At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 30

Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall, *ipso jure*, involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 28 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force, this Convention shall cease to be open to ratification by the Members.

This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 31

The French and English texts of this Convention shall both be authentic.

### DRAFT CONVENTION CONCERNING COMPULSORY INVALIDITY INSURANCE FOR PERSONS EMPLOYED IN AGRICULTURAL UNDERTAKINGS

The General Conference of the International Labour Organization of the League of Nations, Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Seventeenth Session on 8 June, and

Having decided upon the adoption of certain proposals with regard to compulsory invalidity insurance which is included in the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 30th day of June of the year one thousand nine hundred and thirty-three, the following Draft Convention for ratification by the Members of the International Labour Organization, in accordance with the provisions of Part XIII of the Treaty of Versailles and of the corresponding Parts of the other Treaties of Peace:

*Article 1*

Each Member of the International Labour Organization which ratifies this Convention undertakes to set up or maintain a scheme of compulsory invalidity insurance which shall be based on provisions at least equivalent to those contained in this Convention.

*Article 2*

1. The compulsory invalidity insurance scheme shall apply to manual and non-manual workers, including apprentices, employed in agricultural undertakings and to domestic servants employed in the households of agricultural employers.

2. Provided that any Member may in its national laws or regulations make such exceptions as it deems necessary in respect of

- (a) workers whose remuneration exceeds a prescribed amount and, where national laws or regulations do not make this exception general in its application, any non-manual workers engaged in occupations which are ordinarily considered as liberal professions.
- (b) workers who are not paid a money wage;
- (c) young workers under a prescribed age and workers too old to become insured when they first enter employment;
- (d) outworkers whose conditions of work are not of a like nature to those of ordinary wage earners;
- (e) members of the employer's family;
- (f) workers whose employment is of such a nature that, its total duration being necessarily short, they cannot qualify for benefit, and persons engaged solely in occasional or subsidiary employment;
- (g) invalid workers and workers in receipt of an invalidity or old-age pension;
- (h) retired public officials employed for remuneration and persons possessing a private income, where the retirement pension or private income is at least equal to the invalidity pension provided by national laws or regulations;
- (i) workers who, during their studies, give lessons, or work for remuneration in preparation for an occupation corresponding to such studies.

3. Provided also that there may be exempted from liability to insurance persons who, by virtue of any law, regulations or special scheme, are or will become entitled to invalidity benefits at least equivalent on the whole to those provided for in this Convention.

*Article 3*

National laws or regulations shall, under conditions to be determined by them, either entitle persons formerly compulsorily insured who are not in receipt of a pension to continue their insurance voluntarily or entitle such persons to maintain their rights by the periodical payment of a fee for the purpose, unless the said rights are automatically maintained, or in the case of married women, the husband, if not liable to compulsory insurance, is permitted to insure voluntarily and thereby to qualify his wife for an old-age or widow's pension.

*Article 4*

1. An insured person who becomes generally incapacitated for work and thereby unable to

earn an appreciable remuneration shall be entitled to an invalidity pension:

2. Provided that national laws or regulations which secure to insured persons medical treatment and attendance throughout invalidity, and, if invalidity terminates in death, secure pensions at the full rate to widows, without any condition as to age or invalidity, and to orphans, may make the award of an invalidity pension conditional upon the insured person's being unable to perform remunerative work.

3. In the case of special schemes for non-manual workers, an insured person who suffers from incapacity which renders him unable to earn an appreciable remuneration in the occupation in which he was ordinarily engaged or in a similar occupation shall be entitled to an invalidity pension.

*Article 5*

1. Notwithstanding the provisions of Article 6, the right to a pension may be made conditional upon the completion of a qualifying period, which may involve the payment of a minimum number of contributions since entry into insurance and during a prescribed period immediately preceding the happening of the event insured against.

2. The duration of the qualifying period shall not exceed 60 contribution months, 250 contribution weeks, or 1,500 contribution days.

3. Where the completion of the qualifying period involves the payment of a prescribed number of contributions during a prescribed period immediately preceding the happening of the event insured against, periods for which benefit has been paid in respect of temporary incapacity for work or of unemployment shall be reckoned as contribution periods to such extent and under such conditions as may be determined by national laws or regulations.

*Article 6*

1. An insured person who ceases to be liable to insurance without being entitled to a benefit representing a return for the contributions credited to his account shall retain his rights in respect of these contributions:

2. Provided that national laws or regulations may terminate rights in respect of contributions on the expiry of a term which shall be reckoned from the date when the insured person so ceased to be liable to insurance and which shall be either variable or fixed:

- (a) where the term is variable, it shall not be less than one-third (less the periods for which contributions have not been credited) of the total of the periods for which contributions have been credited since entry into insurance;
- (b) where the term is fixed, it shall in no case be less than eighteen months, and rights in respect of contributions may be terminated on the expiry of the term, unless, in the course thereof, a minimum number of contributions prescribed by national laws or regulations has been credited to the account of the insured person in virtue of either compulsory or voluntarily continued insurance.

*Article 7*

1. The pension shall, whether or not dependent on the time spent in insurance, be a fixed

sum or a percentage of the remuneration taken into account for insurance purposes, or vary with the amount of the contributions paid.

2. Where the pension varies with the time spent in insurance, and its award is made conditional upon the completion by the insured person of a qualifying period, the pension shall, unless a minimum rate is guaranteed, include a fixed sum or fixed portion not dependent on the time spent in insurance.

3. Where contributions are graduated according to remuneration, the remuneration taken into account for this purpose shall also be taken into account for the purpose of computing the pension, whether or not the pension varies with the time spent in insurance.

#### Article 8

Insurance institutions shall be authorized, under conditions which shall be determined by national laws or regulations, to grant benefits in kind for the purpose of preventing, postponing, alleviating or curing invalidity to persons who are in receipt of or may be entitled to claim a pension on the ground of invalidity.

#### Article 9

1. The right to benefits may be forfeited or suspended in whole or in part if the person concerned

(a) has brought about his invalidity by a criminal offence or wilful misconduct;

or

(b) has acted fraudulently towards the insurance institution.

2. The pension may be suspended in whole or in part while the person concerned:

(a) is entirely maintained at the public expense or by a social insurance institution;

(b) refuses without valid reason to comply with the doctor's orders or the instructions relating to the conduct of invalids, or voluntarily and without authorization removes himself from the supervision of the insurance institution;

(c) is in receipt of another periodical cash benefit payable by virtue of any law or regulations concerning compulsory social insurance, pensions, or workmen's compensation for accidents or occupational diseases; or

(d) is in employment involving compulsory insurance, or, in the case of special schemes for non-manual workers, is in receipt of remuneration exceeding a prescribed rate.

#### Article 10

1. The insured persons and their employers shall contribute to the financial resources of the insurance scheme.

2. National laws or regulations may exempt from liability to pay contributions

(a) apprentices and young workers under a prescribed age;

(b) workers who are not paid a money wage or whose wages are very low.

(c) workers in the service of an employer who pays the contributions assessed on a basis which is not dependent on the number of workers employed.

3. Contributions from employers may be dispensed with under laws or regulations concerning schemes of national insurance not restricted in scope to employed persons.

4. The public authorities shall contribute to the financial resources or to the benefits of insurance schemes covering employed persons in general or of manual workers.

5. National laws or regulations which, at the time of the adoption of this Convention, do not require contributions from insured persons, may continue not to require such contributions.

#### Article 11

1. The insurance scheme shall be administered by institutions founded by the public authorities and not conducted with a view to profit, or by State insurance funds:

2. Provided that national laws or regulations may also entrust its administration to institutions founded on the initiative of the parties concerned or of their organizations and duly approved by the public authorities.

3. The Funds of insurance institutions and State insurance funds shall be administered separately from the public funds.

4. Representatives of the insured persons shall participate in the management of insurance institutions under conditions to be determined by national laws or regulations, which may likewise decide as to the participation of representatives of employers and of the public authorities.

5. Self-governing insurance institutions shall be under the administrative and financial supervision of the public authorities.

#### Article 12

1. The insured person or his legal representatives shall have a right of appeal in any dispute concerning benefits.

2. Such disputes shall be referred to special tribunals which shall include judges, whether professional or not, who are specially cognisant of the purposes of insurance and the needs of insured persons or are assisted by assessors chosen as representative of insured persons and employers respectively.

3. In any dispute concerning liability to insurance or the rate of contribution, the employed person and, in the case of schemes providing for an employers' contribution, his employer shall have a right of appeal.

#### Article 13

1. Foreign employed persons shall be liable to insurance and to the payment of contributions under the same conditions as nationals.

2. Foreign insured persons and their dependants shall be entitled under the same conditions as nationals to the benefits derived from the contributions credited to their account.

3. Foreign insured persons and their dependants shall, if nationals of a Member which is bound by this Convention and the laws or regulations of which therefore provide for a State subsidy towards the financial resources or benefits of the insurance scheme in conformity with Article 10, also be entitled to any subsidy or supplement to or fraction of a pension which is payable out of public funds:

4. Provided that national laws or regulations may restrict to nationals the right to any subsidy or supplement to or fraction of a pension which is payable out of public funds and granted solely to insured persons who have exceeded a prescribed age at the date when the laws or regulations providing for compulsory insurance come into force.

5. Any restrictions which may apply in the event of residence abroad shall only apply to pensioners and their dependants who are na-

nationals of any Member bound by this Convention and reside in the territory of any Member bound thereby to the extent to which they apply to nationals of the country in which the pension has been acquired: Provided that any subsidy or supplement to or fraction of a pension which is payable out of public funds may be withheld.

#### Article 14

1. The insurance of employed persons shall be governed by the law applicable at their place of employment.

2. In the interest of continuity of insurance, exceptions may be made to this rule by agreement between the Members concerned.

#### Article 15

Any Member may prescribe special provisions for frontier workers whose place of employment is in its territory and whose place of residence is abroad.

#### Article 16

In countries which, at the time when this Convention first comes into force, have no laws or regulations providing for compulsory invalidity insurance, an existing non-contributory pension scheme which guarantees an individual right to a pension under the conditions defined in Articles 17 to 23 hereinafter shall be deemed to satisfy the requirements of this Convention.

#### Article 17

A person who becomes generally incapacitated for work and thereby unable to earn an appreciable remuneration shall be entitled to a pension.

#### Article 18

The right to a pension may be made conditional upon the claimant's having been resident in the territory of the Member for a period immediately preceding the making of the claim. This period shall be determined by national laws or regulations but shall not exceed five years.

#### Article 19

1. A claimant shall be entitled to a pension if the annual value of his means does not exceed a limit which shall be fixed by national laws or regulations with due regard to the minimum cost of living.

2. Means up to a level which shall be determined by national laws or regulations shall be exempted for the purpose of the assessment of means.

#### Article 20

The rate of pension shall be an amount which, together with any means of the claimant in excess of the means exempted, is at least sufficient to cover the essential needs of the pensioner.

#### Article 21

1. A claimant shall have a right of appeal in any dispute concerning the award of a pension or the rate thereof.

2. The appeal shall lie to an authority other than the authority which gave the decision in the first instance.

#### Article 22

1. Foreigners who are nationals of a Member bound by this Convention shall be entitled to

pensions under the same conditions as nationals:

2. Provided that national laws or regulations may make the award of a pension to foreigners conditional upon their having been resident in the territory of the Member for a period which shall not exceed by more than five years the period of residence prescribed for nationals.

#### Article 23

1. The right to a pension may be forfeited or suspended in whole or in part if the person concerned

- (a) has brought about his invalidity by a criminal offence or wilful misconduct;
- (b) has obtained or attempted to obtain a pension by fraud;
- (c) has been sentenced to imprisonment for a criminal offence;
- (d) has persistently refused to earn his living by work compatible with his strength and capacity.

2. The pension may be suspended in whole or in part while the person concerned is entirely maintained at the public expense.

#### Article 24

Subject to the provisions of paragraph 5 of Article 13, this Convention does not refer to the maintenance of pension rights in the event of residence abroad.

#### Article 25

The formal ratifications of this Convention under the conditions set forth in Part XIII of the Treaty of Versailles and in the corresponding Parts of the other Treaties of Peace shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 26

This Convention shall be binding only upon those Members whose ratifications have been registered with the Secretariat.

It shall come into force twelve months after the date on which the ratifications of two Members of the International Labour Organization have been registered with the Secretary-General.

Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 27

As soon as the ratifications of two Members of the International Labour Organization have been registered with the Secretariat, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

#### Article 28

A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph,

exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

#### Article 29

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 30

Should the Conference adopt a new Convention revising this Convention in whole or in part,

then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall, *ipso jure*, involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 28 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force, this Convention shall cease to be open to ratification by the Members.

This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 31

The French and English texts of this Convention shall both be authentic.

### DRAFT CONVENTION CONCERNING COMPULSORY WIDOWS' AND ORPHANS' INSURANCE FOR PERSONS EMPLOYED IN INDUSTRIAL OR COMMERCIAL UNDERTAKINGS, IN THE LIBERAL PROFESSIONS, AND FOR OUTWORKERS AND DOMESTIC SERVANTS

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Seventeenth Session on June 8, 1933, and

Having decided upon the adoption of certain proposals with regard to compulsory widows' and orphans' insurance, which is included in the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts this 30th day of June of the year one thousand nine hundred and thirty-three, the following Draft Convention for ratification by the Members of the International Labour Organization, in accordance with the provisions of Part XIII of the Treaty of Versailles and of the corresponding Parts of the other Treaties of Peace:

#### Article 1

Each member of the International Labour Organization which ratifies this Convention undertakes to set up or maintain a scheme of compulsory widows' and orphans' insurance which shall be based on provisions at least equivalent to those contained in this Convention.

#### Article 2

1. The compulsory widows' and orphans' insurance scheme shall apply to manual and non-manual workers, including apprentices, employed in industrial or commercial undertakings or in the liberal professions, and to outworkers and domestic servants:

2. Provided that any Member may in its national laws or regulations make such exceptions as it deems necessary in respect of:

- (a) workers whose remuneration exceeds a prescribed amount, and, where national laws or regulations do not make this exception general in its application, any non-manual workers engaged in occupations which are ordinarily considered as liberal professions;
- (b) workers who are not paid a money wage;

(c) young workers under a prescribed age and workers too old to become insured when they first enter employment;

(d) outworkers whose conditions of work are not a like nature to those of ordinary wage earners;

(e) members of the employer's family;

(f) workers whose employment is of such a nature that, its total duration being necessarily short, they cannot qualify for benefit, and persons engaged solely in occasional or subsidiary employment;

(g) invalid workers and workers in receipt of an invalidity or old-age pension;

(h) retired public officials employed for remuneration and persons possessing a private income, where the retirement pension or private income is at least equal to the invalidity pension provided by national laws or regulations;

(i) workers who, during their studies, give lessons, or work for remuneration in preparation for an occupation corresponding to such studies;

(j) domestic servants employed in the households of agricultural employers.

3. Provided also that there may be exempted from liability to insurance persons whose survivors will, by virtue of any law, regulations or special scheme, become entitled to benefits at least equivalent on the whole to those provided for in this Convention.

4. This Convention does not apply to seamen and sea fishermen.

#### Article 3

National laws or regulations shall, under conditions to be determined by them, either entitle persons formerly compulsorily insured who are not in receipt of a pension to continue their insurance voluntarily or entitle such persons to maintain their rights by the periodical payment of a fee for the purpose, unless the said rights are automatically maintained, or, in the case of married women, the husband, if not liable to compulsory insurance, is permitted to insure voluntarily and thereby to qualify his wife for an old-age or widow's pension.

#### Article 4

1. Notwithstanding the provisions of Article 5, the right to a pension may be made condi-

tional upon the completion of a qualifying period, which may involve the payment of a minimum number of contributions since entry into insurance and during a prescribed period immediately preceding the happening of the event insured against.

2. The duration of the qualifying period shall not exceed 60 contribution months, 250 contribution weeks, or 1,500 contribution days.

3. Where the completion of the qualifying period involves the payment of a prescribed number of contributions during a prescribed period immediately preceding the happening of the event insured against, periods for which benefit has been paid in respect of temporary incapacity for work or of unemployment shall be reckoned as contribution periods to such extent and under such conditions as may be determined by national laws or regulations.

#### Article 5

1. An insured person who ceases to be liable to insurance without being entitled to a benefit representing a return for the contributions credited to his account shall retain his rights in respect of these contributions:

2. Provided that national laws or regulations may terminate rights in respect of contributions on the expiry of a term which shall be reckoned from the date when the insured person so ceased to be liable to insurance and which shall be either variable or fixed:

(a) where the term is variable, it shall not be less than one-third (less the periods for which contributions have not been credited) of the total of the period for which contributions have been credited since entry into insurance;

(b) where the term is fixed, it shall in no case be less than eighteen months, and rights in respect of contributions may be terminated on the expiry of the term, unless, in the course thereof, a minimum number of contributions prescribed by national laws or regulations has been credited to the account of the insured person in virtue of either compulsory or voluntarily continued insurance.

#### Article 6

The widows and orphans' insurance scheme shall as a minimum confer pension rights on widows who have not remarried and the children of a deceased insured or pensioned person.

#### Article 7

1. The right to a widow's pension may be reserved to widows who are above a prescribed age or are invalid.

2. The provisions of paragraph 1 shall not apply in the case of special schemes for non-manual workers.

3. The right to a widow's pension may be restricted to cases where the marriage has lasted for a prescribed period and was contracted before the insured or pensioned person had reached a prescribed age or become invalid.

4. The right to a widow's pension may be withheld if, at the time of the death of the insured or pensioned person, the marriage had been dissolved or if a separation had been pronounced in proceedings in which the wife was found solely at fault.

5. Where there are several claimants to a widow's pension, the amount payable may be limited to that of one pension.

#### Article 8

1. Any child who has not reached a prescribed age which shall not be less than fourteen shall be entitled to a pension in respect of the death of either parent:

2. Provided that the right to a pension in respect of the death of an insured or pensioned mother may either be made conditional upon the mother's having contributed to the support of the child or be made conditional upon her having been a widow at the time of her death.

3. National laws or regulations shall determine the cases in which a child, other than a legitimate child, shall be entitled to a pension.

#### Article 9

1. The pension shall, whether or not dependent on the time spent in insurance, be a fixed sum or a percentage of the remuneration taken into account for insurance purposes, or vary with the amount of the contributions paid.

2. Where the pension varies with the time spent in insurance, and its award is made conditional upon the completion by the insured person of a qualifying period, the pension shall, unless a minimum rate is guaranteed, include a fixed sum or fixed portion not dependent on the time spent in insurance; where the pension is awarded without any condition as to the completion of a qualifying period, provision may be made for a guaranteed minimum rate of pension.

3. Where contributions are graduated according to remuneration, the remuneration taken into account for this purpose shall also be taken into account for the purpose of computing the pension, whether or not the pension varies with the time spent in insurance.

#### Article 10

Insurance institutions shall be authorised under conditions which shall be determined by national laws or regulations, to grant benefits in kind for the purpose of preventing, postponing, alleviating or curing invalidity to persons who are in receipt of or may be entitled to claim a pension on the ground of invalidity.

#### Article 11

1. The right to benefits may be forfeited or suspended in whole or in part:

(a) if death has been caused by a criminal offence committed by or the wilful misconduct of the insured person or any person who may become entitled to a survivor's pension; or

(b) if the insured person or any person who may become entitled to a survivor's pension has acted fraudulently towards the insurance institution.

2. The pension may be suspended in whole or in part while the person concerned

(a) is entirely maintained at the public expense or by a social insurance institution;

(b) refuses without valid reason to comply with the doctor's orders or the instructions relating to the conduct of invalids, or voluntarily and without authorisation removes herself from the supervision of the insurance institutions;

- (c) is in receipt of another periodical cash benefit payable by virtue of any law or regulations concerning compulsory social insurance pensions, or workmen's compensation for accidents or occupational diseases;
- (d) having been awarded a widow's pension without any condition as to age or invalidity, is living with a man as his wife; or
- (e) in the case of special schemes for non-manual workers, is in receipt of remuneration exceeding a prescribed rate.

*Article 12*

1. The insured persons and their employers shall contribute to the financial resources of the insurance scheme.
2. National laws or regulations may exempt from liability to pay contributions.
  - (a) apprentices and young workers under a prescribed age; or
  - (b) workers who are not paid a money wage or whose wages are very low.
3. Contributions from employers may be dispensed with under laws or regulations concerning schemes of national insurance not restricted in scope to employed persons.
4. The public authorities shall contribute to the financial resources or to the benefits of insurance schemes covering employed persons in general or of manual workers.
5. National laws or regulations which, at the time of the adoption of this Convention, do not require contributions from insured persons, may continue not to require such contributions.

*Article 13*

1. The insurance scheme shall be administered by institutions founded by the public authorities and not conducted with a view to profit, or by State insurance funds:
2. Provided that national laws or regulations may also entrust its administration to institutions founded on the initiative of the parties concerned or of their organisations and duly approved by the public authorities.
3. The funds of insurance institutions and State insurance funds shall be administered separately from the public funds.
4. Representatives of the insured persons shall participate in the management of insurance institutions under conditions to be determined by national laws or regulations, which may likewise decide as to the participation of representatives of employers and of the public authorities.
5. Self-governing insurance institutions shall be under the administrative and financial supervision of the public authorities.

*Article 14*

1. The survivors of a deceased insured or pensioned person shall have a right of appeal in any dispute concerning benefits.
2. Such disputes shall be referred to special tribunals which shall include judges, whether professional or not, who are specially cognisant of the purposes of insurance or are assisted by assessors chosen as representative of insured persons and employers respectively.
3. In any dispute concerning liability to insurance or the rate of contribution, the employed person and, in the case of schemes providing for an employer's contribution, his employer shall have a right of appeal.

*Article 15*

1. Foreign employed persons shall be liable to insurance and to the payment of contributions under the same conditions as nationals.
2. The survivors of foreign insured or pensioned persons shall be entitled under the same conditions as nationals to the benefits derived from the contributions credited to their account.
3. The survivors of foreign insured or pensioned persons shall, if nationals of a Member which is bound by this Convention and the laws or regulations of which therefore provide for a State subsidy towards the financial resources or benefits of the insurance scheme in conformity with Article 12, also be entitled to any subsidy or supplement to or fraction of a pension which is payable out of public funds.
4. Provided that national laws or regulations may restrict to nationals the right to any subsidy or supplement to or fraction of a pension which is payable out of public funds and granted solely to the survivors of insured persons who have exceeded a prescribed age at the date when the laws or regulations providing for compulsory insurance come into force.
5. Any restrictions which may apply in the event of residence abroad shall only apply to pensioners who are nationals of any Member bound by this Convention and reside in the territory of any Member bound thereby to the extent to which they apply to nationals of the country in which the pension has been acquired: Provided that any subsidy or supplement to or fraction of a pension which is payable out of public funds may be withheld.

*Article 16*

1. The insurance of employed persons shall be governed by the law applicable at their place of employment.
2. In the interest of continuity of insurance exceptions may be made to this rule by agreement between the Members concerned.

*Article 17*

Any Member may prescribe special provisions for frontier workers whose place of employment is in its territory and whose place of residence is abroad.

*Article 18*

In countries which, at the time when this Convention first comes into force, have no laws or regulations providing for compulsory widows' and orphans' insurance, an existing non-contributory pension scheme which guarantees an individual right to a pension under the conditions defined in Articles 19 to 25 hereinafter shall be deemed to satisfy the requirements of this Convention.

*Article 19*

1. The following shall be entitled to a pension:
  - (a) every widow who has not remarried and who has at least two dependent children;
  - (b) every orphan, that is to say, every child who has lost both parents.
2. National laws or regulations shall define
  - (a) the cases in which a child other than a legitimate child shall be deemed to be the child of a widow for the purpose of entitling her to a pension;
  - (b) the age until which a child shall be considered dependent upon a widow or shall

be entitled to an orphan's pension: Provided that this age shall in no case be less than fourteen.

#### Article 20

1. The right to a widow's pension may be made conditional upon the residence in the territory of the Member

(a) of the deceased husband during a period immediately preceding his death; and

(b) of the widow during a period immediately preceding the making of her claim for a pension.

2. The right to an orphan's pension may be made conditional upon the residence, in the territory of the Member during a period immediately preceding death, of whichever of the parents died the more recently.

3. The period of residence in the territory of the Member to have been completed by a widow or a deceased parent shall be prescribed by national laws or regulations, but shall not exceed five years.

#### Article 21

1. A claimant shall be entitled to a widow's or orphan's pension if the annual value of the claimant's means, including any means of dependent children or orphans, does not exceed a limit which shall be fixed by national laws or regulations with due regard to the minimum cost of living.

2. Means up to a level which shall be determined by national laws or regulations shall be exempted for the purpose of the assessment of means.

#### Article 22

The rate of pension shall be an amount which, together with any means of the claimant in excess of the means exempted, is at least sufficient to cover the essential needs of the pensioner.

#### Article 23

1. A claimant shall have a right of appeal in any dispute concerning the award of pension or the rate thereof.

2. The appeal shall lie to an authority other than the authority which gave the decision in the first instance.

#### Article 24

1. Foreign widows and orphans shall, if nationals of a Member bound by this Convention, be entitled to pensions under the same conditions as nationals.

2. Provided that national laws or regulations may make the award of a pension to foreigners conditional upon the completion of a period of residence in the territory of the Member for a period which shall not exceed by more than five years the period of residence provided for in Article 20.

#### Article 25

1. The right to a pension may be forfeited or suspended in whole or in part if the widow or the person who has undertaken responsibility for the care of the orphan has obtained or attempted to obtain a pension by fraud.

2. The pension may be suspended in whole or in part while the person concerned is entirely maintained at the public expense.

#### Article 26

Subject to the provisions of paragraph 5 of Article 15, this Convention does not refer to the maintenance of pension rights in the event of residence abroad.

#### Article 27

The formal ratifications of this Convention under the conditions set forth in Part XIII of the Treaty of Versailles and in the corresponding Parts of the other Treaties of Peace shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 28

This Convention shall be binding only upon those Members whose ratifications have been registered with the Secretariat.

It shall come into force twelve months after the date on which the ratifications of two Members of the International Labour Organisation have been registered with the Secretary-General.

Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 29

As soon as the ratifications of two Members of the International Labour Organisation have been registered with the Secretariat, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organisation. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organisation.

#### Article 30

A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

#### Article 31

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 32

Should the Conference adopt a new Convention revising this Convention in whole or in

part, then, unless the new Convention otherwise provides.

- (a) the ratification by a Member of the new revising Convention shall, *ipso jure*, involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 30 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force, this Con-

vention shall cease to be open to ratification by the Members.

This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 33

The French and English texts of this Convention shall both be authentic.

### DRAFT CONVENTION CONCERNING COMPULSORY WIDOWS' AND ORPHANS' INSURANCE FOR PERSONS EMPLOYED IN AGRICULTURAL UNDERTAKINGS

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Seventeenth Session on 8 June 1933, and Having decided upon the adoption of certain proposals with regard to compulsory widows' and orphans' insurance which is included in the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts, this 30th day of June of the year one thousand nine hundred and thirty-three, the following Draft Convention for ratification by the Members of the International Labour Organization, in accordance with the provisions of Part XIII of the Treaty of Versailles and of the corresponding Parts of the other Treaties of Peace

#### Article 1

Each Member of the International Labour Organization which ratifies this Convention undertakes to set up or maintain a scheme of compulsory widows' and orphans' insurance which shall be based on provisions at least equivalent to those contained in this Convention.

#### Article 2

1. The compulsory widows' and orphans' insurance scheme shall apply to manual and non-manual workers, including apprentices, employed in agricultural undertakings and to domestic servants employed in the households of agricultural employers:

2. Provided that any Member may in its national laws or regulations make such exceptions as it deems necessary in respect of

- (a) workers whose remuneration exceeds a prescribed amount and, where national laws or regulations do not make this exception general in its application, any non-manual workers engaged in occupations which are ordinarily considered as liberal professions;
- (b) workers who are not paid a money wage;
- (c) young workers under a prescribed age and workers too old to become insured when they first enter employment;
- (d) outworkers whose conditions of work are not of a like nature to those of ordinary wage earners;
- (e) members of the employers' family;
- (f) workers whose employment is of such a nature that, its total duration being necessarily short, they cannot qualify for

benefit, and persons engaged solely in occasional or subsidiary employment;

(g) invalid workers and workers in receipt of an invalidity or old-age pension;

(h) retired public officials employed for remuneration and persons possessing a private income, where the retirement pension or private income is at least equal to the invalidity pension provided by national laws or regulations;

(i) workers who, during their studies, give lessons, or work for remuneration in preparation for an occupation corresponding to such studies.

3. Provided also that there may be exempted from liability to insurance persons whose survivors will, by virtue of any law, regulations or special scheme, become entitled to benefits at least equivalent on the whole to those provided for in this Convention.

#### Article 3

National laws or regulations shall, under conditions to be determined by them, either entitle persons formerly compulsorily insured who are not in receipt of a pension to continue their insurance voluntarily or entitle such persons to maintain their rights by the periodical payment of a fee for the purpose, unless the said rights are automatically maintained, or, in the case of married women, the husband, if not liable to compulsory insurance, is permitted to insure voluntarily and thereby to qualify his wife for an old-age or widow's pension.

#### Article 4

1. Notwithstanding the provisions of Article 5, the right to a pension may be made conditional upon the completion of a qualifying period which may involve the payment of a minimum number of contributions since entry into insurance and during a prescribed period immediately preceding the happening of the event insured against.

2. The duration of the qualifying period shall not exceed 60 contribution months, 250 contribution weeks, or 1,500 contribution days.

3. Where the completion of the qualifying period involves the payment of a prescribed number of contributions during a prescribed period immediately preceding the happening of the event insured against, periods for which benefit has been paid in respect of temporary incapacity for work or of unemployment shall be reckoned as contribution periods to such extent and under such conditions as may be determined by national laws or regulations.

*Article 5*

1. An insured person who ceases to be liable to insurance without being entitled to a benefit representing a return for the contributions credited to his account shall retain his rights in respect of these contributions:

2. Provided that national laws or regulations may terminate rights in respect of contributions on the expiry of a term which shall be reckoned from the date when the insured person so ceased to be liable to insurance and which shall be either variable or fixed:

- (a) where the term is variable, it shall not be less than one-third (less the periods for which contributions have not been credited) of the total of the period for which contributions have been credited since entry into insurance;
- (b) where the term is fixed, it shall in no case be less than eighteen months and rights in respect of contributions may be terminated on the expiry of the term, unless, in the course thereof, a minimum number of contributions prescribed by national laws or regulations has been credited to the account of the insured person in virtue of either compulsory or voluntarily continued insurance.

*Article 6*

The widows' and orphans' insurance scheme, shall as a minimum confer pension rights on widows who have not remarried and the children of a deceased insured or pensioned person.

*Article 7*

1. The right to a widow's pension may be reserved to widows who are above a prescribed age or are invalid.

2. The provisions of paragraph 1 shall not apply in the case of special schemes for non-manual workers.

3. The right to a widow's pension may be restricted to cases where the marriage has lasted for a prescribed period and was contracted before the insured or pensioned person has reached a prescribed age or become invalid.

4. The right to a widow's pension may be withheld if, at the time of the death of the insured or pensioned person, the marriage had been dissolved or if a separation had been pronounced in proceedings in which the wife was found solely at fault.

5. Where there are several claimants to a widow's pension, the amount payable may be limited to that of one pension.

*Article 8*

1. Any child who has not reached a prescribed age, which shall not be less than fourteen, shall be entitled to a pension in respect of the death of either parent:

2. Provided that the right to a pension in respect of the death of an insured or pensioned mother may either be made conditional upon the mother's having contributed to the support of the child or be made conditional upon her having been a widow at the time of her death.

3. National laws or regulations shall determine the cases in which a child, other than a legitimate child, shall be entitled to a pension.

*Article 9*

1. The pension shall, whether or not dependent on the time spent in insurance, be a fixed sum

or a percentage of the remuneration taken into account for insurance purposes, or vary with the amount of the contributions paid.

2. Where the pension varies with the time spent in insurance, and its award is made conditional upon the completion by the insured person of a qualifying period, the pension shall unless a minimum rate is guaranteed, include a fixed sum or fixed portion not dependent on the time spent in insurance; where the pension is awarded without any condition as to the completion of a qualifying period, provision may be made for a guaranteed minimum rate of pension.

3. Where contributions are guaranteed according to remuneration, the remuneration taken into account for this purpose shall also be taken into account the purpose of computing the pension, whether or not the pension varies with the time spent in insurance.

*Article 10*

Insurance institutions shall be authorized, under conditions which shall be determined by national laws or regulations, to grant benefits in kind for the purpose of preventing, postponing, alleviating or curing invalidity to persons who are in receipt of or may be entitled to claim a pension on the ground of invalidity.

*Article 11*

1. The right to benefits may be forfeited or suspended in whole or in part:

- (a) if death has been caused by a criminal offence committed by or the wilful misconduct of the insured person or any person who may become entitled to a survivor's pension; or
- (b) if the insured person or any person who may become entitled to a survivor's pension has acted fraudulently towards the insurance institution.

2. The pension may be suspended in whole or in part whole the person concerned

- (a) is entirely maintained at the public expense or by a social insurance institution;
- (b) refuses without valid reason to comply with the doctor's orders or the instructions relating to the conduct of invalids, or voluntarily and without authorisation removes herself from the supervision of the insurance institutions; or
- (c) is in receipt of another periodical cash benefit payable by virtue of any law or regulations concerning compulsory social insurance pensions, or workmen's compensation for accidents or occupational diseases;
- (d) having been awarded a widow's pension without any condition as to age or invalidity, is living with a man as his wife; or
- (e) in the case of special schemes for non-manual workers, is in receipt of remuneration exceeding a prescribed rate.

*Article 12*

1. The insured persons and their employers shall contributed to the financial resources of the insurance scheme.

2. National laws or regulations may exempt from liability to pay contributions

- (a) apprentices and young workers under a prescribed age;

- (b) workers who are not paid a money wage or whose wages are very low; or
  - (c) workers in the service of an employer who pays the contributions assessed on a basis which is not dependent on the number of workers employed.
3. Contributions from employers may be dispensed with under laws or regulations concerning schemes of national insurance not restricted in scope to employed persons.
4. The public authorities shall contribute to the financial resources or to the benefits of insurance schemes covering employed persons in general or of manual workers.
5. National laws or regulations which, at the time of the adoption of this Convention, do not require contributions from insured persons may continue not to require such contributions.

#### Article 13

1. The insurance scheme shall be administered by institutions founded by the public authorities and not conducted with a view to profit, or by State insurance funds:
2. Provided that national laws or regulations may also entrust its administration to institutions founded on the initiative of the parties concerned or of their organisations and only duly approved by the public authorities.
3. The funds of insurance institutions and State insurance funds shall be administered separately from the public funds.
4. Representatives of the insured persons shall participate in the management of insurance institutions under conditions to be determined by national laws or regulations, which may likewise decide as to the participation of representatives of employers and of the public authorities.
5. Self-governing insurance institutions shall be under the administrative and financial supervision of the public authorities.

#### Article 14

1. The survivors of a deceased insured or pensioned person shall have a right of appeal in any dispute concerning benefits.
2. Such disputes shall be referred to special tribunals which shall include judges, whether professional or not, who are specially cognisant of the purposes of insurance or are assisted by assessors chosen as representative of insured persons and employers respectively.
3. In any dispute concerning liability to insurance or the rate of contribution, the employed person and, in the case of schemes providing for an employer's contribution, his employer shall have a right of appeal.

#### Article 15

1. Foreign employed persons shall be liable to insurance and to the payment of contributions under the same conditions as nationals.
2. The survivors of foreign insured or pensioned persons shall be entitled under the same conditions as nationals to the benefits derived from the contributions credited to their account.
3. The survivors of foreign insured or pensioned persons shall, if nationals of a Member which is bound by this Convention and the laws or regulations of which therefore provide for a State subsidy towards the financial resources or benefits of the insurance scheme in conformity with Article 12, also be entitled to any subsidy or supplement to or fraction of a pension which is payable out of public funds.

4. Provided that national laws or regulations may restrict to nationals the right to any subsidy or supplement to or fraction of a pension which is payable out of public funds and granted solely to the survivors of insured persons who have exceeded a prescribed age at the date when the laws or regulations providing for compulsory insurance come into force.

5. Any restrictions which may apply in the event of residence abroad shall only apply to pensioners who are nationals of any Member bound by this Convention and reside in the territory of any Member bound thereby to the extent to which they apply to nationals of the country in which the pension has been acquired: Provided that any subsidy or supplement to or fraction of a pension which is payable out of public funds may be withheld.

#### Article 16

1. The insurance of employed persons shall be governed by the law applicable at their place of employment.
2. In the interest of continuity of insurance, exceptions may be made to this rule by agreement between the Members concerned.

#### Article 17

Any Member may prescribe special provisions for frontier workers whose place of employment is in its territory and whose place of residence is abroad.

#### Article 18

In countries which, at the time when this Convention first comes into force, have no laws or regulations providing for compulsory widows' or orphans' insurance, an existing non-contributory pension scheme which guarantees an individual right to a pension under the conditions defined in Articles 19 to 25 hereinafter shall be deemed to satisfy the requirements of this Convention.

#### Article 19

1. The following shall be entitled to a pension:
- (a) every widow who has not remarried;
  - (b) every orphan, that is to say, every child who has lost both parents.
2. National laws or regulations shall define
- (a) the cases in which a child other than a legitimate child shall be deemed to be the child of a widow for the purpose of entitling her to a pension;
  - (b) the age until which a child shall be considered dependent upon a widow or shall be entitled to an orphans' pension: Provided that this age shall in no case be less than fourteen.

#### Article 20

1. The right to a widow's pension may be made conditional upon the residence in the territory of the Member
- (a) of the deceased husband during a period immediately preceding his death; and
  - (b) of the widow during a period immediately preceding the making of her claim for a pension.
2. The right to an orphan's pension may be made conditional upon the residence, in the territory of the Member during a period immediately preceding death, of whichever of the parents dies the more recently.
3. The period of residence in the territory of the Member to have been completed by a widow

or deceased parent shall be prescribed by national laws or regulations but shall not exceed five years.

#### Article 21

1. A claimant shall be entitled to a widow's or orphan's pension if the annual value of the claimant's means, including any means of dependent children or orphans, does not exceed a limit which shall be fixed by national laws or regulations with due regard to the minimum cost of living.

2. Means up to a level which shall be determined by national laws or regulations shall be exempted for the purpose of the assessment of means.

#### Article 22

The rate of pension shall be an amount which, together with any means of the claimant in excess of the means exempted, is at least sufficient to cover the essential needs of the pensioner.

#### Article 23

1. A claimant shall have a right of appeal in any dispute concerning the award or a pension of the rate thereof.

2. The appeal shall lie to an authority other than the authority which gave the decision in the first instance.

#### Article 24

1. Foreign widows and orphans shall, if nationals of a Member bound by this Convention, be entitled to pensions under the same conditions as nationals:

2. Provided that national laws or regulations may make the award of a pension to foreigners conditional upon the completion of a period of residence in the territory of the Member for a period which shall not exceed by more than five years the period of residence provided for in Article 20.

#### Article 25

1. The right to a pension may be forfeited or suspended in whole or in part if the widow or the person who has undertaken responsibility for the care of the orphan has obtained or attempted to obtain a pension by fraud.

2. The pension may be suspended in whole or in part while the person concerned is entirely maintained at the public expense.

#### Article 26

Subject to the provisions of paragraph 5 of Article 15, this Convention does not refer to the maintenance of pension rights in the event of residence abroad.

#### Article 27

The formal ratifications of this Convention under the conditions set forth in Part XIII of the Treaty of Versailles and in the corresponding Parts of the other Treaties of Peace shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 28

This Convention shall be binding only upon those Members whose ratifications have been registered with the Secretariat.

It shall come into force twelve months after the date on which the ratifications of two

Members of the International Labour Organization have been registered with the Secretary-General.

Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 29

As soon as the ratifications of two Members of the International Labour Organization have been registered with the Secretariat, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

#### Article 30

A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

#### Article 31

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 32

Should the Conference adopt a new Convention revising this Convention in whole or in part then unless the new Convention otherwise provides,

(a) the ratification by a Member of the new revising Convention shall, *ipso jure*, involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 30 above, if and when the new revising Convention shall have come into force;

(b) as from the date when the new revising Convention comes into force, this Convention shall cease to be open to ratification by the Members.

This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 33

The French and English texts of this Convention shall be authentic.

## RECOMMENDATION CONCERNING THE GENERAL PRINCIPLES OF INVALIDITY, OLD-AGE AND WIDOWS' AND ORPHANS' INSURANCE

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Seventeenth Session on 8 June, 1933, and

Having decided upon the adoption of certain proposals with regard to invalidity, old-age and widows' and orphans' insurance which is included in the second item on the Agenda of the Session, and

Having determined that these proposals should take the form of a recommendation

adopts, this 30th day of June of the year one thousand nine hundred and thirty-three, the following Recommendation, to be submitted to the Members of the International Labour Organization for consideration with a view to effect being given to it by national legislation or otherwise, in accordance with the provisions of Part XIII of the Treaty of Versailles and of the corresponding Parts of the other Treaties of Peace:

The Conference,

Having adopted Draft Conventions concerning compulsory invalidity, old-age and widows' and orphans' insurance for persons employed in industrial or commercial undertakings, in the liberal professions, and for outworkers and domestic servants, and concerning compulsory invalidity, old-age and widows' and orphans' insurance for persons employed in agricultural undertakings, and

Considering that these Draft Conventions lay down the minimum conditions to be complied with from the beginning by every scheme of compulsory invalidity, old-age and widows' and orphans' insurance, and

Considering that it is desirable to indicate a number of general principles which practice shows to be best calculated to promote a just, effective and appropriate organization of invalidity, old-age and widows' and orphans' insurance.

Recommends that each Member should take the following principles and rules into consideration:

### 1. SCOPE

1. (a) Compulsory invalidity, old-age and widows' and orphans' insurance for employed persons should include, irrespective of age, sex or nationality, every person who is ordinarily engaged in employment for remuneration.

(b) Where economic, social and administrative conditions permit, national laws or regulations should provide that invalidity, old-age, and widows' and orphans' insurance should also include persons of small means working on their own account in industry, commerce and agriculture.

2. If, however, it is considered advisable to fix a minimum age for entry into insurance, such age should be as close as possible to the age at which compulsory school attendance ceases and at which the choice of an occupation is made.

3. The fixing of a maximum age for entry into insurance is only justified in insurance schemes which make the right to a pension conditional upon the completion of a qualifying

period and then only for workers who, when they take up employment for remuneration as their ordinary occupation, are too old to be able to complete the qualifying period before the normal pensionable age.

4. Where it is considered advisable to fix (apart from the limitation, inherent in social insurance, of the remuneration taken into account for insurance purposes) a maximum remuneration as a criterion of liability to insurance, only such workers should thereby be excluded as, by reason of the fact that their remuneration is considerably in excess of the general level of wages, may be deemed to be capable of making provision by themselves against invalidity, old-age and death.

## II. PENSIONS

### A. Qualifying Period and Insurance Periods

5. The qualifying period prescribed by insurance schemes which provide for awarding all pensioners a pension at a fixed rate or varying with the remuneration taken into account for insurance purposes should be restricted to a contribution period which shall not be longer than is strictly necessary to preclude persons from entering insurance with intent to take undue advantage of it, and to ensure some consideration for the benefits afforded.

6. The qualifying period for the purpose of an invalidity or survivor's pension should in no case exceed 60 contribution months, 250 contribution weeks, or 1,500 contribution days, and the qualifying period for the purpose of an old-age pension should not exceed twice this maximum.

7. Periods during which the insured person is incapable of work by reason of sickness, is not available for work by reason of childbirth, or is involuntarily unemployed should, within limits to be prescribed, count towards the qualifying period, even where no contributions are paid for such periods by sickness or maternity insurance or by an unemployment fund.

8. (a) Insurance schemes which place limitations on the retention of rights in respect of contributions which have been paid should guarantee retention of such rights for a term of at least eighteen months reckoned from the last contribution payment, this term being prolonged, in schemes in which contributions are graduated according to remuneration, up to at least one-third (less the periods for which contributions have not been credited) of the total of the periods for which contributions have been credited since entry into insurance. In reckoning this term, periods during which the insured person was incapable of work by reason of sickness, was not available for work by reason of childbirth, or was involuntarily unemployed or engaged in military service, should not be considered as periods for which contributions have not been credited.

(b) Any further retention of rights in respect of contributions may be made conditional either upon resumption of payment of contribution in virtue of compulsory or voluntarily continued insurance or upon the payment of a moderate fee for this purpose; in insurance schemes in which contributions are graduated according to remuneration and which provide for pensions varying with the time

spent in insurance, resumption of payment of contributions should operate to increase the value of the rights in course of acquisition.

9. A person formerly insured should be able to recover rights already expired, by the payment of a prescribed number of contributions in virtue of compulsory or voluntarily continued insurance; where the pension varies with the number or amount of the contributions credited to the account of the insured person, the number of contributions so prescribed should be less than the number required for the initial qualifying period.

10. Sums required to be paid for maintaining the rights in course of acquisition of insured persons who are unemployed for a long time should—in view of the impossibility of putting the expense of such payments solely on the insured persons in employment—be obtained through the financial assistance of the public authorities; and the same principle should apply to payments for the purpose of consolidating and enhancing the rights of such unemployed persons.

### B. Old-Age Pensions

11. For insurance schemes which fix the pensionable age above sixty it is recommended, as a means of relieving the labour market and of ensuring rest for the aged, that the pensionable age should be reduced to sixty, in so far as the demographic, economic and financial situation of the country permit, and if necessary, by stages.

12. Insured persons who have for many years been engaged in a particularly arduous or unhealthy occupation should be enabled to claim a pension at a less advanced age than workers in other occupations.

13. (a) In order to ensure that workers in their old age shall not suffer privations, the pension should be sufficient to cover essential needs. The pension provided for all pensioners, who have completed a certain qualifying period should accordingly be fixed with due regard to the cost of living.

(b) In insurance schemes in which contributions are graduated according to remuneration, insured persons to the account of whom have been credited contributions corresponding to the normal duration of working life should be awarded a pension commensurate with their economic condition during their working life. To this end the pension provided for insured persons who have completed thirty years of actual contribution should not be less than half the remuneration taken into account for insurance purposes either since entry into insurance or over a prescribed period immediately preceding the award of the pension.

14. A bonus should be paid to a pensioner:

(a) for each dependent child who is of school age, or being under the age of seventeen, is continuing his general or vocational education, or who cannot by reason of infirmity earn his living;

(b) when his wife is aged or infirm and is not herself on this account entitled to a pension.

15. A pensioner who needs the constant attendance of another person should be awarded a special supplement.

### C. Invalidity Pensions

16. (a) A pension should be awarded to an insured person who by reason of sickness or infirmity is unable to earn an appreciable remuneration by work suited to his strength and ability and his training; remuneration which is less than one-third of the ordinary remuneration of a fit worker of similar training and experience should not be deemed to be appreciable.

(b) Nevertheless, in special insurance schemes set up on behalf of manual or non-manual workers in certain occupations, reduction of capacity for work should be assessed solely with reference to the occupation hitherto followed or to a similar occupation.

17. (a) In order to fulfil its purpose, an insurance scheme should provide for every insured person who becomes invalid after having completed the qualifying period a pension sufficient to cover his essential needs. The minimum pension provided for every pensioner should accordingly be fixed with due regard to the cost of living.

(b) In insurance schemes in which the minimum pension is fixed in terms of the remuneration taken into account for insurance purposes, the minimum should not be less than 40 per cent of such remuneration. The same result should be aimed at by schemes in which the pension includes a fixed portion which is the same for every pensioner and a portion varying with the number and amount of the contributions credited to his account.

18. A bonus should be paid to a pensioner for each dependent child who is of school age, or being under the age of seventeen, is continuing his general or vocational education, or who cannot by reason of infirmity earn his living.

19. A pensioner who needs the constant attendance of another person should be awarded a special supplement.

### D. Survivors' Pensions

20. (a) If a pensioner or insured person dies after completing the qualifying period and leaves a widow, the widow should be entitled to a pension as long as she does not remarry.

(b) If, however, the award of the pension is subject to the fulfilment of other conditions, pensions should nevertheless be awarded to widows unable to earn their living by reason of age or invalidity and to widows with a dependent child who is of school age or who, being under the age of seventeen, is continuing his general or vocational education.

21. A pension should also be awarded to an invalid widower who by reason of his invalidity was dependent on an insured woman who dies after completing the qualifying period.

22. (a) The pension awarded to a widow (or invalid widower) should represent a substantial contribution towards covering essential needs. Whatever may be the method of computing it, the minimum pension should be fixed with due regard to the cost of living.

(b) In insurance schemes in which contributions are graduated according to the remuneration of the deceased, the widow's (or invalid widower's) pension should not be less than half the pension to which the deceased was entitled or would have been entitled if at the date of his death he had been awarded an invalidity or old-age pension. Nevertheless,

where such schemes determine the rights of survivors without regard to the rate of the pension to which the deceased was or would have been entitled, a widow's (or invalid widower's) pension should not be less than 20 per cent of the remuneration of the deceased taken into account for the purposes of his insurance either since entry into insurance or over a prescribed period immediately preceding his death.

23. (a) Every child of school age who was dependent on a pensioner or insured person who died after completing the qualifying period should be entitled to a child's pension, and the pension should continue to be paid until the age of seventeen if the child is continuing his general or vocational education, and even beyond this age, if the child cannot by reason of infirmity earn his living.

(b) A child's pension may be paid in the form of a supplement to the pension of his widowed mother.

24. (a) The minimum pension provided for every child should represent a substantial contribution towards the cost of maintaining and educating him; such minimum should be higher in the case of an orphan child.

(b) In insurance schemes in which contributions are graduated according to the remuneration of the deceased, a child's pension should not be less than one-quarter or in the case of orphans one-half of the pension to which the deceased was entitled or would have been entitled if at the date of his death he had been awarded an invalidity or old-age pension. Nevertheless, where such schemes determine the rights of survivors without regard to the rate of the pension to which the deceased was or would have been entitled, a child's pension should not be less than 10 per cent or in the case of orphans 20 per cent of the remuneration of the deceased as taken into account for the purposes of his insurance either since entry into insurance or over a prescribed period immediately preceding his death.

25. If it is considered advisable to fix a maximum for the total of the survivors' pensions which may be awarded in respect of one deceased person, such maximum should not, where survivors' pensions vary with the pension of the deceased, be less than the pension, including bonuses for family responsibilities, to which the deceased was or would have been entitled, or, where survivors' pensions vary with the remuneration of the deceased taken into account for the purposes of his insurance, be less than half such remuneration.

26. Survivors not eligible for a pension because the qualifying conditions have not been fulfilled should (provided that a minimum number of payments has been credited to the account of the deceased) be granted a lump sum which will enable them to adapt themselves to the change in their circumstances caused by the death of the head of the family.

27. In countries where burial expenses are not, by law or custom, covered by some other insurance, and in particular by sickness insurance, a benefit in respect of the cost of decent burial should be paid by widows' and orphans' insurance on the death of an insured person.

### *E. Provisions for the Suspension or Reduction of Pensions*

28. Where provision is made for the suspension or reduction of invalidity, old-age or survivors' pensions in cases where a concurrent title exists to a pension acquired under another scheme of social insurance or a scheme of pensions or workman's compensation for accidents or occupational diseases, the provisions concerning suspension or reduction should be such as to enable the pensioner to receive in its entirety whichever of the pensions is the higher, and in any case he should be paid that part of the invalidity, old-age or survivor's pension which corresponds to the insured person's own contributions.

29. Where an invalidity or old-age pension is suspended for a reason other than the existence of a concurrent title to another pension, the dependent family of the person whose pension is suspended should be awarded a maintenance allowance equal to the whole or to a part of the pension.

### III. FINANCIAL RESOURCES

30. (a) The financial resources of the insurance scheme should be provided by contributions from the insured persons and contributions from their employers.

(b) The public authorities should contribute to the insurance scheme.

31. As a general rule the contribution of the insured person should not be higher than the contribution of his employer.

32. The employer should be responsible for the whole or the greater part of the joint contribution in respect of workers who are remunerated only in kind, out-workers, and apprentices whose remuneration does not exceed a prescribed amount.

33. The State should be responsible for the contributions in respect of periods of compulsory military service performed by persons who were insured before beginning their military service.

### IV. ADMINISTRATION

34. National laws or regulations should provide that insured women are adequately represented on the administrative bodies of invalidity, old-age and widows' and orphans' insurance.

A total of 2,952 accidents was reported to the Ontario Workmen's Compensation Board during July in the industries in Schedule 1 of the Act, 13 of which were fatal cases; in Schedule 2 industries 168 accidents were reported including 7 fatal cases; and 178 accidents were reported to employees of the Crown, 3 of which were fatal during the month, making in all 3,298, of which 23 were fatal.

Under a bylaw recently passed by the York (Ontario) Township Council, exempting from municipal taxes dwellings erected during the next five years, it is provided that 80 per cent of the workmen employed must belong to the township and that they are to be paid the standard rates of wages prevailing in the township and adjoining municipalities.

## NUMBERS GAINFULLY EMPLOYED IN CANADA IN 1931 AS SHOWN IN THE SEVENTH CENSUS

THE Dominion Bureau of Statistics has issued a preliminary report, Bulletin No. XXXI, on the number of persons ten years of age and over gainfully employed in Canada in 1931 as ascertained in the seventh decennial Census. The table showing the numbers of persons, male and female, by industrial groups and by provinces, is given herewith, as well as a table showing the percentage distribution by industrial groups for Canada. The report contains tables showing by provinces the total population, male and female, ten years of age and over, and the numbers gainfully employed, in 1931 and also in 1921, 1911 and 1901 by provinces; it shows the numbers also, for 1931, by provinces and by occupational groups, and in each of the various occupations.

An earlier preliminary report, Bulletin No. XXVIII, gave similar information for cities of 30,000 and over in population, namely Brantford, Calgary, Edmonton, Halifax, Hamilton, Kitchener, London, Montreal, Ottawa, Quebec, Regina, Saint John, Saskatoon, Three Rivers, Toronto, Vancouver, Verdun, Victoria, Windsor and Winnipeg.

The term "gainfully employed" is applied to persons pursuing an occupation by which money or its equivalent is earned or in which assistance is given in the production of marketable goods. Women and children working at home on general household work without wages and having no other employment are not included among the "gainfully employed." A person who happened to be idle or unemployed at the date of the census was enumerated as of the occupation usually followed when employed, or of the occupation in which last regularly employed.

Out of the total population of Canada in 1931, 10,374,196, there were 8,159,059, ten years of age and over. Of these 3,924,533, 48.10 per cent, were gainfully employed. Of this number, 2,564,879 were classed as "wage-earners" (LABOUR GAZETTE, November 1932, page 1188). By sex there were, ten years of age and over 4,252,537 males of whom 3,258,614, or 76.63 per cent, were gainfully employed, and 3,906,522 females of whom 665,919, or 17.05 per cent, were gainfully employed.

The various occupations are classified into groups based on the principle of the material worked in, the process performed, and type of service rendered. Thus all blacksmiths are included in a group of classes under "Metal

Products" irrespective of the industries in which employed, whether in railway shops, mines, factories, general repair work, etc.

The following list gives the number of workers in some of the principal occupations. Railway occupations are here omitted as they are shown for 1931 and 1932 in the succeeding article.

|  |         |
|--|---------|
| Farmers and stock-raisers.. . . .  | 633,165 |

### Joint Industrial Councils in the Netherlands

An Act was passed in the Netherlands last April, to take effect at a future date, providing for the establishment of joint industrial councils. Under its provisions the Crown is authorized to establish a national or regional industrial council for any industry, branch of an industry or group of industries in which the circumstances give occasion therefor. An industrial council is to be composed of an even number of members, not less than six and not more than twenty, who are to be appointed in equal numbers by employers' and workers' organizations designated by the Minister responsible for the administration of the Act. The members hold office for a term of four years, at the expiry of which they may be reappointed. The Crown may appoint as chairman a person not connected with the particular industry for which the council is established; if no such independent chairman is appointed, the council elects from its members, two chairmen, one from the employers' and one from the workers' side, who officiate in turn for periods of six months.

The functions of an industrial council are of a varied character, and include the drawing up of schedules of working conditions, preferably in the form of collective agreements; the promotion of effective vocational education and training; the consideration of means of preventing unemployment and expanding the opportunities of employment; the promotion of amicable relations and mutual co-operation between the employer and the workers, both in the individual undertaking and throughout the industry as a whole; the encouraging of the formation of provident and other institutions for the benefit of the workers, and the control, management, or par-

ticipation in the management, of such institutions; the discussion of the technical and commercial affairs of the industry, in so far as they affect the workers' interest; and the collection of statistical data. In regard to all matters assigned to it by the Act, the industrial council has the power to issue such regulations as it deems necessary. To issue, amend or withdraw any such regulations, a favourable majority of at least two-thirds of the members representing each side is necessary. Regulations issued by an industrial council require the approval of the Crown before they can be enforced; but, once approved, they are binding on all persons engaged in the industry.

Other functions of industrial councils include the furnishing of advice to Government departments, local authorities and private individuals and organizations upon matters connected with their particular industries, and co-operation in the administration of legislation. The Act further prescribes that collective agreements may provide for the submission of disputes to the industrial councils for settlement, and that, where no such provision is made, the industrial councils may of their own accord take steps to prevent or settle disputes.

Regulations, effective August 1, issued under the Fire Marshal Act of British Columbia, were published in the *British Columbia Gazette*, July 27, 1933. One series of regulations governs the approval, sale, installation and maintenance of oil burners and oil-burning equipment; the other series governs the construction, installation and maintenance of chimneys, fireplaces, smoke pipes and furnace chambers.

## STEAM RAILWAY EMPLOYEES AND COMPENSATION IN CANADA, 1931 AND 1932

THE Dominion Bureau of Statistics has issued a preliminary report on steam railways in Canada in 1932, with comparative figures for 1931. The data include the average number in each class or occupation, the total time on duty, salaries or wages paid, the average number of hours or days worked during the year, and the average salary or wages received per year as well as per hour or day.

Similar figures are collected and published each year in the annual reports on Statistics of Steam Railways of Canada (The report for 1931 was reviewed in the LABOUR GAZETTE, April, 1933, page 438). Certain figures as to numbers of employees and their compensation have been included in an appendix to the Department's annual reports on Wages and Hours of Labour in Canada, issued as supplements to the LABOUR GAZETTE for January each year.

The table appearing on page 70 in the supplement to the issue for January, 1933, showed average earnings per hour for the principal classes of wage earners from 1926 to 1931 inclusive, with the average number in each class employed in 1931 and the total hours on duty.

The accompanying table gives for each class of employees on salary as well as on wages, etc., the figures for 1931 and 1932 as to average numbers employed, as well as the average earnings per hour or day and also per year.

The report refers to the changes in wages made between December 1, 1931, and August, 1932 (which have been reported in the LABOUR GAZETTE from time to time) being a ten per cent deduction from the pay of each employee, and also to the reductions in salaries for office staffs not under agreements with the various unions, being also ten per cent.

AVERAGE NUMBER AND EARNINGS OF EMPLOYEES ON STEAM RAILWAYS IN CANADA FOR THE YEARS ENDED DEC. 31, 1931 AND 1932

(1) Employees are counted each month. The average number of employees is the sum of these monthly counts divided by twelve.

(2) D Indicates earnings per day.

## AVERAGE NUMBER AND EARNINGS OF EMPLOYEES ON STEAM RAILWAYS IN CANADA FOR THE YEARS ENDED DEC. 31, 1931 AND 1932

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JULY, 1933

### Reports of Superintendents of the Employment Service

THE employment situation at the end of July was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces were busy cutting hay, and the general report was that the crops would be good, although dry weather had caused considerable anxiety for a time. Fishing receipts were plentiful in Nova Scotia, but the catch had fallen off considerably in New Brunswick. There was continued activity in logging, with large quantities of pulpwood piled on logging roads ready for shipment to factories, and other lumber was ready for overseas. Mines in the New Glasgow area and also those in Cape Breton and vicinity worked from two to five days per week. Mining operations at several points were reported to be somewhat better and output increased. Manufacturers of food-stuffs and soft drinks announced steady improvement in business, but other concerns were only fair. Sawmills were operating slowly with only half crews working, and sash and door factories in Chatham were closed, with large stocks of manufactured goods on hand. The steel industry also showed a somewhat improved situation. Little new building construction was in evidence, but projects already underway were progressing favourably, and city relief work was being maintained in several centres. Tourist travel was heavy. Employment was available for long-shoremen owing to shipments of lumber. Trade, both wholesale and retail, was fair. In the Women's Domestic Section little change was noted, the usual number of casual placements being made, besides others in regular employment.

Improvement was shown in farming, logging and mining in the Province of Quebec. The situation in manufacturing, likewise, was better, as the majority of industries including paper, boots and shoes, clothing, and textiles, were busier. Tobacco, rubber and metallurgy, especially at Montreal, were quiet, and although the leather industry in Quebec City displayed some activity, manufacturers there operated on reduced time. Conditions in Sherbrooke, however, were satisfactory. Little change was manifested in building construction, as the slight increase in employment in this group resulted from minor construction jobs, rather than from larger enterprises. Montreal reported a few orders for building mechanics, but scarcely any for building

labourers and relief work there provided the chief means of employment. Trade was active. In the Women's Domestic Section a number of vacancies was listed, with applicants less numerous than usual.

The demand for farm help in the Province of Ontario remained steady, harvesting being fairly well advanced and nearly all small fruits gathered. In some localities extra work was done by exchange of help so that no additional workers were required, but where farm help was needed, plenty of experienced men were available. Prolonged drought had damaged crops, especially sugar beets, in some parts of the province, but elsewhere conditions were fair. As the pulpwood peeling season was nearing completion, activity in logging was much lessened, particularly at Port Arthur and Timmins. The situation was quiet also at Sudbury. Mining remained about the same, a few placements being made, but many men seeking work. There was little material change in industrial conditions in the manufacturing centres, although the general improvement previously reported in the iron and steel industry, textile, clothing and boot and shoe factories continued. Former employees were being recalled, and many plants were working full time. Building construction remained quiet, most of the work undertaken being repairs or alterations. Local municipal work was carried on with relief labour, and airport and highway construction continued to provide employment for other unemployed. Water and rail transportation was fair. The Women's Domestic Section was somewhat quiet, due to the fact that many householders were away from the cities, but there was reported an encouraging increase in wages for some of the vacancies listed.

Requests for farm help in the Prairie Provinces were slightly greater, though in the majority of cases these were for haying, as harvesting had barely started. Crop conditions throughout the West had not been favourable, owing to extreme heat and prolonged dry weather. Average yields in Northern Manitoba, with less than the average in central and southern districts, seemed probable, while in Saskatchewan, grasshoppers, as well as adverse climatic conditions, had damaged hundreds of acres of growing grain, and in Alberta estimated losses, according to reports received, ranged from forty to seventy per cent. Logging and mining were both

quiet, although the improvement already noted in Saskatchewan in the former group was being maintained. Manufacturers in Winnipeg reported the turnover as satisfactory, but elsewhere conditions were dull. Building construction showed no improvement, with little actual building taking place other than the erection of small dwellings and repairs. Unemployed men were being sent to relief camps, where the only available work at present was in progress. Trade was fair, with collections poor. In the Women's Domestic Section there was a steady demand for workers, and a noticeable increase in applications and placements.

Farming in British Columbia showed little change although the demand for help was regular. Fruits were ripening well with shipments increasing, and canning factories opening and increasing their staffs as occasion arose. The strawberry crop had also provided additional work at Kamloops, as white labour instead of Chinese had been employed.

Logging showed some improvement, for more men were being absorbed. Sawmills were operating steadily, although wages were very low. Shingle mills were also working to capacity. In mining, considerable activity was reported from the Topley district, where development work was proceeding on several properties and strikes made of rich ore. Elsewhere, little change was noted in this group. Building construction was quiet, but work was available for many men in relief camps which were located throughout the province, and which seemed about the only outlet for labour. Casual work on the waterfront at Prince Rupert and Victoria was better, but at other ports there was little activity in that line. Painting and repairs afforded employment at the shipyards in Victoria. Business in connection with transportation and hotels in this city was also above expectations. There was little change in the Women's Section, with a number of applicants still on relief.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD APRIL TO JUNE, 1933

REPORTS received from the offices of the Employment Service of Canada during the quarter April to June, 1933, indicated a decline in business transacted when comparison was made with the corresponding quarter of 1932, as there was a loss of 8 per cent in vacancies and of 10 per cent in placements effected. Logging, farming, transportation and mining showed increased vacancies and placements, the highest gains being in the two first named groups, but these gains only offset in a small way the heavy decline registered in placements in construction and maintenance, followed by smaller losses in services, trade and manufacturing, the change in manufacturing being nominal only. In the services' division an increase was recorded in vacancies, while construction and maintenance, trade and manufacturing showed declines under this comparison. Provincially, New Brunswick, Ontario, Manitoba, Alberta and British Columbia recorded fewer vacancies and placements during the quarter than in the corresponding period of last year, but Nova Scotia, Quebec and Saskatchewan reported gains under both headings, the change in New Brunswick being very slight.

From the chart on page 841, which accompanies the article on the work of the Employment Offices for the month of June, 1933, it will be seen that the curve of vacancies and of placements in relation to applications pur-

sued an upward trend throughout most of the quarter, although a slight decline appeared the latter half of April and very little change was recorded during the first half of June. At the close of the period, however, the curve of vacancies was one point above that recorded at the end of the corresponding quarter last year, and that of placements a fractional point lower. During the period April to June, 1933, there was a ratio of 57.0 vacancies and of 54.1 placements for each 100 applications for employment, as compared with 59.2 vacancies and 57.2 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 1,204; of applications registered, 2,111; and of placements effected, 1,142, as compared with a total daily average of 1,271 vacancies, 2,147 applications and 1,228 placements in regular and casual employment during the second quarter of 1932.

During the three months, April to June, 1933, the Offices of the Service reported that they had made 89,401 references of persons to positions and had effected a total of 84,458 placements, of which 42,862 were in regular employment and 41,596 in casual work. Of the placements in regular employment 31,523 were of men and 11,339 of women, while casual work was found for 33,133 men and 8,463 women. A comparison with the same quar-

ter of 1932 showed that 93,315 placements were effected, of which 37,353 were in regular employment and 55,962 in casual work. Applications for employment during the period under review were received from 121,062 men and

35,106 women, a total of 156,168, in comparison with a registration of 163,122 persons during the same period of 1932. Employers notified the Service during the second quarter of 1933 of 89,051 positions, of which 65,086 were

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN JUNE, 1933

THE following information as to the employment situation in Canada is based upon reports from four sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on July 1 was 8,125, the employees on their payrolls numbering 778,148 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for June was 1,692, having an aggregate membership of 150,040 persons. It should be

understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 60 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of July, 1933, as Reported by Employers

The industrial situation showed further marked improvement at the beginning of July, the increases in personnel reported to the Dominion Bureau of Statistics by 8,125 employers being greater than those indicated by the firms making returns for any previous July in the years since 1920. The establishments whose data were tabulated had 778,148 persons on their July 1 staffs, as compared with 742,750 on June 1, 1933; this pronounced increase of 35,398 employees caused the index to rise by 3.8 points since the preceding month to 84.5 on July 1, as compared with the average seasonal advance of about two points in the experience of the last twelve years. This upward trend is illustrated in the accompanying chart, in which both the crude and the seasonally-corrected curves of employment show a decided rise on July 1. The index, based on the 1926 average as 100, was 80.7 on June 1, 1933, while on July 1 in the years since 1920, it was as follows: 1932, 88.7; 1931, 103.8, 1930, 118.9; 1929, 124.7; 1928, 117.7; 1927, 109.7; 1926, 105.0; 1925, 98.0; 1924, 97.1; 1923, 100.7; 1922, 92.2 and 1921, 88.6.

The favourable movement noted in the last three months for which statistics have been compiled, gathering momentum in its progress, has provided work for over 79,000 persons, besides increasing the working hours of others previously employed. It is worthy of note that during the period April to July in 1931, the firms reporting added some 38,000 persons to their staffs, while last year the gains indicated during the same three months resulted

in employment for only slightly over 11,000 workers. The second quarter of the year is normally a period of industrial expansion, but the increase this year was over twice as large as that noted in 1931, and more than seven times as great as in 1932.

Especially pronounced advances occurred on the date under review in manufacturing, in which the gain exceeded that reported on July 1 in any preceding year for which data are available. As on June 1, the improvement was widespread, almost all branches of the industry sharing in the recovery. The outstanding increases were reported in food, lumber, textile, iron and steel and non-ferrous metal factories. Logging, mining (except of coal), communications, transportation, construction, services and trade also showed important increases in the number of persons employed. In many cases, these gains compared favourably with the losses indicated on July 1 a year ago.

### Employment by Economic Areas

The trend was upward in all five economic areas; the largest additions to staffs were made in Quebec and Ontario. In these two provinces and British Columbia the expansion indicated on July 1, 1933, was greater than on the same date in any previous year of the record.

*Maritime Provinces.*—Statements were tabulated from 605 firms employing 62,700 workers, as against 57,992 in the preceding month. This considerable increase, which was the fifth

consecutive gain since the early spring, compared favourably with the minor decline noted on July 1, 1932; the general index then, however, was higher. Construction, particularly highway construction, recorded substantial improvement on the date under review, when there were also gains in lumber mills, iron and steel and pulp and paper plants, and in trade, services and transportation; on the other hand, coal-mining was seasonally slacker.

*Quebec.*—Manufacturing showed pronounced improvement in Quebec, there being large increases in animal food, leather, clay, glass and stone, iron and steel, tobacco and beverage

whose statistics were tabulated reported 319,664 employees, or 13,009 more than on June 1. Employment in previous years has frequently advanced on July 1, but the month's gain on the date under review exceeded that noted at the beginning of July in any other year since 1920. The improvement was widespread, extending to practically all industries, including services, trade, transportation, mining, logging, construction and manufacturing. The gains in factory employment were most pronounced; this group also showed general advances, but the expansion in lumber, food, non-ferrous metal, iron and steel, textile and

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

age, pulp and paper, lumber and textile factories. In the non-manufacturing industries, quarrying, services, trade, logging and construction all reported considerably heightened activity. The general gain during the month was greater than that reported on July 1 in any other year of the record. The forces of the 1,965 co-operating employers aggregated 224,197 persons, compared with 214,051 on June 1, or an addition of 10,146. A decline had been registered on the same date of last year, but the index then was between three and four points higher.

*Ontario.*—There was a further increase in activity in Ontario, where the 3,584 firms

rubber plants was especially noteworthy. A reduction had been indicated on July 1, 1932, but the index then was higher.

*Prairie Provinces.*—The most important expansion recorded in industrial employment in this area was in construction, but services, trade, communications and transportation also reported improvement; manufacturing showed no general change, while activity in coal-mining was seasonally reduced. In addition, there have doubtless been seasonal increases in agricultural work, which, though not recorded in this survey owing to the generally small unit of production, must be an important factor in relieving the unemployment situ-

ation. Data were compiled from 1,174 employers with an aggregate staff of 104,851 workers on July 1, as against 102,004 in their last report. This gain of 2,847 workers was much larger than that registered on the same date of last year, when employment was, however, in greater volume.

*British Columbia.*—Continued advances were made in British Columbia, where the index stood at 81.8 as compared with 83.7 on July 1, 1932; very little change over the preceding month had then been indicated. A total working force of 66,736 persons was em-

ployed on the date under review by the 797 firms whose data were received and who had 62,148 on their staffs at the beginning of June. The increase on July 1 was the fourth consecutive gain recently recorded; in this upward movement, nearly 12,000 recorded workers have been re-employed. Manufacturing, particularly of food products, was seasonally busier on July 1, 1933, and transportation also reported considerable improvement, while a slightly upward tendency, on the whole, was in evidence in the remaining groups.

Table I gives index numbers by economic areas.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

|  | Canada | Maritime<br>Provinces | Quebec | Ontario | Prairie<br>Provinces | British<br>Columbia |

| Relative Weight of Employment by Economic<br>Areas as at July 1, 1933..... | 100.0  | 8.0                   | 28.8   | 41.1    | 13.5                 | 8.6                 |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

## Employment by Cities

The eight cities for which separate tabulations are made—Montreal, Quebec City, Toronto, Ottawa, Hamilton, Windsor and the adjacent Border Cities, Winnipeg and Vancouver—all showed increased activity; the gains compared favourably with the declines which occurred in all these centres, except Winnipeg, at the beginning of July in 1932.

Montreal.—Employment in Montreal again increased, there being gains in manufacturing, notably of iron and steel products, and in con-

struction and trade, while transportation was rather slack. A combined working force of 119,701 persons was indicated by the 1,122 co-operating employers, who had 118,354 workers on June 1. Large decreases had been noted on July 1, 1932, but the index then was higher.

Quebec.—Continued expansion was reported in Quebec, where statements were tabulated from 150 firms with 12,424 employees, compared with 12,059 in the preceding month. Employment in services and trade increased,

| Relative Weight of<br>Employment by<br>Cities as at July 1,<br>1933..... | 15.4     | 1.6    | 13.5    | 1.5    | 3.1      | 1.3     | 4.3      | 3.3       |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

while other groups showed little general change. The index was lower than at the beginning of July, 1932, when a decline had been shown.

*Toronto.*—There were important, general advances in employment in manufacturing, the largest taking place in iron and steel plants; trade and services also showed improvement. The 1,210 employers furnishing data enlarged their staffs by 1,492 workers to 104,853 at the beginning of July. A contrac-

tion had been reported on the same date of last year, but employment was then in greater volume.

*Ottawa.*—Statistics were received from 158 employers with 11,671 persons on their pay-lists, compared with 11,596 in the preceding month. There was little change, on the whole, in manufacturing, transportation and trade, while construction showed improvement. Losses had been indicated on July 1, 1932,

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100).

|   | All industries | Manufacturing | Logging | Mining | Communications | Transportation | Construction | Services | Trade |
|---|----------------|---------------|---------|--------|----------------|----------------|--------------|----------|-------|
| July 1, 1921.....   | 88.6           | 87.6          | 63.9    | 96.5   | 92.3           | 92.0           | 77.7         | 90.2     | 92.0  |

| Relative Weight of Employment by Industries as at July 1, 1933..... | 100.0          | 52.9          | 1.7     | 5.4    | 2.9            | 12.1           | 11.7         | 2.8      | 10.5  |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

when the index was higher than on the date under review.

*Hamilton.*—There was a further increase in Hamilton, where employment was in less volume than on the same date of last year;

500 workers were added to the forces of 242 firms furnishing information, bringing them to 24,248 at the beginning of July, 1933. Manufacturing reported considerable improvement, especially in iron and steel, while other groups showed only small fluctuations.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

| Industries                               | Relative weight | July 1, 1933 | June 1, 1933 | July 1, 1932 | July 1, 1931 | July 1, 1930 | July 1, 1929 | July 1, 1928 |
|--|-----------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|
| <i>Manufacturing</i> .....               | 52.9            | 83.0         | 80.0         | 85.4         | 97.2         | 111.3        | 120.3        | 113.1        |

| Personal (chiefly laundries).....        | 0.2             | 113.1        | 118.6        | 130.7        | 125.8        | 128.9        | 126.6        | 119.2        |
| Trade.....                               | 1.1             | 114.5        | 111.5        | 119.5        | 128.0        | 133.6        | 135.1        | 129.5        |
| Retail.....                              | 10.5            | 111.8        | 109.1        | 115.4        | 124.0        | 129.5        | 127.7        | 115.3        |
| Wholesale.....                           | 7.7             | 118.1        | 114.9        | 121.8        | 130.7        | 133.5        | 132.8        | 117.0        |
| All Industries.....                      | 2.8             | 97.2         | 96.0         | 100.8        | 109.1        | 120.3        | 116.8        | 110.8        |
|  | 100.0           | 84.5         | 80.7         | 88.7         | 103.8        | 118.9        | 124.7        | 117.7        |

The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

*Windsor and the Adjacent Border Cities.*—Heightened activity, mainly in iron and steel, plants, caused a gain of 267 persons in the staffs of the 135 reporting employers, who had 10,303 in their employ on the date under review. The index was lower than on July 1, 1932, when losses had been reported.

*Winnipeg.*—Transportation and trade registered moderate advances, while other industries showed only slight changes on the whole. An aggregate working force of 33,276 employees was reported by the 381 co-operating firms; this was 479 more than on June 1. The improvement noted on the same date of a year ago involved a larger number of persons, and employment then was generally more active.

*Vancouver.*—The trend of employment in Vancouver continued favourable, according to information from 346 establishments employing 25,818 workers, as against 25,401 in the preceding month. There were moderate increases in practically all groups, those in manufacturing being most pronounced. A decrease had been recorded by the firms making returns for July 1, 1932, when the index was a few points higher.

Index numbers by cities are given in Table II.

### Manufacturing Industries

Employment in manufacturing showed continued important improvement on July 1, there being an increase of 15,100 persons in the staffs of the 4,986 establishments reporting, which had 411,666 employees on the date under review. This advance was the largest ever indicated at the beginning of July in this record of twelve years, resulting in a noteworthy gain in both the crude and the seasonally corrected index numbers. The former rose from 80.0 on June 1, 1933, to 83.0 on July 1, while the adjusted index also increased by three points, an encouraging contrast to the experience of the last twelve years, in which manufacturing operations have on the average shown a slight decline between these two months. The increase on the date under review was the sixth successive gain since January, 1933; in this upward swing, nearly 43,000 persons have been re-employed, while the index has advanced by between eight and nine points. Practically all divisions of manufacturing reported heightened activity, the electric current industry being the only notable exception. The expansions in food, lumber, textile, iron and steel and non-ferrous metal factories were greatest, but those in leather, pulp and paper, rubber, tobacco and beverage, clay and stone and mineral product

plants were also pronounced. As was pointed out in the survey of employment for June 1, the improvement in textiles and iron and steel is particularly interesting, since the trend of employment in these groups has almost invariably been down at the beginning of June and July in the years since 1920.

*Animal Products, Edible.*—Very large additions to staffs were recorded in this group, 3,651 persons being taken on by the 267 establishments making returns, which had 23,699 in their employ. Pronounced improvement was noted in fish-canning in British Columbia, but there were losses in the same industry in the Maritime Provinces, while dairies and meat-packing plants in the other provinces afforded increased employment. The index on July 1, 1933, was higher than on the same date in 1932, when a smaller gain had been indicated.

*Leather and Products.*—Statements were received from 254 manufacturers in this division, employing 19,046 workers, as compared with 18,652 in the preceding month. The bulk of the increase took place in tanneries and boot and shoe factories and occurred largely in Quebec, although the other provinces also showed improvement. The situation was better than that recorded on July 1 of last year, when large losses had been reported.

*Lumber and Products.*—Rough and dressed lumber mills showed considerably heightened activity, and employment in other lumber-using factories was also brisker. Very much smaller increases had been noted on July 1, 1932; the index then stood at 64.8, as against 63.7 on July 1, 1933. A combined working force of 33,219 employees was reported by the 760 firms co-operating on the date under review; this was 3,713 more than at the beginning of June. All provinces shared in the upward movement, but the gains in Quebec and Ontario were greatest.

*Plant Products, Edible.*—The resumption of operations in canneries caused an advance, which was similar in size to that registered on July 1 a year ago, when the index was slightly higher. Returns were received from 377 manufacturers of vegetable foods, having 27,063 operatives, as against 25,997 in their last report. The improvement in Ontario and British Columbia was most noteworthy.

*Pulp and Paper Products.*—There was a decline in printing and publishing houses, while pulp and paper mills were decidedly busier. The 553 co-operating employers in the Dominion reported 51,815 workers, compared with 51,336 on June 1. Curtailment had been indicated in the group as a whole on

July 1, 1932, but the index of employment was then slightly higher.

*Rubber Products.*—Continued improvement was registered in rubber factories, in which employment was lower than in the summer of last year. Statistics were tabulated from 47 firms with 10,172 employees on the date under review, as compared with 9,758 in the preceding month.

*Textile Products.*—Further extension of operations, mainly in Quebec, was reported by the 853 co-operating textile manufacturers, who employed 80,900 workers, or 1,802 more than at the beginning of June. The largest gains were in knitting mills, but cotton, silk, garment and miscellaneous textile factories also were decidedly busier, while headwear plants released employees. Declines have been indicated on the corresponding date in 1932, but the level of employment then was practically the same as on the date under review. The increase on July 1, 1933, was particularly interesting, in that it reverses the unfavourable movement usual at the beginning of July.

*Tobacco, Distilled and Malt Liquors.*—Employment in this division showed a moderate increase, according to statistics from 147 establishments, employing 13,761 persons, compared with 13,181 in the preceding month. There were increases in all except the Maritime Provinces, the largest taking place in Quebec and Ontario. A decline had been noted on the same date last year, when the index was higher.

*Chemicals and Allied Products.*—There was a slight falling-off in activity in chemical factories; 157 firms had 8,318 employees, compared with 8,352 on June 1. The Maritime Provinces reported most of the decrease. A larger reduction had been shown at the beginning of July, 1932, and employment then was in smaller volume.

*Clay, Glass and Stone Products.*—Improvement was indicated in building material plants, the 182 co-operating establishments enlarging their forces by 481 persons to 6,167 on the date under review. Most of the gain was in Quebec and Ontario. The level of employment was below that of July 1 of a year ago; the trend then was downward.

*Electric Current.*—A loss was registered in electric current plants, 92 of which reported a combined working force of 13,569 persons as against 13,802 at the beginning of June. The index was lower than on the same date in 1932, when a minor decline had been indicated.

*Electrical Apparatus.*—There was an increase of 87 in the staffs of the 91 manufacturers furnishing data, who had 9,164 employees on July 1. Firms in Ontario absorbed most of these additionally employed persons. The number engaged in the production of electrical apparatus was much smaller than on July 1 in the preceding year, when a reduction had taken place.

*Iron and Steel.*—The trend in iron and steel factories was again upward, this being the sixth consecutive advance recently recorded. Since the experience of the last twelve years shows that curtailment generally occurs between June and July, the gain this year is of special significance. Losses had been indicated on July 1 of a year ago, when employment was, however, in larger volume. The greatest improvement on the date under review was in the rolling mill, agricultural implement, structural iron and steel, machinery, foundry and machine shop and some other groups, while the vehicle division showed contraction. Returns were compiled from 775 employers whose forces aggregated 81,640 workers, as against 80,492 in the preceding month.

*Non-Ferrous Metal Products.*—Further large increases were registered in non-ferrous metal products; the smelting and refining and base metal divisions showed the most pronounced advances. The 137 co-operating manufacturers employed 13,663 operatives, or 1,013 more than in the preceding month. Little change had been reported on the same date of last year, and the index was then lower.

*Mineral Products.*—Continued gains were shown in this division, in which the index, at 125.4 was slightly higher than in July, 1932. Statistics were received from 112 employers whose staffs rose from 12,112 on June 1, 1933, to 12,436 on July 1.

### Logging

There was a further increase in logging, 2,399 persons being added to the staffs of the 220 reporting firms, who employed 13,527 on July 1. This advance compared favourably with the reduction which occurred on the same date of 1932, and, indeed, of all other years of the record. The index was higher than at the beginning of July of last year and also of 1931.

### Mining

*Coal.*—There was a seasonal decrease in employment in coal mines, 90 of which employed 20,562 men, as compared with 20,994 in their last report. There were moderate losses in both Eastern and Western coal fields. A larger decline had been noted on July 1 of last year, when employment was in greater volume.

*Metallic Ores.*—Another advance was reported in metallic ore mines; statements were tabulated from 75 operators employing 16,773 persons, or 747 more than on June 1. Most of the gain took place in Ontario. The general index, at 142.0, was nearly ten points higher than on July 1, 1932.

*Non-Metallic Minerals, other than Coal.*—There was a considerable increase in the pay-rolls of the 74 co-operating non-metallic mineral mines, which employed 4,819 workers, or 503 more than in the preceding month. Employment was quieter than at the beginning of July a year ago, when little change in the situation had been recorded.

### Communications

For the first time this year, there was an improvement in this group, according to the reporting companies and branches, which had 22,093 persons on their payrolls, compared with 21,868 on June 1. Employment on both telephones and telegraphs was more active. A decline had been indicated on July 1, 1932, but employment then was at a higher level.

### Transportation

*Street Railways and Cartage.*—Employment in the local transportation group showed little general change, 174 firms having 23,945 workers in their employ, as against 23,975 in the preceding month. Improvement had been noted on the same date in 1932, when the index was fractionally higher.

*Steam Railways.*—Statistics tabulated from 100 companies and divisional superintendents in the steam railway operation group showed that they employed 55,510 workers at the beginning of July, or 1,599 more than in the preceding month. A smaller gain had taken place on July 1 last year, when employment was above its level at the time of writing. The five economic areas reported improvement on the date under review, but the greatest gains were in Ontario and the Prairie Provinces.

*Shipping and Stevedoring.*—There was an increase in employment in water transportation on the date under review; 93 companies enlarged their staffs by 147 employees, bringing them to 14,786. The index, at 89.9, was practically the same as at the beginning of July, 1932, when a moderate falling-off had been indicated. On the date under review, there were declines in Quebec, but British Columbia showed an increase as compared with June 1.

### Construction and Maintenance

*Building.*—Improvement in employment was noted in building construction, comparing fav-

ourably with the curtailment indicated on July 1, 1932, when activity in this group was greater. The 634 co-operating contractors employed 15,596 workers, as compared with 13,481 in the preceding month. There was expansion in all provinces except British Columbia, but the largest gains were in Quebec and Ontario.

*Highways.*—The number of men engaged on road construction and maintenance increased on the date under review, when the 343 firms furnishing data had 47,000 employees, or 8,132 more than at the beginning of June. There were considerable advances in all provinces, those in the Maritimes and Quebec being greatest. Employment in this group was not so brisk as on July 1, 1932, when a larger program of road work and improvement was being carried out in connection with unemployment relief.

*Railway.*—A combined working force of 28,399 persons was reported by the 37 contractors and divisional superintendents whose statistics were tabulated, and who had 26,499 employees on June 1. All provinces shared in the increase. Smaller additions to staffs were noted on July 1 a year ago, but the index then was higher than on the date under review.

### Services

Continued expansion was shown in the service group, according to returns from 324 employers with 21,871 persons on their staffs, as compared with 20,756 in the preceding month. The opening of the summer-hotel season caused most of the gain, which was on a larger scale than that reported on July 1, 1932, when employment was, however, in greater volume. The tendency was generally favourable in all provinces, but the largest increases were in the Prairie Provinces.

### Trade

Wholesale houses showed slightly greater activity, and retail stores reported a substantial gain in personnel. Statements were tabulated from 895 firms having 81,601 persons in their employ, as against 79,723 in the preceding month. Employment was in smaller volume than last summer, although a decline had been indicated in the group as a whole on July 1, 1932.

### Tables

Index numbers of employment by economic areas, leading cities and industries are shown in the accompanying tables, in which the columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada on the date under review.

## (2) Unemployment in Trade Unions at the Close of June, 1933

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied in work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

June of last year, when 21.9 per cent of inactivity was recorded. Influencing the situation to a marked degree during June was the employment expansion noted from Nova Scotia, principally in the coal mining industry and the iron and steel trades, though there was a general tendency toward greater activity throughout the country, with the exception of the Province of Quebec, where the situation declined slightly. In contrast with conditions during June of last year British Columbia unions reported an increase in industrial activity of nearly 4 per cent during the month reviewed, Quebec and Ontario showing frac-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Further improvement, and of a more noteworthy character, was apparent in conditions affecting local trade union members during June as compared with the previous month, unemployment standing at 21.8 per cent, in comparison with 23.8 per cent at the close of May. The June percentage was based on the returns furnished to the Department of Labour by 1,692 labour organizations with a combined membership of 150,040 persons, 32,756 of whom were reported idle on the last day of the month. The unemployment level, however, showed practically no variation from

tional gains only. On the other hand, employment recessions on a moderate scale were reflected by Nova Scotia unions, while lesser declines occurred in New Brunswick, Manitoba, Saskatchewan and Alberta.

Reports on unemployment affecting trade union members in the largest city in each province, with the exception of Prince Edward Island, are compiled separately each month. The most substantial percentages of idleness of the cities compared were recorded by Toronto and Montreal unions during June, the percentage in the former city representing

but a nominal improvement over May conditions and in the latter, a fractional employment contraction only. Halifax unions, with a gain of about 5 per cent in work available over May, reported the best situation; and increases of more moderate proportions were reflected by Winnipeg, Regina and Vancouver unions. On the other hand, activity for Edmonton and Saint John members subsided slightly from May. Vancouver unions reported the most noteworthy advances in employment from June of last year, and in Montreal and Regina the trend was towards

greater activity. A less favourable situation, however, prevailed for members in Edmonton, Halifax, Saint John, Winnipeg and Toronto than in June a year ago, though the declines were not of particular importance.

Accompanying this article is a chart which shows the trend of unemployment by months from January, 1927, to date. Tracing the course of the curve since the beginning of the year we find the level at the close of January to be identical with that of December, 1932. In February, the curve projected slightly downward, showing a more favourable employment tendency, though in March unemployment as evident from the curve was again in slightly greater volume. The trend during April and to the close of the month under review was towards heightened activity, the improvement in April and May being very slight, but increasing in volume during June. The highest percentage of unemployment for the first half of this year obtained in January.

The manufacturing industries, with 453 unions embracing a membership of 43,145 persons in June, indicated that 10,553, or a percentage of 24.5, were without employment on the last day of the month, contrasted with percentages of 28.5 in May and 24.2 in June last year. The iron and steel trades reported improvement from May involving the greatest number of members, and among pulp and paper makers, and general labourers gains on a smaller scale, though noteworthy, were recorded. Brewery, textile, fur, hat and cap workers and metal polishers all reported extensive percentage advances from May, which combined, however, did not affect a great number of members. Among garment and wood workers, and bakers and confectioners increases in activity on a more moderate scale were recorded. On the other hand, a considerable drop in the volume of work available from May was reported among cigar makers and glass workers, activity for leather workers being slightly retarded. Employment for printing tradesmen and jewellery workers was maintained in exactly the same volume during both months under comparison. Contrasted with conditions in the manufacturing industries for June, 1932, wood, textile, garment, hat, cap and fur workers and metal polishers all indicated a much higher level of employment during the month reviewed. Among brewery workers the gains noted were also of considerable proportions bakers and confectioners indicating moderate increases in activity and pulp and paper makers but fractional improvement. The iron and steel trades suffered the greatest losses in employed members from June last year, though decidedly less active conditions were manifest

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

| Month             | N.S. and Prince Edward Island | New Brunswick | Quebec | Ontario | Manitoba | Saskatchewan | Alberta | British Columbia | Canada |
|-------------------|-------------------------------|---------------|--------|---------|----------|--------------|---------|------------------|--------|
| Average 1919..... | 3.1                           | 2.0           | 3.4    | 2.7     | 2.1      | 3.2          | 2.0     | 7.9              | 3.4    |
| Average 1920..... | 1.8                           | 2.0           | 7.2    | 3.4     | 3.1      | 3.2          | 2.8     | 11.2             | 4.9    |
| Average 1921..... | 11.3                          | 8.5           | 16.6   | 9.7     | 8.5      | 7.8          | 7.8     | 23.5             | 12.7   |
| Average 1922..... | 7.1                           | 4.3           | 8.6    | 5.0     | 8.9      | 5.4          | 6.1     | 12.4             | 7.1    |
| Average 1923..... | 3.0                           | 2.0           | 6.7    | 3.7     | 5.8      | 3.0          | 6.0     | 5.8              | 4.9    |
| Average 1924..... | 5.1                           | 4.0           | 10.9   | 6.1     | 6.5      | 4.3          | 5.4     | 5.8              | 7.2    |

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

[illegible]

by general labourers, cigar makers and glass workers. Among printing tradesmen and leather workers slight declines only were apparent.

Coal mining on the whole employed larger working forces during June than in the previous month as shown by the reports tabulated from 48 unions, with 13,136 members. Of these 1,917, or 14.6 per cent, were reported idle at the end of the month, in contrast with a percentage of 21.5 in May. This employment advancement from May was, for the most part, in the Province of Nova Scotia, where a number of miners returned to work during the month, although Alberta unions also showed a more favourable trend, the change being slight. British Columbia miners, however, indicated some slowing up of activity. Slackness in Alberta and British Columbia mines accounted for the adverse employment movement shown from June last year, when 12.4 per cent of unemployment was recorded in the mining industry as a whole, while in Nova Scotia the situation was somewhat improved. A number of miners, however, continued to work at greatly reduced time.

The building and construction trades afforded a somewhat better volume of employment during June than in the previous month, the percentage of idleness standing at 62.5 in contrast with 65.6 per cent in May. The percentage for June was based on returns received from 218 associations of building tradesmen, with 18,315 members, 11,452 of whom were without work on the last day of the month. Activity for electrical workers, granite and stone cutters, and bridge and structural iron workers was on a much higher level than in May, and moderate advances in employment were reflected by plumbers and steamfitters, and carpenters and joiners. Among tile layers, lathers and roofers, and steamshovel and dredge men also slight gains occurred. On the other hand, bricklayers, masons and plasterers, and painters, decorators and paperhangers reported employment curtailment, which was not exceptionally pronounced. In making a comparison with the returns for June of last year in the building trades, when 60.8 per cent of unemployment was recorded, bridge and structural iron workers, electrical workers and painters, decorators and paperhangers all reported large percentage increases in activity during the month reviewed, and granite and stonecutters an improvement on a moderate scale. Of the recessions which more than counteracted these gains the most substantial were reported by bricklayers, masons and plasterers, while tile layers, lathers and roofers, and hod carriers and building labourers indicated

marked losses viewed from a percentage basis, which, however, involved few workers. A less favourable situation also prevailed for plumbers and steamfitters, steam shovel and dredge men, and carpenters and joiners.

There was little change in the situation for transportation workers during June from either the preceding month or June of last year, as manifest by the returns received from 737 associations with a membership covering 54,332 persons. Of these, 6,502 were reported idle at the end of the month, a percentage of 12.0, compared with 12.2 per cent of unemployment in May and 11.8 per cent in June a year ago. Steam railway employees, whose returns constituted nearly 79 per cent of the entire group membership recorded, were responsible for the favourable tendency shown from May. Among navigation workers employment eased off slightly, teamsters and chauffeurs showing the same situation as in May and street and electric railway employees an almost unchanged employment volume. Compared with the returns for June of last year in the transportation industries teamsters and chauffeurs reported noteworthy improvement in conditions during the month surveyed, and among navigation workers increased employment was available. Contractions of a slightly more than offsetting nature, however, were reflected by steam and street and electric railway employees.

Reports were tabulated at the close of June from 6 unions of retail clerks, with 1,073 members, 1.4 per cent of whom were without work, contrasted with percentages of 0.6 in May and 2.3 in June last year.

Activity for civic employees was slightly retarded during June, the 72 associations making returns, with an aggregate membership of 6,701 persons showing 6.3 per cent of idleness in contrast with 5.2 per cent in May. The situation was also less favourable than in June last year, when 5.1 per cent of the members reported were without work.

From unions in the miscellaneous group of trades 111 reports were received during June, covering 4,164 members, 976 or 23.4 per cent of whom were idle on the last day of the month, in contrast with 21.6 per cent of unemployment in May and 21.2 per cent in June last year. Stationary engineers and firemen reported an employment drop of 3 per cent from May and barbers, and hotel and restaurant employees contractions of lesser degree. On the other hand, unclassified workers and theatre and stage employees were slightly better engaged. Much quieter conditions prevailed for hotel and restaurant employees than in June a year ago, and among unclassified workers and barbers the recessions

noted were slight. Conditions for stationary engineers and firemen, however, were somewhat improved from June last year and the situation for theatre and stage employees tended favourably, though the change was quite small.

Fishermen with 3 unions, including 1,205 members in June, reported an unemployment percentage of 1.2 in contrast with 2.1 per cent in May and with 7.6 per cent in June last year.

There was a considerable lessening of the unemployment volume among lumber workers and loggers during June, both as compared with the previous month and June, 1932, as

shown by the reports received from 5 unions embracing a membership of 696 persons. Of these 168, or 24.1 per cent, were reported without employment at the end of the month, compared with 31.5 per cent of idleness in May and 48.7 per cent in June last year.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1932, inclusive, and also the percentage of unemployment by provinces for June of each year from 1919 to 1930, inclusive, and for each month from January, 1931, to date. Table II summarizes the returns in the various groups of industries for the same months as Table I.

### (3) Employment Office Reports

The volume of business transacted by the offices of the Employment Service of Canada during the month of June, 1933, as indicated by the average daily placements effected, was 1 per cent higher than in the preceding month and 5 per cent above that of the correspond-

under both comparisons, but the decline from May was due to the heavy loss recorded in services and the smaller decline in construction and maintenance, while in comparison with the corresponding month last year, the loss reported by these two groups was con-

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o—o—o—o—o—o

ing month last year. Although the total placements for the entire month under review were slightly less than in May, the daily average was somewhat higher, due to the difference in the number of working days in May and June. All groups, except construction and maintenance and services, recorded gains

siderably less than the gains recorded in all the remaining industrial divisions.

The accompanying chart shows the trend of employment from January, 1931, to date, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices

of the Service throughout Canada, computations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications showed little change throughout June, the curve of vacancies remaining unchanged during the first half of the month and that of placements declining a fraction of a point, while both showed a very slight upward trend during the latter half of the period, and at the end of June were at practically the same level as that shown at the close of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 59.5 during the first half and 60.4 during the second half of June, 1933, in comparison with ratios of 57.0 and 59.4 during the corresponding periods of 1932. The ratios of placements to each 100 applications during the same periods were 56.5 and 57.3, in comparison with 55.1 and 57.8, respectively.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during June, 1933, was 1,269, as compared with 1,258 in the preceding month and with 1,177 during June of last year.

The average number of applications for employment received daily by the offices during the month under review was 2,116, in comparison with 2,143 in May and 2,022 in June, 1932.

The average number of placements made daily by the offices of the Service during the month under review was 1,204, of which 646 were in regular employment and 558 in work of one week's duration or less, as compared with a total daily average of 1,191 during the preceding month. Placements in June, 1932, averaged 1,142 daily, consisting of 511 placements in regular and 631 in casual employment.

During the month of June, 1933, the offices of the Service referred 31,760 persons to positions and effected a total of 30,091 placements. Of these, the placements in regular employment numbered 16,146, of which 12,196 were of men and 3,950 of women, while placements in casual work totalled 13,945. The number of vacancies reported by employers was 23,582 for men and 8,124 for women, a total of 31,706, while applications for work totalled 52,896, of which 41,363 were from men and 11,533 from women. Reports for May, 1933, showed 32,693 positions available, 55,706 applications made and 30,952 placements effected, while in June, 1932, there were recorded 29,404 vacancies, 50,547 applications for work and 28,532 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1923, to date:

| Year                 | Placements |         |         |
|----------------------|------------|---------|---------|
|                      | Regular    | Casual  | Totals  |
| 1923.....            | 347,165    | 115,387 | 462,552 |
| 1924.....            | 247,425    | 118,707 | 366,132 |
| 1925.....            | 306,804    | 106,021 | 412,825 |
| 1926.....            | 300,226    | 109,929 | 410,155 |
| 1927.....            | 302,723    | 112,046 | 414,769 |
| 1928.....            | 334,604    | 135,724 | 470,328 |
| 1929.....            | 260,747    | 137,620 | 398,367 |
| 1930.....            | 187,872    | 180,807 | 368,679 |
| 1931.....            | 175,632    | 295,876 | 471,508 |
| 1932.....            | 153,771    | 198,443 | 352,214 |
| 1933 (6 months)..... | 74,322     | 81,777  | 156,099 |

#### NOVA SCOTIA

There was a decrease of nearly 14 per cent in the number of positions offered through employment offices in Nova Scotia during June, when compared with the preceding month, but a gain of nearly 172 per cent in comparison with the corresponding month of last year. Placements declined nearly 13 per cent from May, but showed a gain of nearly 178 per cent over June, 1932. This large increase in placements over June of last year was entirely due to work provided in relief of unemployment on highway construction. There was a small decline in service placements, and the changes in other groups were nominal only. Of the 1,613 placements effected during the month 1,314 were in construction and maintenance, and 258 in services. Of the latter, 193 were of household workers. Regular employment was found for 40 men and 58 women.

#### NEW BRUNSWICK

Employment opportunities, as indicated by orders received at employment offices in New Brunswick during June, were over 5 per cent less favourable than in the preceding month and nearly 11 per cent below the corresponding month last year. There was a loss also of over 6 per cent in placements when compared with May and nearly 12 per cent in comparison with June, 1932. The decline in placements from June of last year was due to fewer workers being sent to relief work on highway construction. Small gains were reported in services, logging, and transportation. Industrial divisions in which most of the placements were made during the month were; logging, 43; construction and maintenance, 499, and services, 489, of which 335 were of household workers. During the month 94 men and 47 women were placed in regular employment.

## REPORT OF THE EMPLOYMENT OFFICES FOR THE MONTH OF JUNE, 1933

| Offices                       | Vacancies              |                           | Applicants               |                       |               |               |                            | Regular placements same period 1932 |

\*104 Placements effected by offices since closed.

## QUEBEC

Positions offered through employment offices in the Province of Quebec during June were nearly 6 per cent less than in the preceding month, but 81 per cent above the corresponding month last year. There was a decline of nearly 8 per cent in placements when compared with May, but a gain of nearly 49 per cent in comparison with June, 1932. All groups, except logging and farming, participated in the gain in placements over June of last year, services and construction and maintenance showing the largest increase. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 181; logging, 30; farming, 50; construction and maintenance, 466; trade, 100; and services, 1,547, of which 1,309 were of household workers. Placements in regular employment numbered 864 of men and 1,135 of women.

## ONTARIO

There was a decrease of over 6 per cent in the number of positions offered through employment offices in Ontario during June, when compared with the preceding month, but a gain of over 2 per cent in comparison with the corresponding month last year. Placements also were over 5 per cent less than in May, but over 2 per cent in excess of June, 1932. Gains in placements over June of last year were reported in all industrial divisions except construction and maintenance and services, the largest increase being in logging. Placements by industrial divisions included: manufacturing, 462; logging, 1,544; farming, 1,515; transportation, 141; construction and maintenance, 6,930; trade, 327; and services, 3,229, of which 1,698 were of household workers. During the month 5,974 men and 1,353 women were placed in regular employment.

## MANITOBA

The demand for workers, as indicated by orders received at employment offices in Manitoba during June, was over 1 per cent greater than in the preceding month, but over 53 per cent less than during the corresponding month last year. Similar percentages of change were reported in placements. A substantial reduction in the number of persons placed on highway construction relief work accounted for the decline in placements from June of last year. A loss was also reported in services, while farming showed the only gain of importance. Placements by industrial divisions included: manufacturing, 27; farming, 591; construction and maintenance, 478; trade, 42; and services, 726, of which 595 were of household workers. There were 896 men and 379

women placed in regular employment during the month.

## SASKATCHEWAN

During June, orders received at employment offices in Saskatchewan called for 2 per cent less workers than in the preceding month, but for 23 per cent more than during the corresponding month of last year. There was a decline of over 5 per cent in placements when compared with May, but a gain of nearly 22 per cent in comparison with June, 1932. All industrial divisions, except transportation, participated in the increase in placements over June of last year, construction and maintenance, services, and farming showing the largest gains. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 80; farming, 660; construction and maintenance, 755; trade, 67; and services, 789, of which 531 were of household workers. Regular employment was found for 1,107 men and 404 women.

## ALBERTA

Orders received at employment offices in Alberta during June called for nearly 6 per cent less workers than in the preceding month, but nearly 22 per cent more than during the corresponding month of last year. There was a decline of over 5 per cent in placements when compared with May, but a gain of nearly 21 per cent in comparison with June, 1932. The gain in placements over June of last year was due to increased employment being offered on highway construction and in the National Parks, as the slight improvement reported in manufacturing, transportation and trade was offset by declines in farming and services. Placements by industrial divisions included: manufacturing, 48; farming, 694; construction and maintenance, 1,210; and services, 543, of which 370 were of household workers. There were 1,404 men and 290 women placed in regular employment during the month.

## BRITISH COLUMBIA

Opportunities for employment, as indicated by orders received at employment offices in British Columbia during June, were nearly 22 per cent better than in the preceding month and 28 per cent above the corresponding month of last year. Slightly smaller percentages of gain were reported in placements under both comparisons. Increased placements over June of last year were reported in all industrial divisions except farming and trade. The largest gain, however, was in the highway division of construction and maintenance, and was mainly responsible for the improvement under this comparison. Place-

ments by industrial divisions included: manufacturing, 33; farming, 166; mining, 36; transportation, 113; construction and maintenance, 2,973; and services, 608, of which 373 were of household workers. During the month 1,817 men and 284 women were placed in regular employment.

### Movement of Labour

During the month of June, 1933, the offices of the Employment Service of Canada effected 16,146 placements in regular employment, 7,662 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 104 were granted the Employment Service reduced transportation rate, 97 going to centres within the same province as the despatching office and 7 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

In Ontario 18 certificates for reduced transportation were granted during June, all to provincial points. Of these, 10 were issued at Port Arthur to 9 bushmen and 1 machinist and 5 at Fort William to 4 loggers and 1 saw-mill hand going to employment within their respective zones. The remaining 3 transfers were from North Bay, from which centre 1 moulder and 1 hotel cook were sent to Timmins and 1 tourist camp waitress within the North Bay zone. The Manitoba labour movement during June emanated from Winnipeg and comprised the transfer of 9 workers, 2 within the province and 7 to points outside. Of the latter, 3 were farm hands and 1 a farm

housekeeper for the Regina zone, while to Estevan were conveyed 1 cafe waitress and to Port Arthur 1 farm hand and 1 hospital maid. The 2 persons going to provincial employment were carpenters for the Winnipeg zone. Saskatchewan offices granted 2 certificates during June, 1 to a cook for a lumber company, journeying from Prince Albert within the same zone and the other to a farm cook, who was despatched from Regina to Saskatoon. Workers taking advantage of the Employment Service reduced transportation rate in Alberta during June were 49 in number, all travelling to provincial employment. From Edmonton the movement included 23 farm hands, 1 farm housekeeper, 2 hotel workers, 2 steamship employees, 9 mine workers, 2 carpenters, 1 cook, 1 blacksmith, 1 labourer, 1 hospital kitchen maid, 1 edgerman, and 1 fisherman, going to employment at various centres within the Edmonton zone. The Calgary office was instrumental also in transferring 2 farm hands to Edmonton and 2 farm hands within its own zone. Those who availed themselves of the reduced transportation rate in British Columbia during June numbered 26, all journeying to provincial employment. The Vancouver office was responsible entirely for the transfers, despatching 3 miners to Penticton, 1 millwright to Kamloops, 1 engineer to Prince George and 18 mine workers, 2 hotel workers and 1 farm hand to points within the Vancouver zone.

Of the 104 workers who were carried at the Employment Service reduced transportation rate during June, 49 journeyed over the Canadian National Railways, 31 over the Canadian Pacific Railway, 20 over the Pacific Great Eastern Railway, 2 over the Temiskaming and Northern Ontario Railway and 2 over the Northern Alberta Railway.

### (4) Building Permits Issued in Canada in June, 1933

The value of the building permits issued by 61 cities during June was \$3,535,948; this was an increase of \$1,532,639, or 76.5 per cent, as compared with the May total of \$2,003,309, while in comparison with June, 1932, there was a decline of \$1,492,376, or 29.7 per cent, the value for that month having been \$5,028,324. In connection with these figures, it should be noted that wholesale costs of building materials have been lower in 1933 than in any other year of the record, averaging 75.8 in the first half of 1933, as compared with 76.8 in the first six months of 1932, the previous minimum since 1920, and with 144.5 in 1920, the maximum in the thirteen years considered. The 1926 average equals 100 in calculating these index numbers.

Some 50 cities furnished detailed statements showing that they had issued over 200 permits for dwellings valued at over \$1,200,000 and some 1,700 permits for other buildings estimated to cost approximately \$2,300,000. During May authority was given for the erection of over 300 dwellings and some 2,100 other buildings, valued at approximately \$700,000 and \$1,100,000, respectively.

Improvement over May, 1933, was recorded in New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. The largest increase, of \$1,250,691, or 235.3 per cent, occurred in Quebec. On the other hand, there was a decline of 15.9 per cent in Nova Scotia.

As compared with June, 1932, there were increases in Quebec, Manitoba and British Columbia, that of \$109,459 or 55.3 per cent in the last-named being largest. The remaining provinces showed decreases, Ontario reporting the greatest loss of \$1,346,470 or 57.4 per cent.

Of the larger cities, Montreal, Winnipeg and Vancouver reported increases in the value of the permits issued as compared with May, 1933, and also with June, 1932, while Toronto showed a gain in the first but decline in the second comparison. Of the other centres, Sydney, Moncton, Shawinigan Falls, Brantford, Fort William, Galt, Kingston, London, Port Arthur, St. Catharines, East Windsor, Regina, Lethbridge, New Westminster and North Vancouver reported improvement over May, 1933, and June, 1932.

*Cumulative Record for First Half-Year, 1920-1933.*—The following table gives the value of the building authorized by 61 cities during June and in the first six months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first six months of the same year are also given.

The aggregate for the first six months of this year was lower than in the first half of 1932

| Year      | Value of permits issued in June | Value of permits issued in first six months | Indexes of value of permits issued in first six months (1926=100) | Average indexes of wholesale prices of building materials in first six months (1926=100) |
|-----------|---------------------------------|---|---|--|
| 1933..... | \$ 3,535,948                    | \$ 10,107,289                               | 12.8  | 75.8   |
| 1932..... | 5,028,324                       | 24,341,044                                  | 30.9  | 76.8   |
| 1931..... | 8,593,958                       | 58,950,508                                  | 74.8  | 83.5   |
| 1930..... | 18,621,487                      | 85,413,985                                  | 108.4   | 95.0   |
| 1929..... | 27,816,592                      | 124,609,267                                 | 158.2   | 99.2   |
| 1928..... | 22,751,960                      | 102,036,987                                 | 129.6   | 65.9   |
| 1927..... | 18,363,239                      | 80,842,719                                  | 102.6   | 96.0   |
| 1926..... | 18,718,050                      | 78,760,419                                  | 100.0   | 101.0  |
| 1925..... | 14,915,884                      | 65,899,717                                  | 83.7  | 103.1  |
| 1924..... | 13,967,006                      | 60,674,154                                  | 77.0  | 110.8  |
| 1923..... | 14,286,252                      | 73,047,496                                  | 92.7  | 111.4  |
| 1922..... | 17,052,582                      | 71,281,674                                  | 90.5  | 108.0  |
| 1921..... | 14,240,934                      | 55,771,684                                  | 70.7  | 132.0  |
| 1920..... | 14,113,794                      | 61,754,710                                  | 78.4  | 144.5  |

or any previous year of the record; however, the cost of building, as indicated by the index number of wholesale prices of building materials, was also lower than in any of the last thirteen years.

The accompanying table gives the value of the building permits issued by 61 cities during May and June, 1933, and June, 1932; the 35 cities for which records are available since 1910 are marked by asterisks.

#### ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS AS ISSUED BY 61 CITIES

| Cities                      | June, 1933 | May, 1933 | June, 1932 | Cities                            | June, 1933          | May, 1933              | June, 1932 |

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, June, 1933, summarized the employment situation as follows:—

Employment at June 26, 1933, showed a further substantial improvement, which again extended to all but a few industries. The improvement was most marked in mining and quarrying, iron and steel, tinplate, and metal goods manufacture, engineering, shipbuilding and ship repairing, the textile industries, cement, brick and tile, glass, furniture, leather and leather goods manufacture, the food and drink, paper, printing, and distribution industries, and the transport, hotel and boarding-house services.

On the other hand, there was a decline in tailoring, dressmaking, hat and cap manufacture, and in the motor vehicle industry.

There was a further reduction in the number of insured workpeople unemployed in all parts of the country. Employment continued fair in London and the South-Eastern Counties, and was moderate in South-West England. In the Midlands it continued slack, and it was still bad in all other areas.

Among the workpeople, numbering approximately 12,808,000, insured against unemployment in Great Britain and Northern Ireland, and working in practically every industry except agriculture and private domestic service, the percentage unemployed at June 26, 1933, (including those temporarily stopped as well as those wholly unemployed), was 19·5, as compared with 20·5 at May 22, 1933, and with 22·2 at June 27, 1932. The percentage wholly unemployed at June 26, 1933, was 15·8, as compared with 16·6 at May 22, 1933; while the percentage temporarily stopped was 3·7, as compared with 3·9. For males alone, the percentage at June 26, 1933, was 22·8, and for females, 10·9; at May 22, 1933, the corresponding percentages were 23·7 and 12·1.

At June 26, 1933, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,884,322 wholly unemployed, 463,712 temporarily stopped, and 90,074 normally in casual employment, making a total of 2,438,108. This was 144,771 less than a month before, and 309,235 less than a year before. The total included 2,016,341 men, 51,709 boys, 334,379 women and 35,679 girls.

### United States

Index numbers showing the trend of employment and pay rolls in manufacturing industries are computed monthly by the Bureau

of Labour Statistics of the U.S. Department of Labour from reports supplied by representative establishments in 89 of the principal manufacturing industries of the United States and covering the pay period ending nearest the 15th of the month. These indexes of employment and pay rolls are figures showing the percentage represented by the number of employees or weekly pay rolls in any month compared with employment and pay rolls in a selected base period. The year 1926 is the Bureau's index base year for manufacturing industries, and the average of the 12 monthly indexes of employment and pay rolls in that year is represented by 100 per cent.

Comparing the index number of employment in June, 1933, (62·8) with the index of May, 1933, (58·7) it is seen that employment has increased 7 per cent over the month interval, while a similar comparison of the June pay roll index (43·1) with the index of pay rolls in May, 1933, (38·9) shows a gain of 10·8 per cent in pay rolls. Comparing employment in June, 1933, with June, 1932, it is seen that the level of employment in June of the present year is 9·2 per cent above the level of the June, 1932, employment index (57·5) and payrolls in June, 1933, are 9·7 per cent above the level of the June, 1932, pay roll index (39·3).

The change in employment and pay rolls in June, 1933, are based on reports supplied by 17,952 establishments in 89 of the principal manufacturing industries of the United States. These establishments reported 2,802,711 employees on their pay rolls during the pay period ending nearest June 15 whose combined weekly earnings were \$50,408,132. The employment reports received from those co-operating establishments cover approximately 50 per cent of the total number of wage earners in all manufacturing industries of the country.

The upswing in business activity which was reflected in May by increases in employment in 72 industries was further extended in June, when 79 of the 89 industries reported increases in number of workers over the month interval, and 80 industries reported gains in pay rolls. The usual seasonal movement at this period of the year is downward, the average percentage decrease in employment between May and June during the past 10 years having been 1·4 per cent and in pay rolls 3 per cent.

A comparison of the June, 1933, index of employment with the index of employment in July, 1932 (55·2), in which month the low

point of employment in 1932 was reached, shows a gain in June, 1933, of 13.8 per cent in employment over this 11-month interval. The June, 1933, pay roll index is 19.1 per cent above the July, 1932, pay roll index (36.2).

The American Federation of Labour, in the *Monthly Survey of Business*, published early

in August, estimates that about 1,500,000 persons went back to work from March to June, not including agricultural workers who found jobs on farms, but that well over eleven million were still without work. Trade union figures for July, it is stated, showed re-employment still continuing, but a rate only half that of June.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts executed by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act," (chapter 20-21, Geo. V). The full text of this measure appeared in the *LABOUR GAZETTE*, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repair or demolition of any work shall be subject to the following conditions respecting wages and hours:

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency, as may be approved by the Minister.

(2) The provisions of this section shall not apply to persons employed in the fabrication or manufacture of materials, supplies or equipment for use in the work contemplated where such fabrication or manufacture is carried on in any established plant or factory other than a plant or factory established for the purposes of the work contemplated.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, re-

modelling, repair or demolition of any work, is to obtain before hand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings, harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees, mail bags, letter boxes, and other postal stores, and any other articles and things hereafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions are referred to in the Orders in Council as "B" conditions, (the conditions of the Fair Wages Orders in Council with reference to building and construction works were designated as "A" conditions), and include the following Fair Wages Clause:

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to

the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the Contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available,

or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been executed by the Governments of Canada recently:

#### DEPARTMENT OF PUBLIC WORKS

##### *Contracts in Group "A" (Construction, etc.)*

Construction of wharf repairs to the quay, Rimouski, P.Q. Name of contractors, Ludger Lemieux, Ltd., Quebec, P.Q. Date of contract, July 24, 1933. Amount of contract, approximately \$37,619.00. A fair wages schedule was inserted in the contract as follows:—

### Recent Immigration Into Canada

The Department of Immigration and Colonization has recently issued figures showing the immigration to Canada for the quarter year ended June 30, 1933. The total number of immigrants entering the Dominion during the period was 4,325, of whom 1,196 were males, 1,698 females and 1,431 children under eighteen years of age. Those of British origin numbered 749, of United States origin 2,702, of Northern European races 185, and other races 689. In the corresponding period of 1932 immigration totalled 7,339, including 1,283 of British origin, 4,902 of United States origin, 288 of

Northern European races, and 866 of other races.

A recent amendment to the Workmen's Compensation Act of Nova Scotia provides that an applicant for compensation shall be entitled to the benefit of the doubt, and that it shall not be necessary for the applicant to adduce conclusive proof of his right to the compensation applied for, but that the Board shall be entitled to draw and shall draw from all the circumstances of the case, facts and medical opinions, all reasonable inference in favour of the applicant.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Printing and Publishing

**TORONTO, ONTARIO.**—FAIR SHOP EMPLOYING PRINTERS AND BOOKBINDERS ASSOCIATION OF TORONTO AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 91.

Agreement to be in effect from May 1, 1933, to April 30, 1934, and thereafter from year to year until notice.

Union members to be employed.

Hours: regular hours to be 44 per week, but at the employer's option, each employee may work only 5 days per week, with 6-day plant operation whenever necessary.

Overtime: time and one half; work on Sundays and seven named holidays, double time.

Wages for hand compositors, stone men, make-up men, proof-readers, linotype operators, linotype machinists and operators of type composing machinery or keyboards: 75 cents per hour for day work. For work on the two night shifts, 15 per cent over the day rate.

Apprentices limited to two to the first five journeymen and one to each subsequent four. Apprentices to serve five years and comply with other apprentice regulations of the International Typographical Union.

Wages for apprentices: from \$12.50 per week during first half of third year to \$25 per week during second half of fifth year.

In case of any great change in conditions of the industry, joint committees to meet and consult on means of meeting such conditions.

### Construction: Buildings and Structures

**HAMILTON, ONTARIO.**—THE HAMILTON CONTRACTING PLASTERERS' ASSOCIATION AND THE EMPLOYING PLASTERERS OF HAMILTON AND THE OPERATIVE PLASTERERS AND CEMENT FINISHERS' INTERNATIONAL ASSOCIATION, LOCAL No. 298.

Agreement made following strike reported in the *LABOUR GAZETTE*, June, 1933, page 591, and

July, page 684, to be in effect from May 1, 1933, to April 30, 1934.

This agreement is the same as the one previously in effect and summarized in the *LABOUR GAZETTE*, March, 1932, page 348, with the following exception:

Wages for journeymen plasterers: 90 cents per hour (a reduction of 10 cents per hour).

**CALGARY, ALBERTA.**—CERTAIN CONTRACTORS AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 348.

Agreement to be in effect from April 1, 1933, to April 30, 1934.

This agreement renews the one which came into effect August 15, 1931, and which was summarized in the *LABOUR GAZETTE*, November, 1931, page 1254, with the following exception:

Wages per hour: from April 1, 1933, to July 31, 1933, 80 cents for journeymen and 90 cents for job foreman; from August 1, 1933, to April 30, 1934, 90 cents for journeymen and \$1 for job foremen. Wages for apprentices optional. (The rates in effect since August 15, 1931, were \$1 for journeymen and \$1.25 for foremen.)

As soon as convenient after March 15, 1934, a joint committee to meet to settle wage rates to be in effect after May 1, 1934.

### Transportation and Public Utilities: Street and Electric Railways

**WINDSOR, ONTARIO, AND VICINITY.**—ESSEX DIVISION, HYDRO ELECTRIC RAILWAYS AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, LOCAL No. 616.

Agreement to be in effect from July 1, 1933, to June 30, 1934.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, February, 1933, page 228, August, 1931, page 934, and June, 1929, page 678.

Wage rates are unchanged at 53 cents per hour for motormen, conductors, one-man car and bus operators and \$119.70 per month for substation operators.

### Transportation and Public Utilities: Water Transportation

**MONTREAL, QUEBEC.**—VARIOUS STEAMSHIP COMPANIES AND THE ASSOCIATION OF SYNDICATED LONGSHOREMEN OF THE PORT OF MONTREAL.

Agreement reached as a result of the Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907, the report of which board was published in the July issue of the *LABOUR GAZETTE*, page 676.

Agreement to be in effect from June 30, 1933, to December 31, 1933.

The agreement applies to all ocean steamships coming into the port of Montreal under the Companies' jurisdiction.

Preference of work to be given members of the union, whenever available. The Companies

recognize the union and the union to have the right to appoint a representative on the wharves.

Hours: 10 per day.

Overtime: when required to work during meal hour, double time until discharged for meals. Double time for work on Sundays and two holidays.

Wages per hour: 56 cents for day work; 66 cents between 7 p.m. and 11 p.m.; 76 cents between 12 midnight and 5 a.m. (reductions of 3 cents per hour). For work with nitrate, bulk sulphur, full cargoes of china clay and fertilizer, shifting bunker coal, handling cargo in refrigerators which is to be transported at 32°F or under, for grain trimming and bagging, for work performed in open 'tween deck when there is grain running in a hatch connected with the said open deck: 10 cents per hour extra.

The running of grain in the pipes to be stopped while the men go down in the hold to work, two men to stand on deck during that time, if necessary.

Sixteen men to constitute a regular gang; extra men to be employed at the discretion of the employers.

The number of pieces or packages per sling of various commodities are specified.

Each party to appoint a committee and these two committees to meet to adjust any grievances. Any dispute which cannot be settled between the parties to be referred to an arbitration board whose decision is to be final and binding.

To guarantee the carrying out of the terms of the agreement, the Companies and the union each are to put up a bond of \$2,000.

#### MONTREAL, QUEBEC.—VARIOUS SHIPPING COMPANIES AND THE INDEPENDENT ASSOCIATION OF CARPENTERS AND SHIPLINERS OF THE PORT OF MONTREAL.

Agreement to be in effect from June 30, 1933, to March 31, 1934.

The agreement applies to all ocean steamships coming into the port of Montreal under the Companies' jurisdiction and covers all fitting of such vessels lying in the harbour for grain and cattle and all woodwork in connection with the stevedoring gear, except where permanent gear men are employed.

Union to supply the necessary men and, if available, a minimum gang is specified for work under certain conditions.

Hours: 10 per day.

Overtime: Double time for work during meal hours and until discharged for meals. Double time for work on Sundays and two holidays.

Wages per hour: 56 cents for day work, 66 cents between 7 p.m. and 11 p.m. and 76 cents between 12 midnight and 5 a.m. (reductions of 3 cents per hour from the 1932 rates). In the holds of steamers in which bulk sulphur or bulk fertilizer has been stowed, if old wood is being used in whole or in part, 12 cents per hour extra to be paid. (This makes the rates for this work 4 cents per hour lower than the 1932 rates. Where the holds of such steamers are being refilled with new wood, the regular rates to apply.)

Running of grain in the pipes to be stopped while men go down in the hold to work, two men to stand on deck during that time, if necessary.

Both the Companies and the union to put up a \$500 bond to guarantee their carrying out the agreement.

### Unemployment Reserves Condemned by Pennsylvania State Committee

A committee of citizens was appointed by Governor Pinchot of Pennsylvania last November to "examine into the possibilities of making some self-respecting provision for workers when unavoidable unemployment occurs, taking into consideration the plan recently proposed by the representatives of seven eastern states, and other plans," and to suggest ways and means for dealing with the problem of unemployment in Pennsylvania upon a return of normal business activity.

The committee presented their report to the Governor in May. They recommend against the establishment of any kind of compulsory unemployment insurance or unemployment reserves, and state their opinion that the distress arising from unemployment, whether depressional or casual, should continue to be dealt with as an emergency. "It should be relieved (1) by the voluntary efforts and contributions of the people living within the locality in which such distress occurs; and (2) by the exercise of the taxing power of the local community and of the state, to provide to those who are in need, the essential facilities of relief. We advise that a careful study be made of this form of relief in the light of

experience gained during the present emergency in the United States as well as abroad. As a result of such study, there should be devised adequate and properly co-ordinated machinery for the provision of this form of relief when needed, including as far as practical the making of work and the equitable distribution of existing work."

Under the general title: "The Machine Age Series," the Social Service of Canada has in course of publication a number of short pamphlets intended to form a convenient and non-technical introduction to modern social and economic problems. The Council believes that the economic changes dealt with in these pamphlets are, in large measure, "responsible for the growing insecurity of the masses of our population, for their poverty in the midst of plenty, and for the resulting unrest from which the whole world suffers." The titles and authors of the first three pamphlets in the series are as follows: I. "The industrial revolution in Canada", by I. M. Biss; II. "The Canadian farmer and the machine age," by W. M. Drummond, Professor of Rural Economics, University of Toronto; III. "The Canadian wage earner in the machine age," by D. C. MacGregor.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, JULY, 1933

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was upward, the cost of the weekly family budget in terms of retail prices being slightly higher due to an advance in the cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices advanced substantially due mainly to higher prices for grains and other primary products.

In retail prices the cost per week of a list of twenty-nine staple foods in terms of the average retail prices in sixty-nine cities was \$6.95 at the beginning of July as compared with \$6.84 for June; \$6.67 for March (the low point of the downward movement); \$6.78 for July, 1932; \$10.98 for July, 1929; \$11.07 for July, 1926; \$10.96 for July, 1921; \$16.84 for July, 1920; and \$7.42 for July, 1914. The most important advance occurred in the cost of eggs, bread, flour and potatoes, while slight increases occurred also in the cost of beef, fresh pork, and prunes. A seasonal decline occurred in the cost of butter. Including the cost of fuel and rent with that of foods, the total budget was \$15.48 at the beginning of July as compared with \$15.41 for June (the low point); \$16.21 for July, 1932; \$21.26 for July, 1929; \$21.30 for July, 1926; \$21.53 for July, 1921; \$26.92 for July, 1920 (the post war peak) and \$14.17 for July, 1914. Fuel was somewhat lower due to decreases in the prices of coal in many localities. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics continued toward higher levels to 70.5 for July as compared with 67.6 for June. This is the fifth consecutive month this index has advanced, the low point of the downward movement being reached in February at 63.6. Some comparative figures for earlier dates are 66.5 for July, 1932; 97.2 for July, 1929; 100.1 for July, 1926; 164.3 for May, 1920 (the post war peak); and 64.4 for July, 1914. One hundred and fifty-six prices quotations were higher, forty-one were lower and three hundred and five were unchanged. An important feature of the upward movement is the narrowing of the gap between the prices of raw materials and finished products, the former advancing more rapidly than the latter.

In the grouping according to chief component materials seven of the eight main groups were higher, and one was unchanged. The groups which advanced were: the Vegetables and Vegetable Products group, due chiefly to higher prices for grains, flour, oatmeal,

bran and shorts; the Animals and their Products group, due to advances in the prices of furs, hides, leather, hogs, butter and eggs which more than offset declines in the prices of steers, calves, lambs and fresh meats; the Fibres, Textiles and Textile Products group, because of higher prices for raw cotton, cotton yarn, raw wool, worsted yarn and raw flax which more than offset slightly lower prices for raw silk; the Wood, Wood Products and Paper group mainly because of higher quotations for spruce, fir and cedar lumber; the Non-Ferrous Metals and their Products group, chiefly on account of higher prices for antimony, copper, lead, tin and zinc; the Non-Metallic Minerals and their products group because of increased quotations for anthracite coal; and the Chemicals and Allied Products group, due to advances in the price of alum, copper sulphate, red lead and citric acid. The Iron and its Products group was unchanged.

In the grouping according to purpose both consumers' goods and producers' goods were substantially higher, the former because of higher prices for flour and milled products, cured meats, eggs and woollen yarn which exerted a greater influence on the index than lower prices for foreign fruits, fresh meats and poultry, and the latter due to higher prices for lumber, painters' materials, materials for the textile and clothing industries, for the furs and leather goods industries, for the metal working industries, for the milling and other industries, as well as miscellaneous producers' materials.

In the grouping according to origin Canadian farm products were substantially higher, while less important advances occurred in articles of forest origin and articles of mineral origin. Articles of marine origin were lower. Both raw and partly manufactured goods and fully and chiefly manufactured goods were higher, the advance in the former being much more marked than in the latter group.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of July of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be

(Continued on page 862)

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family

\* Prior to 1926 number of commodities was 236.

(Continued from page 854)

available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers, and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal,

wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But, as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

## Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for working men's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to

1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices were again slightly higher, sirloin steak averaging 22.2 cents per pound in July as compared with 22 cents in June and 20.5 cents in March, and round steak averaging 18 cents per pound as compared with 17.7 cents in June and 16.3 cents in March. Prices were higher in most localities except in the Prairie provinces where lower levels were reached. Veal was slightly higher advancing from 11.8 cents per pound in June to 12 cents in July, while mutton was down from an average price of 21.3 cents per pound to 20.5 cents. Fresh pork was  $\frac{1}{2}$  cent per pound higher at 16.1 cents. Eggs showed considerable seasonal advance in most localities, fresh being up in the average from 19.2 cents per dozen in June to 21.1 cents in July, and cooking from 15.3 cents per dozen to 17.1 cents. These prices were little changed from those prevailing a year ago.

Milk was unchanged at an average price of 9.1 cents per quart. Dairy butter was 1 cent per pound lower at an average price of 19.9 cents. The price of bread which has been unchanged during the last four months at an average price of 5.5 cents per pound showed a slight advance to 5.6 cents. This is the first increase in this average since 1929. Flour was also slightly higher averaging 3.1 cents per pound in July as compared with 3 cents in June and 2.6 cents in March. Onions were higher in most localities, the average being 6.3 cents per pound in July as compared with 5.6 cents in June. The price of potatoes continued to advance to \$1.16 per ninety pounds in July as compared with \$1.03 in June, 92 cents in April and 66 cents in July, 1932. A factor in this movement is the prospect of smaller crops in many parts of Canada. Prunes were slightly higher at 11.7 cents per pound as compared with 11.3 cents in June. Sugar prices were unchanged at an average of 7.9 cents per pound, increases in some localities being offset by declines in others. Anthracite coal was again considerably lower averaging \$14.57 per ton as compared with \$14.79 in June and \$15.29 in May. Declines occurred in Sorel, Brockville, Orillia, Niagara Falls, Guelph, Woodstock, Stratford, London, Windsor, Owen Sound and North Bay. The price of bituminous coal was down from \$9.34 per ton in June to \$9.22 in July. No changes were reported in rent.

### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1933\*

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent 18½%; Clothing, 18½%; Sundries, 20%.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices averaged substantially higher in July than the previous month. Manitoba northern cash wheat was up from 66·8 cents per bushel in June to 83·4 cents in July. The high price for the month was 94 cents per bushel reached on the 18th and the low 79·1 cents per bushel reached on the 3rd. Unfavourable crop conditions in Canada and the United States were factors in the rapid advance during the first half of the month. Prices for Canadian wheat rose relatively faster than those for Australia and the Argentine wheat which tended to curtail export demand for the former. During the latter half of the month prices declined steeply with the result that quotations at the closing of the month were only 6 cents per bushel higher than at the beginning. In coarse grains western barley was up from an average of 37·5 cents per bushel in June to 50·3 cents in July; oats from 29 cents per bushel to 39·7 cents; rye from 52·8 cents per bushel to 67·5 cents; and flax from \$1.35 per bushel to \$1.43. Flour prices moved in sympathy with wheat, the price per barrel being up from \$5.10 in June to \$6.40 in July. Raw sugar at New York advanced from \$1.53 per cwt. to \$1.73 (Canadian funds), while granulated at Montreal rose from \$6.37 per cwt. to \$6.47. Ceylon rubber at New York was up from an average price of 6·9 cents per pound in June to 8·4 cents in July. In live stock choice steers at Toronto declined from \$5.10 per hundred pounds to \$4.81 but were slightly higher at Winnipeg at \$4.32 per hundred pounds. Veal calves at

Toronto were down from \$5.33 per hundred pounds to \$4.96 and at Winnipeg from \$4.37 to \$3.95. Bacon hogs at Montreal rose from \$5.96 per hundred pounds to \$6.49 and at Toronto from \$5.69 per hundred pounds to \$6.30. This same grade at Winnipeg averaged 52 cents per hundred pounds higher at \$5.57. Lambs at Montreal were substantially lower the price being down from \$9.08 per hundred pounds to \$7.66, while the price at Winnipeg was 50 cents per hundred pounds higher at \$6.45. Fresh eggs at Montreal rose from 21 cents per dozen to 22·9 cents. Creamery butter at Montreal advanced from 21·1 cents per pound to 22·8 cents and at Winnipeg from 20 cents per pound to 21 cents. Raw cotton at New York was up from an average price of 10·5 cents per pound to 11·4 cents (Canadian funds). The increase was said to be due in part to the reports of the success attending the United States Government acreage reduction program and to continued unfavourable weather conditions. The price of raw wool was up from 12½-14 cents per pound to 15-18½ cents. Increases were said to be due in part to advanced quotations at recent London sales and to higher sterling rates of exchange. A grade of spruce lumber advanced \$2 per thousand board feet to \$15. The price of cedar boards moved up from \$14 per thousand to \$15 and fir timber was \$1 per thousand board feet higher at \$15. Scrap steel was 50 cents per ton higher at \$7, and scrap iron was \$1 per ton higher at \$8. In non-ferrous metals the price of electrolytic copper advanced from \$9.70 per hundred pounds to \$10.37, copper wire bars from \$9.06 per hundred pounds to \$9.45, while the price of tin was 1 cent per pound lower at 52½ cents. Anthracite coal was up from \$11.40 per ton to \$11.68.

### PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes and conditions affecting prices in Great Britain and certain other countries. The index numbers of the cost of living are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases. The latest quarterly table giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the July issue of the LABOUR GAZETTE.

#### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 61·2 for June, an increase of 2·4 per cent

over the May level and of 3·8 per cent over June, 1932. With the exception of the meat and fish group which showed a decline and of coal which was unchanged, all groups showed advances over the previous month.

The *Statist* index number, on the base 1867-1877=100, was 81·3 at the end of June, an increase of 0·5 per cent for the month and of 5·6 per cent over the June, 1932, index number. As compared with the end of May, the advance in vegetable food was nearly offset by lower prices for animal food, sugar, coffee and tea; advances in minerals and textiles were partly counteracted by a decline in the sundries group.

COST OF LIVING.—The Ministry of Labour's index number, on the base July, 1914=100, was 138 at July 1, an advance of 1·5 per

cent for the month due entirely to an advance in foods, chiefly potatoes and eggs.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914 = 100 (gold basis), was 80 for June, an increase of 2.6 per cent for the month. Every group showed an advance with the exception of animal foods.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913 = 100, was 92.9 for June, an advance of 1.1 per cent for the month. Nearly all groups were included in the general advance, the most notable increases occurring in rubber, hides and leather and non-ferrous metals.

**COST OF LIVING.**—The official index number, on the base 1913 = 100, was 118.8 for June, an increase of 0.5 per cent for the month, due to higher food prices.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926 = 100, was 65.0 for June, an advance of 3.7 per cent over the May level and of 1.7 per cent over June, 1932. This is the fourth consecutive month in which an increase has been recorded and is the first time since early in 1929 that this index number has shown an increase over the corresponding month of the previous year. For June of this year all groups showed an advance over the May level and of the 784 commodities listed, 395 advanced in price, 331 were unchanged and 58 were lower than in May.

The *Annalist* index number, on the base 1913 = 100, was 103.4 for July, an increase of 9.4 per cent over the June figure. Building materials were unchanged, but all other groups were included in the advance, the greatest increases occurring in textile products, fuels and farm products.

*Bradstreet's* index number, which is the sum totals of the prices per pound of 96 commodities of common consumption was \$8.3373 at July 1, an advance of 3.9 per cent for the month, and of 23.9 per cent over July 1, 1932. The index number at July 1, was the highest recorded since September, 1931. As compared with June 1, decreases were noted in the live stock, provisions, naval stores and chemicals and drugs groups, but the other nine groups were all higher.

*Dun's* index number, which is based on the estimated cost *per capita* of a year's supply of commodities in wholesale markets was \$149.178 at July 1, a gain of 6.6 per cent for the month and of 19.04 per cent over the same date last year. As compared with

June 1, all groups were higher with the exception of "other food," which showed a decrease.

Irving Fisher's index number, on the base 1926 = 100, was 69.0 for July, an advance of 8.3 per cent over the June level, and of 14.9 over the July, 1932, figure.

**COST OF LIVING.**—The Bureau of Labour Statistics index number on the base 1913 = 100, was 128.3 for June, which is a decline of 2.9 per cent from the December, 1932, level. Food was 2 per cent lower, clothing 1.4 per cent, rents 7.8 per cent, fuel and light 5.4 per cent and miscellaneous items 2.4 per cent, while house furnishing goods were 0.2 per cent higher.

The index number of the Department of Labour and Industries, Massachusetts, on the base 1913 = 100, was 121.0 for June, an increase of 1.1 per cent for the month due to higher prices for food and clothing.

### Other Countries

#### *Wholesale Prices:—*

The official index number for Peru, on the base 1913 = 100, was 178 for May and 180 for June.

The official index number for Austria, on the base—first half of 1914 = 100, was 110.9 for July.

The official index number for Czechoslovakia, on the base July, 1914 = 100, was 98.3 for June.

The official index number for Denmark, on the base 1913 = 100, was 123 for June.

The official index number for Norway, on the base 1913 = 100, was 121 for June.

The index number of the Commerce Department, Sweden, on the base 1913 = 100, was 106 for May and also for June.

The index number of the National Tariff Commission for China, on the base 1926 = 100, was 104.2 for May.

#### *Cost of Living:—*

The official index number for Austria, on the base July, 1914 = 100, was 105.3 for July.

The index number of the cost of living at Milan, Italy, on the base June, 1927 = 100, was 75.63 for May.

The official index number for Norway, on the base July, 1914 = 100, was 147 for June.

The official index number for Switzerland, on the base June, 1914 = 100, was 130 for May.

The official index number for South Africa, on the base 1910 = 1000, was 1247 for May.

The official index number for Bombay, India, on the base July, 1914 = 100, was 106 for March, 101 for April, 100 for May and 104 for June.

The official index number for New Zealand, on the base 1926-1930 = 1000, was 798 for May, as compared with 806 for February.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1933

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the second quarter of 1933, was 180, there being 49 in April, 68 in May and 63 in June.

The report for the first quarter of 1933 was given in the *LABOUR GAZETTE*, May, 1933, page 564. In the second quarter of 1932, 209 fatal accidents were recorded (*LABOUR GAZETTE*, August, 1932, page 936). The supplementary lists of fatal industrial accidents, not reported in time for inclusion, contain 10 fatalities for the first quarter of 1933 and 3 fatalities for 1932. In this series of reports it is the custom to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the *LABOUR GAZETTE*. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the second quarter of 1933 were as follows: agriculture, 30; logging, 24; fishing and trapping, 5; mining, non-ferrous smelting and quarrying, 23; manufacturing, 26; construction, 13; electric light and power, 5; transportation and public utilities, 33; trade, 6; service, 15.

Of the mining accidents, 13 were in "metaliferous mining," 5 in "coal mining," 3 in "non-metallic mineral mining and quarrying, n. e. s.," and 2 in "structural materials".

Of the accidents in manufacturing, 1 was in "animal products," 2 in "leather, fur and products," 10 in "saw and planing mill products," 3 in "wood products," 3 in "pulp, paper and paper products," 1 in "iron, steel and products," 5 in "non-metallic mineral products," and 1 in "chemical and allied products".

In construction there were 9 fatalities in "buildings and structures," 3 in "highway and bridge," and 1 in "miscellaneous construction."

In transportation and public utilities, there were 14 fatalities in "steam railways," 9 in "water transportation," 6 in "local transportation," 2 in "storage," and 2 in "telegraphs and telephones"

In trade there was one fatality in "wholesale," and 5 in "retail".

Of the fatalities in service, 11 were in "public administration," 1 in "recreational," 2 in "personal, domestic and business," and 1 in "professional establishments".

The most serious accident during the period under review occurred on Lac Creux, Quebec, on May 20, when several sticks of dynamite exploded on a craft on which a party of men had set out to blow up a pile of logs which was obstructing logging operations. Seven log drivers were killed by the force of the explosion which resulted from a detonator cap dropping into the load of dynamite. Accidental death due to negligence of the camp foreman was the verdict returned by a coroner's jury investigating the circumstances surrounding the accident.

Other accidents involving the loss of two or more lives were as follows:

Two farm labourers were overcome by gas fumes while cleaning a well near Goderich, Ontario, on June 7.

Two fishermen were drowned off Prince Edward Island on June 1, when their motorboat was swamped in a heavy sea.

Two prospectors were drowned near Bret Lake, Ontario, on May 13.

On June 12, two painters were killed at Saskatoon, Saskatchewan, when a scaffold gave way.

When an engine was derailed at a switch near L'Epiphanie, Quebec, on April 27, the engineer and fireman lost their lives.

Two workmen were crushed under a safe when it slipped from a moving tackle at Hamilton, Ontario, on June 27.

When a plane crashed into Emma Lake, Saskatchewan, on June 21, the pilot, pilot mechanic, and mechanic lost their lives while engaged in forestry patrol.

### Supplementary Lists Of Accidents:

A supplementary list of accidents occurring during the first quarter of 1933 has been compiled which contains 10 fatalities, of which 3 were in mining, non-ferrous smelting and quarrying, 1 in manufacturing, 1 in construction, 1 in transportation and public utilities, 2 in trade, and 2 in service. Two of these accidents occurred in January, 3 in February and 5 in March.

A further supplementary list of accidents occurring during 1932 has been made. This includes three fatalities of which one was in manufacturing and 2 in transportation and public utilities. One of these accidents occurred in May, 1 in October and 1 in December.

The accompanying table giving the number of fatal industrial accidents in Canada during the second quarter of 1933, classified under groups of industries and causes, appears in an abbreviated form. It takes the place of the

customary quarterly statement which has been previously included in the LABOUR GAZETTE giving a list of the accidents occurring during the period covered and certain particulars as to each.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE SECOND QUARTER OF 1933 BY GROUPS OF INDUSTRIES AND CAUSES

| Cause   | Agriculture | Logging | Fishing and Trapping | Mining, Non-ferrous Smelting and Quarrying | Manufacturing | Construction | Electric Light and Power | Transportation and Public Utilities | Trade | Finance | Service | Unclassified | Total |
|---|-------------|---------|----------------------|--|---------------|--------------|--------------------------|-------------------------------------|-------|---------|---------|--------------|-------|
| A.—Prime movers (engines, shafting, belts, &c.)                             |             |         |                      | 1  | 4             |              |                          | 1                                   |       |         |         |              | 6     |
| B.—Working machines   | 1           |         |                      |  | 3             |              |                          |                                     |       |         |         |              | 4     |
| C.—Hoisting apparatus (elevators, conveyors, etc.)                          |             |         |                      |  | 2             |              |                          |                                     |       |         |         |              | 2     |
| D.—Dangerous substances (steam, electricity, flames, explosives, &c.)       | 6           | 10      |                      | 4  |               |              | 2                        | 2                                   | 1     |         | 1       |              | 26    |
| E.—Striking against or being struck by objects                              |             | 2       |                      |  | 2             |              |                          | 1                                   |       |         |         |              | 5     |
| F.—Falling objects  | 2           | 4       |                      | 8  | 5             | 3            |                          | 4                                   | 1     |         | 1       |              | 28    |
| G.—Handling of objects  |             |         |                      |  | 1             |              |                          |                                     |       |         |         |              | 1     |
| H.—Tools  |             |         |                      |  | 4             |              |                          |                                     |       |         |         |              | 4     |

### Miners' Nystagmus

The Medical Research Council (Great Britain) recently published a report by its committee on miners' nystagmus. This is an occupational disease whose chief symptom is the involuntary oscillation of the eyeballs. It is held to be caused by an insufficiency of light reaching the eye of the miner while at work, and of all measures of prevention it is held that the most important is to secure for the miner's work an adequate illumination.

The report discusses in detail methods of improving illumination in mines. In the treatment of the disease the committee think it is chiefly the psychological factors which need to be tackled. The first essential is a better understanding of its nature, and especially of its analogy with the condition once known as "shell-shock", not only in the similarity of many of the symptoms, but also in the circumstances under which it appears. The arduous nature of the work, the ever-present element of danger (especially in the safety-lamp pits), and the fear of incapacity are circumstances common to both disabilities, and

they are the very circumstances in which an "anxiety state" is easily set up.

"As to what is suitable treatment, the first step is plainly to combat the belief that the psychoneurotic symptoms undoubtedly present can be a direct physical result of oscillation of the eyeballs, for the patient's outlook may well become hopeless when the belief is added that medical science has nothing to offer in the cure of that disorder. Recognition of the validity of the mental symptoms will aid in the removal of their expression in the physical sphere, and at the same time give the patient that confidence in the practitioner without which no help will be acceptable.

"The Committee are strongly of opinion that the practical treatment of the disease from an administrative point of view should consist in the elimination of a hopeless dependence on compensation by the provision of opportunities for work of some kind, the end in view being complete restoration to work underground, under conditions of proper illumination, even if this has to be preceded by a period of work in daylight."

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Liability for Accident Due to Negligence of Fellow Employee

Two men, Lambkin and Morel, were employed as butchers by the proprietor of a meat market at Ottawa. In November, 1932, Lambkin threw down a quarter of beef on a block, causing a large butcher's knife which had been lying on the block to be flipped into the air, with the result that Morel was cut and seriously injured in the arm. Morel claimed damages against his employer. The action was tried at Ottawa by Mr. Justice Armour without a jury.

The learned Justice pointed out that the question arose during the progress of the case, whether, in accordance with the rule laid down in the case of the *Dominion Cannery Limited* versus *Costanza* (1923)\* the action should not be stayed until an application had been made to the Workmen's Compensation Board under section 14 of the Act. The plaintiff had applied to the Board, and the Board found that this was an action, the right to bring which was not taken away by Part I of the Act.

Another question, his Lordship continued, arose under section 122 of the Act. That section provides that the Act shall not apply to the industry of farming or to domestic or menial servants or their employers. The argument was advanced that the plaintiff was a domestic or a menial servant, and that, therefore, the statute had no application to this action, but that it must be dealt with under the common law. "Unhappily, there is no definition in the statute of a domestic or menial servant, and the interpretation to be given to these words must be determined by their ordinary meaning and by the decided cases where they have been considered."

After discussing the origin of the words "domestic" and "menial," the learned Justice continued: "Whether a servant is a menial or not, which it is very often very difficult to decide, must depend on the circumstances of each particular case. The question is one for the jury. Again taking the circumstances to be admitted, another question which would arise would be: Was the plaintiff a domestic or menial servant? Now, whose function is it to draw inferences of fact in such a case? Plainly, it is that of the jury and not of the Judge."

The recent cases on this subject in the Ontario Courts are *Buchanan v. Lashbrook* (1923), (housekeeper or forewoman of the housemaids

in an hotel, a domestic servant); *Jarvis v. Oshawa Hospital*, (1931) (LABOUR GAZETTE, June, 1931, page 730) (pupil dietitian in an hospital not a domestic servant); *Peidl v. Bonas*, (LABOUR GAZETTE, May, 1931, page 622) (farm hand is a menial servant); *Duncan v. Norton Palmer Hotel Co. Ltd.*, (1933) (LABOUR GAZETTE, February, 1933, page 250) (housemaid in an hotel found by the jury to be a domestic servant). Applying the above definitions to the case in hand, upon the evidence the plaintiff was neither a domestic nor a menial servant within sec. 122 of the Act.

"As the accident does not fall to be dealt with under Part I, and the plaintiff is not within the exceptions in sec. 122, the rights and liabilities of the parties must be determined by Part 2, secs. 118 to 121, of the Act. The profound changes made by Part 2 in the law of negligence between master and servant have already been pointed out by Mr. Justice Middleton in his judgment in *Lewis v. Nesbitt & Auld Limited*, (1933). The Act was discussed by Mr. Justice Magee, in his dissenting judgment in *Duncan v. Norton-Palmer Hotel Co. Ltd.* above. In an action of this kind, the defences of common employment and contributory negligence no longer avail the master, but contributory negligence must be taken into account in assessing the damages. (Secs. 120 and 121, and The Negligence Act, 1930)."

On the facts, the learned Justice found that Lambkin was negligent and that the plaintiff also was negligent and that the degrees of fault should be apportioned equally. The amount of the plaintiff's damages was found to be \$2,500 and judgment was entered in the plaintiff's favour for the sum of \$1,250 and the costs of the action.

Judgment was given for the plaintiff for \$1,250 and costs.

*Morel versus Faith* (Ontario) 1933, *Ontario Weekly Notes*, page 563.

### Partnership liable for wages of workman employed by one of its members

The Western Cartage Company of Winnipeg was an association of several partners, some of whom were truck owners and drivers. It was agreed that each partner was to be paid for the work done by his truck, as if he were an independent driver and owner. Bailey, one of the partners, the owner of a truck, employed a driver (the plaintiff). This driver sued for the wages owing to him, and the question arose whether the plaintiff was

\* LABOUR GAZETTE, June, 1932, page 664.

the employee of the partnership, or of Bailey individually.

Mr. Justice Robson, delivering the judgment of the Manitoba Court of Appeal (which reversed the judgment of Mr. Justice Dysart, in favour of the defendant) said: "The plaintiff is a truck driver. He was employed by the defendant Bailey, his work in using Bailey's truck being part of Bailey's contribution to the enterprise. It seems to me that the fact was, and that plaintiff understood it, that Bailey was his employer and Bailey was directly liable to him for his wages. The facts seem to have been sufficiently known to plaintiff to exclude any contention on his part that Bailey had assumed to employ him for the partnership or that Bailey had ostensible authority thereto.

"But the plaintiff has an alternative position under The Builders' and Workmen's Act, (Manitoba). That Act imposes a certain duty on proprietors and contractors to see, for one thing, that payment is made of wages due to the employees of contractors or subcontractors as the case may be.

"The main work done by this partnership was under a contract with the city of Winnipeg... Now if Bailey was not acting as agent of the partnership in employing plaintiff and, as I have already stated, I do not think he was, then he was at least a subcontractor, that is, 'an independent truck driver and owner,' to use the words of the agreement. It seems that the labourers who loaded the trucks were employed by the partnership. Turnbull, the secretary of the partnership, said that he prepared time sheets for these labourers. Being asked why he prepared them he said, 'these men had to be paid' and that it was the city of Winnipeg that demanded the time sheets. He also said there were no time sheets for the truck drivers. It is said the city contract amounted to about \$80,000. So I look on the city work as of such a substantial and continuous nature as to be a contract under the Act wherein the proprietor or contractor as the case may be is required to see that the workmen are paid.

"Now it seems that Bailey had made a general assignment to D. Swail of the moneys to become due to Bailey from the partnership on this work and Swail has been paid \$2,495.71 out of moneys earned by Bailey's truck. There is \$219.49 in the defendants' hands which it is said is held by a garnishee process. Now the answer that is made to the plaintiff's contention under the Act is that he acquiesced in Bailey's assignment to Swail. It is fair to assume from the evidence that plaintiff knew that there was an assignment of

\$1,500 to Swail to pay for the Bailey truck. That was as far as the written assignment went. But it appears very clearly from the evidence that plaintiff knew as the fact was that Swail was advancing to Bailey, in addition to the truck itself, gas and oil and repairs for the carrying-on of the work and that Swail was relying on receipt of moneys from defendants to pay for these accessories and incidentals and it is reasonable to find that such was the intention of the parties and that plaintiff acquiesced therein. I do not think the payments to Swail can be attacked by plaintiff. There is however still in defendant's hands \$219.49 and I see no reason for not applying thereto plaintiff's rights under the Act as above stated. That sum is held by defendants under a garnishee issued by McKenzie, one of the defendants, so he is bound herein and it can now be declared that his garnishee does not affect the \$219.49.

"The appeal should be allowed and judgment entered for the plaintiff for \$219.49. I think the costs below should be allowed to the plaintiff on a County Court basis with counsel fee fixed at \$50 and costs of examinations for discovery. The plaintiff should have the costs of the appeal."

*Loft versus Halliday et al* (Manitoba) 1933, *Western Weekly Reports*, vol. 2, page 581.

### Union Official a "Workman" for Compensation Purposes

The Court of Appeals of the District of Columbia (U.S.A.) recently rendered a decision in a workmen's compensation case involving the status of labour unions as employers and the dividing line between employees and officials. Opie F. Lindsay was the business agent for the Lathers' International Union, local No. 9, Washington, D.C. Acting in this capacity he went to Fredericksburg, Va., to investigate certain charges concerning labour conditions. While returning from Fredericksburg his automobile came into a collision with a passing motor vehicle, and Lindsay received injuries from which he died. His widow filed a claim for compensation under the Workmen's Compensation Act of the District of Columbia. The claim was allowed by the United States Employees' Compensation Commission. The insurance carrier of Lathers' Local Union No. 9 contested the claim on the ground that Lindsay was not an "employee" of the union within the meaning of the Act, but an "official", and consequently not covered by the contract of insurance.

The Supreme Court of this District of Columbia upheld the award of the commission. The insurance carrier thereupon carried the case to the Court of Appeals, whose decision sustained the finding of the lower court. In support of its decision the Court of Appeals declared that the lathers' local union was an

employer, and that Lindsay, when he met his death, was an employee within the purview of the statute, and that at the time of the accident he was the business agent of the union performing duties defined by the union's constitution.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

**I**NDUSTRIAL employment in Canada at the beginning of August showed a further upward movement, according to statements tabulated by the Dominion Bureau of Statistics from 8,261 firms in all lines of industry except agriculture, fishing, hunting and highly specialized business. They employed 804,219 workers, compared with 780,015 on July 1. This increase compared favourably with the large decline reported on August 1, 1932, and exceeded the average advance noted at the beginning of August in the last twelve years. It also brought the index to a point slightly higher than on the same date in 1932, the first time since early in 1930 that improvement has been recorded over the same month in the immediately preceding year. The index (based on the average in the calendar year 1926 as 100), stood at 87.1 on August 1, 1933, compared with 84.5 in the preceding month, and with 86.3 on the same date in 1932. On August 1 of the eleven preceding years, the index was as follows: 1931, 105.2; 1930, 118.8; 1929, 127.8; 1928, 119.3; 1927, 110.5; 1926, 105.5; 1925, 97.5; 1924, 95.8; 1923, 101.4; 1922, 94.2 and 1921, 90.0.

At the beginning of August, 1933, the unemployment percentage reported to the Department of Labour by local trade unions was 21.2 as compared with 21.8 per cent at both the beginning of July, 1933, and August, 1932. The percentage for August was based on the reports tabulated by the Department of Labour from 1,714 labour organizations, with a membership numbering 151,363 persons.

Reports received by the Department of Labour from the offices of the Employment Service of Canada showed that the volume of business during July, 1933, as indicated by the average daily placements effected, was less than that of June, but somewhat higher than the daily average recorded during July a year ago. Vacancies in July, 1933, numbered 28,630, applications 50,397 and placements in regular and casual employment 27,266.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent was considerably higher at \$15.96 for August as compared with \$15.48 for July. The increase was due to the increased cost of foods, chiefly potatoes, eggs, butter, bread and flour. The cost of this budget in August, 1932, was \$16.42; as compared with \$21.90 in August, 1929; \$21.98 in August, 1921; \$26.92 in July, 1920 (the post war peak); and \$14.41 in August, 1914. The index number of wholesale prices calculated by the Dominion Bureau of Statistics showed the first decline during the last six months to 69.4 in August as compared with 70.5 in July; 67.6 in June; 63.6 in February, the low point; 66.7 in August, 1932; 98.4 in August, 1929; 164.3 in May, 1920 (the post war peak); and 66.1 in August, 1914. The decline was due mainly to lower prices for grains, milled products and non-ferrous metals.

The table of monthly statistics reflecting industrial conditions is given on page 873. Employment continued to show further improvement in contrast to the downward movement of a year ago. The figures for car loadings and railroad earnings also showed considerable increases as compared with last year, while production of footwear, newsprint and the output of central electric stations were substantially higher. Financial transfers in the form of bank debits were higher in July than in any month since October, 1930, the increase reflecting the greater activity on the exchanges of Montreal, Toronto and Winnipeg, particularly the latter. Wholesale prices were somewhat lower in August and building and construction continued at a low level as shown by figures for building permits and contracts awarded.

The time loss due to industrial disputes during August was somewhat higher than that recorded for the previous month, the number of workers involved being almost twice as large as in July when only one-half the number of strikes occurred. As compared with August, 1932, while the same number of strikes was recorded, the number of workers involved and the time loss incurred showed a very

steep decline from the same month last year when disputes involving 600 coal miners in Alberta, 800 fur factory workers in Toronto, Ont., and 3,000 men's clothing factory workers in Montreal, P.Q., caused an approximate time loss of 15,000 working days, 12,000 working days and 25,000 working days respectively. There were in existence during the month seventeen disputes, involving 2,526 workers and resulting in a time loss of 18,762 working days, as compared with eight disputes, involving 1,556 workers and resulting in a time loss of 13,775 working days in July. In August, 1932, there were on record seventeen disputes, involving 4,612 workers and resulting in a time loss of 51,815 working days. At the end of the month there were five disputes in progress involving approximately 467 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off by the union.

#### **Industrial Disputes Investigation Act.**

During the past month the Department received reports from the Boards of Conciliation and Investigation established under the Industrial Disputes Investigation Act in connection with disputes between (1) the Winnipeg Electric Company and certain of its employees; and (2) the Canadian Pacific Railway Company and its locomotive firemen and enginemen. Two Boards were established to inquire into disputes respectively between the two principal railway companies and their clerical staffs, and between the Canadian National Railways and (a) certain of their clerks, freight handlers, etc., and (b) their clerks and other classes on the headquarters staff. Particulars of the proceedings under the Act during the month, with the text of the reports mentioned above, are given on page 878.

#### **Death of Hon. G. D. Robertson, former Minister of Labour**

The death occurred in Ottawa on August 25 of the Honourable Senator Gideon D. Robertson former Minister of Labour, after a lengthy illness. The news of his passing was received with widespread regret and tributes to his high character and accomplishments were received from many different quarters.

He was appointed to the Senate in January, 1917, during the administration of Sir Robert Borden, and became a Minister without Portfolio in the Dominion Cabinet in the following fall. In November, 1918, he was named Minister of Labour and continued in this portfolio in the administration of Rt. Hon.

Arthur Meighen until 1921. In 1930 he was re-appointed as Minister of Labour, and in addition to his other duties, was charged with the organization of unemployment relief. During his incessant application to this work, Senator Robertson was attacked by an illness from which he never recovered and retired on account of ill health in February, 1932.

At the age of 19 he had become a railway telegrapher and in 1908 was chosen General Chairman of the Order of Railroad Telegraphers on the Canadian Pacific Railway. In 1915 he was elected International Vice-President of this organization and served continuously in this office—excepting for the period that he was in the Cabinet—until the recent convention of the Order in Montreal last May when he was made a Vice-President Retired.

During his first term of office as Minister of Labour, Senator Robertson was called upon to deal with labour problems of exceptional difficulty and became a successful mediator in numerous labour disputes. The establishment of the Canadian Railway Board of Adjustment No. 1, a permanent organization for the disposal of any disputes arising out of agreements between the operating trades, telegraphers and track men of the Canadian Railway systems and the employing companies, was due largely to his efforts. Among his other achievements as Minister was the establishment of the Employment Service of Canada, and the Technical Education Act, which furnished federal aid towards vocational education in all parts of the country.

Senator Robertson took an important part in the establishment of the International Labour Organization of the League of Nations and served as President of the International Labour Conference at its Sixteenth Session in Geneva, Switzerland, in 1932.

#### **Industrial council for fibre board industry**

An industrial council has been formed at Gatineau Mills, Quebec, one of the plants of International Fibre Board, Limited, a subsidiary company of the Canadian International Paper Company. The Council is composed of six members, three representing the Company and three the workers. The general manager of the plant will act as chairman but without voting power. The Council's function will be to discuss any problems that may arise concerning the mill and to submit to the management recommendations for their solution. The first meeting was to be held on September 11, when a vice-chairman and secretary were to be elected. The representatives of the workers will also select one of their number to serve on a general industrial council made up of repre-

sentatives from all the mills of the Canadian International Paper Company. The meetings of the general council will be held at the head office of the company in Montreal.

The plan is also being applied at the mill of the International Fiber Board, Limited, the Three Rivers mill of the Canadian International Paper Company, and the Dalhousie mill of the New Brunswick International Paper Company. It was recently adopted at fifteen plants of the International Paper Company in the United States.

### Hours of Work Act may be applied to tramways at Montreal

The Hon. C. J. Arcand, Minister of Labour of Quebec, announced on September 5 that the provincial government was considering the application of the provisions of the Hours of

Work Act, 1933, to the motormen and conductors employed on the street railways at Montreal. Negotiations with the tramway company and employees had been, he said, already begun with a view to limiting the working time of these employees to 54 hours in a six-day working week. The purpose in view is to secure more equal distribution of employment among the 2,500 employees of the Montreal Tramways Company. The company's officials admitted that if the schedules were established on a basis of a six-day week instead of one of seven days, the shorter week would better distribute the wages and work available, but they pointed out that according to the terms of its agreement with the men the company was under the obligation of preparing work schedules on a seven-day basis.

The provisions of the Hours of Work Act were outlined in the *LABOUR GAZETTE*, July, 1933, page 695, and the text of the orders governing the building industry in the District of Montreal and in the rest of the Province were given respectively in the issues for July, page 701, and August, page 706. The Act enables the government, by Order in Council, to limit the hours of labour in any industry or trade which does not compete with similar enterprises in other provinces.

### National board to settle labour disputes in U.S.A.

A national board of arbitration has been appointed by President Roosevelt to decide all disputes growing out of labour or industrial problems in the United

States. Senator Robert F. Wagner, of New York, is the chairman, the other members being Professor Leo Wolman, of Columbia University; Gerard Swope, president of the General Electric Company; William Green,

president of the American Federation of Labor; John L. Lewis, president of the United Mine Workers of America; Walter C. Teagle, president of the Standard Oil Company; and Louis Kirstein, of William Filene's Sons, Boston.\* This board has the power "to consider, adjust, and settle controversies arising through different interpretations of the 'blanket code'" (*LABOUR GAZETTE*, August, 1933, page 785).

The *New York Times*, in announcing the establishment of the board in its issue of August 13, stated as follows:—

"The method that will be used by the board in disputes depends upon whether the industry involved has, or has not, conciliation machinery of its own. If it has, the dispute will be referred by the board to the conciliators within the industry. If not, the method will be as follows: On hearing from employers or workers that a dispute exists, the board's first step will be to refer the question to the Board of Conciliation of the Department of Labour. The department will send conciliators into the field to seek an adjustment. If failure meets this effort the controversy will be taken up directly by the Labour Board, or by such central or local agencies as it may establish, in an attempt at arbitration. . . . It is the hope of the National Labour Board that the need for its services may be limited by the setting up in various industries of machinery similar to that in the cotton textile industry. Each industry, it is suggested, might have a national board, with State boards and local adjustment committees in the factories and plants."

### Canadian Garment Manufacturers and the "N.R.A."

The president of the Canadian Association of Garment Manufacturers, Mr. Warren K. Cook attended the public hearings of the United States Clothing industry at Washington in connection with the code of fair practices under the National Recovery Act (An outline of this code appears on another page of this issue). Subsequently, the Canadian Association sent out a questionnaire to all branches of the needle trades, including both members and non-members of the Association. The *Canadian Textile Journal*, in its issue of August 25, states that the questionnaire asks members of the trade if they are in favour of the needle trades industry in Canada promoting an Industrial

\* An account of the plan adopted by this firm of retail merchants for giving their employees a share in management appeared in the *LABOUR GAZETTE*, April, 1930, page 413.

Recovery Bill similar to the one in force in the United States; also if they will support the efforts of the Canadian Association of Garment Manufacturers in making a similar measure effective in Canada. "Views are solicited on the advisability of the leaders of the group drafting a code of ethics, recommending standardization of hours and wages throughout the industry and co-operation with organized labour for the mutual benefit. Suggestions are invited for defining and curing the ills from which the industry has suffered for some considerable time. In brief the questionnaire is an attempt to obtain the views of all manufacturers in the industry on the question of complete economic rehabilitation. It is proposed that this objective shall be achieved through Federal approval of a code of fair trading practices sponsored by the majority of the manufacturers.

"Whether such action," the *Journal* continues, "can or will be supported by the federal or provincial Governments remains to be seen. Group action alone will do much to improve the tone of trading and is the preliminary to legislative action designed to place control of an industry in the hands of the representatives of the majority of its members, or to any measure of co-operation between industry and the state."

Other developments in the same direction were seen in Canada during the past month. While the British Columbia Lumber and Shingle Manufacturers' Association took no concerted action to fall into line with the industry in the United States, it was announced that seven shingle mills had introduced a six-hour working day for their employees. In Ontario a movement originated by the mayor and City Council of Windsor for the adoption of a "fair wage or boycott" policy in connection with civic business, was discussed by several other city councils throughout the province.

#### **Advisory service in industrial hygiene.**

The Division of Industrial Hygiene of Ontario is mentioned in the August issue of *Industrial Medicine* (Chicago) as setting an example to other public departments in providing an advisory service in industrial hygiene. The magazine cites the report of Dr. J. Grant Cunningham on the work of the Division in 1931, where the director describes the examinations made of the conditions of workers exposed to dust hazards: "The findings in all survey examinations are communicated in person to the plant physician. Where the examinations indicate the presence of a hazard, the composite findings

are submitted to the employer with recommendations for the control of the hazard, including subsequent examinations, provided by the employer, where this is considered desirable."

#### **Labour organization campaign in United States**

In order to secure the participation of labour in the benefits of the National Industrial Recovery Act the American Federation of Labor has organized a campaign "to put every worker in a union." Frank Morrison, secretary of the Federation, writing in a special organizing supplement to *Labour* (Washington), August 15, stated as follows: "All wage workers and salaried employees are eligible to membership in the American Federation of Labor through the local unions of the affiliated international unions that have jurisdiction over their respective trades and callings. Where there is no opportunity for workers to establish membership in affiliated national or international unions, or in local unions directly chartered by the American Federation of Labor, they may join with their fellow workers in a local union or a federal labour union of mixed crafts and callings and secure a charter direct from the Federation."

#### **Old Age Pension Act to be effective in Nova Scotia**

The Hon. Angus L. MacDonald, the newly elected Premier of Nova Scotia, announced on September 5, that the first Order in Council of his government was a proclamation making effective the provisions of the Old Age Pensions Act, passed by the Provincial legislature in 1931 (an outline of this legislation appeared in the *LABOUR GAZETTE*, September, 1931, page 982). It provides that in the absence of any special appropriation of the Legislature, the moneys necessary for the purposes of the Act and agreements made thereunder are to be paid out of the Consolidated Revenue Fund of the Province. The Lieutenant-Governor in Council may make regulations for the carrying out of the Act and of any agreement and may appoint a Board of Review with power to determine doubtful cases. Pensions are exempt from taxation and from seizure, garnishment or other legal process and are unassignable. The receipt of a pension does not disqualify the pensioner from voting at provincial or municipal elections.

Nova Scotia is the seventh of the nine provinces of Canada to pass concurrent legislation giving effect to the Old Age Pensions Act of the Dominion (Revised

Statutes of Canada, 1927, chapter 156, amended by Statutes of 1931, chapter 42). The provinces participating in the benefits of the Dominion Act, with the date of their entry into the system are as follows: British Columbia, September 1, 1927; Saskatchewan, May 1, 1928; Manitoba, September 1, 1928; Alberta, August 1, 1929; Ontario, November 1, 1929; Prince Edward Island, July 1, 1933. The Northwest Territories were also brought in by Order in Council dated January 25, 1929. The Act passed by the New Brunswick legislature in 1930 has not yet been made effective by the necessary proclamation.

### **Women's minimum wages in Province of Quebec**

New orders of the Minimum Wage Board, affecting the minimum weekly rates to be paid to female employees in the boot, shoe and other leather trades in Quebec, appear on another page of this issue. The method of the Board in fixing these rates is to divide the Province into zones according to the density of population, the minimum rates being adjusted to correspond with the cost of living in each division. This procedure is also followed in Ontario and other provinces. Complaints had reached the Board that the existing difference in the rates as between the city and the outside districts had re-acted unfavourably on certain industries in Montreal. Accordingly the Board has now reduced the "spread" for the industries mentioned above, reducing the minimum wage for experienced workers at Montreal from \$12.50 to \$11 per week, and raising that for small municipalities from \$8 to \$9. Corresponding changes are made also in the minimum wages payable to apprentices.

### **Settlement of unemployed on farms in New Zealand**

Provision has been made in New Zealand for the settlement of approved persons on small farms in order to relieve unemployment. The Small Farms (Relief of Unemployment) Act, recently passed, authorizes the establishment of a board of three to five members to promote (with the assistance of such local committees as the board may deem necessary) the settlement of suitable Crown lands; or where in the opinion of the board sufficient areas of unoccupied Crown lands are not available for the purposes of the Act, the board may make arrangements for the acquisition by the Crown by way of purchase or by way of lease with the right of purchase of suitable areas of private land or for the resumption of suitable areas of Crown lands held under lease or licence. If in the opinion of the board any land suitable

for occupation under the Act is not being adequately used, that land may (subject to the right of the owner or occupier to appeal to a magistrate) be compulsorily acquired for the purposes of the Act. Lands acquired or resumed under the Act are to be leased with right of purchase to approved persons, or the board may arrange for the grant of a lease from a private owner to an approved person as lessee. The Board must fix, within the limits laid down by the Act, an annual rent payable under such leases after arranging for a valuation of the land to be made. The rent payable during the first four years of the term of any lease granted under the provisions of the Act may in case of default by the lessee be paid out of the Unemployment Fund.

### **Relief work in Victoria, Australia**

A special relief works scheme is now in effect in the State of Victoria, Australia, for the purpose of providing employment for about 20,000 men. Its object is to eliminate as far as possible the payment of sustenance allowance and to provide instead relief in the form of wages for work performed. The works undertaken will be financed entirely from funds that would ordinarily be applied to the payment of sustenance allowance, and the scheme will involve no increase in taxation. The basic wage of the municipality in which the men are engaged will be paid, varying from 9s. 10d. to 10s. 4d. a day. Unemployment men who are not physically fit will continue to draw sustenance, but those who are fit and who elect to do relief work will receive larger benefits in cash. It is proposed to pay single men 3s. a week more than those on sustenance and married men 4s. a week more, with 2s. 6d. for each child under 16 years and 5s. for each child over 16 years. The work will be rationed, and the men will as far as possible be given continuous work involving no broken days.

It is estimated that about 80 per cent of the men now drawing sustenance will be physically fit to participate in the plan; it was to be tried for a period of three months, starting if possible on July 1, 1933, and at the end of that time will be reviewed and modified in the light of the experience gained.

### **Progress of industrial safety in past century**

On the occasion of the centenary of the first appointment of factory inspectors in Great Britain in 1832 the Chief Inspector of Factories and Workshops, in his report for 1932, reviews the progress in accident prevention during the past hundred years. He

points out that new processes, new machines, and new sources of power are constantly being introduced, with the result that there are always new problems to be met. For example, the greater use of electricity has brought with it special dangers, unthought of even a quarter of a century ago. Again, as one industrial disease is conquered, or at least disarmed, another arises to be fought. The old prevalent scourges of lead poisoning, phosphorus necrosis, and anthrax have been largely overcome, only to be replaced by other diseases, such as occupational epithelioma and silicosis, the existence of which was only dimly appreciated until recent times.

On the subject of accidents, the Chief Inspector remarks: "Accidents still exact far too heavy a toll, though there are signs that (leaving out of account the last two years, in which trade depression has materially affected the figures) the general level of fatal accidents is lower than formerly. From 1902 to 1914 the numbers varied from about 1,000 to 1,300 per annum, and in 1920 the highest number ever recorded (1,404) occurred; from 1921 to 1930 these were consistently fewer, the numbers ranging from about 840 to 980. Any similar comparison for non-fatal accidents is invalidated by the successive changes in the standard of notification. . . . Again the cases of poisoning notifiable by medical practitioners under section 73 of the Factory Act of 1901 are now far less numerous, notwithstanding successive extensions to new diseases and the presumably higher standard of reporting. From another aspect the fact that within recent years the number of prosecutions has greatly declined, and was, for 1932, one half of the number in 1902, may be taken as a favourable sign."

The Chief Inspector observes that the standard of factory conditions in Great Britain was long in advance of, and is still equal to, that of any other country; this could never have been achieved by the efforts of a small body of Government officials alone, without the willing compliance, help, and friendliness of the employers and workers actually engaged in industry. "The main function of the (factory) inspector to-day is instruction (on matters within the law) and advice (on matters outside the law), rather than compulsion."

The Ontario Government recently issued an order, to take effect on September 1, increasing the rate of pay in the construction relief camps in Northern Ontario from \$5 to \$10 a month, with board. Between 40 and 50 of these camps are located in the north, the majority of them being scattered along the links of the projected trans-Canada highway.

The cost of living in the United States declined 2.9 per cent between December 1932 and June 1933, according to the semi-annual survey by the Bureau of Labour Statistics. Food decreased 2 per cent; clothing, 1.4 per cent; rents, 7.8 per cent; fuel and light, 5.4 per cent; and miscellaneous items, 2.4 per cent; while house-furnishing goods increased 0.2 per cent. Comparing June 1932 with June 1933, there was a decrease of 5.5 per cent in cost of living as a whole.

A survey of 8,722 persons employed on made work in Philadelphia showed considerably over 90 per cent of men jobless because of business conditions beyond their control. Most of the workers had lost their jobs toward the close of the summer of 1930. Approximately 94 per cent had become unemployed since the summer of 1929. The previous wages of these workers compared quite favourably with the wages of others in similar occupations in the State. About 40 per cent of the whites and 60 per cent of the Negroes had had to resort to charity before they obtained made work. The outstanding conclusion of the investigators is that planned co-operative group action is essential for dealing effectively with problems of unemployment and destitution.

Members of the medical profession in the Province of Quebec have chosen a committee of six members, to act as "liaison" between the profession and the Quebec Workmen's Compensation Commission in matters pertaining to medical services rendered under the terms of the Act. The committee consists of Dr. P. C. Dagneau and Dr. A. Rousseau, of Quebec; Dr. A. T. Bazin, Dr. B. G. Bourgeois, Dr. F. A. C. Scrimger and Dr. E. Trotter, of Montreal. The new committee will be officially recognized at the next meeting of the Medical Association of the Province of Quebec.

Compulsory labour service for all young men in Germany will begin on January 1, 1934. Physical disability is reported to be the only ground for exemption. Each one subject to the service will be required to work 6 hours a day for 6 months. One or two hours are to be given to instruction in political science and certain periods of the day to sports and recreation. Clothing, food, shelter, and all necessary equipment are to be furnished by the Government. No wages are to be paid, but a few cents per day will be given for "pocket money." The men will be engaged on various kinds of public works, including reforestation.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**D**URING the month of August the Department of Labour received the reports of two Boards of Conciliation and Investigation established under the provisions of the Industrial Disputes Investigation Act to deal with disputes between (1) the Winnipeg Electric Company and certain of its employees being motormen, conductors and busmen, and employees of the mechanical, track and gas production departments, and (2) the Canadian Pacific Railway Company and certain of its employees being members of the Brotherhood of Locomotive Firemen and Enginemen.

Two Boards of Conciliation and Investigation were established by the Minister on August 28 to enquire into disputes between the two principal Canadian railways and their clerical staffs, arising out of a further 10 per cent wage deduction proposed by the companies in addition to the 10 per cent deduction already in effect i.e., a total deduction on the pay-rolls of 20 per cent from wages calculated at the schedule basic rates of pay. Three thousand employees, being clerks, freight handlers and station employees, and subsidiary groups are involved in the dispute with the Canadian Pacific Railway Company. The personnel of the Board in this case is as follows:

Mr. Lynn B. Spencer, K.C., of Welland, Ontario, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Messrs. George S. Currie, of Montreal, and W. F. O'Connor, K.C. of Toronto, nominees of the company and employees, respectively.

The other Board was established to deal with two applications which had been received from the Canadian National Railways, embracing approximately 5,100 employees, being (1) clerks, freight handlers, labourers and miscellaneous classes as per system wage agreements of August 1, 1929, employees of the ferry service between Tormentine, N.B., and Borden, P.E.I., and the wharf employees at Halifax, N.S., and (2) clerks and other classes on the headquarters staffs. The membership of this Board is as follows: The Honourable Mr. Justice Louis Cousineau, of Aylmer, P.Q., chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members, Mr. F. C. Dobell, of Montreal, nominated by the employer, and the Reverend Russell McGillivray, of Ottawa, nominated by the employees.

### Report of Board in Dispute Between the Winnipeg Electric Company and Its Employees

The Board of Conciliation and Investigation established on May 1 to deal with a dispute between the Winnipeg Electric Company and certain of its employees being motormen, conductors and busmen, and employees of the mechanical, track and gas production departments, forwarded its report to the Minister of Labour on August 12. The dispute related to the company's proposal to reduce wages and effect certain changes in working conditions, 990 employees being directly affected. The composition of the Board was as follows: the Honourable Mr. Justice A. K. Dysart, Winnipeg, Manitoba, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members, Messrs. Ernest T. Leech, K.C., and Allan Meikle, both of Winnipeg, nominated by the company and employees, respectively.

The report of the Board deals in some detail with each phase of the dispute and is signed by all three members. The Board's recommendations as to wage rates are contained in supplementary paragraphs signed by the chairman and Mr. Leech. Mr. Meikle

dissents from the recommendations concerning wages and also concerning the contracting out of the St. Mary's Road bus service and has submitted a minority report on these subjects. Following is the text of the Board's report and of the minority report.

#### Report of Board

WINNIPEG, MANITOBA,  
August 12, 1933.

The Honourable, Minister of Labour,  
Ottawa.

SIR,—The Board of Conciliation and Investigation established by you on May 17, 1933, to deal with disputes between the Winnipeg Electric Railway and certain of its employees engaged in its:

- (a) Traffic Department
- (b) Mechanical Department
- (c) Track Department
- (d) Gas Producing Department

having now completed their work beg to submit herewith their report.

The Board, consisting of Mr. Ernest T. Leech, K.C., of Winnipeg, appointed on the recommendation of the employer, Mr. Allan Meikle, of Winnipeg, Manitoba, appointed on the recommendation of the employees, and the Honourable Mr. Justice A. K. Dysart, of Winnipeg, appointed third member and Chairman of the Board, held their first meeting on May 20 for organization purposes.

Attempts to effect conciliation were then made, but were soon abandoned as hopeless.

The Board then invited the parties to produce evidence and argument in support of their respective contentions, and the first meeting for this purpose was held on May 25, and the parties appeared by their representatives as follows:—

For the Employer: C. H. Dahl, L. Palk and R. R. Knox.

For the Employees of the Traffic Department (Motormen, Conductors and Busmen, 675 in all): Alex Hume, E. Armstrong, R. B. Russell.

For the Employees in the Mechanical Department (200 in all): A. Hume, W. S. McLean, S. Johnson.

For the Employees of the Track Department (75 in all): A. Hume, J. Lowesky, P. Kosman.

For the Employees of the Gas Department (40 in all): R. B. Russell, L. Tofts and E. Maturin.

The hearings continued quite regularly for several weeks, but not continuously, and there were several adjournments of considerable length made at the request, and for the convenience, of the parties. The whole period covered by the sittings extended over many weeks.

During the course of these hearings two new questions, both outside the scope of our original submission, arose, and, with your authority or approval, were dealt with, and are included in this report.

These are (1) Alleged breach by Company of existing wage agreement. (2) St. Mary's bus route.

The nature of the investigation was such that it called for an examination of the whole financial structure and operations of the Company in both the Railway utility and the Gas Producing Departments. This breadth of the scope was necessitated by the Company's demand for a reduction of wage rates based on its financial inability to continue paying present rates—a demand that was vigorously resisted by the employees whose demand for increased rates was predicated upon the Company's ability to pay same. In addition to the

wage question common to all the employees, each of four departments presented a list of other matters calling for decision, some of them involving considerable investigation and material. In all more than one hundred exhibits were filed, many of them voluminous and complicated, being subjected to elaboration by the one, and to scrutiny by others, of the opposing parties. After conclusion of evidence and argument the Board found that a proper consideration of the material scattered all through these exhibits involved much work and consumed a great deal of time.

In dealing with the matters specifically, it will be convenient to deal first with each Department in turn touching on the questions relating respectively to these Departments, and then to deal generally with those matters which are common to these Departments.

### *Traffic Department*

The first brief submitted by the employees of this Department sets out a list of the changes or improvements now desired by these men, as follows:—

(1) The employees are asking that the wage rate of 1931 be restored.

(2) That 12 days' holidays with pay be granted each year commencing with the year 1933.

(3) That all busses be equipped with adjustable seats.

(4) That all runs be posted for selection, including change off crews and relief men.

(5) All bus works, including chartered work, not now on the sign-up sheets be given out according to seniority.

(6) That the furnishing of Bond for \$40 Working Fund be granted.

(7) The providing of ticket holders, free of charge, by the Company.

(8) Change in Regulations governing uniforms.

(9) Schedules to conform to seven-hour day.

(10) The spread-time be reduced from thirteen hours to eleven hours.

(11) A lay-in time of three minutes on each trip at the end of the route.

(12) Change in Motor Bus operation.

(13) Change in regard to backing up of cars at any time without a conductor in rear-platform.

(14) Extra facilities for the purchase of tickets.

(15) A change in the grievance clause.

Dealing with these requests seriatim:—

Item (1) "Wage rate"—This will be considered later in this report.

Item (2), "Holidays with pay".—This likewise will be dealt with later.

Item (3), "All busses to be equipped with adjustable seats."—The Board are of the opinion that this would be a convenience to the men, adding to their comfort if not to their efficiency, and can be effected without very great expense. We recommend that the Company comply with this request as soon as its finances will permit.

Item (4), "That all runs be posted for selection."—This means selection under seniority rule. So far as we can learn this rule is fairly well observed at the present time, but as this is a matter which affects the good relationship amongst the men we recommend that in future the rule be observed more closely.

Item (5), "All bus work, including work not now on the sign up sheets, be given out according to seniority."—The Company claims that this is now done, according to the Seniority Rule, which itself makes all seniority preferences "subject to efficiency," and that the question of efficiency for bus work is a matter for the Company to decide. As against this, the men claim that the rule is not always observed and that efficient bus drivers have been passed over in favour of junior drivers. It is admitted that efficiency goes further than mechanical ability to operate the mechanism of a bus and has to do somewhat with the appearance, address and other qualifications of busmen. The Board think that any complaints as to the application of the Seniority Rule in this connection may properly be taken up by grievance committees.

Item (6), "That the furnishing of a bond for \$40 Working Fund be granted."—The purpose of this request is to meet possible losses from Motormen and Drivers robberies while on duty. Such robberies are of so rare occurrence that the Company takes the position that the cost of furnishing such bonds would be greater than the actual loss sustained through such robberies, and that it prefers to take the risk of such loss rather than to furnish the bond. In no case does it attempt to hold an employee liable for such loss if he is innocent. The Board are of the opinion that the Company should not be required to furnish such Bonds.

Item (7), "Providing for ticket holders free of charge by the Company".—This will be a convenience to the motormen especially of one man cars, but at the present time there are many types of such holders, and the Company, while willing eventually to provide holders, prefer to wait until some standardized type of holder is available. The Board will recom-

mend that as soon as such holder is available it be supplied to the men.

Item (8), "Change in regulations governing uniforms".—The men ask for relaxation of the rules respecting the use of uniforms while on duty. This is a small matter that the Board feel will now be adjusted satisfactorily. The Company's assurance that this will be done satisfies the Board on this point. A larger question in connection with uniforms, however, is that the Company desires to reduce the number of uniforms, or the frequency with which it has been supplying uniforms to the men, and to do away with pea-jackets, and to furnish overcoats only once in every three years instead of in every second year. The Board are of the opinion that if any substantial saving can be effected in this way the men should co-operate with the Company to that end. Neatness in appearance is in the interests both of the Company and of the men. Warmth and comfort of the men is likewise in the interests of efficiency. We feel that the change as recommended in this respect should be at least given a trial especially in view of the Company's financial difficulties.

Item (9), "Schedule to conform to seven hour day".—The last agreement in force, which expired January 31, 1933, but which in at least most respects has been continued in force pending the disposition of this dispute, provides for two schedules of rates of wages—one based on a seven hour day and another, a lower one, on an eight hour day. The men, having the choice in the matter, have elected to work the seven hour day, in order most commendably to distribute the available work over a larger number of men. This they have done on the lower eight hour schedule of rates. They now ask that in future the seven hour day with its correspondingly higher wage rule be universally adopted in this service.

The Company takes the position that it has no objection to the men working the seven hour day, provided that the hourly rate of wages is not thereby increased over the rates which would prevail on an eight hour day basis. Without at this point dealing with the general question of wage rates, the Board agree with the Company's position in this matter that the men may elect to work the seven hour day provided such election does not impose on the Company any increase in the unit cost of such work.

Item (10), "That spread time be reduced from 13 hours to 11 hours."—"Spread time" is the period during which the employee does his day's work—the period between the beginning of the first run and the end of the last

run. The runs aggregate the day's work. Thirteen hours is a long period within which to do seven or eight hours' work, and the Board recommends that as far as possible this period be reduced to eleven hours. This recommendation is put forward in the hope and belief that if acted upon it will improve the comforts of the men, without seriously affecting the efficiency of the Company's service.

Item (11), "A lay-in of three minutes at the end of each trip at the end of the route."—"Lay-in" time means a period at the end of a run, to elapse before the return trip is begun. It is intended to allow ample time for the performance of duties incidental to beginning the return trip—turning the car, or reversing the trolley, changing signs and other matters. The men request that three minutes be allowed them for this purpose. The Company maintains that lay-in time is impracticable and in many instances is out of the question—for instance, where a trip ends in a down town section of the city, or where a trip ends with a loop. To allow lay-in time in the one case would impede and hold up traffic intolerably, and in the other there is no occasion for it. In all, there are relatively few runs on which this request could reasonably apply, and even then the necessity of same could be avoided by the construction of loops at those places. The Board therefore recommend that loops be constructed as soon as the Company's finances permit.

Item (12), "Change in motor bus operation." At the present time the Company train a certain number of its employees for operating busses. The employees ask that all men who so desire be so trained. The Company says that there are now more men so trained than can be employed. This statement is not denied. In these circumstances the request of the men ought not to be pressed, but the existing agreement should stand in this respect.

Item (13), "Change in regard to backing up of cars at any time without a conductor on the rear platform." The backing up of one man cars is occasionally attended with danger, and this is recognized by the Company. The danger is very slight in and around the barns where people are familiar with car operations, but is greater at the end of routes where cars are turned on "Y's." Still the cost of maintaining a competent person at each "Y" to guard in backing cars is an expense that the Company is unwilling to undertake. In the history of the operations very few accidents have occurred in such backing, and, while the Board do not feel that the

men should be called upon to be instruments of inflicting injury to others in the course of dangerous operations, we feel that, in its present circumstances, the Company ought not to be called upon to provide such service. After all if the car operator is careful any responsibility for accidents is on the Company or the person injured.

Item (14), "Extra facilities for the purchase of tickets." Street car tickets are now available for the conductors and motormen and busmen at two car barns, one in the north end of the city and the other near the south end of the city. Tickets are available and may be purchased in the morning before the runs or at the end of the day for the ensuing day's run. There is no occasion for providing extra facilities for those who have the first and last runs during the day. But there are many runs during the course of the day which begin and end in parts of the city far removed from said barns. The men ask that facilities be provided in the Company's main office at the corner of Notre Dame and Portage for the sale of tickets to the men who work on these day trips. The Board think that such service might be provided with a little or no additional expense to the Company and recommend its installation. At the same time they record their views that such facilities if provided ought not to be abused.

Item (15) "Change in grievance clause." At the present time considerable inconvenience is entailed on the employees who live in the suburbs of the City by having to report in their off time in connection with any complaint that may be received against them. The men urge that more consideration be shown them as to the time of reporting for such complaints, especially if the complaint is of a trifling nature or if the complainant has not disclosed his name. They also maintain that complaints ought not to be entered up in their record sheets unless fully proven; and that where a complaint once made is denied by the employee, the matter should end there and not be recorded against him unless the company proves the charge. We think the contention of the men fair and urge its acceptance by the Company.

Where an employee is detained from his work to answer a charge under investigation against him, he should be paid for the time he so loses from such work unless the charge is proven.

#### *Pull-out and Pull-in Time*

The Company asks that the ten minutes now allowed for pull-out time and the five minutes now allowed for pull-in time be elimin-

ated from the working period for which its men are paid. The Board think that the request is on a par with the men's request for holidays—that in the last analysis rates of pay for actual hours of work could cover this item. But the men much prefer to have this result attained in this its present form, and the Board acquiesce.

#### *Mechanical Department*

The Brief for the Mechanical Department contains a list of matters which the men press to have embodied in an agreement as follows:—

A. Restoration of the wages in effect prior to February 1, 1932.

B. Two weeks' holiday each year with pay.

C. Introduction of a classification to be known as "Car Wiremen Helper", and rates of pay for same.

D. Increase in rate of pay for "Sheet Metal Worker".

E. Introduction of a classification to be known as "Sheet Metal Worker's Helper", and rates of pay for same.

F. Increase in rate of pay for "Motor Repairmen" of box type motor.

G. Introduction of classification to be known as "Motor Repairmen's Helper", and rates of pay for same.

H. Introduction of classification to be known as "Pipefitters Helpers" and rates of pay for same.

I. Changes in Clause "Hours of work".

J. Introduction of new section to be known as "Conditions Governing Hours of Work".

Here again items A and B, restoration of wages and establishment of holidays, will be dealt with later.

Items C, E, G and H, proposed new classifications of helpers and rates of pay for same. The whole question of mechanics and their helpers has been fully discussed and considered and it seems to the Board that all "Mechanics" properly so called while doing mechanics work, should draw uniform rates of wages. And further that all "helpers" properly so called while doing the work of a helper, should likewise receive uniform rates of pay. We recognize that in the organization of the Company's shops many men are moved around from work to work as the circumstances require. We recommend therefore that the Company and its employees should get together and agree upon what work may properly be classed as "helper's" work. We realize that much of the rough work or assistance given a mechanic is not properly the work of a "helper", as such, but rather that of a labourer; the distinction between a labourer helping

a mechanic, and a helper assisting a mechanic ought to be defined, and can only be defined as far as the Board is concerned by the parties themselves based upon general usage and understanding in the various trades. The ratio between mechanic's rate of pay and the helper's rate of pay in several departments now existing seems to be that the helper receives about sixty per cent of the mechanic's rate. The introduction of such classifications and rates, however, would have to be safeguarded by some proviso that no helper's work would be paid for as such unless it continued for some definite concrete period, say, one or two hours at a time.

In connection with the introduction of helper's classification, the company have expressed a willingness to admit two of them provided the men accept two other classifications of helpers, namely, carpenters' helpers and painters' helpers. A painter's helper would eliminate the present classification of brushman. The Board are of the opinion the classification of mechanics and helpers should be applied uniformly in all the recognized trades in harmony with the practice in many other shops.

Item "D" proposes to place sheet metal workers in the class of mechanics with mechanics' rate of pay. Under the existing agreement sheet metal workers get a rate lower than mechanics—but this is because of historic development of this job in the Company's shops. The Board think that sheet metal working is a recognized mechanical trade, and should be so treated.

Item "F" proposes an increase of the pay rate for Motor Repairmen. This is admitted by the work of a "specialist" and stands between the shop mechanics on the one hand and helpers on the other. Motor Repairmen now get about seventy per cent of a mechanic's rate of pay, and the Board think this percentage or ratio should be increased but must leave the parties to settle the precise rate.

Item "G"—"Introduction of classification of Motor Repairmen's helpers." The Board cannot see any place for this classification in the present organization of the Company's shops.

Item "I"—Changes in clause "Hours of work." With a shortened day the men desire that their work time and their spare time shall be better segregated or grouped, so as to afford longer periods of off time. This request being reasonable, being a matter of convenience for the men, and so far as it can be arranged by the Company without dislocation of service ought to be acceded to.

Item "J"—"Conditions governing hours of work." This item proposes to introduce several

clauses for the convenience of the men relating to minor details in work. What has been said in respect of Item "I" applies here. If these matters can be adjusted to suit the men without inconveniencing the Company's operations we feel that same should be recommended.

Item: The classification of Pitmen helpers needs mentioning. The evidence shows that the pitmen's helper does work of similar quality and importance with that of the Pitmen leader, but has not the responsibility for the work. For that reason he receives a rate of pay higher than other helpers, and in order that possible misunderstanding may be cleared up we recommend that "pitmen helpers" be eliminated as a class of workmen, and that hereafter the pit crew consist of two men, pitmen leader and pitmen.

#### *Track Department*

The men in the Track Department have made a few requests. Of course, they resist the proposed wage cut and ask for an increase of pay and also for holidays with pay, but they ask for no other changes which require special consideration, and therefore their case is disposed of for the moment and included in the whole treatment of the two subjects of *holidays with pay and rates of wages*.

#### *Re Gas Department*

The men of the Gas Production Department have submitted a number of complaints in addition to the general request for an increase of pay. These complaints are generally of a very minor nature and many of them had not been brought to the attention of the higher officials of the Company. The discussion on these points, however, satisfies the Board that the Company and the men may well be expected to adjust these minor differences without any special recommendation from the Board. There therefore remains in connection with this Department only the question of holidays and rates of wages which will be treated in a general way separately.

#### *Re Alleged Breach of the Wage Agreement Pending Sitting of the Board*

While the Board was in process of sitting the men of the Traffic Department introduced the subject immediately following May 31st pay-day. The complaint was that the Company had failed to recognize the summer schedule in the wage agreements of 1932, which schedule was to have come into effect on May 1st, and the first payment in respect thereof on May 31st. The men allege that the written agreement with all its terms had

been continued by arrangement pending the sittings of the Board. The Company's answer was that nothing had been continued except the rate of wages in effect at the time, that is, the winter rate, the winter rate being about 4c. per hour lower than the summer rate. The matter was discussed as to the jurisdiction of the Board to deal with the matter and was referred to your Department, and finally after an exchange of telegrams the Board were authorized by you to deal with the matter as part of our general submission. Evidence was then fully gone into and argument heard. It is true that the first letter from the Company to the men referring to the termination of the then existing agreement did state that the present rate of wages would continue until a new schedule was arrived at. This phrase "present rate of wages" was apparently interpreted by the men as meaning the whole wage agreement, and in a subsequent letter of March 31st of the Company to the men reference was made by the Company to the previous understanding, that the agreement does say to continue in force, and this confirmation was subsequently repeated. Moreover, in another Department, namely, the Track Department, a somewhat similar agreement had been in force with winter and summer schedules of rates of wages, but in that case the summer schedule being the lower; and in this Department the Company had on April 15th put into effect the lower or summer schedule of rates which the men accepted without protest. This action in respect of the Track men added to the other evidence convinces the Board that the men's understanding of this temporary arrangement is the correct one and what was meant, and what was done, was that the wages agreements of 1932 were continued in force after their expiration date, January 31st, 1933. In all respects the Board therefore hold that the men were entitled to the summer rates of pay under the Schedules in the Traffic Men's agreement.

It is only fair to add that the Company's officials in acting as they did respecting wages believed they were acting within their rights and the understanding that had been arrived at.

#### *Re St. Mary's Bus*

At a late stage in the hearing the men introduced a further complaint that the Company had contracted out one of its suburban services. For some time the Company had been operating a bus service on St. Mary's Road in the Municipality of St. Vital, a suburb of Winnipeg, under contract with the Municipality.

pality. The annual loss from the operation was said to reach \$16,000. The Company being very anxious to rid itself of this burden but being unable to discontinue the service altogether because of this contract with the Municipality, entered into a contract with a local citizen under which agreement the Company agreed to pay him a bonus of \$3,000 a year for operating the bus. This contract has been carried out ever since. The men's contention is that, while the Company have the undoubted right to discontinue any service it may please, it has no right to sublet or contract out the service. In any event they claim this particular contract was a subterfuge and in substance the Company are still operating the route under the name of this citizen.

The Board (Mr. Meikle dissenting) are of the opinion after having listened to all the arguments upon the question that the Company was within its rights in entering into the agreement in question. It certainly had the right to discontinue the service altogether. It had a right to do everything legitimately within its power to eliminate the annual loss on the operation. The contract in question is clearly a good contract on its face, and the Company's statement that it represents the real facts is accepted as correct. The majority of the Board think that the men have no just cause or complaint in respect of this matter, and certainly that they have no rights to be allotted runs over this bus line on their seniority basis as they claim.

#### *Holidays with Pay*

The employees ask for twelve days' holiday per year with pay. The Company are willing to accede to the twelve days' holiday but without pay. The employees point out that employees in all clerical and most other mechanical departments are allowed holidays with pay, and they urge holidays as a matter of justice and efficiency to themselves. Those employees who would take holidays now without pay are loathe to do so because of the known fact that some of their fellow-employees will not take such holidays but desire to secure advantage of continuous work. The compulsory element in this request for a holiday with pay is aimed at these employees. After fully canvassing the situation and considering it from all angles the Board have come to the conclusion that the request for holidays is in effect a request for an increased rate of pay; and that the increase, if granted, would not apply equitably to the Company, nor amongst the employees themselves. For instance, twelve days' holiday is equivalent to

two weeks' work, which would be four per cent of the remaining fifty weeks' working period in each year, so that the employee who works for fifty weeks per year, his holiday would mean an increase of four per cent in his wages. But because the holidays requested are arbitrarily fixed at two weeks, the employee who works only part time of the year, say one-half of the year, would receive double that rate of increase in his pay. The illustration might be pursued. In any light in which it may be viewed it means an increase of pay inequitably levied and administered.

The only way in which a fixed holiday could be applied fairly would be for it to follow immediately upon the completion by each employee of a period of say fifty weeks' work, a period that would have no regard to the calendar year. But while that is not the men's request they might accept it.

In any view every employee would be under the necessity of earning in fifty weeks sufficient to provide for his wants for the fifty-two weeks per year. In other words, this means fewer hours per year, and involves by implication correspondingly higher hourly rates of wages. This statement is made in regard to the ultimate effect of such holidays rather than of its immediate effect upon the questions before us.

On the other hand the Board do feel that the men are entitled to holidays, and if this were made compulsory, and the general rate of wages made satisfactory, the men could afford to take a holiday without either receiving or inflicting injustice, but in the circumstances can make no recommendation.

#### *Rates of Wages*

The Company request a decrease in the rates of wages based upon the four following propositions:—

(1) The Company's financial position is such that it is unable to continue paying the present wage scale.

(2) The cost of living has been reduced more than 30 per cent since the maximum rates were re-established in May, 1929, so that a decrease of 20 per cent in nominal wages or salaries of its employees will not involve any decrease in "Real Wages," and consequently the reduction will not adversely affect the employees' standard of living, as compared with 1929. In fact, the standard will be considerably higher.

(3) In a period of improved business conditions, the Company made possible a better standard of living for the men and did not

take advantage of the cost of living index to reduce their wages to the degree the drop in this index warranted. It therefore feels that general business conditions should be a factor in adjusting wages downwards as well as upwards.

(4) In asking the employees to accept the 20 per cent decrease in wages from the basic rate (rate in effect May 1st, 1929, to January 31st, 1932), the Company is simply doing what has been done generally elsewhere, the general trend of wages all over the world being downward.

The men's counter proposal for an increase of wages is based upon grounds which are practically the opposite of these four set forth by the Company. This means that the said four grounds are subject to controversy which need special consideration.

As to the first ground: the Company's financial position. The gross earnings of the Company from its Railway utility decreased in the four years 1929 to 1932, both inclusive, from roughly \$3,710,000, to \$2,950,000, a decrease of \$760,000; and its operating expenses during the same period decreased from \$2,715,000 to \$2,320,000, that is, \$395,000. Stated in another form the annual net earnings decreased from \$995,000 to \$630,000, a decrease of \$365,000 in four years, or an average of more than \$91,000 per year. For the current year the records of the Company show that this decrease has not in any way abated but rather accentuated, and the Board see no indication of any immediate improvement.

Included in the operating expenses of the road are the wages paid in all Departments aggregating \$1,456,000. This item is not in any degree nor in respect of any persons controverted. There is further an item of power costs which has been criticized by the men as excessive.

#### *Power Costs*

The Power used by the Railway Utility is supplied from other Departments of this Company, and from other closely associated companies.

Dealing with this subject we find from the financial statements that in 1932 the Company purchased its power at 77 mills KWH.AC. or a total for the amount consumed of \$267,000. The men claim that the rate of 77 mills is excessive, and that it should not exceed 65 mills. They base this contention upon the Bunnell report, exhibit 9, made in 1931 by experts, and since reviewed and considered by the Municipal and Public Utility Board of this Province. For some time prior to the Bunnell Report the rate charged for power was 40 mills. This was on a basis of the railway utility

owning part of the power plant, and therefore contributing to its overhead as part owner. The Bunnell report, analyses the situation so as to separate the railway utility from the operation of the power plant, and fixes a fair and reasonable price for the power at 65 mills as above stated. The extra charge which the Company now makes and which brings the total of power cost up to 77 mills is the Railway Utility's proportion of the cost of maintaining and operating sub-stations in or about the City of Winnipeg. A statement submitted for the costs of this item over the period of the four years 1929 to 1932 shows a yearly average higher than that charged in the last two years, which, as stated, is now 12 mills. After hearing all that was said for and against the reasonableness and propriety of this charge the Board are unable to say that the charge is not justified, and therefore must be allowed to stand.

The men make further objection to the power costs on the ground that electric power is sold to other customers of the power company at prices substantially lower than 77 mills; as low in some instances as 50 mills. The Company admit that there may be such instances of lower prices to customers, but explain the price as being based on a different load factor than that used by the Railway Utility. As is well known load factor is an important element in fixing the price. The Company also admit that in order to maintain its position in the competitive field it has had to meet the competition of the City Hydro Electric Power System, with the result that it has in many cases been compelled to sell power cheaper than it otherwise would. This particular branch, however, has only an indirect bearing upon the reasonableness of the price paid for power for the Railway Utility and, we think, has not been developed to a point of having any real significance.

Other items included in the operating expenses objected to by the men are neither large in amount nor very definitely attacked, and no further mention need be made to that here.

Turning now to the other charges that should properly be made against the net earnings we find the following:—

"A"—Depreciation.

"B"—Taxes.

"C"—Bond Interest.

"D"—Dividends on Preferred and Common Stock.

#### *Depreciation*

Depreciation has been arbitrarily fixed and applied by the Company on the basis of the Bunnell and other reports said to be scientific

and generally, if not universally, accepted. According to the percentage so indicated the depreciation allowed on the Railway Utility plant for the year 1932 is \$298,000 odd. This is somewhat higher than the average of the said four year's period ending 1932.

Depreciation is both a practical and theoretical matter. Depreciation is a fact the extent of which can only be estimated on general averages, unless definite valuations are periodically made. If such valuations were made the actual depreciation might be estimated. In the absence of valuations the general life of a plant and its various departments is estimated and lumped and averaged. No actual valuations have been made in this Company, and so the depreciation has been set according to rule as above stated.

It must, however, be evident that the actual amount of depreciation of a plant after a period of years depends materially upon the amount of repairs that have been from time to time effected. The more nearly a property is kept up to a state of perfection by continuous repairs the less will be the actual depreciation. And the converse is likewise true. In 1932 the Company expended \$213,000 on repairs, and it is contended by the men that with so much devoted to repairs the amount allowed for depreciation should be substantially reduced. We must not overlook the fact obsolescence is a factor in all plants and equipment, and, however complete may be the repairs, depreciation will in spite of the fact continue.

It is therefore certain that the items of depreciation and repair must be considered together, and that the one has a distinct and direct bearing upon the other. Although the men have challenged the justification for so large an item of depreciation they have not been able, and certainly it is not within their power, to show that the amount was actually excessive. Nothing but a scientific examination and valuation of the property could determine this fact.

It has to be borne in mind, however, that the amount charged for depreciation is not an actual cash outlay by the Company. It is only a book-keeping charge which is carried for the purpose of the balance sheet and for providing for future replacement. It cannot, however, be disregarded in dealing with a question of this kind, but even though it were wholly disregarded the net earnings would still be little more than sufficient to pay taxes and bond interest, leaving but little over for dividends on preferred shares, and certainly nothing for dividends on common shares.

### *Taxes*

In 1932 the Company paid \$240,000 in taxes, an amount slightly less than the average for the four year period under review. Of this amount \$129,000 was paid to the City of Winnipeg as a tax of five per cent on the gross passenger earnings of the Company for the year. This tax is one which the Company contracted to pay many years ago, and has been a recurring subject of discussion and dissension between the City and the Company in recent years. Both parties to the wage dispute realize and frankly admit that the Railway Utility in providing the service for the City of Winnipeg should in some manner be properly supported by the City of Winnipeg. This aspect of the case will be dealt with later on, but at this point we may say that with a view of averting a cut in wage rates the Board felt justified in exploring all avenues of escape, and so took upon themselves at the suggestion of the Chairman the responsibility of waiting upon the City Council and there presenting the problems which the Board had to deal with, setting forth the facts of the case and the alternative courses open to the Board. The position taken by the Board was that, if, having the facts before them, the Council could see their way to relieve the Company of sufficient part of this five per cent tax, the prospective wage cut might be avoided. Nothing of a concrete nature has as yet resulted from the efforts of the Board in this respect.

### *Bond Interest*

The Company's statements show charged against the net earnings in the Railway Utility bond interest of \$337,000 for each of the four years ending 1932. This interest is the proportion charged to the Railway Utility of a general bond issue on the Company's properties, and the amount herein charged is said by the Company to be a fair and proper proportion. The men, however, think that the proportion is excessive. It is to be noted that the same matter came before the Municipal and Public Utility Board in 1931 when the Company applied for and secured increase in passenger fares. After an examination of the fixed charges which included the said bond interest and dividends on preferred stock, both of which were set at 37.9 per cent of the total of the said respective charges, that Board reduced the total of fixed charges to \$450,000 odd, see Exhibit 27, page 9. If the reduction is distributed rateably over the two items the bond interest would then be about \$325,000 odd, a saving of about \$12,000 a year under the present figure. It has also to be

remarked that the Board considered dividends on preferred stock as being a fixed charge of equal importance with bond interest.

This Board are not in a position to say whether or not the reduction of \$12,000 a year should be made, but even if it were made it would not materially affect the situation.

This concludes what we wish to say on the general grounds of the Company's financial position, having regard to what was said both by the Company's representatives and the men's representatives in respect thereof.

## 2. *Cost of Living*

As to the second ground advanced by the Company, namely, the reduction in the cost of living: Tables and charts produced before the Board based upon the cost of living as set forth in LABOUR GAZETTE indicate that since 1929 the cost of living has been reduced by at least 25 per cent.

The costs of living already referred to do not, of course, include all the expenses to which families are exposed, but they include the essential elements in the cost of living and are to be regarded as a test of the tendency of such costs as a whole. It may be that the items not included in these figures have correspondingly increased, but of that we have no adequate evidence.

## 3. *Wages Should Follow Cost of Living*

This contention the Company supports by charts and records showing that when the cost of living accelerated the rate of wages kept close upon the heels of the increase, but has failed to keep pace with the lowering of living costs. The Company contends that inasmuch as the cost of living was made the ground for the increase, so now that the decrease is in evidence the wages should correspondingly be lowered. The records of the Company's wages compared with living costs support that contention. Moreover, it is only reasonable and logical that the value of labour in terms of living should fluctuate with the costs of living and living standards. This has been recognized in actual practice in this country and City.

## 4. *Wage Decreases are General*

The Company contend that in asking its employees to accept a 20 per cent decrease in wages from the basic rate of 1929 it is only doing what has been done generally throughout the world. It is true that wage reductions have been sharp all over North America. In the City of Winnipeg alone reductions in all classes of employment have reached percentages in some instances far beyond that asked

by the Company. In the Company's own services, general, clerical and management staffs, comprising in all more than 600 men, have been reduced by at least 15 per cent. The electrical workers have likewise taken a 15 per cent cut. The Gas Production workers have taken a ten per cent cut from that peak. In the Railway Utility alone have the men succeeded in minimizing the reduction and escaping with a reduction that has not much exceeded six per cent. The Company claims that, when reductions are universal, it is unfair to its other employees that the Railway Utility men should be given preferential treatment, and if the treatment is confirmed the Company can hardly expect other employees to remain satisfied under the cuts they have accepted. This briefly is the case for the Company. But at the same time the Company have expressed a willingness to make a uniform reduction of 15 per cent from the peak of 1929 applicable to the men in the Railway Utility and Gas Department.

## *Men's Case for Increase*

The men have put forth argument in favour of an increase of wages on their part, but would be content if the present rates were to remain undisturbed. In opposition to the Company's case for a reduction they stoutly maintain that their present rates of wages are relatively lower than those enjoyed by men in corresponding trades all over Canada. They have adduced evidence of corresponding wage rates in various Canadian cities, and on the whole these are higher than Winnipeg rates. They also urge that their gross weekly earnings have been reduced by the fact that they have voluntarily adopted the seven hour day instead of an eight hour day for seven months a year. This they did in order to distribute the work amongst a greater number of employees, but at the same time the Company allowed them a higher rate per hour for the seven hour day than for the eight, thus dividing the burden with them. The men in the Gas Department have already taken a ten per cent cut from the 1929 peak, and in the Railway Utility they have in respect of certain seasons taken a ten per cent cut and the balance of the year a three and a half per cent cut. They claim also that, by reason of the introduction of one man cars and better equipment and supervision, the men now produce greater results per capita than heretofore, and that in relation to other branches of the management and operation the total wage bill has therefore relatively decreased more rapidly than costs of other branches of the service.

### Generally

The Company frankly admitted at the opening of the session that normally no reduction in the wage rates would be asked if it were not for the financial necessities of the Company. They did not deny that the wages of the men were not excessive in themselves, and the Board concur in this view. The gist of the difficulty lies, as already stated, in the inability of the Company to meet even the present wages, and the Board have to decide on whom the further necessary economies must fall.

The real difficulty with this Railway Utility lies in the changes that have been brought about in recent years in and around the city of Winnipeg. Changes similar to these have been taking place throughout the world. The transportation problem has been revolutionized in the past two decades. The introduction of jitneys, taxi-cabs and busses in competition with street railways have largely undermined the paid-passenger transportation of this community. Increased number of privately owned automobiles have likewise relatively reduced the number of those who would use paid conveyances. The Board feel that until the whole problem is taken in hand and controlled from one central source, put under proper regulations both as to conditions, terms and fares, the problem can never be satisfactorily solved. Going one step further, the street railway utility is in direct competition with the City of Winnipeg publicly-owned electric utility, the Hydro, and these two utilities have been in sharp active competition for years, each eager to secure and hold business, the result being that in this ever-extending field competition has in many cases been stated to the Board to have gone so far as to provide service at less than cost. In connection with the larger field, the Gas Department is not to be overlooked, because domestic consumption of gas is in competition with electricity, and the extremely low rates of electric service has had its effect upon the Gas Department of the Company of forcing economies which react upon the wages of the men. The Board are of the opinion that the only real solution for the whole transportation problem in the city is unified control and elimination of competition. Municipal monopoly, whether by direct ownership or through some commission such as the Board of Railway Commissioners, amply empowered to control and regulate all branches of paid passenger transportation, is in our opinion the only eventual solution. Without commenting upon the policy which has allowed the transportation situation to grow from bad to worse, we feel that the

policy has resulted in squeezing between the jaws of a crusher both the workmen and their families on the one side and the bondholders and shareholders on the other; and that the workmen and the bondholders are thus unwillingly compelled to provide the City of Winnipeg with the street car service at less than actual cost. The public users of the system are not paying the cost. How long this may continue we cannot tell, but with a view of seeking some relief from this source your Board felt justified in taking the matter up with the Council of the City of Winnipeg as has already been mentioned. One alternative course suggested as being open to the Company is to reduce the services that entail losses; to cut off certain lines and certain departments and to bring their expenses within their revenues. If these were done the public demand for such services might then bring the whole problem to a head and solution.

Thus far, with the exception of the St. Mary's bus matter, the members of the Board are unanimous and respectfully submit their report.

As to the remainder Mr. Meikle is unable to concur in the recommendations of the majority.

(Sgd.) A. K. DYSART,  
*Chairman.*

Winnipeg.

### Recommendations as to Wage Rates

Notwithstanding the regret with which the subject has to be disposed of, the majority of the Board feel that the present necessities of the Company make it impossible for the Company to continue paying present rates of wages, and in view of the fact no other avenue apparently is open to the Board some reductions must be recommended. We do not overlook the fact that the almost universal application of reductions to wage rates in recent years amply justify reductions with these employees, but at the same time we feel they are not so highly remunerated.

For the employees in the *Traffic Department, Mechanical Department and Track Department* of this Utility, we recommend that the reduction which the men have now taken be carried further to a point 15 per cent below the peak wages of the wage scale in effect immediately prior to the 1st February, 1932; Provided however that no such further decrease

shall operate so as to reduce the rates of wages of any regular employee, exclusive of apprentices, below the level of 38.3 cents per hour, which, we understand, is the rate paid by the City of Winnipeg for common labourers.

Because of what has transpired since April 30, 1933, we recommend that this cut become effective August 1, instead of May 1, 1933, as requested by the Company.

For the employees in the *Gas Department*. The members of the Board with the parties interested visited the Gas plant and observed the nature of the work and conditions of employment of these men, and now feel that in view of the fact that in February, 1932, they took a ten per cent cut from the 1931 level of wages, these employees because of the nature of their work should not be required to take a further cut, and the Board so recommend.

All of which is respectfully submitted.

Yours respectfully,

(Sgd.) A. K. DYSART,  
Chairman.

(Sgd.) ERNEST T. LEECH.

#### Minority Report

*In the matter of the Industrial Disputes Investigation Act, and in the matter of the differences between the Winnipeg Electric Railway Company and the Employees in the following departments: A. Traffic Department, B. Mechanical Department, C. Track Department, D. Gas Production Department, all members of the One Big Union.*

To the Honourable Minister of Labour,  
Ottawa, Canada.

SIR,—The undersigned, a member appointed by you to deal with the above-mentioned matter, has the honour to advise you that, for the reasons hereinafter appearing, he dissents from some features of the report signed by the Hon. Justice A. K. Dysart, Chairman of the Board, and Mr. Ernest T. Leech, K.C., representing the Company on the board.

The following matters brought before the board and which constitute the main reasons for the dissension are:—

- A. St. Mary's Road Bus,
- B. Wages.

A. ST. MARY'S ROAD BUS.

*Re Company contracting this service to a Private Citizen.*

This matter became a part of the board's work, to be decided upon later in the proceedings, and appears to constitute a violation of

the Industrial Disputes Investigation Act during the period when a board is sitting. See subsection G. of Section 2 of the Industrial Disputes Act, headed "Lock-out":

2 (G) "lock-out," without limiting the nature of its meaning, means a closing of a place of employment, or a suspension of work, or a refusal by an employer to continue to employ any number of his employees in consequence of a dispute, done with a view to compelling his employees, or to aid another employer in compelling his employees, to accept terms of employment.

Also subsection D. of Section 2 headed "Dispute":

2 (D) "dispute" or "industrial dispute" means any dispute or difference between an employer and one or more of his employees, as to matters or things affecting or relating to work done or to be done by him or them, or as to the privileges, rights and duties of employers or employees, not involving any such violation thereof as constitutes an indictable offence, and, without limiting the general nature of the above definition, includes all matters relating to:

- (i) the wages allowance or other remuneration of employees, or the price paid or to be paid in respect of employment,
- (ii) the hours of employment, sex, age, qualification or status of employees, and the mode, terms and conditions of employment,
- (iii) the employment of children or any person or persons or class of persons, or the dismissal of or refusal to employ any particular person or persons or class of persons,
- (iv) claims on the part of an employer or any employee as to whether and, if so, under what circumstances, preference of employment should or should not be given to one class over another of persons being or not being members of labour or other organizations, British subjects or aliens,
- (v) materials supplied and alleged to be bad, unfit or unsuitable, or damage alleged to have been done to work,
- (vi) *Any established custom or usage, either generally or in the particular district affected,*
- (vii) the interpretation of an agreement or a clause thereof.

Accordingly, I am convinced that such violation of the act placed the Company in an impossible position as proof was submitted by

the men in the findings of the award handed down by Judge Donovan on the previous Arbitration Board and established by the Agreement. See Exhibit 13A, which reads as follows:—

"All men required to operate motor buses in regular city fare zone and on St. Mary's Road shall be taken from the seniority list, and in order to enable men on the street cars to qualify for motor bus operation the Company will give fifty applicants on a seniority and efficiency basis an opportunity to train and qualify between June 1st and September 30, 1932 . . . ."

This portion of the dispute, I feel sure, should have been recognized by the present board as a violation of the seniority rights of these Busmen and the Company forced to return to the position established in the Agreement signed by their officers and by the officers of the union. Further, having recognized the sacredness of an agreement entered into by the Company with the municipality as being binding on them, they are equally bound to recognize to the same extent the sacredness of the agreement entered into between the Company and the Employees.

To establish further the position of the men, and also to prove that my colleagues erred in their judgment on this matter I would draw to your attention that on Page 44 of the Board's recommendations\* to the minister they recognize that the agreement between the Winnipeg Electric Railway and its Employees is still in existence and that the proposed changes should take effect on August 1 instead of April 30 as requested by the Company. On this whole matter sufficient evidence was produced to convince me that the stand taken by the employees is correct and that the Company did violate the existing agreement as well as the Industrial Disputes Investigation Act.

#### B. WAGES

At the commencement of the sittings of the board the Company, through its officers, definitely stated that they were very reluctant to reduce wages at this time and recognized that the wage rates were not excessive. Mr. Dahl stated that their main case revolves on their financial position. Exhibits No. 6B, and No. 6C, were submitted by the Company to the board as evidence showing the revenue and expenses of the Company for the year ending December 31, 1932, also the relative vehicle miles and revenue from passengers between 1921 and 1932.

On the other hand, the employees submitted to the board in Exhibit No. 23 a sum-

mary showing the relative position of their wages to the savings effected by the Company on other services and expenditures to prove that all the savings had already been made at the expense of the employees.

The following figures are taken from the Company's statement and show how the Employees have fared in the economies affected:

| Year     | Vehicles Miles | Revenue Passengers | Power Charges          | Mot., and Busmen's wages        |
|----------|----------------|--------------------|------------------------|---------------------------------|
|          |                |                    | \$                     | \$                              |

| 1925.... | 10,548,086     | 55,066,058         | 201,491 09             | 1,130,693 57                    |
| 1926.... | 10,434,939     | 57,985,144         | 212,649 25             | 1,139,742 32                    |
| 1927.... | 10,739,330     | 60,045,833         | 216,719 37             | 1,159,733 12                    |
| 1928.... | 11,087,272     | 60,223,255         | 204,850 65             | 1,157,273 71                    |
| 1929.... | 10,828,022     | 61,238,734         | 207,552 88             | 1,077,357 55                    |
| 1930.... | 10,611,252     | 53,997,401         | 209,187 58             | 1,019,707 53                    |
| 1931.... | 9,632,165      | 45,704,371         | 279,189 25             | 886,552 91                      |
| 1932.... | 9,577,370      | 41,483,257         | 267,759 44             | 786,876 86                      |
|          | 33,981         | 20,032,069         | 136,398 55             | 520,158 46                      |
|          | less miles     | less passengers    | increase 103% increase | less than 1921 or 43% reduction |

This savings in wages of \$520,158.46 made in Conductors, Motormen and Busmen's wages, augmented by the following saving made in other departments on an hourly rate and submitted by the Company:—

(See Exhibit 53.)

|   |             |
|---|-------------|
| Switchmen, flagmen and watchmen.. . . . .   | \$17,196 41 |
| Carhouse labour including portion of Foreman's time and labour cleaning barns and greasing cars . . . . . | 6,784 55    |
| Labour for cleaning cars.. . . .  | 9,123 20    |
| Labour for heating cars.. . . .   | 2,756 23    |
| Labour for shifting cars . . . .  | 8,022 98    |
| Inspection of Air Brakes, Motors, Trucks, etc.. . . .   | 10,030 48   |

makes the total savings in wages in 1932 over 1921 of \$574,072.31. Contrast this with the figures submitted by the Company on passengers carried in 1921 and 1932; namely, 20,000,000 less and also the figures showing 33,981 less vehicle miles operated; yet, the expense of superintending transportation has increased by \$2,003.94, also the expense of selling tickets has increased by \$3,372.

The men also submitted figures gleaned from the Company's report showing an increase in printing tickets and transfers between 1921 and 1932 of \$17,126—an increase of 108 per cent despite the fact there were 20,000,000 less passengers.

Those increases, coupled with the great increase in power costs amounting to \$136,398, de-

\*Page 889, majority report.

spite the decrease in cars and mileage, justify the Employees' contention that, while their gross wages have been growing less each year and more duties have been added to their already hazardous employment through the introduction of one-man cars and other services, to date they have borne all the burden in the savings effected and therefore should not be asked to contribute further in any other economies.

The fact that the Employees have voluntarily adopted the seven-hour day instead of the eight-hour day, making a sacrifice of 12½ per cent in their already low wages in order to share the work available among a greater number of men in these times, should be commended by every honest person and consideration given when wage rates are being discussed. Unfortunately my colleagues on the board failed to appreciate this factor which has, in many parts of the continent, been recommended as a partial solution to the aggravated conditions that surround us all.

Nevertheless, the unanimous opinion of the board is that it was owing to the failure of the Company to get relief from other sources; namely, unjust taxation on the gross earnings and other city and provincial taxes, that any wage reduction was ever anticipated.

This vicious principle of crushing the workers' wages down to further levels is not a solution to the problems of the Company and should not be persisted in.

There is another aspect of the case *re* the proposed wage reductions contained in brief No. 27—a report from the Public Utilities Commission when the fares to be charged were under review and recommendations made in favour of an increase in fares. Here we find that the Public Utilities Commission, which is very close to the public on questions of this character, realized it would be wrong to reduce wages at that time when it definitely stated: "It is not proposed that wages or personnel be reduced." It is hoped that this proposed reduction in wages will be treated in the same light by the board as being another factor in aggravating an already serious condition, and therefore should not be granted.

Another thing to be remembered is that companies in the other cities of Canada are not attempting to reduce wages of Street Car-men to the same extent as is proposed in Winnipeg. This fact the whole board has realized as comparative wage rates were submitted to prove the contention without any effort to disprove same.

In the Mechanical Department the same reasons generally speaking can be advanced to show why those men should not receive a wage cut.

In this department the Employees have made a sacrifice of one hour per day in order to spread the work available among a larger number of men, again keeping workers employed who otherwise would be flung out on the street after giving as high as ten to fifteen years' service to the Company.

In the Track Department it was pointed out that these men are the lowest paid workers of all and that the scale of wages paid in Winnipeg is below any other paid in cities of similar size. Most of them are married men with families and only earn, in some instances, \$12 to \$17 per week. To apply a further cut to these men places them in a worsened position than men on relief in many districts and I feel that this is the unkindest cut of all and by no stretch of one's imagination can it be believed that the cost of living can operate against granting an increase in wage rates of men receiving the above-mentioned scale.

As the Company has stated that no wage reduction would have been proposed except financial conditions were such as to force their hand and unfair taxes of long standing were one of the contributing factors, the whole board, at the suggestion of the Chairman, realizing the necessity of preserving the present wage rates, waited upon the City Council and there presented the facts surrounding the problems confronting the board believing that if the real facts were set out in a lucid form—which they were—some relief from the Gross-Earning Tax would be considered favourably by them, thereby averting for the time being a reduction in wages. Nothing having resulted to date from that source, that door is considered closed as an avenue of relief.

I think, therefore, with the evidence produced by the Employees, plus the admission made by the Company that the whole of its case in seeking a reduction in wages rests mainly on its financial position—a position certainly not produced by the Employees—that the factors responsible for bringing about the present financial conditions should be the one avenue for attack and not the Employees' wages.

I am therefore in full accord with the men that their wages should not be reduced and that the burden should be placed where it rightly belongs—on the car-riding public. I disagree with the other members of the board and am in full agreement with my colleagues, as stated in page 41 of the report to the Minister,—

"The real difficulty with this Railway Utility lies in the changes that have been

brought about in recent years in and around the City of Winnipeg. Changes similar to these have been taking place throughout the world. The transportation problem has been revolutionized in the past two decades. The introduction of jitneys, taxi-cabs and busses in competition with street railways have largely undermined the paid-passenger transportation of this community. Increased number of privately owned automobiles has likewise relatively reduced the number of those who would use paid conveyances. The Board feel that until the whole problem is taken in hand and controlled from one cen-

tral source, put under proper regulations both as to conditions, terms and fares that the problem can never be satisfactorily solved. . . ."

#### Gas Workers

In reference to the decision arrived at by the Board that no reduction in the present wages of those Employees be recommended, I fully agree with that decision.

Respectfully submitted,

(Sgd.) ALLAN MEIKLE,

*Representing the Employees.*

### Report of Board in Dispute Between Canadian Pacific Railway and Its Locomotive Firemen and Enginemen

A unanimous report was received by the Minister of Labour on August 31 from the Board of Conciliation and Investigation which heard a dispute between the Canadian Pacific Railway Company and certain of its employees being members of the Brotherhood of Locomotive Firemen and Enginemen. The personnel of the Board was as follows: His Honour Judge J. H. Scott, Perth, Ontario, chairman, appointed on the joint recommendation of the other Board members; Mr. Lynn B. Spencer, K.C., Welland, Ontario, appointed by the Minister in the absence of a recommendation from the employing company, and Mr. Howard S. Ross, K.C., Montreal, P.Q., appointed on the employees' recommendation. Four thousand employees were stated to be directly affected by the dispute. The matter at issue concerned the application of the mileage regulations governing conditions under which demoted engineers may revert to firemen's positions. The Board recommends in effect that the minimum monthly mileage for spare engineers be decreased from 3,200 to 2,800 before they become entitled to demotion to firemen's jobs. The text of the report follows.

#### Report of Board

*IN THE MATTER OF Industrial Disputes Investigation Act and of a dispute between the Canadian Pacific Railway Company and certain of its employees, being members of the Brotherhood of Locomotive Firemen and Enginemen.*

To the Honourable Wesley A. Gordon, K.C., M.P.,  
Minister of Labour,  
Ottawa.

SIR,—The undersigned members of the Board of Conciliation and Investigation, established by your order of the 16th day of March, 1933,

under the provisions of the above Act, have the honour to submit the following report, viz.:

Application for the establishment of the Board was made by the Brotherhood of Locomotive Firemen and Enginemen on the 22nd day of January, 1931, and the dispute which has been referred to the Board is stated therein as the "failure to reach agreement with the Management on the application of Article 31 of Schedules governing conditions under which demoted engineers may take and hold firemen's jobs."

The grievance which was aired before us has been a source of controversy on the part of the firemen for several years. It has already engaged the attention of several boards of conciliation, but the net result has been to leave the situation as it was when complaint was first made and the "casus belli" has, therefore, never been removed. In these circumstances and, in order that one may understand just what the "bone of contention" is, it will be helpful to review shortly the origin of the trouble and the efforts that have been made towards a reconciliation.

Incidentally it may be observed that for a long period there seems to have existed a mutual understanding and accord between railway engineers and firemen, with the acquiescence of their respective companies, that, when during periods of depression or slackness of traffic it becomes necessary to cut down or reduce train service, some concession should be made to the engineers, as the senior branch, in order to ensure the possible continuity of their employment, indicating a policy of the "survival of the fittest." Engineers reach their status after a course of training and experience through the several grades of firemen's jobs, the senior passenger fireman, in line of promotion, stepping up to the rank of "spare" engineer. As a "spare"

he is a sort of engineer at large who stands by, subject to call, to fill any vacancy that may arise, temporarily or otherwise. It is the junior grade of the engineer service, the highest being that of engineer of a passenger train, midway being the freight and kindred services. Accordingly, the scale of pay is determined by the earning possibilities computed in terms of mileage for the respective grades. The working out of the policy of preferential treatment for the engineers, which has been referred to, has been by a process of demotion, which enables an engineer who has been laid off by reduced traffic to revert for the time being, if he chooses, to the status of a fireman and to take over a firing job, thus displacing the junior fireman in the district. On the 17th May, 1913, the two Brotherhoods (Engineers and Firemen) concluded a joint agreement at Chicago (thereafter known as the "Chicago Agreement") which embodied, among other details, the mileage limitations and rules governing the demotion of engineers. This agreement was amended at Cleveland on 4th May, 1918, (and later on 1st May, 1923) and the terms relating to the foregoing features as then in force were on the 1st October, 1920, carried into a joint agreement by and between the Canadian Pacific Railway Company and its Locomotive Engineers and Firemen. The Rule containing these terms was designated in this last contract as Article 31, the number being still preserved not only in the firemen's agreement but also in the separate engineers agreement later on concluded, the terms of which have led to this contest. The experience of the engineers during the intervening years, under the restrictive features of the Chicago agreement, had proved unsatisfactory to them, and, acting within their rights of termination, that agreement was abrogated during the year 1927, upon due notice by the Brotherhood of Locomotive Engineers. In the joint agreement of 1st October, 1920, with The Canadian Pacific Railway Company, Article 24 (a) provides as follows "The right to make and interpret contracts, rules, rates and working agreements for locomotive engineers shall be vested in the regularly constituted committee of locomotive engineers." An identical provision is made for the firemen by subsec. (b) of the same Article. It seems to the members of this Board that an undue importance has been attached to this Article, not only on behalf of the engineers, but also by previous Boards, and from its prominence in the preceding enquiries the opinion seemed to prevail that by virtue of this article it is competent for the engineers to contract with the company independently of the

firemen. In our judgment the purport and effect of Article 24 are that in making and interpreting contracts, etc., the absolute authority of a committee to represent, act for and effectively bind the membership is recognized and affirmed. That such an exclusive agreement, having such effect, was made in this one-sided manner, is one of the firemen's substantial complaints. Retracing our observations to the narrative we find that, having freed themselves from the Chicago agreement, the engineers sought from the company a separate and distinct agreement in which special concessions were proposed for spare engineers, shortly described as those on the *extra* list, by extending their earning possibilities up to the mileage limitations accorded to the next advanced engineers' grade operating freight service or, in other words, eliminating the "spare" grade altogether as it had existed for the purposes of pay, and placing it on a par with an advanced class of operatives. This proposed separate agreement was offered to the company in 1928, which evinced a sympathetic attitude, but the firemen became aware of its purport and immediately intimated strenuous opposition to this particular amendment of Article 31, insisting that the suggested extension of the earning power of spare engineers and the additional mileage spread would operate unfairly towards the firemen's service and further postpone the chance of promotion. This attitude of the firemen caused the company to hesitate in the execution of the new agreement, and the engineers thereupon applied for a Board of Conciliation. This Board, which may be referred to as the McCall Board, by its report dated the 29th November, 1928, found that the engineers had the right to enter into the proposed agreement, and that the company would be justified in giving effect to it. It is claimed by the firemen that they were denied the right to give evidence before this Board and they assert their belief that, had this privilege been granted to them, the Board might have materially modified its recommendations. Whether such a prognosis is warranted or not is *by the way*, but for the sake of a reconciliation a complete survey of all interests affected might have produced better results than a legal decision. However, faced by such a conclusion, the firemen then made application, and the propriety of the contentious change in the Article was again referred to a Board headed by Mr. Justice Bond, whose report, dated 16th January, 1929, while declaring that "there is undoubtedly some evidence before this Board tending to establish that the interests of the present applicants may be adversely affected as a result of putting into

effect the proposed revision," expressed the opinion that, as the engineers were not parties to the proceedings before it, it did not appear that all possible avenues had been fully explored which might conceivably lead to a reconciliation or a modification of the conflicting views. The recommendation of the Board, in these circumstances, was that the putting into effect of the proposed revision of Article 31 be postponed for a reasonable period, the Department of Labour to arrange a conference between representatives of the two Brotherhoods. Subsequent efforts to meet the views of the firemen having failed, the new Schedule of Rules submitted by the engineers received the assent of the Company, and became effective on the 1st February, 1929. The Firemen's Committee immediately renewed and persisted in its objection to the "spare" engineers amendment and, having made no progress, an application was made by them on the 22nd of January, 1931, the present Board being the outcome. During the interval, attempts have been made to heal the differences, which may account for the very considerable delay in the formal establishment of the Board. The Board was met, as the previous Boards had been met, at the outset, by a demurrer raised by the Company and the engineers to the competency of the Board on the ground that the alleged dispute was not between the Company as employer and the applicants as employees, but was, in fact, a controversy between the two Brotherhoods, a contingency not covered by the Act. The decision of the Minister to grant this Board effectually disposed of this contention, and under Sec. 7, subsec. 2 of the Act the Board was precluded from staying its hand and was obliged to survey the merits of the situation so far as it was constitutionally able. The general operation of The Industrial Disputes Investigation Act was, no doubt, predicated upon a direct issue arising between an employer and his employees, and it may be that the framers of the legislation did not contemplate a situation, such as arises here, where the grievance of the complaining class of employees arises from the treatment accorded by the employer to another class in close association with it. It is manifest that where such a conflict of interest is the source of the trouble, proper consideration can not be given and full justice and fair play shown unless all parties concerned are before the Board with equal rights in presenting their respective viewpoints. As the question of a possible defect in the Act in this regard has been raised, the Board regards it as of sufficient importance to draw it to the attention of the Minister of Labour in order that he may consider the necessity or expediency of an amendment. Before

the enquiry opened, the engineers requested and were given leave to be represented and, at all sittings, were accorded the fullest opportunities of presenting their case. The sittings of the Board commenced on the 8th day of May, 1933, and proceeded daily until the 11th May, when the local engagements of the Board members necessitated an adjournment. During the sittings the Company and the two Brotherhoods were actively represented. The attitude of the Railway Company was one of ostensible neutrality. Pursuing its well-known policy of strict impartiality and fair play towards all classes of its employees, it was prepared to fall into line with and give effect to any arrangement or compromise upon which its engineers and firemen might agree. Having, however, already entered into its separate contract with its engineers, which was called in question in this contest, it felt it incumbent to justify the contract and, according to its judgment, demonstrate its freedom from unfairness towards its firemen. The presentations of all parties were reduced to writing and, in addition, the Board heard oral argument from all the representatives. Supplementary statements and replies were admitted as long and as often as they could be produced. The Board was impressed with the careful and thorough preparation on all sides, with their moderate submission of their arguments, and with their temperate and friendly demeanor towards each other. That is the normal atmosphere surrounding the Canadian Pacific which breeds singleness of purpose throughout its employed ranks in promoting its enterprise, but it is a hopeful sign that personal or class differences will not be allowed to militate against the interests of the concern. The sittings of the Board were resumed on the 27th June after a recess of six weeks. During this interval its members pleaded with the Brotherhoods to settle their present differences between themselves, citing for their guidance and justification the proceedings and conclusions reached before a Board of Conciliation dealing with an identical problem affecting the engineers and firemen of the Canadian National Railways as set out in their Report dated 17th February, 1933. The members of the present Board regard the adjustment of the matters referred to them as, so far as they are concerned, a problem of considerable delicacy, but one which can, without difficulty, be solved by a heart to heart conference between the immediate parties concerned. It should be approached, in the Board's opinion, in the light of the peculiarly intimate relationship which exists between engineers and firemen. A railway company is essentially a moving concern. The success of its enterprise depends upon the

constant movement of its rolling stock. The responsibility for this and for the safe and expeditious transportation of passengers and freights rests upon the men at the throttle and those who, with them, are in charge of its motive power. There is every reason, therefore, for the absence of any misunderstanding or cause of friction between operatives so placed and, in their interests, and those of the Company which employs them, they ought to be willing to yield something of what they might perhaps, under normal business conditions, be entitled to insist upon. It is, in view of such considerations, that the Board declared its hope that an independent recommendation by it might be avoided.

The Board resumed its sittings on the 27th June and continued daily in its negotiations with the parties until the 29th June when a further adjournment became necessary by reason of an acute major controversy which had arisen between the parties interested (among others) and the two principal Canadian railway companies. The 29th of August and at Ottawa was settled for the final conference of the Board upon the situation as then presented, all parties being invited in the meantime to amend or extend their presentations as they might desire and they were particularly urged to confer and, if possible, compose their differences. In addition to this the members of the Board have made a special effort during the interval, by means of suggestions through correspondence and contact, to reach common ground, and have exhausted their powers of persuasion in their endeavours. It is a matter of regret and disappointment that little head-way has resulted from these gestures and that the Board is thus obliged to work out an unaided solution. The attitude of the two Brotherhoods cannot be regarded as one of antagonism but, on the part of the engineers, there has been a steady resistance against any disturbance of the rights acquired by them under the Amended Article 31, while the firemen, the applicants in this investigation, have shown an equally firm insistence that the provisions of the original Rule should be restored. The happy medium between the two conflicting contentions has not yet been discovered. The firemen have, all along, chafed under the conviction that a material change in the Rules which adversely affected their interests had been brought about behind their backs, and this feeling of irritation has evidently not been softened by what they regard as similar treatment at the hands of the first Board set up to survey the trouble. In response to the Board's appeal for voluntary conciliation, the engineers submitted a tentative proposition

for a reduced mileage schedule conditional upon their being accorded some equivalent compensation from the firemen. On the other hand, the latter, while maintaining that the original mileage rule should be restored, finally submitted, as a compromise, that a settlement might be accepted by them on, but not beyond, the lines adopted in the Canadian National Railway controversy on the same problem and as set out in the report of the Board of Conciliation dealing with the same and dated the 17th day of February last. These two propositions, however, left an "unbridged gap" and to devise some method of closing up this "hiatus" is the business left for the Board. Its members believe that this is essentially a case for compromise.

It has been urged upon us that the subject matter of the present complaint has already been submitted to, and pronounced upon by, two previous Boards and that, therefore, this Board is precluded from disturbing their findings. With this contention the members of the present Board are unable to agree. In our opinion the primary object of The Industrial Disputes Investigation Act would be greatly weakened and Boards of Conciliation and Investigation established thereunder would be unable to effectually function, if hampered by precedent or the action of any previous body, or influenced by any other consideration than a sense of justice and fair play in an endeavour to reconcile differences between contending parties. The keynote of the Act is "intercession and mediation" and, once seized of the affair, it appears to be the duty of this Board to regard the whole question as open and subject to adjustment. It will be observed, however, that the McCall Board did not consider the merits of the firemen's grievance. All that it did, having declined to recognize them as a factor in their investigation, was to determine that the company would be justified *without further restraint* in putting into force the amended mileage schedule, which it had already concurred in, with respect to the spare engineers. The subsequent finding of the Bond Board was that there was some evidence before it in support of the firemen's contention, but that, as the engineers were not parties to the enquiry, the matter should be further explored by all parties concerned and that to this end a reasonable postponement of final action by the company was desirable. No tribunal has declared its opinion upon their contention that the amended mileage schedule has adversely affected their interests, beyond the passing admission by the Bond Board that there was some evidence before it which favoured the firemen's argument. As before stated, the Amended Article 31 placed the spare engineers

upon a mileage footing with the engineers of the next higher grade by increasing the schedule from its previous minimum of 2,600 miles and maximum of 3,200 miles to 3,200 and 3,800 miles respectively, the standard of the freight and kindred engineers. With regard to the maximum which represents the earning possibilities and involves simply the extent of pay, the firemen are not concerned and only a passing reference thereto has been made in the inquiry before us. The real grievance, if any, lies in the increase of the minimum monthly mileage rate, and it will be sufficient, we think, for the Board to confine its attention to this detail. In this connection the view-point of the firemen is apparent when the system of continuing engineers' employment is scrutinized. As the Board understands it, it is a progressive process, in a descending scale, which works out in the following way, for example—Where a passenger engineer (which is the senior service) is laid off through the company's business exigencies, and wishes to continue his employment, he first seeks his opportunity in order, through the next inferior engineer's grade, that is to say, the services paying freight rates. Failing in this he secures a place on the spare or extra engineers' list and, if this does not afford an opening, he has the right of reverting or demotion to a fireman's grade and to claim a fireman's job, the effect of which is to displace a junior fireman who goes off the list for employment for the time being. The release of the firemen from duty in this way therefore arises from the demands or requirements of the spare engineers and it seems obvious that where the facilities for such demotion and displacement are extended, the effect is to bear more hardly upon the junior firemen. It seems to the Board that the natural result of the minimum mileage increase is to enlarge the opportunity for the exercise of the right of demotion. If, as under the former schedule, an engineer could revert to fireman's rank if he were unable to earn 2,600 miles per month in his senior sphere, he would be more certain of qualifying for demotion if the requirement were raised 100 miles, and this certainty would be emphasized as the mileage rate is increased. It does not therefore appear arguable that the new Rule conceded to the engineers does not militate against the interests of the junior firemen who are more likely than before to be released from service. It reasonably follows, as well, that as the opportunities for demotion become more readily available the firemen's chances of promotion are correspondingly depreciated.

As has been before stated, the new rating has, in fact, cut out the classification of the spare or extra list of engineers as an indi-

vidual grade and has placed them upon a par footing with the next superior grade, viz., the freight and kindred services. It is significant that in the United States the judgment of all railroad authorities retains the grade distinction of the spare men as a class between the senior passenger firemen and the freight engineers and that in a large number of disputes cited to us, involving a similar contest to that now under review, which have been submitted to Boards of Mediation in that jurisdiction, the minimum mileage requisite which, unattainable before demotion can accrue, has been uniformly fixed at 2,600 miles per month. Canadian Railway sentiment, however, which is rather more appealing to the minds of the Board members, has been expressed in the recent Canadian National Railway settlement, before referred to, which sets the minimum at 2,700 miles, thus maintaining the spare list as a class by itself by reason of the temporary character of its service as compared with the assigned or permanent nature of employment in the freight or passenger services, which are rated for pay as superior to it. The judgments of the various Boards dealing with this problem both in the United States and Canada would seem to furnish an appropriate guide for action by this Board and upon which it could justify a recommendation for the modification of the schedule in dispute. We have very carefully considered the rather indefinite "feelers" thrown out by both sides as their ideas of adjustment. With regard to a proposition emanating from the engineers, suggesting a sort of barter arrangement, when it is considered that they have secured from the company a concession of distinct advantage to themselves but carrying with it some disadvantage to the firemen and without compensation to the latter, it would hardly be fair now, as a condition to a reduction in the new mileage schedule, to ask the firemen to further give way. On the other hand, the complete adoption in this instance of the terms of settlement reached in the Canadian National Railway case, which were approved by unanimous consent, would not be practicable where such consent does not exist. The Board has gathered from its conversations and discussions in this case that a reduced mileage of some sort might be acted upon, subject to counteracting conditions, but the actual mileage rating seems to be the chief concern. Reasonable or practical conditions have, however, not been placed before the Board by either side, and, as the Rule in question was made without qualification, the Board is of opinion that the imposition of conditions may well be waived.

The conclusion of the Board, after most careful consideration and anxious thought, is that the interests of both engineers and fire-

men will be served, and the cause of complaint by the applicants substantially removed, by substituting the figures 2,800 for 3,200 wherever they appear in Article 31 of the Engineers' Rules as approved by the Company and effective on 1st February, 1929, as the minimum monthly mileage open to spare engineers before they become entitled to demote to firemen's jobs, and recommend accordingly, strongly urging the company and

both Brotherhoods to adopt this compromise as a solution of this long standing dispute.

All which is respectfully submitted.

(Sgd.) J. H. SCOTT,  
*Chairman.*

(Sgd.) HOWARD S. ROSS,  
(Sgd.) LYNN B. SPENCER.

Ottawa,  
30th August, 1933.

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

### Summary of Recent Proceedings

**E**IGHT new decisions were given recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the *LABOUR GAZETTE*, June, 1933, page 586, and in previous issues; and the fourth report of the proceedings of the Board covering the period from October, 1927, to September 30, 1930, was issued as a supplement to the issue of December, 1930.

The Board was established under a voluntary agreement concluded in 1918 between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and members of any of the six railway brotherhoods, "including the interpretation of wage schedules or agreements, having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of labour, one for each of the following railway brotherhoods; the Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railway Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

#### Case No. 398—Northern Alberta Railways and Order of Railroad Telegraphers.

An employee was accused by another employee of criminal conduct. He was ordered by the superintendent to present himself at the office for investigation, but refused to do so, or to make any statement until he had consulted his lawyer. He was thereupon dismissed from the service of the company. Subsequently the employee was tried under the Criminal Code and the charge

against him was dismissed. The employees contended that the man should then have been reinstated and his wages paid for the period he was held out of service. The company contended that the employee had been properly dismissed owing to his refusal to obey the superintendent's order to attend an investigation of his case; also alleging that the employee had misrepresented his record prior to entering their service.

The Board, in their decision, stated that in regard to the criminal charge, the judgment of the Court must be taken as final; and that the superintendent's order for an investigation, at a time when the accused man was out on bail, pending his trial, was not proper. In regard to the man's antecedents the Board considered that as he had been in the service for several years the company should have checked up his record at an earlier date, the evidence showing, moreover, in their opinion, that no effort at misrepresentation had been made.

The Board ruled therefore that the employee should be reinstated to his former status and position without prejudice not later than September 1, 1933, but that as there had been some delay in the settlement of the case, for which the company was not entirely responsible, he should be paid one-half of the salary he would have received during the two years since his dismissal.

#### Case No. 399—Northern Alberta Railways and Brotherhood of Locomotive Firemen and Enginemen.

Ten demerit marks were placed against the name of an engineer on a work train which got beyond his control and ran down hill on to the main line from the siding leading to the pit where gravel was being loaded. The evidence showed that this employee had operated work trains on former occasions at the same place without mishap. The Board found that on the evidence adduced the discipline should be removed.

**Case No. 413—Canadian National Railways (Central Region) and Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.**

The turn-table at Huntsville not being long enough to accommodate the engines used on two trains, the engineer and fireman of each train were ordered to proceed to Scotia Junction, a distance of 15 miles, and to turn their engine on the wye at that point. They submitted a claim for a minimum day for this movement, under the provisions of Article 5 of the Engineers' and Firemen's Schedule, which reads:—

"Should engineers, firemen or helpers be used out of or at initial or distant terminal after completing their regular assignment, a new day or trip will commence, except in cases where special duties such as watching engines, etc., are required in connection with the run."

The company contended that payment of these crews for the service performed should be on a continuous time basis.

The Board sustained the claim of the employees, finding that the crews were entitled to a separate day for the service mentioned.

**Case No. 414—Canadian National Railways (Central Region) and Brotherhood of Railroad Trainmen.**

The crews on passenger trains running between Campbellton and Levis had an arrangement among themselves under which some of the men were afforded a longer lay-off at home than they would have had if the regular assignments had been followed. During the rush of business on Christmas Eve the company found the regular crew was not immediately available and called a freight crew to take a train from Levis to the home terminal. The employees submitted that this action was contrary to Articles 80 and 7 (clause A) of their schedule, dealing with "deadheading" of crews to take up their assignments, and the monthly guarantee for regularly assigned passenger trainmen.

The Board denied the claim of the employees, finding that while the management appeared to have permitted employees to change off to suit their own convenience, it did not assume additional obligations on that account.

**Case No. 415—Canadian National Railways (Central Region) and Brotherhood of Railroad Trainmen.**

A dispute arose as to the practice of the company in using trainmen employed in one sub-division to man a local train service in

another sub-division, the men claiming that the crews should be paid on a separate trip basis. The employees contended that, at the request of the company, promotion territories were enlarged during the years 1928 and 1929 to conform generally with General Superintendents' territories, and that to continue to employ the same men on two sub-divisions was contrary to the spirit of the agreement.

The company stated that numerous complaints had been received from passengers as to delays in service due to changing crews at sub-divisional points, and it was decided to run crews through on these trains, which necessitated a reassignment of crews. In carrying out this change the provisions of Article 62 of the schedule for Conductors, Baggage-men, Brakemen and Yardmen (effective June 1, 1929) had been observed: "Unless otherwise arranged, runs extended over more than one promotion district will be manned by trainmen from each of the seniority districts involved proportionately, as nearly as possible on a mileage basis."

It was considered by the management that the present assignment of passenger crews on the two sub-divisions was not in violation of any schedule rule or understanding and was the most satisfactory way of equalizing the mileage as between the trainmen of both districts.

The Board denied the employees' claim, taking all the evidence into consideration, considering that the management was within its rights under schedule provisions in assigning crews in question to operate on two promotion districts.

The Board further denied the claim of the employees in regard to a brakeman, who, they alleged, was used off his promotion territory when a steam train was employed on a run usually made by a Diesel engine car, this change necessitating the use of a brakeman.

**Case No. 417—Canadian National Railways (Central Region) and Order of Railway Conductors and Brotherhood of Railroad Trainmen.**

In consequence of an accident in which a train running on the main line side-swiped another train standing in a siding, the engineer of the former train was discharged from the service, the conductor was assessed 15 demerit marks, and the head-end brakeman and fireman were assessed 10 demerit marks each. The employees contended that the demerit marks against the conductor were excessive under the special circumstances in the case and asked that they be deleted from his record.

The company cited Rule 89, which reads: "When necessary to stop and meet a train, the train holding the main track must stop clear of the switch to be used by the other train in taking the siding." Rule 110 was also cited in support of the demerit marks against the conductor: "Both the conductor and the engineman are responsible for the safety of their train," etc. The management called the Board's attention to the possible far-reaching effect that any lessening of the responsibility of train conductors for the safe operation of their trains might have, and "the serious consequences which would be entailed by any interpretation of the Railway's operating rules which would have as its result the liberation from proper responsibility for the operation of their trains which train conductors are now obliged, under the operating rules, to assume."

In the opinion of the Board the conductor did all he could, under the existing conditions, to ascertain that the other train was in clear at the meeting point. The Board therefore, without prejudice to the right of the company's officials to assess discipline, suggested a modification of the discipline assessed in this case.

**Case No. 418—Canadian National Railways (Central Region) and Order of Railway Conductors, and the Brotherhood of Railroad Trainmen.**

Article 16 of the conductors' schedule provides in part as follows:—"Trainmen performing more than one class of road service in a day or trip will be paid for the entire service at the highest rate applicable to any class of service performed."

The employees contended that this rule had not been observed in the method of payment made to a conductor and crew in connection with the handling of a special

passenger train from North Bay to Sudbury. The crew in this case had been ordered for a continuous trip at freight train rates, and on their return were required to handle a passenger special for which they were compensated at passenger train rates. It was claimed that the crew should have been compensated at through freight train rates for the entire trip, instead of at passenger rates. The management claimed that the entire run, including that completed before the crew took over the special passenger train, was in connection with passenger service.

The claim of the employees was sustained by the Board, whose opinion was that two classes of road service had been performed on the trip in question, and that payment should be made in accordance with Article 16 of the Schedule (above).

**Case No. 419—Canadian National Railways (Central Region) and Brotherhood of Railroad Trainmen.**

This case, line No. 418, concerned the application of Article 16. Freight cars were hauled for part of certain trips of a passenger train, and the employees contended that freight rates should be paid for the actual mileage while these freight cars were attached. The company, on the other hand, cited Article 19 of the schedule for Conductors, etc. which reads:—"Passenger trains which only incidentally contain cars used in connection with freight transportation shall be classed as passenger trains."

The evidence showed that the necessity for the handling of freight cars on this passenger service for the periods in question was the result of the discontinuance of the local freight service on the territory. In the opinion of the Board two classes of road service were involved, and the service should have been paid for under Article 16.

## STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1933

THE following table shows the number of disputes, workers involved and time loss for August, 1933, as compared with the previous month and the same month a year ago.

| Date          | Number of disputes | Number of employees involved | Time loss in working days |
|---------------|--------------------|------------------------------|---------------------------|
| *Aug., 1933.. | 17                 | 2,526                        | 18,762                    |
| *July, 1933.. | 8                  | 1,556                        | 13,775                    |
| Aug., 1932..  | 17                 | 4,612                        | 51,815                    |

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition

which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts recorded for August was more than twice as large as that shown for July, 1933, the number of workers involved showing a similar increase. The time loss for the month, however, showed a less substantial increase as no disputes of long duration occurred. As compared with August, 1932, while the same number of strikes was recorded, the number of workers involved and the time loss incurred showed a very steep decline from the same month last year when disputes involving 600 coal miners in Alberta, 800 fur factory workers in Toronto, Ont., and 3,000 men's clothing factory workers in Montreal, P.Q., caused an approximate time loss of 15,000 working days, 12,000 working days and 25,000 working days respectively.

Four disputes, involving 409 workers, were carried over from July, and thirteen disputes commenced during August. Of these seventeen disputes 12 were terminated during the month, 1 being in favour of the employer involved, 4 in favour of the workers concerned, 4 resulting in a compromise settlement, 2 being partially successful and the result of 1 being recorded as indefinite. At the end of August, therefore, there were five disputes in progress recorded as strikes or lockouts, namely: fur factory workers, Winnipeg, Man., fur factory workers, Toronto, Ont., hat and cap workers, Toronto and Hamilton, Ont., scrap

metal workers, Winnipeg, Man., and restaurant employees, Vancouver, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to seven such disputes, namely: photo engravers, Toronto, Ont., commencing March 23, 1931, one employer; photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Winnipeg, Man., February 28, 1932, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; lithographers, Toronto, Ont., April 15, 1932, one employer; motion picture projectionists, Saint John, N.B., March 6, 1933, one employer; and compositors, Winnipeg, Man., March 13, 1933, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which some work is performed or may be required, are not included in the record, as no relation of employer and employee is involved.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

#### STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1933\*

| Industry,<br>occupation and locality   | Number<br>of<br>workers<br>involved | Time<br>loss in<br>working<br>days | Remarks  |

| Fur factory workers (dressers,<br>and dyers), Toronto, Ont....                      | 226                                 | 3,000                              | Commenced August 16, 1933; for increase in wages<br>and reduced hours, etc.; untermi-<br>nated.  |
| Leather factory workers (pur-<br>ses), Montreal, P.Q.....                           | 30                                  | 219                                | Commenced August 15, 1933; for discharge of non-<br>union worker and for increase in wages; termi-<br>nated Aug. 24, 1933; partially successful. |
| <i>Textiles, Clothing, &amp;c.—</i>   |                                     |                                    |  |
| Knitting factory workers, Win-<br>nipeg, Man.....                                   | 30                                  | 15                                 | Commenced Aug. 10, 1933; for reduced hours and<br>recognition of shop committee; terminated Aug.<br>10, 1933; in favour of workers.              |
| Women's clothing factory<br>workers (dress and suit<br>cutters), Montreal, P.Q..... | 500                                 | 5,000                              | Commenced Aug. 15, 1933; for increase in wages,<br>reduced hours and recognition of union; termi-<br>nated Aug. 31, 1933. Compromise.            |
| Women's clothing factory<br>workers (cloakmakers), Win-<br>nipeg, Man.....          | 24                                  | 100                                | Commenced Aug. 15, 1933; against new method of<br>wage payment; terminated Aug. 19, 1933; in<br>favour of workers.                               |
| Textile factory workers (silk),<br>Louisville, P.Q.....                             | 750                                 | 4,500                              | Commenced Aug. 23, 1933; for increase in wages;<br>terminated Aug. 29, 1933; indefinite.   |
| Hat and cap workers, Toronto<br>and Hamilton, Ont.....                              | 200                                 | 400                                | Commenced August 30, 1933; for increase in wages<br>and reduced hours; untermi-<br>nated.  |
| <i>Other Wood Products—</i>   |                                     |                                    |  |
| Furniture factory workers,<br>Toronto, Ont.....                                     | 275                                 | 1,700                              | Commenced August 16, 1933; for increase in wages,<br>reduced hours and recognition of union; termina-<br>ted Aug. 24, 1933; compromise.          |
| <b>TRADE—</b>   |                                     |                                    |  |
| Scrap metal workers (rag pick-<br>ers, etc.), Winnipeg, Man.....                    | 18                                  | 100                                | Commenced August 25, 1933; for increase in wages,<br>recognition of union, etc.; untermi-<br>nated.  |
| <b>SERVICE—</b>   |                                     |                                    |  |
| <i>Business and Personal—</i>   |                                     |                                    |  |
| Restaurant employees, Van-<br>couver, B.C.....                                      | 7                                   | 200                                | Commenced Aug. 1, 1933; for increased wages;<br>untermi-<br>nated.   |

\*In this table the date of commencement is that on which time loss first occurred, and the date of termina-  
tion is the last day on which working time was lost to an appreciable extent.

**COAL MINERS, CANMORE, ALTA.**—As noted in the August issue of the *LABOUR GAZETTE*, the 240 coal miners involved in this dispute resumed work on August 14, 1933, having been on strike from July 5, 1933, to enforce a demand that one miner should be given another place pending negotiations as to improvements to his usual working place. The grade up which the miner had to push the empty cars was declared to be excessive. On August 9, the western representative of the Department, with a provincial mines inspector and officials of the company and the union, inspected the working place. The grade was found to be slight, 1.3 per cent, and the management agreed to alter it if it became excessive. It is reported that as the mine was not being operated full time, operations were affected for only sixteen days during the period of the strike.

**WOMEN'S CLOTHING FACTORY WORKERS (CLOAKMAKERS), TORONTO, ONT.**—This strike involving numbers of employees in several non-union establishments, beginning on July 7, 1933, to secure agreements, wage increases and other changes, was settled in several shops by July 14, as noted in the August issue of the *LABOUR GAZETTE*, the demands of the workers being conceded. In the other shops, however, no settlement has been reported and the dispute appears to have lapsed early in August. Charges of assault against two pickets were dismissed in police court owing to insufficient evidence.

**ORNAMENTAL IRON AND BRONZE WORKERS, MONTREAL, P.Q.**—Approximately 150 members of the Canadian Ornamental Iron and Bronze Workers' Union, employed in some twenty establishments in Montreal, ceased work on July 26, 1933, the dispute being, as noted in the August issue of the *LABOUR GAZETTE*, reported to the Department too late for inclusion in the table and statistical compilation for July. The strikers demanded a minimum rate of 65 cents per hour for mechanics, 55 cents for second class workers and 45 cents for helpers. Early in the dispute the representatives of the employers offered rates of 50 cents, 40 cents and 35 cents respectively for these classes, but this offer was refused. Following further negotiations, however, the men returned to work on August 12, 1933, a signed agreement having been reached for rates of 55 cents per hour for first class men, 45 cents for second class and 35 cents for helpers, it being stipulated that no work would be done on a piece rate basis. The agreement reached is summarized elsewhere in this issue.

**PLUMBERS, HAMILTON, ONT.**—The dispute involving plumbers employed in two establishments in Hamilton demanding the wage rate in the union agreement with the master plumbers' association since July 26, 1933, is

reported to have been settled on August 8, 1933, the employers signing agreements with the union.

**FUR FACTORY WORKERS, MONTREAL, P.Q.**—This dispute commenced on August 3, 1933, when some twenty fur factory workers, members of the Montreal Fur Workers' Union, an independent organization, were locked-out by their employer because of their demand for an increase in piece rates and recognition of their union. Negotiations between the parties, however, resulted in work being resumed on August 7, 1933, at rates approximately twenty per cent higher than prior to the dispute, a forty-four-hour week for piece workers being agreed upon. Union recognition, however, was refused.

**FUR FACTORY WORKERS (OPERATORS, ETC.), TORONTO, ONT.**—Twenty-one cutters, operators, etc., members of the Fur Workers' International Union employed by one firm in Toronto, ceased work on August 12, 1933, protesting against the introduction of a system of wage payment on piece rates. Negotiations between the parties resulted in the workers returning on August 21, 1933, the employer agreeing to pay wages on a time basis.

**FUR FACTORY WORKERS (OPERATORS, ETC.), WINNIPEG, MAN.**—This dispute commenced on August 14, 1933, when some thirty operators, cutters, cleaners, etc., employed by one fur manufacturing company in Winnipeg, Man., ceased work, demanding the reinstatement of one worker allegedly discharged for union activity. Additional demands were made by the union, the Industrial Union of Fur Workers, for increases in wages ranging from ten per cent to twenty per cent, and for recognition of a shop committee, equal division of work, etc. The plant was picketed by the strikers, but on August 17 the employer reported that the establishment was operating with a full staff and working conditions were no longer affected. The union, however, continued to picket the factory. On August 25 the secretary of the provincial Bureau of Labour offered his services as mediator and both parties accepted his offer. Early in September a settlement was reached, the strikers being re-employed.

**FUR FACTORY WORKERS (DRESSERS & DYERS), TORONTO, ONT.**—This dispute commenced on August 16, 1933, when 226 dyers and dressers, employed by one fur manufacturing company in Toronto, Ont., ceased work, demanding the withdrawal of a wage reduction of twenty per cent. Demands were also made for a shorter working week, time and one-half for overtime and improved working conditions. Negotiations between the firm and the Fur Dressers' and Dyers' Industrial Union were carried on

from time to time but no settlement had been reached by the end of the month. On August 30, three pickets were reported to have been arrested on charges of obstructing the police.

**LEATHER FACTORY WORKERS (PURSES), MONTREAL, P.Q.**—Employees in two establishments ceased work on August 15, in one case demanding the dismissal of a non-union employee and in the other demanding increases in wages, a forty-six and one-half hour week and union recognition. In the first case the employees resumed work on August 24, without securing their demand, and in the other case work was resumed on August 21, a ten per cent increase in wages being secured, but not a shorter week or union recognition.

**KNITTING FACTORY WORKERS, WINNIPEG, MAN.**—Demanding a forty-four hour week, recognition of a shop committee and no discrimination on account of union activity, thirty members of the Textile Workers' Industrial Union in one knitting factory in Winnipeg ceased work on August 10, 1933. The employer agreed to these demands and work was resumed in the afternoon.

**WOMEN'S CLOTHING FACTORY WORKERS (CUTTERS), MONTREAL, P.Q.**—Dress cutters, about 500 in number, employed in from one hundred to one hundred and twenty-five establishments, ceased work on August 15 and succeeding days demanding a scale of minimum wage rates, the forty-four hour week, the establishment of an unemployment insurance fund and recognition of the Montreal Dress Cutters' Union (independent). Approximately 10,000 workers of other classes were reported to be indirectly affected. A number of the employers organized as the Manufacturers' Protective Association, and refused to recognize the union. They stated that the wages paid were in most cases higher than the minimum rates demanded, namely \$30 per week for head cutters, \$20 for choppers and \$15 for assistants, and that the forty-eight hour week with overtime during busy seasons was necessary, also that the union had refused arbitration before the strike. Later they offered to agree to the strikers' demands except that for union recognition. On August 22 the union officers stated that about one-half the strikers had resumed work in about fifty shops, the employers in these having individually conceded their demands except that for the unemployment insurance fund. Toward the end of the month it was reported that settlements had been arranged in about twenty-five additional shops, that 350 strikers had resumed work, and that by the end of the month work would be resumed in all cases.

**WOMEN'S CLOTHING FACTORY WORKERS (CLOAKMAKERS), WINNIPEG, MAN.**—This dispute commenced on August 15, 1933, when twenty-four operators, finishers, etc., members of the Industrial Union of Needle Trades Workers employed in one cloak manufacturing establishment ceased work, protesting against the system of piece work payment and contracting under which the factory was operated. Demands were also made for recognition of a shop committee, equal division of work, no discrimination for union activity, etc. Negotiations between the parties resulted in the resumption of work on August 21, 1933, the demands of the workers being conceded.

**TEXTILE FACTORY WORKERS (SILK), LOUISEVILLE, P.Q.**—Weavers, dyers, twisters, etc., 750 in number, employed by one textile factory at Louiseville, P.Q., ceased work on August 23, 1933, to enforce a demand for higher wage rates for a newly installed class of piece work. Several meetings were held between the employer's representative and a committee of the strikers, and work was resumed on August 29, 1933. An increase in wages later on was promised by the management.

**CAP FACTORY WORKERS, TORONTO AND HAMILTON, ONT.**—A strike of employees in several factories in Toronto and Hamilton, Ont., on August 30, 1933, to secure increases in wages and reductions in hours occurred. At the end of the month no termination had been reported. Early in September one firm in Hamilton agreed to an increase in wages of ten to fifteen per cent, the 40 hour week and recognition of the union, the International Union of Cloth Hat, Cap and Millinery Workers.

**FURNITURE FACTORY WORKERS, TORONTO, ONT.**—Approximately 275 workers, employed by twelve firms in Toronto, Ont. and engaged in the manufacture of chesterfield furniture, ceased work on August 16, 1933, demanding increased wages and reduced hours. The strikers were members of a recently formed organization, the Chesterfield and Furniture Workers' Industrial Union, which asked for a signed agreement providing for a forty-four hour week, a fifty per cent increase for upholsterers, forty per cent increase for operators and cutters, 30 per cent increase for unskilled labour, time and one-half for overtime, recognition of shop committees, etc. It was reported in the press that establishments in Kitchener and Waterloo were also affected, but it has been ascertained that workers in this locality refused to strike, their wages having been increased in recent weeks. On August 18 six pickets were arrested following a disturbance.

Shortly after the commencement of the strike the employers offered to grant the forty-four hour week with a forty per cent increase for upholsterers and a twenty per cent increase for other trades. This was refused by the union. Negotiations held between the parties from time to time, however, resulted in the resumption of work on August 24, agreements being reached and signed providing for a forty-four hour week, a forty per cent increase for upholsterers thirty per cent for other skilled and semi-skilled trades and twenty per cent for labourers, with a minimum of \$15 per week or 34 cents per hour, with time and one-half for overtime after 48 hours and equal division of work during the busy season. One firm refused to accept these terms, but the dispute is recorded as terminated by the end of August.

SCRAP METAL WORKERS, (RAG PICKERS, ETC.), WINNIPEG, MAN.—A number of employees in

one establishment ceased work on August 25, 1933, when the demands of a union, affiliated with the Workers' Unity League, for increased wages, abolition of the piece work system and recognition of a shop committee, were refused by the employer. One of the strikers was arrested as a result of a disturbance in connection with picketing on August 28. The employer stated that the establishment was operating without the small number on strike as they were not needed. At the end of the month no settlement had been reported. Early in September work was resumed, an increase in wages being given and piece work abolished.

RESTAURANT EMPLOYEES, VANCOUVER, B.C.—Some of the employees in one restaurant, cooks, waiters, and waitresses, ceased work on August 1, 1933, demanding increases in wages. At the end of the month no settlement had been reached.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, 1933, in the review of Strikes and Lockouts in Canada and Other Countries, 1932. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the Government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in July was 23, and 13 were still in progress from the previous month, making a total of 36 disputes in progress during the month, involving 10,400 workers with a time loss of 67,000 working days.

Of the 23 disputes beginning in July, 3 arose out of proposed reductions in wages, 12 on other wages questions, 2 over questions respecting the employment of particular classes or persons, 4 over other questions of working

arrangements and 2 over questions of trade union principle. Settlements were reached in 23 disputes, of which 5 were settled in favour of workers, 9 in favour of employers and 9 were settled by compromises.

A strike of about 20,000 anthracite coal miners in Wales lasted from August 14 to August 21. The strike was against the alleged non-payment of minimum wages at certain mines and over questions of seniority and was called off by the union.

### France

A strike of boatmen on the rivers and canals of northern France tied up or delayed traffic for several days in August, but was settled by the acceptance of the Government's promise to equalize competition conditions and enforce the 8 hour day.

### United States

The number of disputes beginning in June was 122 and 87 were in effect at the end of the month. The number of workers involved in disputes in effect at the end of the month was 36,757 and the time loss 697,626 working days for June.

With the coming into effect of the National Industrial Recovery Act, a number of disputes occurred in connection with the application of its provisions, chiefly as to employment, wages, hours and collective bargaining. The National Labour Board appointed by the President of the United States early in August to adjust all such disputes was largely successful in settling these disputes within a

short time, and although large numbers were involved, the time loss during August would not be correspondingly high.

A strike of about 15,000 anthracite coal miners in Pennsylvania demanding equalization of work was in progress during the third week of August, but after a few days' work was resumed at the request of the Governor of the State of Pennsylvania, and on August 20, through the mediation of Federal Government officials, it was agreed to continue work pending Federal hearings of the code of this industry.

A strike of 7,000 broadsilk workers at Paterson, New Jersey, began August 31, and on September 6 they were joined by 3,000 employees of silk throwing mills. They demanded substantial increases in wages. No report of a settlement of this dispute has been noted.

A strike of 60,000 dressmakers in New York City and surrounding centres in the states of New York, New Jersey and Connecticut for the unionization of open shops began August 16 and was settled by August 26 in favour of employees. There was also a stoppage of work involving 23,000 cloakmakers in the same district during the same week over the new piece work schedule and this also resulted in an agreement.

A similar strike of 8,000 ladies garment workers at Chicago, Illinois, lasted two weeks and an agreement reached September 4, providing for a two year contract with the 35 hour week, higher wage rates and minimum wages.

The dispute involving 14,000 hosiery workers at Reading, Pennsylvania, who had been on strike for two months for union recognition was settled August 10 by the National Labour Board, providing for no discrimination against strikers or union members and for a joint board of arbitration to settle all disputes.

Hosiery workers numbering about 5,000 at High Point, North Carolina, after a three weeks strike reached a settlement with employers on August 7, by which their weekly wages would be the same for the 40 hour week as formerly paid for a 55 hour week.

A strike of between 12,000 and 15,000 shoe workers in northern Massachusetts is reported to have been settled August 11th by the granting of an increase in wages of 20 per cent when hours were reduced from 48 to 40 per week.

The strike of moving picture workers at Hollywood, California, reported in the last issue of the LABOUR GAZETTE was settled by the National Labour Board on August 23 and the question of union jurisdiction was referred for settlement to the American Federation of Labour.

### Prison Labour in the United States

According to a survey of prison labour recently completed by the Bureau of Labour Statistics of the United States Department of Labour, there were 158,947 prisoners confined in State and Federal prisons in 1932. This compares with 84,761 in 1923, the year of the Bureau's last previous survey on this subject. The figures represent an increase of 87 per cent during the nine-year period.

Of the number incarcerated in 1932, 82,270 were engaged in productive labour, 52,986 were engaged in various prison duties (such as cooking, washing, keeping the cells clean, scrubbing prison walls, etc.); 6,558 were sick and 17,027 were idle.

The 82,270 prisoners engaged in productive labour produced goods having a value of over \$75,000,000. Among the most important classes of goods produced were 22,000,000 shirts having a value of over \$8,000,000; 63,000,000 pounds of binder twine having a value of over \$4,000,000; and more than 36,000,000 automobile licence tags. Twelve hundred miles of new road, having a valuation of over \$15,000,000, was built by prison labour during 1932.

Of the 116 state prisons, 66 paid a money wage to all or a part of the inmates; 48 paid no compensation of any kind for work done; and 2 allowed credit of time on sentences for prisoners doing certain classes of work. Of the 12 Federal prisons, 7 paid wages to prisoners for work and 5 did not. In most of the institutions the pay was nominal, generally ranging from 2 cents to not more than 15 cents per day, although in a few prisons, the scales were considerably higher.

Of the prisoners employed at productive labour in 1932, 1.3 per cent had nominal working hours of less than 24 per week; 55.2 per cent worked 44 hours or less per week; while 21.8 per cent worked 60 hours or over per week.

Dr. David Jamieson, chairman of the Old Age Commission of Ontario, recently congratulated the city of Kitchener on the fact that it had the smallest number of pensioners of any city of the province in proportion to its population. "The record certainly shows," he wrote, "that Kitchener and the county of Waterloo have a very satisfactory showing, and this should be a tribute to the Germans who are the principal stock resident of your district."

## OLD AGE PENSIONS IN CANADA

### Financial Summary as at June 30, 1933

THE accompanying table gives a financial summary to the end of June 30, of operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, chapter 156, amended by Statutes of 1931, chapter 42), and under the concurrent Acts adopted by the provinces participating in the scheme. Full statistics, bringing the information to the end of March, appeared in the LABOUR GAZETTE, July, 1933, page 687.

On September 5 the Hon. Angus L. MacDonald, the newly elected premier of Nova Scotia, announced that a proclamation, the first to be issued by the new government, had been issued, making effective the provisions of the Old Age Pensions Act passed by the provincial legislature in 1931 (LABOUR GAZETTE, September, 1931, page 982).

FINANCIAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT JUNE 30, 1933

|   | Alberta                   | British Columbia            | Manitoba                    | Ontario                    | Saskatchewan              | Northwest Territories               | Totals          |
|---|---------------------------|-----------------------------|-----------------------------|----------------------------|---------------------------|-------------------------------------|-----------------|
|   | Act effective Aug 1, 1929 | Act effective Sept. 1, 1927 | Act effective Sept. 1, 1928 | Act effective Nov. 1, 1929 | Act effective May 1, 1928 | Order in C. effective Jan. 25, 1929 |                 |
| Total number of pensioners as at June 30, 1933.....   | 5,490                     | 7,306                       | 8,494                       | 43,884                     | 8,549                     | 5                                   | 73,728          |
| Average monthly pension.....  | \$18 42                   | \$18 89                     | \$18 87                     | \$18 07                    | \$16 72                   | \$20 00                             | .....           |
| Percentage of pensioners to total population.....   | 0.75%                     | 1.05%                       | 1.21%                       | 1.28%                      | 0.93%                     | 0.05%                               | .....           |
| Percentage of persons over 70 years of age to total population.....   | 1.93%                     | 3.00%                       | 2.57%                       | 4.11%                      | 1.91%                     | 0.95%                               | .....           |
| Percentage of pensioners to population over 70 years of age.....  | 38.83%                    | 35.11%                      | 47.16%                      | 31.03%                     | 48.49%                    | 5.37%                               | .....           |
| Total amount of pensions paid by Province during first quarter of fiscal year 1933-34 (Period April 1-June 30, 1933)..... | \$296,714 57              | \$413,882 12                | \$484,679 32                | \$2,342,888 11             | \$431,225 71              | \$341 25                            | \$3,969,731 08  |
| Dominion Government's share of expenditure.....   | \$222,381 38              | \$309,244 34                | \$363,509 49                | \$1,748,974 21             | \$324,217 10              | \$341 25                            | \$2,968,667 77  |
| Total amount of pensions paid by Province since inception of Old Age Pensions Act to June 30, 1933.....                   | \$3,255,091 30            | \$6,676,449 73              | \$6,860,622 73              | \$29,763,488 60            | 6,413,600 82              | \$5,482 21                          | \$52,974,735 39 |
| Dominion Government's share of expenditure.....   | \$2,078,272 12            | \$3,987,700 80              | \$4,176,110 38              | \$18,489,536 44            | \$3,935,983 74            | \$5,482 21                          | \$32,673,085 69 |

### Ratification of I.L.O. Conventions

Four of the Central and South American countries have made their appearance this year for the first time in the chart of ratifications of International Labour Conventions, namely, Colombia, the Dominican Republic, Uruguay and Venezuela. Colombia has ratified 24 Conventions, comprising all those adopted by the Conference from its inception in 1919 to 1928, with the exception of the Conventions relating to night work of child-

ren and the minimum age for admission to agricultural employment. Uruguay has ratified 30, and thus appears, together with Spain, which has registered the same number, at the head of the list of States Members in respect of Conventions ratified. The Dominican Republic and Venezuela have each ratified four. In addition, Chile, which had already ratified 13 Conventions, has ratified 6 more this year.

## LABOUR LEGISLATION IN NOVA SCOTIA IN 1933

THE following is a brief summary of the laws of interest to labour enacted by the Nova Scotia Legislature during its recent session which opened on March 21, and closed on May 17, 1933.

The *Nova Scotia Labour Act* forbids any person or corporation employing twenty-five or more workers to hire as a workman, or make any agreement or contract for hiring or employment with, a person who has not been a resident of Nova Scotia for at least one year, unless the person hired produces a certificate from the government employment agent or municipal clerk in the place where he is to be employed that there are no unemployed persons in such place capable of doing and willing to do the work, and specifying such work. A fine not exceeding \$500 is provided for violation of those provisions. The Act expires on May 1, 1934.

An *Act relating to the Coal Mines Regulation Act* amends that Act to provide that after the passing thereof (May 17, 1933) and until May 1, 1934 employers shall not, without the written consent of the employee, retain or deduct from salary or wages any sums due before the passing of the amendment, for rent, coal, powder, tools or other warehouse supplies unless the employee's net week's earnings, after the current week's deductions have been made, amount to at least \$12. If the net earnings exceed \$12 but do not exceed \$17, the employer may deduct for such past due accounts a sum not exceeding 5 per cent of the net earnings, and if the net earnings exceed \$17 the employer may deduct a sum not exceeding 10 per cent thereof. No firm or corporation to whom this Act applies or engaged in the business of manufacturing or fabricating steel or steel products may make any deductions from any employee's wages for accounts due before the passing of this Act by such employee to his employer in excess of the percentages given above. These provisions apply from the passing of this Act to May 1, 1934.

The *Nova Scotia Miners' Land Settlement Act 1932*, was the subject of a number of amendments which are retroactive to the date of the passing of the principal Act. Enacted first to provide for settlement of unemployed coal miners on the land its scope was widened to cover settlement of unemployed persons who have been engaged in a manufacturing industry or in transportation, and members of junior agricultural societies. The titles of the Act have been changed to conform to changes in the text, and the short title is now the *Nova Scotia Land Settlement Act*. New powers are conferred upon the Land Settlement Board including that of constituting, subject to the approval of the Lieutenant-Governor-

in-Council, local committees in different parts of the Province and entering into agreements with the Government of Great Britain or of any Province or any part of the British Empire as well as with the Federal Government and organizations for the settlement or operation of vacant or unoperated lands in the Province on terms approved by the Lieutenant-Governor-in-Council. The Board is also empowered to acquire, hold and dispose of lands upon which the timber has been exhausted or burned or which has been vacated or abandoned and which may be made suitable for agricultural or industrial purposes, and to reclaim, clear, develop and operate the same for settlement and for agricultural, grazing or industrial purposes; to investigate and determine the most effective methods and procedure for dealing with all matters pertaining to the maintenance, training and re-establishment of the unemployed and their dependants; to develop ways and means of securing the co-operation and utilizing the services of citizens in all parts of the Province; to arrange for educational and vocational work and undertakings designed to readjust the outlook and future of young men and women and to get them to engage in productive channels of employment; to place unemployed in productive and constructive employment; to promote and carry on such undertakings as the Board may deem expedient; to train in home economics the wives and female dependants of settlers; to pay subsistence allowances to any settler or dependant while such person is receiving instruction or training; to establish, define, cultivate and develop settlement areas for agricultural or industrial purposes, to subdivide them into lots and to dispose of the same; to organize development service leagues throughout the Province to assist in the employment, training and re-establishment of the unemployed and their dependants and, when necessary to provide unemployed members thereof with food, clothing and a necessary allowance; such other purposes and powers as the Governor-in-Council may determine.

In addition to dealing with the unemployed the amending Act also makes provision for assisting persons who have had farming experience and wish to take up land.

The limit of \$500,000 placed on borrowings for the purposes of the Act is removed. Two years is added to the term of an agreement of sale which may now be for 17, 27, or 34 years according to the amount involved, such term to date from the first day of November following the execution of the agreement. The Board may, if it deems it expedient, defer the payment of all or part of the first twelve quarterly instalments instead of the first nine

as formerly. Unless the Board otherwise consents in writing, all lands, stock, etc., of a settler are exempt from liens, attachment, expropriation, etc., as long as any advance made to him by the Board remains unpaid. The property is to constitute security for unpaid advances.

The *Municipal Act* was amended by the addition of a clause similar to one contained in the *Towns Incorporation Act*, providing that municipal councils may pass by-laws providing for the closing of retail shops during certain hours on any day or on certain days.

Sections of the *Education Act*, dealing with school attendance were re-enacted with a number of amendments. The age of compulsory school attendance remains unchanged at 7 to 14 years in rural and 6 to 16 years in urban districts. By majority of vote of the rate-payers and their wives, however, rural school sections may fix the age limits at six or seven to fourteen, fifteen or sixteen years. When the services of a child 12 years of age or over are required in husbandry or some other necessary employment, the principal of the school may, on written application of the parent or guardian, issue a temporary certificate exempting such child from school attendance for a period not exceeding six weeks in any school year. Provisions for the exemption of any child 13 years of age and over, on an employment certificate (including medical certificate) are unchanged except that in sections where there is no attendance officer such certificate must be approved by the supervisor of attendance or the inspector. The supervisor of attendance

may cancel an employment certificate at any time. Employment certificates and temporary certificates must be issued in duplicate, one copy being retained by the principal of the school and the other by the employer. The section was redrawn which forbade the employment in school hours of a child under 16 except on a certificate of employment or satisfactory school work. The fine imposed on an employer for an offence against this section is now \$20 instead of from \$10 to \$50 as formerly.

There are a number of changes in the provisions relating to school attendance officers one or more of whom must now be appointed on or before September 1 in each city, town, or school section having one hundred children between the ages of 7 and 14 years, as shown by the last school census. In addition to making the semi-annual examination of employed children, school attendance officers are required to visit places of public entertainment and amusement, factories, workshops, shops, stores, and all other places where children may be employed or may congregate, and to perform such other duties as may be necessary for the enforcement of Part II of the Act.

The *Parents Maintenance Act* provides that any parent may lay a complaint before a magistrate that he is unable to maintain himself and that his son or daughter does not contribute sufficiently to his support. A complaint may also be laid by any other person on behalf of the parent provided that such person has the consent of the Attorney-General.

## Code of Fair Competition for the Cotton-Textile Industry in the United States

The first code of fair competition to come before the National Recovery Administration in the United States under the newly enacted National Recovery Act (*LABOUR GAZETTE*, July, 1933, page 691; August, page 785) dealt with the cotton-textile industry. Hearings were held from June 27 to June 30, 1933, and on July 9 the President ordered the code adopted providing for operation under the conditions fixed, beginning July 17. As presented, the code set a \$10 minimum wage for a 40-hour week in the South and an \$11 minimum for the North, these rates to apply to all unskilled employees "except learners during a 6 weeks' apprenticeship, cleaners, and outside employees." Maximum working hours for any employee, "except repair-shop crews, engineers, electricians, firemen, office and supervisory staff, shipping, watching, and outside crews, and cleaners", were placed at

40 per week and shifts per week were limited to 2 of 40 hours each. Following presentation of the code, representatives of employers, labour, and consumers were heard publicly both for and against the code as it stood. Labour representatives were unanimous in their disapproval of the minimum wages set, believing the rates unduly low. A rate of 50 cents per hour was suggested, but in general from \$12 to \$16 per week was stated to be acceptable, the rates in several instances, however, being proposed for a working week considerably shorter than 40 hours. Before the close of the hearings the code was voluntarily revised to provide a minimum wage of \$12 per week of 40 hours in the South and \$13 in the North.

In connection with minimum wages it was suggested by labour witnesses that minima should be set for workers in different skill

classes, i.e., unskilled, semi-skilled, skilled, and highly skilled. This, it was said, would obviate any tendency to bring the wages of the highly skilled to extremely low levels.

Opposition to the 40-hour week provision was based on the belief in many quarters that its adoption would change very little the existing position with respect to employment. Suggestions were made of 35, 30 and even 27 hours per week to meet present conditions. In this connection the administrator, General Johnson, raised the point that the adoption of so short a week would force the cotton-textile industry into the position of absorbing more than its quota of the unemployed, that is, more than the normal number of persons employed in the industry. In a later statement by Dr. Alexander Sachs, chief of the research and planning division of the National Recovery Administration, the 40-hour week

was described as being of the proper length to permit employment of 100,000 more persons in this industry than in 1929. This provision of the code was retained.

Finally, the code was amended to provide a Cotton Textile National Industrial Relations Board, composed of one representative each of employers and employees and a third representative to be appointed by the Administrator of the act, to make proper provision with regard to the "stretch-out" system or any other problems of working conditions. Supplementing this board State boards may be appointed and industrial relations committees within the plants where problems arise, the procedure adopted being first to endeavour to settle questions within the respective plants and failing this to refer such questions to the State boards or take final recourse to the national body.

### Decline of Employment in Coal Industry in U.S.A.

A recent address on the status of the coal industry in the United States, by Dr. Alexander Sachs, Director of the Division of Research and Planning of the National Recovery Administration, reproduced in the *New Republic*, August 30, makes the following statement as to the decline of employment in the industry in recent years: "The effect of disorganization has been particularly severe upon employment. In 1923 the industry employed 704,793 wage earners, while in 1931 the figure was 450,213. In 1932 the total employment was 379,565. The total reduction since the peak year 1923 has amounted to about 45 per cent. But even that does not

represent adequately the loss in employment. It is man-hours and man-days that tell the story. Not only has the number employed been drastically reduced, but the working time has also been curtailed. For a period of thirty-two years ending in 1921, bituminous mines worked on an average of 213 days per year. In no year during that period did the mines as a whole average as much as 250 days. Since 1921, the situation has become much worse, the nine-year period, 1922 to 1930, showing an average working time of 189 days. In 1931, the working time was 160 days, and in 1932, 145 days.

### The I.L.O. Year Book 1932

The *I.L.O. Year Book 1932*, just published, is a compendium of facts and figures relating to economic, industrial and social life in 1932. It begins with a general introduction, to which are traced the main events of the year in the life of the International Labour Organization and in that of the many industrial and other bodies and movements with which it is in constant contact. This is followed by a chapter on the economic situation, which brings out with a wealth of statistical data the effects of the depression on prices, currency, finance, production, international trade, income and industrial organization. The next six chapters contain surveys of developments, both national and international, in the spheres of conditions of work, social insurance, wages, unemployment and migration, living conditions and the workers' general rights. A final chapter is de-

voted to the particular problems of agricultural workers, seamen, native labour and some other "special" classes of workers.

A number of statistical tables (membership of trade unions, index numbers of money wages and cost of living, unemployment, migration movements, industrial disputes, etc.) are given in appendices. Charts are also given showing the number of ratifications of each International Labour Convention and the number of Conventions ratified by each State, together with a table printed in four colours indicating in respect of each State and each Convention the stage reached in the procedure of ratification. An index facilitates reference to the volume which, it is believed, will be found a mine of information for all who are concerned with social problems and policy.

## LABOUR AND INDUSTRY IN BRITISH COLUMBIA IN 1932

### Annual Report of Provincial Department of Labour

THE fifteenth annual report of the British Columbia Department of Labour reviews the administrative activities of the Department during the year ended December 31, 1932. The Department is empowered to require the trade unions, industrial societies and other organizations to supply information as to their rules and practices; to require employers to furnish reports as to their employees in respect to wages, hours of work, etc., and to obtain from any available source information as to the cost of living, the relations of prices to labour and industrial conditions in the province. Under departmental administration are the employment offices and the Factories Act. The Deputy Minister of Labour is *ex-officio* chairman of the Board of Adjustment under the Hours of Work Act 1923, which provides for an eight-hour working day in the industries of the province, with the exception of those expressly exempted by the Board. He is also chairman of the Male Minimum Wage Board, administering The Male Minimum Wage Act, and of the Minimum Wage Board (for female employees) which administers the Minimum Wage Act.

The outstanding feature of labour affairs during the year was the unprecedented amount of unemployment. As an index of industrial conditions, the deputy minister draws attention to the lumber industry which in 1929 had a total of 1,079 firms reporting to the Department while for 1932 the number was reduced to 555 firms, and for the month of greatest employment the numbers were 27,041 and 11,505 respectively. Contracting similarly registered a drastic reduction, the firms reporting being 1,272 in 1929 and 736 for 1932, the number employed decreasing from 12,491 in the peak month of 1929 to 5,204 for 1932.

"With our cities crowded with unemployed," the deputy minister states, "employers have, to a larger extent than formerly, been able to secure labour upon their own terms, and it has been difficult to understand the attitude of some employers whose men are obliged to live in camps in keeping up the charge for board at a figure entirely out of harmony with the wages paid, despite the claim from certain quarters that wages had been reduced because of the decrease in the cost of living. Coming into close contact with the hardships created, this Department would be remiss in its duty if it did not issue a warning that greater consideration must be given to amplify the purchasing power of the wage earners. Present methods are not such as

create a demand for the goods produced, and thus we have what is called overproduction. There need be no excess production if the wage earner was in a better position to buy. Stabilization of industry along lines calculated to eliminate vicious competition should be the aim of all manufacturers. Labour has long ceased to be a commodity, and the attitude shown by the recognized trade unions during the past three years has demonstrated that at all times they have been willing to co-operate with employers in the finding of a solution capable of extending the cordial relations existing between employer and employee."

*Unemployment and Relief.*—The report details the operations under the various relief measures entered into jointly with the Dominion Government (These enactments have been dealt with in various issues of the LABOUR GAZETTE). A summary of this service indicates that on March 31, 1933, the numbers on relief in the province totalled 132,838, of whom 25,684 were heads of families, 75,005 were dependants, and 32,149 single individuals.

*Payrolls and Wages.*—The section presenting statistics of trade and industries shows that the 3,529 firms making returns (as compared with 4,088 in 1931) reported a payroll of \$72,606,374.57 (as compared with \$96,296,567.77 in 1931). In addition, an estimate is made of the amount due from employers who failed to make a return or whose returns were received too late to be classified. There are also the payrolls of the railways and transportation industries, wholesale and retail firms, and Dominion and Provincial employees. Including these factors the total gross payroll of the province for 1932 is placed at \$102,957,074. This total payroll is spread among the industrial districts as follows: Greater Vancouver, \$48,183,910.64; rest of mainland, \$37,980,864.59; Vancouver Island, \$16,792,298.77. The distribution of the payroll on a percentage basis to the various groupings of employees in 1932 was as follows: officers, superintendents and managers, 12.77; clerks, stenographers and salesmen, 14.93; wage-earners, 72.30. During a five-year period, the summary shows that the wage-earning group has progressively received a reduced percentage in relation to the other two groups, and this trend draws the following observation:

"The above figures convey in a graphic manner the fact that the wage-earner is the one who has had to bear the brunt of the past few years, though it must be recognized that all have suffered; the fact that the

wage-earning group shows a decline and the other two an increase does not necessarily mean that the amounts paid have increased, but rather that more of the wage-earning group had been laid off, or placed on short time, and that the process of wage cutting had been more severe in the wage-earning group than in the other two. Further evidence of this can be found in the numbers of adult male workers who are in receipt of a weekly wage of less than \$19 per week, the total for 1932 being 20,431, as against 4,391 in 1928, 5,592 in 1929, 7,253 in 1930, and 16,264 in 1931."

All industries except three show a reduced payroll, the reduction varying from \$22,000 in the paint-manufacturing industry to \$5,618,000 in the contracting group. The lumbering group lost \$3,742,000; smelting, \$2,579,000; metal trades, \$2,000,000; coast shipping, \$1,933,000; and public utilities, \$1,789,000. Metal-mining and the pulp and paper industries lost approximately \$1,100,000 each; builders' materials and coal-mining, \$950,000; food products, \$785,000; ship-building, \$651,000; wood-manufacture, \$443,000; house-furnishing, laundries, etc., \$284,000 each; miscellaneous trades and industries, \$242,000; garment-making, \$196,000; breweries, etc., \$186,000.

Industries which showed increased payrolls were: explosives and chemicals with an increase of \$441,000 due to the fertilizer plant at Trail having increased its production; printing and publishing with \$281,000; and oil refining with \$244,000. Attention was directed to the increase in the number of employees in this last industry. In 1931 the month of maximum employment in oil refining was August with 543 employees; in 1932, the greatest number employed in any one month was 792. The report states that the "oil refining plants are increasing the number of employees, and it would be well for workmen who fear other industries are displacing the products they are now producing, to consider adapting themselves to some other line of work; and in this, employers can be of great assistance by refusing to hire any new men, giving the experienced employee the first opportunity of the work offered."

Employers within the province with a payroll of over \$100,000 numbered 110, against a total of 145 for the previous year. This total of 110 firms is exclusive of public authorities (Dominion, Provincial, or municipal), wholesale or retail firms, transcontinental railways, or deep-sea vessels.

The 110 firms are distributed as follows: Lumbering, 23; food products, 18; metal-mining and public utilities, 8 each; coal-mining and coast shipping, 7 each; contract-

ing and printing and publishing, 5 each; pulp and paper, 4; breweries, distilleries, etc., garages and oil-refining, 3 each; laundries, etc., metal trades, miscellaneous trades and industries, ship-building, and smelting, 2 each; and 1 each in explosives, garment-making, buildings' materials, paint-manufacture, house-furnishing, and the manufacture of wood (N.E.S.). Of the 110 firms, four had a payroll of over \$1,000,000; one of them paying out over \$2,000,000 and one over \$3,000,000.

*Weekly Wage Rates.*—During the year the total number of adult males employed was 63,804, as compared with 73,811 in 1931. The average weekly wage of an adult male employee was \$23.62, as compared with \$26.17 for 1931. Since such records have been compiled the highest average weekly wage was \$29.20 in 1929 and the lowest was the wage for 1932.

As indicated in the accompanying table of the twenty-five chief industrial groups, only one (garment making) registered an increase in the average weekly wage, the increase being \$1.56 per week. All the others show reductions of from 22 cents in the public utility group to \$7.89 in jewellery manufacturing. Of the total number of male employees 15.09 per cent were receiving less than \$15 per week.

AVERAGE WEEKLY WAGES OF MALE EMPLOYEES IN BRITISH COLUMBIA IN 1929, 1931, AND 1932

| Industry   | 1929     | 1931     | 1932     |

| 50.00 and over...                                  | 842               | .....            | .....             | .....            | .....            |
| Totals.....  | 63,804            | 2,420            | 7,876             | 517              | 722              |

*Apprenticeship.*—The total number of apprentices in 1932 showed a reduction of 183 from the 1931 total. Since 1929 the number of apprentices employed in industry has dropped from 1,676. It is pointed out, however, that "this reduction does not mean that 944 apprentices have been laid off, but rather that those listed in 1929 have to some extent completed their training and are now listed under males 21 years of age and over. Doubtless cases have occurred where apprentices have been laid off before having completed their training, due to the fact that there is no apprenticeship law in British Columbia."

Increases in the number of apprentices were noted in explosives and chemicals, 16; manufacture of food products, 29; miscellaneous trades and industries, 17. The principal decreases occurred in contracting, 55; garment-manufacture, 25; metal trades, 50; printing and publishing, 48; smelting, 11; public utilities, 24; and in the manufacture of wood (N.E.S.), 11.

*Employment Service.*—The fourteenth annual report of the provincial branch of the Employment Service reviews the activities of 1932. At the end of the calendar year, employment was described as being "at a low ebb without any immediate improvement in

prospect." Owing to industrial conditions, three offices were closed during the year and two temporary offices were not opened. The statistics indicated the situation as follows: applications, 137,730; employers' orders, 37,670; placements, 37,542; transfers in the province, 127. In presenting these figures, the report states: "It is difficult if not impossible, to analyse these figures on any basis of comparison with any other year in the history of the Employment Service, with the possible exception of 1931. The number of applicants shown does not portray the real situation, and this is due to the fact that men sent to relief camps are not shown on the office records as unemployed as long as they remain there."

The work of the offices was increased owing to the willingness of unemployed workers and municipal officials to leave the assignment of the men on relief employment to the employment offices, this being the case particularly in Victoria and Nanaimo. The report reviews the employment situation as follows:—"There was no seasonal demand in the vegetable, fruit, or fishing industries, due to the surplus of labour in the districts in which this work is carried on, and the opportunities for employment were further reduced by a heavy decrease in the acreage normally used for the production of hops. Employment opportunities for handicapped men were greatly reduced owing to the fact that there was little or no building in progress and manufacturing was greatly reduced. In addition, the handicapped men were confronted with the competition of a large surplus of men who are physically fit. Conditions in the Prairie Provinces again prevented us from taking advantage of the opportunity of placing from 5,000 to 10,000 workers in the harvest fields, work which has, in the previous years, been of a great deal of assistance to newly placed settlers on the lands in this province; the returns from this work enabling them to remain on their farms during the winter months and to engage in land clearing instead of gathering in the cities and towns, increasing the competition for the comparatively small number of jobs available during the winter months. The brightest spot in the industrial life of the province during the year has been a marked activity in the field of metalliferous mining, which has absorbed a large number of men in operating mines and also furnishing employment for some of the older, more experienced miners in development work on new properties. Placer work has also been greatly stimulated, and this has offered opportunities for employment for large numbers of venturesome spirits who are will-

ing to try anything once." Unemployment was further aggravated by the enforcement of the United States Immigration laws and the consequent deportation of a large number of Canadians who had become a charge on communities across the border.

*Factory Inspection.*—The annual report of the chief factory inspector states that "at no time is factory inspection more difficult than during an industrial depression of the present magnitude. Employment is intermittent and uncertain and manufacturing at a low ebb. Under such conditions, greater diplomacy and good judgment are necessary in order to maintain conditions that will meet full requirements for the safety and health of employees."

"In order to prevent unfair competition," the report continues, "between the employers who wish to obey the laws governing hours of labour and the installation of necessary safety devices to protect the life and limb of workers, and those who are set on evading the law, we have found it necessary to make frequent inspections, both night and day, of certain factories in which, as past experience has proved, sweat-shop conditions would be attempted if our efforts were relaxed."

During the year 1,109 inspections of factories were made. These included visits to all classes of industry mentioned in Schedule A of the Factories Act and corrective measures, where necessary, were ordered to be taken relating to the safeguarding of machinery, overcrowding of work-rooms, the installation of sanitary conveniences, heating and ventilation of work-rooms, and the removal by mechanical means of dust and deleterious gases. The inspector pays tribute to the efforts being made by the majority of employers to keep their staffs intact by various methods of spreading the amount of work available among their employees, and to the "sacrifices made by employer and employee to keep the wheels of industry turning."

The report observes: (1) that the mechanical safeguards installed on machinery in the factories of British Columbia will stand favourable comparison with those of any province; and (2) that overtime violations in

Oriental establishments have been markedly reduced due largely to police court proceedings and industrial inactivity. There was only one such proceeding taken in 1932.

Child labour in British Columbia is considered almost non-existent, the few requests received to permit children to be employed in factories came from parents, who because of extenuating circumstances require the assistance of the children's earnings. Strict investigation is made of each case before a permit is issued.

It is considered to be a remarkable achievement on the part of elevator operators and those in charge of equipment, that there were no fatal or serious accidents to the elevator using public in 1932. During the year, 315 passenger and 458 freight elevators were inspected, and orders issued for improvements where necessary for safety. Renewal of licences were made by 548 male and 203 female elevator operators while 141 persons wrote examinations and obtained licences as elevator operators.

*Nationality of Employees.*—Of the number employed in industry in 1932, natives of English speaking countries accounted for 75.26 per cent; continental Europe, 14.57 per cent; nationality not stated, 1.77 per cent; Asiatics, 8.40 per cent. The actual number of Asiatics employed was 6,594 as compared with 6,283 for 1931.

*Female Workers.*—Female employees in industry increased to 10.04 per cent from 9.75 in 1931. Industries affording greater employment for females during the year were headed by food products, up 613; printing and publishing, 16; and garment making, 20. Decreases are noted in the following: Public utilities, 263; miscellaneous trades and industries, 232; laundries, cleaning and dyeing, 120; pulp and paper remaining the same, with 78 each year.

*Labour Disputes.*—During the year there were eleven disputes, involving 4,136 employees and a time loss of 37,740 working days. "Eight of these disputes," states the report, "can be traced to a certain group who seemed determined to create trouble between employer and employee wherever possible."

### British Columbia Hours of Work Act in 1932

A review of the administration of the Hours of Work Act is included in the annual report of the British Columbia Department of Labour. This legislation was enacted in 1923 and became effective on January 1, 1925, being administered by a Board of Adjustment (LABOUR GAZETTE, January, 1924,

page 24). It established a normal working day of 8 hours or a 48 hour week in industry except agriculture with provisions for certain other exceptions under special conditions.

In 1932, due to prevailing conditions, the Board had little difficulty in enforcing the regulations, the majority of industrial under-

takings coming within the scope of the Act having been on reduced time during the year. Referring to the changed industrial conditions the Board states: "Previously the reduction of hours worked per week had for its aim the protection of the worker against fatigue; to-day because of world-wide business conditions, we are compelled to take more definite action in the matter of hours of employment. Recent developments would indicate that all employees will never again be absorbed in industry unless a further reduction in working hours is put into effect, and the Board of Adjustment is considering the cancellation of some of the permanent exemptions granted when the Hours of Work Act became effective, January 1, 1925; it being felt, the Act having been in force for eight years, that in the majority of cases the regulations could now be cancelled without seriously interfering with the industrial undertakings affected."

"The question of further reducing the working hours is a serious one for all employees. Presuming that all will be allowed to work at their occupations only thirty hours per week, at the rate of, say, 75 cents per hour, this would mean a weekly wage of \$22.50; if previously they worked forty-four hours per week at the same rate per hour, their weekly pay would be, \$33; the shorter week would mean a wage reduction of \$10.50 per week. It will therefore be seen that the purchasing power of the individual worker is reduced by \$10.50 per week. It may be argued that by employing additional men the spending power will be the same, but study of the proposal does not bear out this con-

tention, unless, of course, commodities now considered necessary to the well-being of every family are correspondingly reduced, and so far there has been no evidence that this will take place. To bring back prosperity, wages should increase in proportion as the number of working hours are reduced.

"Manufacturers by the installation of machines have been able to discharge many employees and at the same time increase production. Where, by this means, profits have been increased, a fair proportion of these profits should have been passed on to those retained on the payrolls. Further adjustment of hours of labour must be made, but this should be effected without decreasing the purchasing power of the wage earners."

*Average Hours.*—In those industries coming within the scope of the Act, the average hours of work decreased, while in those not governed by this legislation the increase in the average exceeded the recorded decreases.

The average weekly hours worked as calculated from the returns made by the 3,529 firms reporting was 47.69, compared with 47.37 in 1931, 48.62 in 1930, and 48.25 in 1929. It is stated that 80.36 per cent of all employees reported were working forty-eight hours or less per week; 7.70 per cent were working between eight but not more than nine hours per day; and 11.92 per cent were working in excess of nine hours per day. It is explained that the 11.92 per cent working in excess of nine hours per day are those who do not come within the scope of the Act; while the 7.70 per cent include operations allowed certain exemptions by the regulations.

### British Columbia Male Minimum Wage Act

A summary of the operation of the Male Minimum Wage Act of British Columbia is presented in the annual report of the Department of Labour of that province. British Columbia is the only province in the Dominion that has a minimum wage for adult males on its statute books. Under the provisions of the first Act, passed by the Legislature in 1925 (LABOUR GAZETTE, January, 1926, page 17) two Orders were issued establishing minimum wages of male employees in the lumber industry and the catering industry. Subsequently the first of these orders was attacked in the Courts. The legislation was repealed following a decision of the Supreme Court of Canada which declared the Act invalid (LABOUR GAZETTE, November, 1928, page 1310). Then, in March, 1929, a new Male Minimum Wage Act was adopted (LABOUR GAZETTE, June, 1929, page 607). Under the new legislation one order, governing stationary steam engineers is in force at

present (LABOUR GAZETTE, March, 1930, page 282).

"Industrial conditions during recent times," the report states "have not been propitious, and the Board has not been pressed by applications from employees covered by the Act to establish wages in other occupations. The Act, however, gives power to the Board to proceed of its own volition without having received application or complaint, and after due inquiry fix minimum wages. The closest attention is being paid by the Board to developments in the United States under the 'National Industrial Reorganization Act,' which marks a radical departure from the former attitude with regard to minimum wages in that country."

The Male Minimum Wage Board in British Columbia consists of Messrs. Adam Bell, Deputy Minister of Labour, Chairman; George H. Cowan, K.C., Vancouver; Norman de W. Lyons, Victoria.

## Minimum Wages for Women in British Columbia in 1932

The fifteenth annual report of the Minimum Wage Board of British Columbia appears as a section of the annual report of the Department of Labour of the province, and deals with the operation of the Minimum Wage Act during the calendar year, 1932. It pays tribute to the late Thomas Matthews, who died during the year and who was a board member since 1918. The vacancy was filled by Mr. Herbert Geddes.

The report refers to the unprecedented difficulties of the past year in enforcing the minimum wage legislation due to the economic stress. The original nine orders covering various occupations and industries remained in force, with a temporary reduction in wages for experienced employees in the fruit and vegetable industry (LABOUR GAZETTE, July, 1932, page 768). The Board considers that "in keeping with the general tendency during the economic chaos, wages would undoubtedly have been more drastically reduced by many employers had there been no protective orders in force."

The nine orders govern the following industries and occupations: mercantile, laundry, public housekeeping, office, personal service, fishing, telephone and telegraph, manufacturing, fruit and vegetable.

As in past years a few firms were found to disregard the law and paid wages below the legal minimum. Through the instrumentality of the Board the sum of \$2,840.58 was collected and distributed to girls who had received less than the amounts to which they rightfully were entitled. This tangible evidence of the practical benefit of the Act was brought about without cost to the employees and without recourse to legal proceedings. The amount referred to above comprised sums ranging from \$1 up to substantial payments of over \$125 in some instances where underpayment had occurred for a considerable time before the firm was checked: it represents the difference between what should have been paid and what actually had been paid. In eleven cases police court proceedings were necessary to obtain redress to employees. Of the eleven cases, six were for infractions of the Public Housekeeping Order.

**Wages and Hours.**—In response to the annual questionnaire, 3,184 employers forwarded completed returns, an increase of 72 over the year 1931. There was a reduction in the number of women and girls working in the industries governed by the Board Orders, the total for 1932 being 17,903 as compared with 18,154 in 1931. This slight reduction of 251 is re-

garded as encouraging in view of the fact that in 1931 there were 2,307 fewer employed than in 1930.

The average weekly wage for women 18 years of age or over showed a decline from \$16.71 in 1931 to \$15.53 in 1932, but coupled with a lower wage was a shorter average week. In 1932 this was 42.07 hours, compared with 43.03 hours for the previous year.

Of the total of 17,903 employed in firms governed by board orders, 3,910, or 21.84 per cent, were listed as receiving the actual weekly minimum wage for their respective classes of work; 8,085, or 45.16 per cent were paid in excess of the minimum rates; while 5,908 or 33 per cent were recorded as having received wages lower than the full weekly minimum. However, in this last group were included young girls and learners for whom lower rates were set and those who worked less than 48 hours, and whose wages were on a *pro rata* basis.

The report contains statistics indicating the methods—reductions of staff, reductions in wages and reductions in hours—utilized by employers to cope with existing conditions. The board points out that while some firms resorted to all three expedients, "on the other side of the picture appeared the more encouraging aspect of the problem—namely the firms who considered it unnecessary to reduce wages or otherwise alter the conditions under which these employees worked." A summary of the statistics reveals that of the reporting employers, 1,271 made no reductions in wages, or staff or hours; 505 firms showed reduced staffs; while 541 firms reduced wages. The number of employees affected by wage cuts was 2,548; employees laid off totalled 1,478, while 1,470 were placed on short time.

Statistics are also presented showing the percentage of wage cuts in various occupations and the number of employees affected thereby. The total of employees thus shown is 2,771 of which number 1,301 had a wage reduction of 10 per cent. The general average of wages in all nine groups showed a decline.

In comparing the figures of 1932 with those of the prior year, it is noted that the proportion of employees with long service has risen. While 1,177 employees were put down in 1931 as having been with the same firm for a period of ten years or over, 1,310 were in this category for 1932. The office occupation supplies 600 workers who have remained over ten years with the employer who made the report to the Board. This calling has always shown more stability of employment than the other groups.

The statistical record for 1932 indicates that 19.51 per cent of employees were married; 3.76 per cent were widows; and 76.73 per cent were single, these percentages denoting very little deviation from the previous year.

Dealing with trade schools, the report makes the following observation:

"The matter of so-called trade schools has occupied the attention of the Board, and a study is being continued in an endeavour to prevent what might become an abuse. With the *bona fide* schools the Board has no quarrel, but some establishments have been set up which, through clever propaganda, have induced girls to pay high fees in return for courses of doubtful value. The training in such places is not always adequate; and, having parted with their tuition fees, when the pseudo-graduates sever their connections with the school they find themselves insufficiently equipped to secure positions in the already overcrowded labour market. By a court ruling persons who had paid tuition fees in return for training were classed as 'students.' As such they they were held beyond the scope of the Act, and so not considered employees

as defined by the Statute. With this judgment serving as a precedent, the Board is powerless to deal with the situation under the Minimum Wage Act. In order to check what might threaten to become a growing menace to the strength of the Board's regulations the passing of Trades School Act is being urged from certain quarters. Under such an Act exploitation of defenceless girls would be lessened, while trade schools giving training of value would be protected. The Board is cognizant of the seriousness of the matter and is preparing to meet the situation when the time is opportune."

In a reference to the spread of minimum wage legislation, the report points out that eight of the nine provinces have enacted minimum wage legislation, and draws attention to the appeal of President Roosevelt directed to the governors of thirteen States of industrial importance in which there is no minimum wage legislation. A statistical comparison is also given of the minimum wage rates in Canadian provinces with the rates paid in the States of California, Oregon and Washington.

## WOMEN'S MINIMUM WAGES IN QUEBEC

### Revised Orders governing Boot and Shoe and other Leather Trades

THE Minimum Wage Board of the Province of Quebec recently re-issued, in revised form, orders No. 7, 7a and 7b under the Women's Minimum Wage Act. The original orders were published in 1929 (LABOUR GAZETTE, May, 1929, page 489). The effect of the present series of orders, which become effective on October 1, 1933, is to reduce the minimum wage to be paid to experienced workers in the Montreal District from \$12.50 to \$11 per week, and at the same time to increase from \$8 to \$9 the minimum wage payable to experienced workers in small municipalities. Some changes are made in the rates payable to learners, as follows: In Montreal District learners in the third and fourth half year are to be paid at the rate of \$9 and \$10 instead of \$9.50 and \$11 as formerly. In the smaller municipalities the rates for learners are raised throughout, starting from \$6 and rising by four 6-month periods to \$8. Formerly learners started at \$5, rising to \$7.

The text of the new orders are as follows:—

**Order No. 7—(Amended)—**Governing female employees in the Boot and Shoe factories and all other Leather trades in the City and Island of Montreal, and a radius of ten miles around and beyond the Island.

**Order No. 7a.—(Amended)—**Covering all municipalities of over 3,000 population, with the exception of the City and Island of Montreal and a radius of ten miles around and beyond the Island.

**Order No. 7b.—(Amended)—**Covering all municipalities with less than 3,000 population.

(1) *Minimum.*—No wage shall be less per week than is set forth in the following table:

| Population groups                                     | Experienced workers having over 24 months' experience at the trade | Apprentices with less than 24 months' experience at the trade   |
|---|--|---|
| City and Island of Montreal.....                      | \$11 00  | Beginners, not less than.....\$7 00<br>After 6 months' experience..... 8 00<br>After 12 months' experience..... 9 00<br>After 18 months' experience.....10 00 |

(2) *Hours of Work*.—The work-period for which these minimum wages shall be paid shall be 48 hours per week.

(a) Work in excess of the above work-period shall be counted as overtime and shall be paid for at not less than the minimum wages fixed by this Order.

(b) Work for less than the above work-period may be counted as short-time and be paid for *pro rata* of the minimum wages fixed by this Order.

(c) The total of working hours cannot in any case exceed 55 hours per week unless a special permit has been obtained from the Public Buildings and Industrial Establishments Inspection Department.

(3) *Maximum of Apprentices*.—The number of apprentices shall not exceed one-half of the total female working force. Temporary employees, whose term of employment does not exceed one month, shall not be subject to this rule, nor be included in this calculation.

(4) *Piece Work*.—The wages paid to each timeworker and to each pieceworker during the first six months' employment in the industry shall conform to this Order. In the case of pieceworkers of more than six months' experience, it is sufficient if at least 80 per cent receive wages conformable to this Order.

(5) *Deductions for Absence*.—No deduction below the Minimum wage line for absence

shall exceed the value of the time lost based on the wage of the employee.

(6) *Waiting*.—Any employee required to wait on the premises shall be paid for the time thus spent. Pieceworkers shall be paid at a rate not less than that fixed for the class to which they belong.

(7) *Permits*.—The Board may issue permits for lower wages on behalf of aged or handicapped workers. It may also grant permits of variation or suspension of any of these regulations in case of exceptional conditions. Employers and employees are invited to consult the Board regarding any problems which this Order may concern.

(8) *Penalties*.—Any violation of this Order is punishable by fine.

(9) *Posting*.—Each establishment shall keep a copy of this Order posted in a conspicuous place in the work shop.

(10) This Order is subject to annual revision by the Board.

(11) This Order shall come into force and be effective on October 1, 1933, replacing Orders Nos. 7, 7a and 7b published in the *Quebec Official Gazette*, Vol. 61, No. 18, May 4, 1929.

GUS FRANCO, Chairman.  
O. BRUNET,  
C. J. GRIFFIN,  
E. RICHARD.

MONTREAL, June 27, 1933.

## MINIMUM WAGES FOR WOMEN IN MANITOBA

### New Order of Board Governing Certain Manufacturing Industries

REGULATION No. 7 was re-issued by the Minimum Wage Board of Manitoba in an order dated September 2, 1933. The former order dealing with the same group of industries was published in the *LABOUR GAZETTE*, September, 1926, page 873. The new order reduces the normal hours of work from 9 per day and 48 per week to 8 per day and 44 per week. It also reduces the minimum wages of experienced employees from \$12 to \$11 per week, with corresponding changes in the minimum rates for inexperienced employees. The minimum wage for experienced piece workers is to be averaged over a period of four weeks, instead of three months, as formerly. (The revised Regulation No. 3, governing laundries, etc., in the Province, was given in the *LABOUR GAZETTE*, December, 1932, page 1263.)

**Revised Regulation No. 7. Governing the occupation of female employees in the following Industries: Artificial Flowers, Bedding, Ladies' Wear, Hats, Caps, Embroidery, Jewellery, Regalia and Garments which include all Clothing Trades except Dressmaking, Millinery, Custom Tailoring and Furriers in all portions of the Province of Manitoba.**

#### 1. *Conditions of Labour*

(1) *Cleanliness*.—Every room and the floors, walls, ceilings, windows, and every other part

thereof, and all fixtures, therein, shall at all times be kept in a clean and sanitary condition.

(2) *Drinking Water*.—A sufficient quantity of safe, fresh drinking water within reasonable access of all workers, shall be provided with sanitary appliances for drinking. A common drinking cup shall not be used.

(3) *Lighting*.—Artificial illumination in every workroom shall be installed, arranged and used, so that the light furnished will at all times be sufficient for the work carried on therein, and prevent unnecessary strain to the vision or glare to the eyes of the worker.

Each workroom shall be lighted from outdoors, with windows at least equal in size to one-eighth of the floor space, and opening on a street, lane or court at least ten feet wide, except where the work requires a low temperature or a subdued light.

(4) *Ventilation*.—There shall be 400 cubic feet of air space for each employee in each workroom. All windows and sashes except show windows, shall open freely. Air shafts shall provide for a free circulation of fresh air. Storm sashes shall either be on hinges or have a portion at least eighty square inches in size which can readily be opened. In any workroom which cannot be ventilated by these means, mechanical appliances shall be installed.

(5) *Toilet Rooms*.—There shall be provided, suitable and convenient toilets, separate from those used by the opposite sex, and the number of such toilets shall not be less than one to every twenty female persons employed at one time or fraction thereof. Such toilets must

be thoroughly ventilated and open to the outside air, and must be kept in a clean and sanitary condition, and privacy assured at all times.

(6) Wash Basins.—Wash basins shall be provided in at least the proportion of one to twenty female persons employed at one time, or fraction thereof, and shall be separate from those used by the opposite sex. Individual towels, either cloth or paper, shall be furnished to the workers, and shall be kept in a clean and sanitary condition.

(7) Temperature.—There shall be a thermometer in each workroom, and the maximum temperature during working hours shall not exceed 75 degrees Fahrenheit, except when the temperature outdoors exceeds 75 degrees Fahrenheit.

(8) Health and Injuries.—All machinery and danger points shall be protected as far as possible by approved safety devices. All protection possible against occupational diseases shall be provided. Each establishment shall keep a First Aid Kit to be approved by the Bureau of Labour, and at least one reliable member of the working force shall be trained in its use. A couch or stretcher shall be provided for emergencies, and where no dressing room or similar apartment exists, a screen shall be provided.

(9) Lunch and Rest Room.—Where employees remain for lunch suitable provision shall be made for dining and rest purposes.

## 2. Hours

(1) Hours of Labour.—The hours of labour shall be not more than eight (8) hours in any day nor more than forty-four (44) in any week. No employee shall work between 9 p.m. and 7 a.m., nor on Sundays. There shall be a period of not less than eleven (11) hours between the close of one day's work and the beginning of the next.

(2) Time Record.—Employers shall keep an accurate record in a manner convenient for examination by inspectors of all hours worked and wages paid to each employee whether on time or piece work.

(3) Overtime.—Overtime may be worked in case of emergency on permit from the Bureau of Labour, not oftener for any employee than thirty-six (36) times in one year. No overtime to exceed three (3) hours in any one day nor six (6) hours in any week. No minor under seventeen (17) years of age shall work overtime. There shall be extra pay at not less than the regular rate for all overtime worked.

(4) Lunch Hour.—At least one hour shall be allowed for lunch.

(5) Delays.—An employee waiting on the premises as required by the employer shall be paid for the time thus spent.

## 3. Wages

(1) Minimum Wage.—No experienced employee of eighteen (18) years of age or over shall be paid wages at a less rate than \$11 per week, and not less than twenty-five cents (25c.) per hour. The minimum wage for experienced piece-work operators may be averaged over a

period of four weeks. This average may be computed over any consecutive four weeks' period.

(2) No inexperienced employee shall be paid wages at a less rate than eight dollars and eighty cents (\$8.80) per week and not less than twenty cents (20c.) per hour for the first six months after entering the industry. After this period, she shall be considered an experienced employee and shall receive the minimum wage.

(3) Methods of Payment.—Wages shall be paid weekly and after each week's wages have been earned, they shall be paid within three (3) days.

(4) Notice to be Given.—After four (4) weeks' employment, one week's notice shall be required on the part of the employer in dismissing an employee, and on the part of an employee on leaving employment.

(5) Statutory Holidays.—No reduction shall be made from the Minimum wage of time workers for statutory holidays.

The number of inexperienced employees in any factory shall not exceed 25 per cent of the total experienced female employees. No girl under fifteen years of age shall be employed.

## 4. Permits of Exemption.

The Board may issue a permit upon application therefor to any employer, granting modification of or exemption from these regulations. Such permits will be issued only in cases of exceptional or emergent conditions arising.

## 5. Penalty

Any violation of these regulations is punishable by fine or imprisonment, or both. See "The Minimum Wage Act," Section 17.

## 6. Posting of Regulations

Each employer shall keep a copy of these regulations posted in a conspicuous place.

This order becomes effective and of full force and effect from this date and all regulations and orders of the Minimum Wage Board appertaining to the above-mentioned industries made prior to the date hereof are hereby repealed.

All complaints treated as strictly confidential.

The Association of Workmen's Compensation Boards in Canada held a conference at Regina early in September, under the chairmanship of Mr. N. R. Craig, K.C., chairman of the Saskatchewan Board. About 25 delegates attended, representing the Boards of eight provinces. The object of the conference was to deal with certain problems common to compensation administration, and to reach a more uniform basis for decisions rendered by the various units. The discussions dealt with workmen's claims, medical and hospital accounts, employees' assessments, and other questions.

## WORKMEN'S COMPENSATION IN SASKATCHEWAN IN 1932

THE third annual report of the Workmen's Compensation Board of Saskatchewan reviews the administration of the Act during the calendar year 1932. Organization work was completed on December 1, 1929, and the Board began to pay compensation and medical aid on July 2, 1930. The provisions of the Act were outlined in the *LABOUR GAZETTE*, April, 1929, page 379. The report for 1932 is a provisional summary, and it is explained that the final statement will indicate considerable adjustment in present statistics.

According to the 1931 summary the net amount collected from employers in that year was \$615,103.24 and the final surplus for 1931 was \$128,442.44. For the year 1932, the estimate indicated total receipts of \$450,873.25, and total disbursements of \$415,671.01, leaving an estimated surplus of \$35,202.24. The provisional payroll for 1932 amounted to \$28,629,647, representing a decrease of \$9,797,059 as compared with the adjusted payroll of 1931. The percentage of accident cost to the 1932 payroll was calculated at .927. The estimated accident cost for 1932 was \$265,746.24—a decrease of \$71,085.04 from the year previous.

Pensions being paid at the end of 1932 totalled 106, of which 20 were to widows and 36 were children's pensions. The total number of employers making returns for 1932 was 4,899 as compared with 4,976 in 1931.

*Accidents and Prevention.*—The number of accidents reported during 1932, were 2,844 of which 1,594 involved full compensation; 98 part compensation; and 1,152 medical aid only. There were 3,969 accidents in 1931. Fatalities during 1932 numbered 13 as compared with 14 in 1931.

A recapitulation of the statistics for 1931 shows that of the 3,969 accidents in that year, the causes were grouped as follows: prime movers, 130; working machines, 289; hoisting apparatus, 35; dangerous substances, 194; stepping on or striking against, 474; falling objects, 390; handling objects, 796; runaways and animals, 85; moving trains, vehicles, etc., 184; falls of persons, 491; all other causes, 673. The total number of days lost through accident in 1931 was 56,066, the average days lost per accident for temporary total disability being 26.91. The average age of injured workmen in 1931 was 36.04 years, and the average weekly wage was \$21.60.

The accident prevention work of the Board in 1932 consisted chiefly of the following activities: (1) reporting to each organized local Accident Prevention Association the accidents happening in its district, with a view to receiving from the association suggestions

for the avoidance of such accidents, and to enable the association to investigate such accidents if thought desirable; (2) correspondence with the individual employer concerning every accident which appeared to be due to carelessness in general methods or in particular procedure; (3) distribution to a limited extent of safety literature; (4) thorough investigation through the Department of Labour, of all accidents where there seemed to be unusual circumstances; (5) a daily report to the Department of Labour for the attention of their inspection branch of every accident reported to the Compensation Board.

It was stated that through the insistence of the Board and the Department of Labour that goggles should be used for eye protection, eye accidents have been greatly reduced. Attention was also drawn to the necessity of keeping first aid kits properly replenished.

*Payrolls.*—The following table gives the estimate of wage expenditure for 1932 in Schedule 1 by classes:

| Class  | Wage expenditure |
|--|------------------|
| Canadian Pacific Railway.....  | \$2,191,652 00   |
| Canadian National Railway.....   | 2,500,000 00     |
| Province of Saskatchewan.....  | No estimate      |
| Dominion of Canada.....  | required         |
| Cities of Regina, Saskatoon and Moose Jaw.....                             | 2,339,300 00     |
| Municipalities, with the exception of Regina, Saskatoon and Moose Jaw..... | 1,657,420 00     |
| Lumbering.....   | 176,966 00       |
| Planing mills, etc.....  | 1,284,200 00     |
| Mining.....  | 824,350 00       |
| Gravel pits, brick and glass works.....                                    | 228,766 00       |
| Garages, machine shops, etc.....   | 2,830,742 00     |
| Gasoline, chemicals, etc.....  | 441,182 00       |
| Breweries, bottling works, etc.....  | 331,070 00       |
| Milling and grain elevators.....   | 4,505,500 00     |
| Abattoirs and packing houses.....  | 635,733 00       |
| Creameries and bakeries.....   | 1,434,600 00     |
| Printing, power laundry, dyeing, etc.....                                  | 1,762,650 00     |
| Road making and wholesale establishments.....                              | 2,831,324 00     |
| Construction—Steel, concrete, brick.....                                   | 1,879,811 00     |
| Electric power lines and railroad construction.....                        | 774,383 00       |
|  | \$28,629,647 00  |

During the month of August a total of 3,130 accidents were reported to the Ontario Workmen's Compensation Board in the Industries in Schedule 1 of the Act, 8 of which were fatal cases; in Schedule 2 industries 166 accidents were reported including 5 fatal cases and 264 accidents to employees of the Crown, 5 of which were fatal were reported during the month making in all 3,560, of which 18 were fatal. This number compares with 3,298 in July, and 3,483 in August, 1932. The total benefits awarded in August amounted to \$254,020.68, of which \$199,050.34 was for compensation and \$54,970.34 was for medical aid.

## RECENT LABOUR UNION CONVENTIONS

### Ontario Provincial Council of Carpenters

The twenty-second annual convention of the Ontario Provincial Council of Carpenters was held in Brantford on July 22. In his presidential address, Mr. W. Thompson made a plea for strong organization and co-operation, and referred to the formation of the National Construction Council established last February to stimulate building activity in the Dominion (LABOUR GAZETTE, March, 1933, page 283).

In addition to the delegates of various locals, there were present, with a voice in the proceedings, Tom Moore, President of the Trades and Labour Congress of Canada, and Arthur Martel, General Executive Board Member and fraternal delegate from the Quebec Provincial Council. Other visitors present included A. Martin, president of London Local, No. 1946; A. Cooper and F. Ward, business agent and secretary, respectively, of Toronto, Local No. 27.

The report of the Executive Council urged all locals "to press for the shorter work week" and recommended their affiliation with the National Construction Council. The executive also stated that in many urban centres "there is lots of work that should be done for the protection of life, the benefit of health and the preservation and beautification of buildings," and advised that committees should be appointed by each local to list such works, bring them before the proper authorities, and have them started to provide work for the unemployed.

In dealing with this subject, the report of the committee on officers' reports, agreed that such work should be done in towns and cities, but considered that a lot of it "is being done at very low wage" and suggested that the current wage rate should be insisted on by all locals. In this respect, the committee advocated a Federal-provincial program of public works, claiming that if such were started that "at least 75 per cent of the unemployed would be put back to work." The initiation of such building programs also formed the basis of an adopted resolution.

Mr. Tom Moore gave the convention a detailed review of the formation and functions of the National Construction Council, and the convention subsequently adopted a resolution of affiliation.

The convention commended to all locals "that every reasonable effort be made to make effective the forty-hour work week," and the whole membership was urged to "press forward for still further reductions by legislative action in the hours of labour per day and week until all men may have the opportunity of gainful employment."

Another resolution called for the enactment of legislation whereby municipalities could initiate proceedings to remove any building considered to be detrimental to public welfare.

Other resolutions recommended as follows:—

Enactment of legislation providing for state hospitalization and medical treatment.

Discontinuance of wage reductions, and the initiation of a policy "creating a stable condition in industry through regulation of working hours, commodity prices and wages to ensure an ever increasing standard of living."

Enactment of legislation providing for contributory unemployment insurance.

Legislation establishing an eight hour work day and forty-four hour week in private enterprises and a thirty hour week on all public works.

Discontinuance of the employment of unmarried men in camps on permanent construction work, "thereby forcing an ever-increasing number of married men and their families to become wards of the state" and demanding that "the construction of buildings be carried on in such manner as will provide for the payment of prevailing wage rates."

Discontinuance of engaging unemployed single men on construction works, and confining their employment to schemes of reforestation and land-clearing.

Regulations that would put the onus on construction superintendents for seeing that skillsaws are provided with guards.

Certain amendments to the Ontario Apprenticeship Act, respecting transfer of apprentices.

Abandonment of the use of steel sashes in federal, provincial and municipal buildings, and in schools, factories and apartments, and of the practice of laying asphalt shingles on old roofs without removing the wood shingles.

The election of officers resulted as follows: President, Chas. R. Nichols; vice-presidents, Albert Edgington, Leonard Lear, and R. Barnett; secretary-treasurer, T. Jackson.

## Quebec Provincial Council of United Brotherhood of Carpenters and Joiners of America

The 24th annual convention of the Quebec Provincial Council of the United Brotherhood of Carpenters and Joiners of America was held at Montreal on July 6-8, under the presidency of Omer Fleury, Quebec. The secretary-treasurer's report showed the effects of the prevailing trade depression, but the Council lost none of its affiliated locals during the year.

Various resolutions were referred to the Trades and Labour Congress of Canada, for action to be taken at the convention to be held at Windsor, Ontario, on September 18, making the following recommendations:—

Nomination, by the provincial government, of a labour representative on the Workmen's Compensation Board.

Adoption by the Province of Fair Wages legislation similar to the Dominion Fair Wages and Eight Hour Day Act of 1930, to be applied in connection with all work undertaken by, or on behalf of, the province.

Discontinuance of the system of direct relief of the unemployed, and of the practice of employing this class of labour on construction work at very low rates of wages; and adoption of prevailing rates of wages in connection with public works.

Organization of a campaign for the prevention of accidents in connection with construction work, similar to the safety movement in the manufacturing industries.

Effecting economies in Workmen's Compensation, not by reducing the workmen's benefits, but by taking from under the provisions of the act employees of the government, who are already insured in private companies against accidents.

Discontinuance of the granting of special permits for longer working hours in various industries.

Adoption of the gradual re-employment of workers by means of public work, in place of the policy of direct relief.

An 8-hour working day in the cotton manufacturing industry.

The convention approved the order of the International of April, 1932, extending from six to twelve months the period after which members would be suspended for non-payment of dues. The General President, Wm. L. Hutcheson, was commended for the assistance he had proposed for individual members and local unions.

The convention expressed appreciation of the work of the Hon. C. J. Arcand, Minister of Labour, in the direction of social legislation, especially in providing for the observance of the 8-hour day and 40-hour week in construction work.

Mr. James Marsh, general organizer for Ontario, who attended as fraternal delegate, conveyed the greetings to the convention from the Provincial Council of that Province.

Mr. Tom Moore, president of the Trades and Labour Congress of Canada, addressed the delegates, referring to the serious condition of the industry notwithstanding a slight improvement in recent weeks. He criticized the policy of the various governments in Canada in reducing staffs and wages, thus lessening the workers' purchasing power and extending conditions of destitution; and stated his preference for a policy of inflation as a means of lessening charges for internal public debts. In regard to the "wages" paid in relief camps, Mr. Moore considered that fundamental principles were violated by the payment of such a sum of 20 cents per day. He strongly urged the need for a system of unemployment insurance. Further, he congratulated the Provincial Government on being the first to adopt the principle of the 6-hour day in the public construction works (LABOUR GAZETTE, August, 1933, page 776; July, 1933, page 701); and on providing for the insertion of "fair wages" clause in public works contracts (LABOUR GAZETTE, November, 1932, page 1141).

## Brotherhood of Locomotive Engineers

The seventh triennial convention was held at Cleveland, Ohio, June 5 to July 21, 1933, with approximately 315 delegates in attendance, Grand Chief Alvanley Johnston presiding. During the opening session, a motion to elect a chairman from among the delegates was defeated.

A committee of six members were elected to meet representatives of the Brotherhood of Locomotive Firemen and Enginemen on the question of amalgamation. At a later session

President D. B. Robertson of the Brotherhood of Locomotive Firemen and Enginemen on invitation of the Chief Engineer appeared before the delegates and delivered an address in which he enumerated the advantages to be gained from a union of the Brotherhoods and strongly urged the delegates to support any move which had for its object the amalgamation of the two organizations. The amalgamation committee was authorized to draw up a plan for the amalgamation of the two Brotherhoods.

The convention authorized the appointment of a committee to investigate the Brotherhood's part in the Standard Trust Bank. A vote of confidence in Chief Engineer Johnston was adopted by the convention following indictments in connection with the bank.

The convention instructed Chief Engineer Johnston to proceed to Washington, D.C., for negotiations in connection with the railroads' demand for a 22½ per cent wage cut. On the return of the Chief Engineer he reported to the convention that an agreement had been reached between the Conference Committee of Managers and the Railway Labour Executives Association, providing for withdrawal of the railroads' 22½ per cent wage cut demand and continuation of the present 10 per cent wage deduction until June 30, 1934. The convention voted unanimously to ratify the agreement and ordered that a letter be sent to the Canadian authorities calling attention to the agreement and to the action of the B. of L.E. convention. The letter states:

"This settlement resulted from the efforts of United States Government agencies and the undersigned were directed by our convention to respectfully request and urge that the honourable members of the Dominion Government of Canada use their good offices in effecting a like settlement of the controversy now pending between the Canadian Railroads and their employees."

Hon. Peter Heenan, former Canadian Minister of Labour, addressed the convention on recent Canadian Railway legislation, with special reference to its provisions affecting labour.

After some discussion the convention voted to reduce the number of assistant grand chief engineers to six, with one national legislative representative. The convention also adopted a recommendation of the committee on representation to raise from 200 to 300 the number of members entitling a division to a delegate of its own. A constitutional amendment providing for initiative, referendum and recall was adopted.

Resolutions were adopted recommending as follows:—

Passage of a train limit law;

Amendment of the Hours of Service law to limit the number of hours to twelve;

Installation of speed recorders on locomotives;

Enactment of legislation to bring subsidiary railroads under direct jurisdiction of the Railway Labour Act;

Discontinuance of further wage reductions and restoration of the present deduction at the expiration of the time limit;

Against any change in the bureaus administering the railroad safety and inspection laws that would tend to cripple or impair the present efficient execution of these laws;

That locomotive appliance and safety inspectors ride locomotives to ascertain the condition of such locomotives.

Appreciation was expressed of the prompt action of President Roosevelt in appointing a fact-finding committee to investigate the controversy between the Kansas City Southern Railroad and its employees.

The convention was opposed to the revision of any schedule which is calculated to reduce the engineers' pay, either through the modification of working rules or basic rates of pay, unless such change is ordered by the Chief Engineer.

Non-contributory unemployment insurance provided by the Federal Government was approved.

A motion to move headquarters to Chicago was rejected by the convention, as was also a proposal for the establishment of a board of appeals.

Officers re-elected were: Grand Chief Engineer, Alvanley Johnston, B. of L.E. Bldg., Cleveland, Ohio; First Assistant Grand Chief, T. J. Bissett; Secretary-Treasurer, James H. Cassell, 1136 B. of L.E. Bldg., Cleveland, Ohio; H. P. Chase, Winnipeg, replaces R. H. Cobb as Canadian Assistant Grand Chief Engineer.

### Province of Ontario Association of Journeymen Barbers

The eighteenth annual convention of the Province of Ontario Association of Journeymen Barbers was held at Hamilton on August 7, with delegates present representing sixteen cities. President P. C. Hollier, who presided during the sessions, gave a detailed report of events of interest since the last convention, making particular reference to the enactment by the Provincial Legislature of the Hairdressers and Barbers Registration Act, which he claimed was "a most unsatisfactory piece of

legislation." The president informed the delegates that the barbers of the Province had been endeavouring for seventeen years to obtain a compulsory licence law for barbers, similar to what had been enacted in many States across the line and in two provinces in Canada, which makes it compulsory for all barbers working at the profession to pass an examination as to their physical fitness, freedom from communicable disease and efficiency at their work. President Hollier claimed that

what the Ontario Legislature passed was a voluntary registration law for barbers and hair dressers, "and granted a charter to a private corporation who will have power to solicit members and collect and keep all fees." The convention adopted a resolution calling upon the Ontario Legislature to prepare and enact at the next session a barbers' licence law which will compel all barbers to take out a licence issued by the government, all fees to be paid to the government to be used for administration of the Act.

Mr. W. C. Birthright, secretary-treasurer of the Journeymen Barbers' International Union of America gave a talk on the financial department of the organization.

The chief officers elected were: President, George McDonald, 348 Bell St., Ottawa; First Vice-president, J. Perrin, 116 St. Paul St., St. Catharines; Secretary-Treasurer, P.C. Hollier, 234 King St. W., Hamilton.

The next convention will be held on Civic Holiday, August, 1934, at Sarnia.

### Employees' Insurance Plan of Ottawa Electric Railway Company

The Ottawa Electric Railway Company have in operation an insurance and benefit plan to assist its employees to make provision for themselves and their families in case of death, illness or of accident not provided for by the Ontario Workmen's Compensation Act. The Company agrees to pay for each employee a portion of the premium of the covering policy, while the portion of the policy paid by each employee entering into the scheme amounts to \$1.50 per month, this assessment being deducted from the wages of the insured employee.

The benefits listed include the sum of \$1,000, payable at death, to the insured's beneficiary. Upon retirement from service at the age of 65 years, the employee has his choice of the following benefits: (a) A cash payment of \$1,083.12; (b) A paid-up insurance policy of \$1,625 (subject to evidence of insurability); (c) A cash payment of \$416.22, with a paid-up insurance policy of \$1,000 (subject to evidence of insurability); (d) An

annuity of \$100 for the balance of his life with a guarantee of \$1,000; if he dies before the tenth annuity is paid, the balance will be paid to the beneficiary.

In the event of illness or accident incurred while off duty, the employee receives \$15 per week for a period not in excess of 26 weeks, provided the disability has not been sustained while engaged in any trade or occupation for pecuniary gain. The physician appointed under the plan is to be the sole judge as to an employee's fitness to perform his duties. During the period the insured employee is off duty on account of illness or accident, he is provided with free medical attendance, exclusive of the cost of surgical operations.

If an employee before reaching the age of 65 years ceases to remain in the employ of the company his payments are returned with interest at 3 per cent, or he may still continue the policy in force under certain conditions.

Provision is also made for the withdrawal of an employee from the plan.

### United States Employment Service

The Hon. Frances Perkins, U. S. Secretary of Labour, outlines the past and future work of the United States Employment Service in an article appearing in the *Conference Board Service Letter*, July 30. In the past, she points out, the organization of the labour market was left mainly to private initiative. "In the field of public employment offices, municipal agencies ante-dated those financed from state funds. Ohio led the way among the states with the passage of an act in 1890 establishing state-city employment offices in the five principal cities of the state. By January 1, 1933, three fourths of the states had enacted laws permitting the establishment of state-supported offices, but only twenty-five states have one or more such offices in operation. In fact, as of that date, there were only one hundred and thirty-nine state-supported offices in operation in the entire United States. The

number of municipal offices is not known, but presumably it is small except among those organized primarily for relief purposes. The Federal Government has, on the whole, entered into the field during only two brief periods. The first occurred during the World War when federal offices were rapidly opened throughout the country in order to supply needs growing out of the War. The federal service was frankly looked upon as an emergency measure and all but vanished soon after the Armistice. The Farm Labour Division, however, survived this period and has remained in operation throughout the intervening years. Recently its field of activity has centered in the cotton growing states as the gathering of this crop still requires the shifting of great numbers of workers. During 1930 the Federal Government opened employment offices for veterans and their dependents in twenty-three cities.

The number was later increased to thirty. The Secretary of Labour utilized an additional appropriation to recognize the United States Employment Service in 1931. A state director was appointed for each one of the forty-eight states and the District of Columbia. Each was instructed to carry on general placement work in his or her office. Also additional placement offices were established. Unfortunately, little discrimination was used in the geographical location of these offices since frequently they were established as competing offices in cities in which a public employment office was already in operation. In line with recommendations made by informed persons, the remaining field reorganization offices were closed in April, 1933. This did not affect the status of either the Veterans' or the Farm Labour Offices. Such, briefly, has been the past.

"Now we are attempting to build anew under the Wagner-Peyser Act, signed by President Roosevelt June 6, 1933, and designed to make possible the creation of a nation-wide system of public employment offices. The bill was not an innovation but is much the same as the one first introduced in 1919 and which has reappeared from time to time since then.

"The enactment of this legislation means that a way is now provided for genuine integration into one organized system of all the various public employment offices throughout the country. Two principles will govern us as we proceed to put the law into effect.

(1) That direct operation of employment offices is best done by state and municipal governments.

(2) That the function of the Federal government is to assist these governments to develop, maintain and expand their agencies

into adequate employment services with high standards and common procedures and to weld them into one effective nation-wide system.

"The only offices operated by the Federal Government itself will be the one in the District of Columbia, those specialized for veterans and those in the Farm Labour Service. Also the law provides that for a limited time only the Federal Government may operate offices in states which are operating none of their own, or, under certain conditions, where State Legislatures have not accepted the provisions of the Act. Additional responsibilities of the Federal Service will be the clearance of labour among the several states and the collection of reliable and comparable information with respect to the demand for and the supply of labour, as well as the conduct of researches related to the work. In order most effectively to administer its assistance to the states and to perform its interstate functions, the United States Employment Service will probably soon establish several regional clearing houses with field supervision.

"Federal funds to match state funds will be granted to those states whose employment system complies with the prescribed standards.

"A wise provision of the Wagner Act requires the establishment of a Federal Advisory Council made up of men and women representing employers and employees in equal numbers and the public, for the specific purpose of 'formulating policies and discussing problems relating to employment and insuring impartiality, neutrality and freedom from political influence in the solution of such problems.' Similar councils are required for individual states."

---

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF AUGUST, 1933

### Reports of Superintendents of the Employment Service

THE employment situation at the end of August was reported by the superintendents of the Employment Service to be as follows:—

The harvesting of crops was underway in the Maritime Provinces and farmers were busy. Recent rains had greatly improved conditions and market produce was plentiful. Large catches of fish were reported, particularly of lobsters, shad and mackerel, but cod and haddock were scarce. Practically no change was shown in logging, there being little activity in this industry at the present time, but a considerable demand for sawed lumber,

which augurs well for fall woods' work. Unfortunately large quantities of logs and pulpwood have been destroyed by forest fires in the Miramichi district. Hundreds of men have been employed by the Government fire warden fighting this menace, and in some sections twenty to thirty square miles of government lands have been laid waste. Coal mines in the New Glasgow district operated from one to four days per week. In Cape Breton and vicinity, days worked by the different mines averaged from two to five. More activity was also apparent in the iron and steel industry, though factories and machine

shops were quiet. Canneries were very busy, also wood working plants, other industries showing little change. An extensive amount of highway construction was under way as municipal, street and sewer work continued, with many men engaged, but building construction, except for a few larger projects already started, consisted mostly of the erection of small dwellings and minor repairs. Both railway freight and passenger transportation were heavy, but there was little movement along the waterfront, as few vessels were in port. Trade was fair. There was the usual demand for domestic workers in the Women's Section, with placements made accordingly.

Requests for farm labour in the province of Quebec were slightly less as the season's work was well advanced. No improvement was noted in logging. Some activity, however, was shown in the mining district of Rouyn where prospectors had started work. Factories in Hull, Montreal, Quebec and Three Rivers were slightly busier. This applied particularly to the boot and shoe, clothing, and paper industries. At Sherbrooke conditions were quiet. Little building construction was in evidence, but in Montreal more than 4,000 men were employed by the city on relief projects. Transportation was slow, and trade less favourable. Vacancies were numerous in the Montreal Women's Domestic Section, but qualified applicants scarce. At Quebec City, although many requests for household help were received, lower wages were being offered.

Employment opportunities for farm help were slack in Ontario, with little demand for fruit pickers in the Niagara district, due to workers offering their services at low wages or in some cases accepting fruit in lieu of money. A small demand was in evidence for fuel woodcutters, but these were easily obtained. One sawmill in the North Bay district had reopened, as an unexpected increase in the volume of recent shipments had considerably reduced the stock in hand and so released more space for freshly cut lumber. Several logging camps were preparing for the season's work in the bush, but plenty of men were ready for this type of labour. Mining showed little change. While the industrial trend in the manufacturing industries continued to be slightly upward, few vacancies were listed. Toronto reported the improvement there as being more or less of a general nature, as no particular line of endeavour in any way monopolized the orders. Fruit canneries showed a decided increase in staff, but this was seasonal only, and some canning plants in St. Catharines were not reopening. Little new building construction was under way, but relief work was still in progress on highways and

airport construction, and with the increase in wages on the Trans-Canada highway, a greater number of men were satisfied to take this employment when offered. All railroads running out of St. Thomas were busy in the traffic department. There were many calls for general maids and day workers as city people returned to their homes, and many experienced applicants were available for all positions.

Interrupted only for the time being by copious general rains, harvesting made rapid progress throughout the Prairie Provinces. Threshing was practically completed in southern Manitoba, and well advanced in the northern areas. With harvesting almost two weeks earlier than usual in this province and land cleared for ploughing in most districts, farmers were looking for a fall in which large areas could be prepared for seed. Wide variation in yield was reported in Manitoba, from a few bushels only per acre in the dry sections, to normal or better, where rain had been more frequent, and in many cases both quantity and quality were better than at first expected. Northerly districts were favoured with fair to good stands of barley and oats, but in the south a shortage of both grains for feeding and seed was predicted. Cutting was also well advanced, both in Saskatchewan and Alberta, but in the latter province threshing would not become general until better weather prevailed. Throughout the West the demand for farm help was below normal, as practically all requirements were met by transients or local men in each district. Around about Drumheller a severe hailstorm had done extensive damage to crops, an area three miles wide and twenty miles long suffering a loss ranging from 75 to 100 per cent. There was a fair amount of sawmill work being carried on, but no demand for men. Mine operators reported that coal orders were beginning to come in greater volume, but many of the mines, as yet, were running on short time, and with reduced crews. Manufacturing showed no improvement, and building construction provided little employment except that offered by the various municipalities on relief projects, or by the Government in different relief camps situated throughout the provinces. Trade was quiet and collections fair. In the Women's Domestic Section, although there was a decidedly improved demand for domestic help, sufficient applicants were on hand to fill nearly all positions.

There was little call for general farm labour in British Columbia, but harvesting of fruit and vegetable crops provided work for some extra hands. Fruit canneries were also busy.

Owing to dry weather and to fire hazard, several logging camps were closed, while in some districts, where fire had already broken out, resulting in considerable loss to equipment and the destruction of millions of feet of logs, men from the camps were employed as fire fighters. Sawmills continued to operate fairly well, but at extremely low wages. A fair amount of mining was underway, but no demand for men. Building construction remained dormant, and National Defence relief camps and highway construction were

about the only means of work available for skilled or unskilled labour. Waterfront workers at New Westminster, Prince Rupert and Victoria were busy, but work in this line was somewhat slack at Vancouver. The shipyards were quiet. Transportation showed a slight improvement, accounted for by cheap rates on railways and boats. Conditions remained practically unchanged in the Women's Domestic Section, with a steady demand continuing for domestics, but no calls for any other class of workers.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN JULY, 1933

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on August 1 was 8,261, the employees on their payrolls numbering 804,219 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period

under review. The number of unions reporting for July was 1,714, having an aggregate membership of 151,363 persons. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

### (1) Employment Situation at the beginning of August, 1933, as reported by Employers

Employment at the beginning of August showed a further upward movement, according to statements tabulated by the Dominion Bureau of Statistics from 8,261 firms, whose payrolls aggregated 804,219 persons, as compared with 780,015 on July 1. This increase compared favourably with the large decline reported on August 1, 1932, and exceeded the average advance noted at the beginning of August in the last twelve years. As a consequence, both the crude and the seasonally-adjusted index numbers were higher than on July 1, 1933. This is illustrated in the accompanying chart which also shows that for the first time since early in 1930, the level of employment was above that recorded on the same date in the immediately preceding year. The crude index, calculated on the 1926 average as 100, rose from 84.5 at the beginning of July, 1933, to 87.1 on August 1, compared with 86.3 on the same date in 1932. At the beginning of August in the eleven preceding years, the index was as follows: 1931, 105.2; 1930, 118.8; 1929, 127.8; 1928, 119.3; 1927, 110.5; 1926, 105.5; 1925, 97.5; 1924, 95.8; 1923, 101.4; 1922, 94.2, and 1921, 90.0.

The increase which occurred on August 1, 1933, was the fourth consecutive gain indicated since the spring. In this important upward movement, approximately 104,000 persons have been re-employed by the firms furnishing monthly data to the Dominion Bureau of Statistics, the index rising from 76.0 on April 1 to 87.1 on August 1, or by 14.6 p.c.; no doubt there have been proportional additions to the staffs of the smaller industrial firms who do not report monthly, and also additional employment in agriculture, while increases in the working hours of many persons previously employed have also taken place. The recorded advance is in striking contrast to the decline of over 10,000 persons reported by the employers making returns between April 1 and August 1, 1932; in the corresponding period in 1931, some 51,000 persons were taken on by the co-operating establishments, while in 1930, the reported increases aggregated 97,000 persons. Thus the expansion indicated in recent months is greater than in any year since 1929.

Important recovery continued to be made in manufacturing; this compared favourably with the declines noted on August 1 in the last three years and was greater than the usual seasonal advance experienced since 1920. The favourable movement again extended to most of the industries included in manufacturing. The gains in lumber, fruit and vegetable canning, leather, pulp and paper, textile, clay, glass and stone and iron and steel factories were especially pronounced. Mining, steam railway operation and construction also reported very marked improvement; highway construction, in particular, was decidedly more active.

### Employment by Economic Areas

Activity increased in all five economic areas, employers in Ontario and the Prairie Provinces taking on the greatest number of extra workers. It is significant that employment in the Maritime and Prairie Provinces, Quebec and British Columbia was at a higher level on August 1, 1933, than on the same date in 1932, the first time in many months that such a betterment has been indicated.

*Maritime Provinces.*—Statements were tabulated from 597 firms in the Maritime Provinces employing 64,974 persons, compared with 62,644 in the preceding month. This advance, which was the sixth successive increase to be re-

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

corded, brought the index to 93.9, or practically three points higher than on August 1, 1932, when a decidedly downward movement had been shown. This was the first month since the beginning of 1931 in which the comparison with the corresponding month of the preceding year has been favourable. Highway, railway and building construction reported improvement at the beginning of August, 1933, the increase in highway work being considerable; services also showed greater activity, while manufacturing was slacker, largely on account of seasonal losses in fish-canning, together with declines in iron and steel plants.

*Quebec.*—Continued improvement was shown in Quebec, according to returns from 2,006 employers with 229,206 workers, as against 224,730 on July 1. This gain, supplementing those recorded in the last three monthly reports, resulted in a slightly higher level of employment than on August 1, 1932, the first time since April, 1930, that activity in any month has exceeded that indicated on the same date in the preceding year. A pronounced contraction had taken place on August 1 a year ago. Manufacturing, mining, building and railway construction and steam railway operation reported increased employment on

the date under review, while employment on telephones and in services declined; within the manufacturing division, all but the rubber and miscellaneous manufactured product divisions showed gains, those in leather, vegetable food, pulp and paper, textile, tobacco and beverage, clay, glass and stone and iron and steel plants being greatest.

*Ontario.*—Employment in this province showed a further advance, the 3,651 firms co-operating on August 1 having 326,525 employees, or a gain of 6,186 persons since July 1.

Activity has increased steadily in the last four months, with the result that over 31,500 persons have been reinstated in the reporting firms of Ontario since April. In the same period of 1932, more than 15,200 workers were released by the establishments furnishing data. Improvement was noted in manufacturing, the leather, lumber, pulp and paper, rubber, textile, clay, glass and stone, iron and steel and non-ferrous metal industries showing important additions to staffs. Among the non-manufacturing groups, improvement also took place in

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

|  | Canada | Maritime<br>Provinces | Quebec | Ontario | Prairie<br>Provinces | British<br>Columbia |
|--|--------|-----------------------|--------|---------|----------------------|---------------------|
| Aug. 1, 1921.....  | 90.0   | 102.4                 | 83.7   | 90.5    | 96.8                 | 85.4                |
| Aug. 1, 1922.....  | 94.2   | 105.5                 | 86.1   | 96.7    | 100.8                | 88.6                |
| Aug. 1, 1923.....  | 101.4  | 109.8                 | 97.1   | 103.4   | 103.6                | 95.2                |

| Relative Weight of Employment by Economic<br>Areas as at Aug. 1, 1933..... | 100.0  | 8.1                   | 28.5   | 40.6    | 13.9                 | 8.9                 |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

mining, transportation and construction, all three branches of which were busier. On the other hand, logging, telephone operation, hotels and restaurants and retail trade showed curtailment, in some cases of a seasonal nature. Activity had declined sharply on August 1, 1932, but the index then was fractionally higher than on the date under review.

*Prairie Provinces.*—Employers in the Prairie Provinces reported an increase, the fourth recently recorded. The 1,193 employers making returns had 112,086 workers, or 6,697 more

than at the beginning of July. This increase, which compared favourably with the decrease indicated on the same date of last year, took place mainly in highway construction, but manufacturing, mining, communications, steam railway operation and services also showed improvement. Railway construction, however, was slacker. The level of employment was slightly higher than on August 1, 1932.

*British Columbia.*—Further improvement was registered in British Columbia, mainly in manufacturing and construction; logging, min-

| Relative Weight of<br>Employment by<br>Cities as at Aug. 1,<br>1933..... | 15.0     | 1.6    | 13.0    | 1.5    | 3.0      | 1.3     | 4.2      | 3.3       |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

ing and trade, however, also showed heightened activity. Within the manufacturing division, the greatest gains occurred in lumber mills and canneries. Returns were compiled from 814 firms employing 71,428 persons, or 4,515 more than in the preceding month. A reduction had been indicated at the beginning of August of last year, and the index, at 87.3 on the date under review, was practically six points higher than on the same date in 1932. This is the first time since early in 1930 that such a comparison has been favourable.

Table I gives index numbers by economic areas.

### Employment by Cities

Employment increased in five of the eight cities for which separate tabulations are made. Montreal, Ottawa, Hamilton, Winnipeg and Vancouver showed improvement; in Quebec City and Windsor and the adjacent Border Cities, there was little general change, while in Toronto seasonal curtailment occurred.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100).

|   | All industries | Manufacturing | Logging | Mining | Communications | Transportation | Construction | Services | Trade |
|---|----------------|---------------|---------|--------|----------------|----------------|--------------|----------|-------|
| Aug. 1, 1921.....   | 90.0           | 88.0          | 58.3    | 95.2   | 92.0           | 94.8           | 88.7         | 89.9     | 90.7  |

| Relative Weight of Employment by Industries as at Aug. 1, 1933..... | 100.0          | 52.7          | 1.7     | 5.5    | 2.7            | 11.8           | 12.8         | 2.7      | 10.1  |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

*Montreal.*—In contrast with the reductions noted on August 1 of the last three years, there was an increase in Montreal on the date under review, this being the fifth consecutive advance made in recent months. A combined

payroll of 121,003 employees, or 1,188 more than on July 1, was reported by the 1,137 co-operating firms. Steam railway operation, construction and manufacturing registered improvement; within the last-named, leather,

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

vegetable food, tobacco and beverage, metal and clay, glass and stone plants recorded heightened activity, while textiles were seasonally dull. On the whole, employment was in rather smaller volume than on August 1, 1932.

*Quebec.*—No general change was reported in Quebec City; manufacturing recorded greater activity, but services showed curtailment. Statements were received from 154 employers whose staffs aggregated 12,505 workers. Reductions had been indicated on August 1 of a year ago, when the index was between one and two points higher.

*Toronto.*—There was a falling-off in activity in Toronto, according to data from 1,234 firms employing 104,266 persons, or 789 fewer than at the beginning of July. The decline was largely seasonal, employment having been reduced on August 1 in nine out of the twelve years for which statistics are available; the loss this year, however, was considerably smaller than on the same date in 1930, 1931 or 1932. Nevertheless, the index was lower than at the beginning of August in these years. Manufacturing showed general improvement, in spite of a contraction in food factories, and building was also rather brisker, while telephones, services and retail trade released employees. The contraction in retail establishments is seasonal.

*Ottawa.*—Employment in Ottawa showed continued advances, 169 persons being added to the forces of the 161 co-operating employers, who had 11,848 workers on August 1. There were gains in manufacturing and in highway construction, while other groups showed little general change. Employment at the beginning of August, 1932, had declined, but the index then was higher.

*Hamilton.*—There were further additions to staffs in Hamilton, 240 establishments reporting 24,387 persons on their pay lists, as against 24,294 in their last return. Manufacturing showed little change on the whole, increases in textiles and some other groups offsetting losses in iron and steel. The fluctuations in other industries were slight. Employment was quieter than on the same date last year, when large decreases had been noted.

*Windsor and the Adjacent Border Cities.*—Little general change occurred in the Border Cities; statistics were received from 135 firms employing 10,328 workers, or practically the same number as on July 1. Automobile and other iron and steel works slightly reduced their working forces, but other manufacturing establishments were rather busier, and moderate gains were also made in construction

and trade. Large declines had been recorded on August 1 in 1931 and 1932, and employment at midsummer in those two years was in slightly smaller volume.

*Winnipeg.*—A decrease was indicated in Winnipeg, according to 395 firms who had 34,090 employees, as compared with 33,589 at the beginning of July. There were general increases in manufacturing and in construction and communications, while other industries reported only slight changes. An unfavourable trend had been in evidence on the same date of last year, but employment was then at a higher level.

*Vancouver.*—In Vancouver, manufacturing, road construction and trade showed improvement, that in factory employment occurring mainly in food and lumber plants. On the other hand, building was slacker. Returns were compiled from 346 employers with 26,368 persons on their staffs, as compared with 25,770 in the preceding month. Reductions had been indicated on August 1, 1932, but the index of employment then was slightly higher.

Index numbers of employment by cities are given in Table II.

### Manufacturing

Further important improvement took place on August 1 in manufacturing establishments, 5,075 of which reported 423,697 operatives on their payrolls, as compared with 412,966 on July 1; this was an increase of 10,731 persons, or 2.6 per cent. In the experience of the last twelve years, factory employment has usually shown a slight advance on August 1, but the increase this year is considerably greater than normal. The index stood at 85.2, compared with 83.0 on July 1. This favourable movement resulted in an upward trend in both the crude and the seasonally corrected curves of employment. The firms reporting for August 1, 1933, showed the seventh consecutive gain recorded this year; during this period, the co-operating manufacturers have enlarged their staffs by nearly 53,400 persons, while the index has risen from 74.4 on January 1 to 85.2 at the beginning of August, or by 14.5 per cent. It is also noteworthy that the index on the latest date was 2.6 points higher than that of 82.6 recorded on August 1, 1932; this is the first time since November, 1929, that any month has shown greater activity than in the same month of the preceding year. General curtailment had been recorded on August 1 of last year. Improvement was indicated on the date under review in most of the industries classed in the manufacturing division, fish-

canning, chemical and miscellaneous manufactures being the exceptions, and in these, the declines were comparatively slight. The greatest expansion occurred in lumber, vegetable food, textile, pulp and paper, leather, iron and steel and clay, glass and stone plants, but fur, rubber, tobacco and beverage, electric current, electrical apparatus and non-ferrous metal factories also reported heightened activity. The gain in textiles and iron and steel plants, like that on June 1 and July 1, was contrary to the usual seasonal trend during the summer.

*Animal Products.*—Dairies and meat product plants registered gains, while fish-preserving factories in the Maritime Provinces were seasonally slacker, offsetting the increases recorded in the same industry in British Columbia; there was, however, a decline in the animal food group as a whole. Statistics were received from 261 firms employing 23,610 workers, as compared with 23,691 in the preceding month. The trend on August 1 in other years of the record has frequently been downward; the index on the date under review, at 129.6, was higher than at the beginning of August in any other year of the record, comparing favourably with that of 113.3 noted on August 1, 1932, and with the previous maximum of 123.6 on the same date in both 1929 and 1930.

*Leather and Products.*—Expansion was shown in employment in the leather group, 934 persons being added to the staffs of the 262 co-operating manufacturers, who employed 20,098 on August 1. Most of the improvement occurred in shoe factories in Quebec and Ontario. A smaller gain had been reported by the firms making returns for the same date a year ago, when the level of employment was lower.

*Lumber and Products.*—Rough and dressed lumber mills and miscellaneous wood-using factories showed greatly heightened activity, while other divisions reported only slight changes. The lumber industry as a whole registered an advance that compared favourably with the large decline recorded on August 1, 1932, when the index was lower. The payrolls of the 778 firms furnishing data aggregated 35,211 operatives, as against 33,281 in their last report. There were moderate increases in all provinces except British Columbia, where there were very pronounced gains.

*Musical Instruments.*—Employment in musical instrument factories was better than in the preceding month, but was not so active as in the corresponding month of last year. Statements were received from 35 manufacturers who had enlarged their payrolls by 49 persons to 709 on August 1, 1933.

*Plant Products, Edible.*—Large additions to staffs were registered in fruit and vegetable canneries and in sugar refineries, while other factories coming under this heading showed little general change; 404 employers in the vegetable food group reported 29,600 workers, or 1,970 more than at the beginning of July. The increase took place largely in Quebec and British Columbia. Employment was in slightly greater volume than on August 1, 1932, when smaller gains had been indicated.

*Pulp and Paper Products.*—Pulp and paper, printing and publishing and miscellaneous paper-using establishments recorded heightened activity. Statistics were received from 568 manufacturers whose payrolls were increased by 1,187 persons to 53,293 on August 1. The greatest advances took place in Quebec and Ontario. A large reduction had been noted in the corresponding month last summer, when the index was slightly lower, standing at 86.6, as compared with 88.4 on August 1, 1933.

*Rubber Products.*—There was an increase in rubber works, 47 of which had 10,320 persons on their payrolls, compared with 10,172 on July 1. The gain (which took place chiefly in Ontario, while the tendency in Quebec was downward) compared favourably with the general decline reported at the beginning of August of a year ago, when the level of employment was insignificantly lower.

*Textile Products.*—Cotton, woollen, silk and knitting mills recorded increased working forces, but garment factories were seasonally slacker; there was an advance of 1,762 persons in the staffs of the 851 co-operating manufacturers, who employed 82,482. The general trend in Quebec and Ontario was decidedly upward. Large losses had been noted at the beginning of August, 1932, when the index stood at 91.8, compared with 97.7 on the date under review.

*Other Plant Products.*—Data were received from 149 establishments in these industries whose payrolls, aggregating 14,144 on August 1, showed an increase of 385 persons since July 1. There were gains in tobacco and beverage factories. The index on the same date last year was fractionally higher.

*Chemicals and Allied Products.*—A small contraction was noted in chemical works at the beginning of August, 79 persons having been released since the preceding month from the payrolls of the 158 co-operating manufacturers, who employed 8,201 workers. The index was higher than on August 1, 1932, when a greater reduction had been indicated.

*Clay, Glass and Stone Products.*—Further additions to staffs were reported in building

material plants, according to 187 employers with 6,953 workers, or 721 more than in their last report. The bulk of the increase was in Quebec and Ontario. Employment was in less volume than on the same date last summer, although large losses had then taken place.

*Electric Current.*—Considerable improvement was noted in electric current works, 93 of which reported 13,841 employees, compared with 13,584 on July 1. The index number on the date under review was lower than on August 1, 1932, when practically no change had been recorded.

*Electrical Apparatus.*—Employment in 96 electrical apparatus works showed an increase at the beginning of August; they employed 9,436 operatives, or 258 more than in the preceding month. The situation was not so good as on August 1 of last year, when a large reduction had been indicated.

*Iron and Steel Products.*—Crude, rolled and forged, machinery, shipbuilding, heating appliance, iron pipe and tool factories reported improvement, while agricultural implement works showed declines. A combined working force of 82,381 persons was indicated by the 780 co-operating manufacturers, who had 81,670 on July 1. Firms in all provinces except the Maritimes recorded heightened activity, those in Ontario showing the greatest gains. Seasonal contractions on a large scale had been noted at the beginning of August in 1932, but the index then was rather more than a point higher than on the date under review.

*Non-ferrous Metal Products.*—Further additions to staffs were recorded in this group on August 1, according to the 140 firms furnishing data, who employed 14,096 workers, compared with 13,718 in the preceding month. Increases were shown in smelting and refining and other branches of the industry. Employment was in greater volume than on August 1 of a year ago, when very little general change had been indicated.

*Mineral Products.*—Statistics tabulated from 116 manufacturers of mineral products showed that they employed 12,619 workers, or 55 more than in their last report. The index was higher than on the same date in 1932, curtailment having then been indicated.

### Logging

Seasonal dullness reduced employment in logging camps in Ontario, while in British Columbia continued gains were indicated. Statements were tabulated from 224 firms throughout the Dominion, employing 13,420 men, or 100 fewer than in the preceding

month. Much larger losses were reported on August 1 last year, when the index stood at 29.1, as compared with 48.9 on the date under review.

### Mining

*Coal.*—There was an increase of 315 employees in the staffs of the 90 operators furnishing returns, bringing them to 20,876 on August 1, 1933. The improvement occurred largely in the Western coal fields. A small gain had been registered on the same date of last year, when the index was a few points higher.

*Metallic Ores.*—A very large advance was recorded in metallic ore mines, in which employment was decidedly more active than at the beginning of August of last year. Returns were received from 79 mines, with 17,919 workers, as compared with 16,765 in their last report. Improvement was shown in all provinces, that in Ontario being greatest.

*Non-metallic Minerals (Other than Coal).*—Further expansion was noted in this division, in which 76 employers enlarged their payrolls by 459 persons to 5,302 at the beginning of August. Employment was at a higher level than in the same month last summer, when a decrease had been recorded.

### Communications

There was a decline in the personnel of telephone companies on August 1, but telegraphs were more active; the communication firms co-operating with the Dominion Bureau of Statistics had 22,007 employees, as against 22,131 in the preceding month. The number engaged in this group was less than on August 1 of a year ago.

### Transportation

*Street Railway and Cartage.*—A falling-off was registered in this division, according to data received from 178 employers with 23,882 workers, as against 24,020 on July 1. No general change had been recorded on August 1 of last year, when employment was at a slightly higher index.

*Steam Railway Operation.*—The trend of employment in steam railway operation was favourable in all but the Maritime Provinces; the 99 companies and divisional superintendents throughout the Dominion furnishing data reported 56,665 employees, compared with 55,510 in their last report. A decrease had occurred on the same date in 1932, but the index then was higher.

*Shipping and Stevedoring.*—Statements were tabulated from 93 companies in this group, employing 14,593 workers, or 195 fewer than on July 1, 1933. There were losses in the Maritime Provinces, Quebec and British

Columbia, but gains in Ontario. A decline had also been noted at the beginning of August a year ago; employment in shipping was then more active.

### Construction and Maintenance

*Building.*—Considerable increases were again reported in building construction, 646 contractors adding 1,550 persons to their staffs, bringing them to 17,265 at the beginning of August. There were advances in all provinces except British Columbia. Employment was not so brisk as in the same month of 1932; curtailment had then been indicated.

*Highway.*—The number engaged on highway construction and maintenance showed gains in all provinces except Quebec. Data were received from 353 employers with 57,010 workers on their payrolls, as compared with 47,031 at the beginning of July. A decrease had taken place on August 1, 1932, and employment on road work was then not so active.

*Railway.*—A further increase was recorded in this group on August 1, 1933, when 34 companies and divisional superintendents reported that they had 28,620 men on their staffs, compared with 28,367 in the preceding month. There were gains in all except the Prairie Provinces. The index number was

fractionally lower than at the beginning of August of a year ago, when important declines had been noted.

### Services

Little general change occurred in the service group; 329 firms employed 21,924 persons, practically the same number as at the beginning of July. A general decrease had been recorded on August 1, 1932, but the index was then higher.

### Trade

There was a seasonal falling-off in employment in retail trade, but wholesale houses were more active, according to 903 trading establishments, which employed 81,039 workers, as compared with 81,893 on July 1. Quebec reported the largest declines. Greater losses had also occurred at the beginning of August last year, but the index then was a few points higher.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of July, 1933

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged in work outside their own trades or who are idle owing to illness are not considered as unemployed while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Activity for trade union members tended favourably during July though the change from the previous month was slight as manifested by the returns tabulated from a total of 1,714 labour organizations with 151,363 members. Of these 32,131 or 21.2 per cent were without work on the last day of the month contrasted with a percentage of 21.8 in June. Improvement in like measure from that of June was reflected from July last year when unemployment also stood at 21.8. The advances in employment from June were distributed throughout the various provinces ex-

cept Saskatchewan where a nominal adverse movement was reflected. In no province, however, was the change of particular consequence. Contrasted with the returns for July of last year some curtailment of activity was shown by Nova Scotia and Saskatchewan unions during the month reviewed, while in the remaining provinces a better situation prevailed, British Columbia showing the most active conditions.

The returns on unemployment in the largest city in each province with the exception of Prince Edward Island are tabulated separately each month. Saint John unions during July reported a gain in active members of nearly 5 per cent when compared with June conditions, Regina and Edmonton unions showing improvement of somewhat lesser degree. In Toronto, Winnipeg, Montreal and Vancouver the tendency was also toward greater activity, though the changes were quite small. Employment for Halifax members, however, eased off slightly from June. Saint John, as in the previous comparison, reported the most noteworthy expansion from July of last year, while increases in employment on a smaller scale were reflected by Vancouver, Toronto, Halifax,

Montreal, and Winnipeg unions, the gains in the latter two cities being fractional only. In Regina and Edmonton on the other hand, the situation declined slightly from July a year ago.

The chart which appears with this article illustrates the trend of unemployment by months from January, 1927, to date. During July the curve continued in the downward course shown during the last few months and indicative of a slightly better employment volume. The same degree of change as from June was shown in the level of the curve from July last year, the tendency also being favourable.

men the improvement indicated was of moderate proportions. On the contrary, metal polishers, and hat and cap workers were considerably slacker than in June, and noteworthy curtailment was evident among general labourers and textile workers. Lesser declines occurred for bakers and confectioners, glass and brewery workers. Conditions were substantially improved from July last year for wood, textile, garment, hat, cap and fur workers, and metal polishers. Marked increases in activity were apparent also among brewery workers, while pulp and papermakers showed gains on a smaller scale. Cigarmakers and glass workers reported the most extensive employment

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The situation in the manufacturing industries was somewhat better during July than in either the previous month or July of last year according to the returns received from a total of 453 organizations, covering a membership of 43,804 persons. Of these 9,770 or 22.3 per cent were without work on the last day of the month, contrasted with percentages of 24.5 in June and 24.1 in July, 1932. A greater volume of employment than in June was available to cigarmakers, papermakers, printing tradesmen, wood, garment, leather, fur, and iron and steel workers, the percentage gains shown by wood workers and cigarmakers being pronounced, while among the other trades-

men the improvement indicated was of moderate proportions. On the contrary, metal polishers, and hat and cap workers were considerably slacker than in June, and noteworthy curtailment was evident among general labourers and textile workers. Lesser declines occurred for bakers and confectioners, glass and brewery workers. Conditions were substantially improved from July last year for wood, textile, garment, hat, cap and fur workers, and metal polishers. Marked increases in activity were apparent also among brewery workers, while pulp and papermakers showed gains on a smaller scale. Cigarmakers and glass workers reported the most extensive employment

There was little variation in the volume of work afforded coal miners during July from

the previous month, though the tendency was toward greater activity. This was indicated by the reports tabulated from 50 unions of these workers with an aggregate of 13,489 members, 1936 or 14.3 per cent of whom

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

| Month        | N.S. and Prince<br>Edward Island | New Brunswick | Quebec | Ontario | Manitoba | Saskatchewan | Alberta | British<br>Columbia | Canada |
|--------------|----------------------------------|---------------|--------|---------|----------|--------------|---------|---------------------|--------|
| Average 1919 | 3-1                              | 2-0           | 3-4    | 2-7     | 2-1      | 3-2          | 2-0     | 7-9                 | 3-4    |
| Average 1920 | 1-8                              | 2-0           | 7-2    | 3-4     | 3-1      | 3-2          | 2-8     | 11-2                | 4-9    |
| Average 1921 | 11-3                             | 8-5           | 16-6   | 9-7     | 8-5      | 7-8          | 7-8     | 23-5                | 12-7   |
| Average 1922 | 7-1                              | 4-3           | 8-6    | 9-0     | 8-9      | 5-4          | 6-1     | 12-4                | 7-1    |
| Average 1923 | 3-0                              | 2-0           | 6-7    | 3-7     | 5-8      | 3-3          | 6-0     | 5-2                 | 4-9    |
| Average 1924 | 5-1                              | 4-0           | 10-9   | 6-1     | 6-5      | 4-3          | 8-4     | 5-5                 | 7-0    |
| Average 1925 | 5-0                              | 3-6           | 10-9   | 5-5     | 5-1      | 3-3          | 5-6     | 5-2                 | 4-9    |
| Average 1926 | 7-8                              | 2-1           | 6-8    | 4-1     | 3-6      | 3-0          | 4-0     | 5-5                 | 5-1    |
| Average 1927 | 3-7                              | 1-9           | 6-8    | 4-1     | 4-4      | 3-2          | 4-1     | 5-5                 | 4-9    |
| Average 1928 | 4-0                              | 1-2           | 6-1    | 3-5     | 4-2      | 3-0          | 4-2     | 5-1                 | 4-5    |
| Average 1929 | 4-0                              | 1-6           | 7-7    | 4-3     | 7-1      | 5-3          | 6-4     | 5-9                 | 5-7    |
| Average 1930 | 5-4                              | 3-7           | 14-0   | 10-4    | 9-6      | 10-6         | 13-3    | 11-6                | 11-1   |
| Average 1931 | 8-5                              | 9-2           | 19-3   | 17-2    | 15-7     | 15-6         | 19-4    | 17-6                | 16-8   |
| Average 1932 | 9-6                              | 14-4          | 26-4   | 23-7    | 20-0     | 15-8         | 22-6    | 21-6                | 22-0   |

were idle at the end of the month, contrasted with 14.6 per cent in June. What slight improvement was indicated from June may be attributed entirely to the western coal fields, the Nova Scotia mines showing a slight falling off in employment. Compared with the returns for July, 1932, when 12.6

per cent of idleness was reported in coal mining as a whole, marked increases in slackness were reflected by British Columbia miners during the month reviewed, small employment contractions only being evident among Nova Scotia miners. In the Alberta mines there was some lessening of the unemployment volume from July last year though conditions were still quite slack. Short time work continued prevalent among the miners.

The building and construction trades which have been showing steady though gradual improvement since the close of February continued the favourable trend during July, unemployment, however, still remaining at a high level. Reports for July were received from 203 associations of building tradesmen, combining a membership of 18,211 persons, 11,280 or 61.9 per cent of whom were idle at the end of the month contrasted with 62.5 per cent in June. Painters, decorators and paperhangers, and tile layers, lathers and roofers reported the best situation from June, plumbers and steamfitters, and bricklayers, masons and plasterers showing moderate gains, and carpenters and joiners, and hod carriers and building labourers slight increases only. Activity was considerably curtailed for granite and stonecutters from June, and the situation declined also for bridge and structural iron workers, and electrical workers. Among steam shovelmen the same percentage of idleness was recorded in both months reviewed. Contrasted with the situation in July last year when unemployment stood at 58.6 in the building trades as a whole, painters, decorators and paperhangers, and bridge and structural iron workers alone reported a higher level of activity during the month under survey, the improvement being substantial. Of the employment losses reported in the remaining trades, the most extensive were reflected by tile layers, lathers and roofers, and hod carriers and building labourers, though noteworthy increases in slackness were recorded also by bricklayers, masons and plasterers, and granite and stonecutters.

From unions in the transportation industries 756 reports were tabulated during July, involving a membership of 54,817 persons, 6,844 or 12.5 per cent of whom were idle at the end of the month in contrast with percentages of 12.0 in June and 13.0 in July, 1932. Steam railway employees, whose return constituted over 79 per cent of the entire group membership reported, showed but a fractional drop in available work from June as did also street and electric railway employees, and activity was slightly retarded for navigation workers. Among teamsters and chauffeurs all members were reported busy compared with a nominal

unemployment percentage in June. Conditions for steam railway employees were slightly more favourable than in July last year, and a better situation obtained for teamsters and chauffeurs. On the other hand, nominal adverse changes were indicated by navigation workers and street and electric railway employees.

The 5 unions of retail clerks making returns in July with 1,055 members reported an unemployment percentage of 2.9 in contrast with percentages of 1.4 in June and 0.9 in July, 1932.

The situation for civic employees showed very little variation during July from the previous month, unemployment standing at 6.2 in contrast with a percentage of 6.3 in June. The July percentage was based on the reports received from 73 associations with a total of 6,739 members. There was a slight falling off in activity from July last year when 4.7 per cent of the members reported were without work.

Employment for members in the miscellaneous group of trades was at a somewhat higher level during July than in either the previous month or July last year, the 123 unions furnishing reports with a combined membership of 4,394 persons, showing 20.6 per cent of idleness compared with percentages of 23.4 in June and 24.5 in July last year. The most noteworthy gains in activity from June were reported by stationary engineers and firemen, and among hotel and restaurant employees, barbers and unclassified workers improvement in lesser degree was noted. Some slowing up of activity, however, was indicated, by theatre and stage employees. Stationary

engineers and firemen were in large measure responsible for the better employment trend shown from July last year in the miscellaneous group of trades, though barbers also were somewhat busier. On the contrary, recessions in employment of noteworthy proportions occurred for hotel and restaurant, and theatre and stage employees. Among unclassified workers, there was little change from July, 1932, conditions, though the tendency was unfavourable.

The percentage of idleness reported by fishermen remained much the same during July as in the preceding month, the 2 unions making returns with 705 members, showing 1.4 per cent of inactivity compared with 1.2 per cent in June. Marked advances in employment, however, were indicated from July last year when 10.6 per cent of the members reported were without work.

Lumber workers and loggers showed a better situation during July from both the previous month and July a year ago, the improvement in the latter comparison being quite substantial. Returns for the month reviewed were tabulated from 5 unions of these workers, with a membership numbering 683 persons, 154 of whom or 22.5 per cent were idle at the end of the month, contrasted with percentages of 24.1 in June and 42.0 in July, 1932.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1932 inclusive, and also the percentage of unemployment by provinces for July of each year from 1919 to 1930 inclusive, and for each month from January, 1931, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for July, 1933

The volume of business transacted by the Offices of the Employment Service of Canada during July, 1933, showed a loss of 9 per cent in the average daily placements effected when compared with June, 1933, but a gain of 8 per cent in comparison with those effected during the corresponding month a year ago. Declines from last month were recorded in all groups, except farming and mining, the largest loss being in construction and maintenance, and the gain registered in farming, fairly substantial. When compared with July a year ago, minor declines were recorded in farming and transportation, all other groups showing gains, the highest of which were in construction and maintenance, services and logging.

The accompanying chart shows the trend of employment since January, 1931, as repre-

sented by the ratio of vacancies notified and of placements effected for each one hundred applications for work registered at the Offices of the Service throughout Canada, compilations being made semi-monthly. It will be noted that the curves both of vacancies and placements in relation to applications declined throughout the month, although during the latter half of the period the downward trend was only about one per cent, and at the end of the month both levels were just slightly below those recorded at the close of July a year ago. The ratio of vacancies to each one hundred applications was 57.4 during the first half and 56.3 during the second half of July, 1933, in contrast with the ratios of 53.8 and 57.3 during the corresponding periods of 1932. The ratios of placements to

each one hundred applications during the periods under review were 54.2 and 54.0 as compared with 52.2 and 55.7 during corresponding month of 1932.

The average number of vacancies reported daily by employers to the Offices of the Service throughout Canada during July, 1933, was 1,146, as compared with the daily average of 1,037 during the corresponding month a year ago, and with 1,269 recorded daily in June, 1933.

of men and 3,800 of women, while placements in casual work totaled 12,077. The number of vacancies reported by employers was 21,528 for men and 7,102 for women, a total of 28,630, while applications for work numbered 50,397, of which 38,904 were from men and 11,493 from women. Reports for June, 1933, showed 31,706 positions available, 52,896 applications made and 30,091 placements effected, while in July, 1932, there were recorded 25,917 vacancies, 46,692 applications for work, and

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o

The average number of applications for employment received daily by the Offices of the Service during the month under review was 2,016 in comparison with 1,868 in July, 1932. Applications for work during the preceding month of 1933 averaged 2,116 daily.

The average number of placements made daily by the Offices of the Service during July, 1933, was 1,091, of which 608 were in regular employment and 483 in work of one week's duration or less, as compared with a total daily average of 1,204 during the preceding month. Placements in July a year ago average 1,008 daily, consisting of 460 in regular and 548 in casual employment.

During the month of July, 1933, the Offices of the Service referred 28,604 persons to vacancies and effected a total of 27,266 placements. Of these the placements in regular employment were 15,189 of which 11,389 were

25,191 placements in regular and casual employment.

The following table gives the placements effected by the Offices of the Employment Service of Canada, each year, from January, 1923 to date:—

| Year                 | Placements |         |         |
|----------------------|------------|---------|---------|
|                      | Regular    | Casual  | Totals  |
| 1923.....            | 347,165    | 115,387 | 462,552 |
| 1924.....            | 247,425    | 118,707 | 366,132 |
| 1925.....            | 306,804    | 106,021 | 412,825 |
| 1926.....            | 300,226    | 109,929 | 410,155 |
| 1927.....            | 302,723    | 112,046 | 414,769 |
| 1928.....            | 354,604    | 155,724 | 470,328 |
| 1929.....            | 260,747    | 137,620 | 398,367 |
| 1930.....            | 187,872    | 180,807 | 368,679 |

\*252 Placements effected by offices since closed.

## NOVA SCOTIA

Employment opportunities as indicated by orders received at employment offices in Nova Scotia during July were nearly 12 per cent less favourable than in the preceding month, but about 154 per cent above the corresponding month of last year. There was a decline of over 14 per cent in placements in comparison with June, but a gain of over 155 per cent when compared with July, 1932. The substantial increase over July of last year was due to more placements on highway and street construction. Logging also showed improvement, but this gain was offset by a decline in services. There were 62 placements in logging, 1,062 in construction and maintenance, and 228 in services. Of the latter, 164 were of household workers. During the month 295 men and 50 women were placed in regular employment.

## NEW BRUNSWICK

During July positions offered through employment offices in New Brunswick were over 10 per cent higher than in the preceding month and nearly 13 per cent above the corresponding month of last year. There was a gain of nearly 11 per cent in placements when compared with June and of 12 per cent in comparison with July, 1932. Logging and transportation showed the only increases of importance in placements over July of last year, while losses were reported in construction and maintenance, manufacturing and farming. The changes in other groups were nominal only. Most of the placements effected during the month were in the following divisions: logging, 163; transportation, 130; construction and maintenance, 494; and services, 372, of which 302 were of household workers. Placements in regular employment numbered 252 of men and 64 of women.

## QUEBEC

There was a decline of over 13 per cent in the number of positions offered through employment offices in the Province of Quebec during the month of July when compared with the preceding month, but a gain of nearly 77 per cent in comparison with the corresponding month of last year. Placements were 8 per cent less than in June, but nearly 55 per cent above July, 1932. All industrial divisions except farming and logging, in which small declines were reported, participated in the gain in placements over July of last year, the increases in services, construction and maintenance, and manufacturing being the largest. Placements by industrial divisions included: manufacturing, 149; logging, 127; farming, 54; construction and maintenance, 344; trade, 102; and services, 1,411, of which 1,134 were of household workers. There were 887 men and

1,048 women placed in regular employment during the month.

## ONTARIO

The demand for workers as indicated by orders received at employment offices in Ontario during July was nearly 16 per cent less than in the preceding month, but nearly 9 per cent greater than during the corresponding month of last year. Slightly smaller percentages of change were recorded in placements under both comparisons. Increased placements in construction and maintenance, logging, and services accounted for the gain over July of last year, offset in part by a decline in farming. The changes in other groups were small. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 410; logging, 506; farming, 1,424; transportation, 71; construction and maintenance, 6,323; trade, 334; and services, 2,898, of which 1,571 were of household workers. Regular employment was found for 4,362 men and 1,253 women during the month.

## MANITOBA

Orders received at employment offices in Manitoba during July called for over 37 per cent more workers than in the preceding month, but over 31 per cent less than during the corresponding month of last year. There was a gain of over 39 per cent in placements when compared with June but a loss of nearly 31 per cent in comparison with July, 1932. A large decrease in construction and maintenance placement, with a somewhat smaller loss in services, accounted for the decline from July of last year. Small changes only were reported in all other groups. Placements by industrial divisions included: manufacturing, 29; farming, 994; construction and maintenance, 882; trade, 24; and services, 680, of which 547 were of household workers. There were 1,519 men and 399 women placed in regular employment during the month.

## SASKATCHEWAN

During July orders received at employment offices in Saskatchewan called for over 3 per cent less workers than in the preceding month, but nearly 10 per cent more than during the corresponding month of last year. There was a decline of over 5 per cent in placements when compared with June, but a gain of over 8 per cent in comparison with July, 1932. Farm and service placements were higher than in July of last year, and accounted for the increase under this comparison for the province as a whole. Losses were reported in all other divisions. None of them were, however, large. Placements by industrial divisions included: manufacturing, 49; farming, 973; construction and maintenance, 362; trade, 50; and services, 810, of which 525 were of house-

hold workers. Placements in regular employment numbered 1,059 of men and 447 of women.

#### ALBERTA

Opportunities for employment as indicated by orders received at employment offices in Alberta during July were nearly 2 per cent better than in the preceding month and over 22 per cent more favourable than during the corresponding month of last year. There was a decline of nearly 3 per cent in placements when compared with June, but a gain of over 18 per cent in comparison with July, 1932. All industrial divisions participated in the gain in placements over July of last year, those in construction and maintenance and farming being the largest. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 73; logging, 74; farming, 821; construction and maintenance, 1,019; and services, 479, of which 335 were of household workers. During the month 1,493 men and 292 women were placed in regular employment.

#### BRITISH COLUMBIA

There was a decline of nearly 23 per cent in the number of positions offered through employment offices in British Columbia during July when compared with the preceding month, but a fractional gain when compared with the corresponding month of last year. Placements also were nearly 23 per cent less than in June, but were on the same level as in July, 1932. Increased placements in construction and maintenance, logging and mining over July of last year were offset by declines in transportation, farming, manufacturing, services, and trade. Placements by industrial divisions included: manufacturing, 23; logging, 34; farming, 182; mining, 38; construction and maintenance, 2,239; and services, 532, of which 357 were of household workers. Regular employment was found for 1,522 men and 247 women during the month.

#### Movement of Labour

During the month of July, 1933, the offices of the Employment Service of Canada made 15,189 placements in regular employment, 7,547 of which were of persons from whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter, 108 were allowed the Employment Service reduced transportation rate, 99 travelling to centres within the same province as the despatching office and 9 to other provinces. The reduced transportation rate which is 2.7 cents per mile with a minimum fare of \$4 is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

In Quebec 1 certificate for reduced transportation was granted during July at the Quebec City office to a logging camp cook, journeying to employment within its own zone. At Ontario offices 19 persons secured certificates for reduced transportation during July, all of whom went to provincial employment. These included 14 bushmen transferred from Port Arthur, 4 bushmen from Fort William, and 1 summer camp cook from Toronto to employment within their respective zones. Business transacted by Manitoba offices during July involved the issue of 12 certificates, 4 provincial and 8 interprovincial, all of which were granted at the Winnipeg office. Within the province 1 electrician, 1 camp cook, and 1 hotel chamber maid were despatched to Dauphin, and 1 farm hand to employment in the Winnipeg zone. The movement to other provinces included the transfer of 2 hotel workers, 1 café employee, 1 hospital maid, and 1 logging camp cook to the Port Arthur zone, 1 farm hand each to the Saskatoon and Yorkton zones, and 1 farm housekeeper to Moose Jaw. The transfers from Saskatchewan centres during July were 2 in number, these being provincial and destined to the Regina zone. The Saskatoon office was responsible for the despatch of 1 farm hand, and the Regina office of 1 teacher. Alberta offices issued 49 certificates for reduced transportation during July, all to provincial points. Of these, 48 were secured at the Edmonton office by 1 farm hand going to Drumheller and by 17 farm hands, 2 farm housekeepers, 12 miners, 12 bush workers, 1 edgerman, 2 hotel workers, and 1 cook journeying to employment at centres within the Edmonton zone. The 1 remaining transfer was of a farm hand sent from Calgary to Lethbridge. Persons in British Columbia who benefited by the reduced transportation rate during July numbered 25, of whom 24 went to situations within the province and 1 outside. The latter, a farm hand, was transferred from Vancouver to Edmonton. Travelling provincially from Vancouver 1 miner was bound for Penticton, 1 hotel waitress for Nelson, 5 mine workers and 1 baker for Kamloops, and 13 mine workers and 2 hotel cooks for points within the Vancouver zone. From Prince Rupert in addition, 1 miner was despatched to employment within its own zone.

Of the 108 persons who profited by the Employment Service reduced transportation rate during July, 52 travelled by the Canadian National Railways, 40 by the Canadian Pacific Railway, 13 by the Pacific Great Eastern Railway, and 3 by the Northern Alberta Railway.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, August, 1933, summarized the employment situation as follows:—

Employment at July 24, 1933, showed, on the whole, little change as compared with a month before. There was a further improvement in iron and steel manufacture, in engineering, shipbuilding and ship repairing, metal goods manufacture, the pottery, glass, brick and tile, woollen and worsted, silk and artificial silk, linen, hosiery, lace and leather industries, and in the transport and hotel and boarding house services.

On the other hand there was a further decline in the motor vehicle and clothing industries. Some decline also occurred in the boot and shoe and carpet industries, and in building and public works contracting. The numbers temporarily stopped showed an increase in the cotton and jute industries, owing mainly to local holidays; and there was also a slight increase in coal mining.

There was a further reduction in the numbers unemployed in London and the Midlands and in North-East England, while an increase in the number in North-West England and in Scotland was due to local holidays. Employment continued fair in London and the South-East, moderate in the South-West, slack in the Midlands, and bad in all other areas.

Among the workpeople, numbering approximately 12,808,000, insured against unemployment in Great Britain and Northern Ireland, and working in practically every industry except agriculture and private domestic service, the percentage unemployed at July 24, 1933 (including those temporarily stopped as well as those wholly unemployed) was 19.6, as compared with 19.5 at June 26, 1933, and with 22.8 at July 25, 1932. The percentage wholly unemployed at July 24, 1933, was 15.6, as compared with 15.8 at June 26, 1933; while the percentage temporarily stopped was 4.0, as compared with 3.7. For males alone, the percentage at July 24, 1933, was 22.8, and for females, 11.0; at June 26, 1933, the corresponding percentages were 22.8 and 10.9.

At July 24, 1933, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,855,214 wholly unemployed, 501,702 temporarily stopped, and 85,259 normally in casual employment, making a total of 2,442,175. This was 4,067 more than a month before, but 369,607 less than a year before. The total included 2,013,716 men, 54,859 boys, 334,609 women and 38,991 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at July 24, 1933, was 2,507,215.

### United States

*Manufacturing Industries.*—Index numbers showing the trend of employment and pay rolls in manufacturing industries are computed monthly by the Bureau of Labour Statistics of the U. S. Department of Labour from reports supplied by representative establishments in 89 of the principal manufacturing industries of the United States and covering the pay period ending nearest the 15th of the month. These indexes of employment and pay rolls are figures showing the percentage represented by the number of employees on weekly pay rolls in any month compared with employment and pay rolls in a selected base period. The year 1926 is the Bureau's index base year for manufacturing industries, and the average of the 12 monthly indexes of employment and pay rolls in that year is represented by 100 per cent.

The index of employment in July, 1933 (67.3), compared with the index of June, 1933 (62.8), shows an increase in employment of 7.2 per cent over the month interval. A similar comparison of the July pay-roll index (46.5) with the index of pay rolls in June, 1933 (43.1), shows a gain of 7.9 per cent in pay rolls. The level of employment in July of the present year is 21.9 per cent above the level of July, 1932, employment index (55.2) in which month the low point of employment in the year 1932 was recorded. The pay-roll index in July, 1933, stands 28.5 per cent above the level of the July, 1932, pay-roll index (36.2), which month was also the low point in earnings during the year 1932.

These changes in employment and pay rolls in July, 1933, are based on reports supplied by 18,090 establishments in 89 of the principal manufacturing industries of the United States. These establishments reported 3,023,831 employees on their pay rolls during the pay period ending nearest July 15 whose combined weekly earnings were \$54,553,744. The employment reports received from these co-operating establishments cover approximately 50 per cent of the total number of wage earners in all manufacturing industries of the country.

The recent broad expansion in manufacturing industries which began in April and which was reflected by increases in employment in 72 of the manufacturing industries surveyed in May and 79 industries in June,

continued in July, 77 industries reporting increases in number of wage earners over the month interval and 71 industries reporting increases in weekly pay-roll totals. The increases in employment and pay rolls shown in July, 1933, are of especial significance, as decreases in employment and pay rolls, due to inventory taking, repairs, vacations, and Fourth of July holidays, have occurred invariably in this month during the preceding 10 years for which index numbers are available. The average percentage of decrease in employment between June and July during the past 10 years has been 2.2 per cent and in pay roll 5.4 per cent.

The 12 industries reporting decreases in employment between June and July were industries usually reporting seasonal declines at this time, the most pronounced losses appearing in the silverware, women's clothing, and millinery industries. Five of the 12 decreases were changes of less than 1 per cent.

Increased employment and pay rolls were reported in each of the 14 groups into which these 89 manufacturing industries are classified, with the exception of the tobacco manufactures group in which decreases were shown. The most pronounced increase in employment (12.6 per cent) was reported in the transportation equipment group, and gains of more than 10 per cent were reported in the rubber products, lumber, and iron and steel groups.

Twenty-four of the 77 industries reporting increased employment over the month interval reported gains ranging from 10 per cent to 24.7 per cent. The following industries of major importance were included in this group: Brick, 19.1 per cent; silk, 14 per cent; iron and steel, 13.9 per cent; automobiles, 13.2 per cent; woollen goods, 13.1 per cent; saw-mills, 13 per cent; automobile tires, 12.5 per cent; mill work, 11.1 per cent; and cotton goods, 10.5 per cent. Other important industries reporting substantial gains in number of workers were chemicals, men's clothing, ship-building, rayon, foundries, structural iron work, cement, steam fittings, boots and shoes, electrical machinery, and machine tools.

*Non-Manufacturing Industries.*—Increased employment in July, 1933, as compared with June, was reported in 12 of the 16 non-manufacturing industries included in the Bureau of Labour Statistics' monthly employment survey. The canning and preserving industry reported the most pronounced gains in both employment and pay roll over the month interval, the increase of 37.8 per cent in employment and 25.8 per cent in pay rolls indicating the usual seasonal expansion in this industry. An

increased demand is indicated in the rising employment in the anthracite and bituminous coal-mining industries, the anthracite mining industry reporting an increase of 11 per cent in employment, coupled with an increase of 11.5 per cent in pay rolls. The bituminous coal mining industry reported a gain of 3.1 per cent in employment coupled with an increase of 15.1 per cent in earnings. The quarrying and non metallic mining industry reported a gain of 4.8 per cent in number of workers in July, 1933, compared with June, and the metal-liferous mining industry reported an increase of 4.7 per cent in employment. The crude petroleum producing industry reported a gain of 2.7 per cent in number of employees from June to July; hotels, due largely to the opening of seasonal resort hotels, reported an increase of 2.6 per cent; and the wholesale trade industry reported an increase of 1.6 per cent in number of employees over the month interval. The gains in the remaining 4 industries reporting increased employment were less than 1 per cent and were as follows: Laundries and banks-brokerage-real estate-insurance, 0.4 per cent each; power and light, 0.3 per cent; and electric railroad and motor bus operation, 0.1 per cent. In the four industries in which decreases in employment were reported, the retail trade group showed a falling-off in employment, which is customary at this time of year. This decline of 4.7 per cent appeared largely in the department, variety and limited price group of establishments. The dyeing and cleaning industry reported a seasonal loss of 3.2 per cent and the telephone and telegraph industry reported a drop of 1 per cent in number of employees. The building construction group reported a decline of 0.4 per cent in employment from June to July.

According to preliminary figures, published in the September issue of the *Monthly Survey of Business*, official publication of the American Federation of Labor, employment estimates showed that from March to July, 2,033,000 men and women have gone back to work, and that in August "re-employment continued almost as rapidly as July in spite of the check to business." By July unemployment had been reduced by nearly 1,900,000, the number still out of work in July being 11,573,000 as compared to 13,471,000 in March. Trade union unemployment figures for August show 23.7 per cent of the membership out of work, compared to 24.1 per cent in July; 24.5 per cent in June; 25.8 per cent in May; and 26.6 per cent in March.

## FAIR WAGES SCHEDULES FOR PUBLIC WORKS IN MANITOBA, 1933-34

UNDER the provisions of Section 10 of Chapter 69, Consolidated Amendments, 1924, of the Province of Manitoba, being "An Act to Establish and Protect the Wages of Workmen Employed on Public Works," the Minister of Public Works of the Province has approved of the rate per hour and working hours set forth in the following schedules as the minimum rate per hour payable to any employee engaged in the respective trades, and the maximum number of hours during which an employee engaged in the respective trades shall be required to work.

The new schedules are to apply and be effective for the period from September 1, 1933, to April 30, 1934, until such time as another order may be made by the Minister of Public Works. (The schedules in effect last year were given in the LABOUR GAZETTE, August, 1932, page 908.)

The rates were established by the Minister of Public Works upon the recommendation of the Board appointed under Section 3 of the Act, and consisting of the following members:—A. Macnamara (chairman), representing the Manitoba Provincial Government; C. J. Harding, and Thos. J. Williams, representing the Manitoba Building Trades Federation; F. Fraser, and E. Claydon, Sr., representing the Winnipeg Builders' Exchange.

In the case of certain contracts between contractors and the Government and the City of Winnipeg for unemployment relief works, which works are not completed and for which contracts were let during the existence of fair wage rates higher than those now proposed, it is recommended that the old rate of wages shall continue unless an agreement to the contrary mutually agreeable to all parties concerned is negotiated.

### Fair Wage Schedule for Winnipeg

The following schedule shall apply to the City of Winnipeg and a radius of thirty miles therefrom, effective from the First Day of September, 1933, to the Thirtieth Day of April, 1934.

|  | Rate<br>per hour | Hours<br>per week |
|--|------------------|-------------------|
| 1 Asbestos Workers—  |                  |                   |
| (a) Journeymen.....  | \$0 75           | 44                |
| (b) First class improvers.....                                 | 0 65             | 44                |
| 2. Asphalters—   |                  |                   |
| (a) Finishers.....   | 52-0 65          | 44                |
| (b) Men engaged preparing,<br>mixing and heating material..... | 0 45             | 50                |
| 3. Blacksmiths.....  | 0 70             | 44                |

|  | Rate<br>per hour | Hours<br>per week |
|--|------------------|-------------------|
| 4. Bricklayers.....  | 1 05             | 44                |
| (b) Helpers—   |                  |                   |
| 1. Mixing and tempering mortar.....  | 0 50             | 50                |
| 2. Attending bricklayers on<br>or at scaffold.....   | 0 45             | 50                |
| 5. Bridge and structural steel and<br>iron workers.....  | 0 80             | 44                |
| 6. Carpenters.....   | 0 75             | 44                |
| 7. Cement finishers.....   | 0 45             | 50                |
| 8. Electrical workers, inside wire-<br>men—Licensed journeymen.....  | 0 65             | 50                |
| 9. Labourers—  | 0 90             | 44                |
| (a) Skilled—Comprising the fol-<br>lowing: Placing or assisting<br>mechanics in the placing of<br>face brick, cut stone, archi-<br>tectural terra cotta, marble<br>(real or imitation), roofing<br>slate, plaster castings, orna-<br>mental bronze and iron, in-<br>terior joinery, laying drain<br>tiles, attending concrete mix-<br>er, puddling concrete in slabs,<br>bending and placing reinforcing<br>material, moveable scaff-<br>olding and runways..... | 0 45             | 50                |

\*Subject to any agreement between tradesmen and employers which may be consummated during the period this schedule is in effect.

### Fair Wage Schedule for the Province of Manitoba (exclusive of Winnipeg)

The following schedule shall apply to any portion of the Province of Manitoba other

than the City of Winnipeg, and a radius of thirty miles therefrom, effective from the

First Day of September, 1933, to the Thirtieth Day of April, 1934.

|   | Rate<br>per hour | Hours<br>per week |
|---|------------------|-------------------|
| 1. Asbestos workers—  |                  |                   |
| (a) Journeymen.....   | \$0 70           | 44                |
| (b) First class improvers.....  | 0 65             | 44                |
| 2. Asphalters—  |                  |                   |
| (a) Finishers.....  | 0 52-0 65        | 44                |
| (b) Men engaged preparing, mixing and heating materials.....  | 0 45             | 50                |
| 3. Blacksmiths.....   | 0 65             | 44                |
| 4. Bricklayers.....   | 1 00             | 44                |
| (b) Helpers—  |                  |                   |
| 1. Mixing and tempering mortar.....   | 0 50             | 50                |
| 2. Attending bricklayers on or at scaffold.....   | 0 40             | 50                |
| 5. Bridge and structural steel and iron workers.....  | 0 75             | 44                |
| 6. Carpenters.....  | 0 70             | 44                |
| (b) Helpers.....  | 0 40             | 50                |
| 7. Cement finishers.....  | 0 65             | 50                |
| 8. Electrical workers, inside wiremen—  |                  |                   |
| Licensed journeymen.....  | 0 80             | 44                |
| 9. Labourers—   |                  |                   |
| (a) Skilled—comprising the following: Placing or assisting mechanics in the placing of face brick, cut stone, architectural terra cotta, marble (real or imitation), roofing slate, plaster castings, ornamental bronze and iron, interior joinery, laying drain tiles, attending concrete mixer, puddling concrete in forms, or levelling and finishing in slabs, bending and placing reinforcing material, movable scaffolding and runways..... | 0 45             | 50                |
| (b) Labourers on buildings.....   | 0 40             | 50                |
| (c) Unskilled.....  | 0 35             | 50                |
| 10. Lathers (metal, wood)—  |                  |                   |
| (a) Metal lathers.....  | 0 80             | 44                |
| (b) Wood lathers.....   | 0 75             | 44                |

|   | Rate<br>per hour | Hours<br>per week |
|---|------------------|-------------------|
| 11. Marble setters.....   | 0 95             | 44                |
| (b) Helpers.....  | 0 45             | 50                |
| 12. Mosaic and tile setters.....                                | 0 90             | 44                |
| (b) Helpers.....  | 0 45             | 50                |
| 13. Operating engineers on construction—                        |                  |                   |
| (a) Engineers in charge of machines of three or more drums..... | 0 80             | 50                |
| (b) Engineers in charge of double drum machines.....            | 0 70             | 50                |
| (c) Engineers in charge of single drum machines.....            | 0 70             | 50                |
| (d) Firemen.....  | 0 50             | 50                |
| 14. Painters, decorators, paperhangers and glaziers.....        | 0 65             | 44                |
| 15. Plasterers.....   | 1 00             | 44                |
| (b) Helpers.....  | 0 50             | 50                |
| *16. Plumbers.....  | 0 90             | 44                |
| (b) Helpers.....  | 0 45             | 50                |
| 17. Sheet metal workers.....                                    | 0 70             | 44                |
| *18. Steamfitters.....  | 0 90             | 44                |
| (b) Helpers.....  | 0 45             | 50                |
| 19. Stonecutters—   |                  |                   |
| Journeymen.....   | 0 85             | 44                |
| 20. Stonemasons.....  | 1 00             | 44                |
| (b) Helpers—  |                  |                   |
| 1. Mixing and tempering mortar.....                             | 0 50             | 50                |
| 2. Attending stonemasons on or at scaffold.....                 | 0 40             | 50                |
| 21. Terrazzo workers—   |                  |                   |
| (a) Layers.....   | 0 67½            | 44                |
| (b) Helpers.....  | 0 45             | 50                |
| 22. Truck drivers.....  | 0 40             | 50                |

NOTE.—All men hired in Winnipeg to go into the country to work on buildings shall be paid the City Schedule rate, excepting where other agreements for specific work are in effect.

\*Subject to any agreement between tradesmen and employers which may be consummated during the period this schedule is in effect.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts executed by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the LABOUR GAZETTE, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repair or demolition of any work shall be subject to the following conditions respecting wages and hours:

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the con-

tract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency, as may be approved by the Minister.

(2) The provisions of this section shall not apply to persons employed in the fabrication or manufacture of materials, supplies or equipment for use in the work contemplated where such fabrication or manufacture is carried on in any established plant or factory other than a plant or factory established for the purposes of the work contemplated.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction,

remodelling, repair or demolition of any work, is to obtain before hand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the manufacture and supply to the Government of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), include the following Fair Wages Clause:

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the Contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are

fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been executed by the Governments of Canada recently:

#### DEPARTMENT OF FISHERIES

##### *Contract in Group "A" (Construction, etc.)*

Construction of a 50 foot vessel equipped with a 95 H.P. Acadia Diesel engine, for the use of the Department of Fisheries. Name of contractors, Messrs. Kenneth MacAlpine & Son, Shelburne, N.S. Date of contract, August 5, 1933. Amount of contract, \$9,740. The General Fair Wages Clause was inserted in this contract.

#### DEPARTMENT OF PUBLIC WORKS

##### *Contracts in Group "A" (Construction, etc.)*

Construction of repairs to harbour works at Matane, P.Q. Name of contractors, Francois Belley, George Villeneuve and George Lajoie, all of Pointe au Pic, P.Q. Date of contract, August 31, 1933. Amount of contract, approximately \$18,979.87. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour   | Rates of wages not less than | Hours of labour not more than |
|--|------------------------------|-------------------------------|
|  | per hour                     | per day                       |
| Blacksmith.....  | \$0 45                       | 8                             |
| Carpenters and joiners.....  | 0 50                         | 8                             |
| Timbermen and cribmen (using such tools as broad-axe, adze, saw, hammer, auger)..... | 0 37½                        | 8                             |
| Driver, horse and cart.....  | 0 45                         | 8                             |
| Driver, team and wagon.....  | 0 55                         | 8                             |
| Drill runners, machine.....  | 0 40                         | 8                             |
| Boatmen.....   | 0 50                         | 8                             |
| Firemen.....   | 0 35                         | 8                             |
| Hoist operators (gasoline).....  | 0 45                         | 8                             |
| Motor truck driver.....  | 0 40                         | 8                             |
| Compressor operator.....   | 0 40                         | 8                             |
| Powderman.....   | 0 35                         | 8                             |
| Quarry men.....  | 1 00                         | 8                             |
| Labourers.....   | 0 30                         | 8                             |

Construction of alterations and extension to Lancaster Hospital, Saint John, N.B. Name of contractors, Acme Construction Co., Ltd., Saint John, N.B. Date of contract, August 25, 1933. Amount of contract, \$37,997 and unit prices. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour                              | Rates of wages not less than | Hours of labour not more than |
|---|------------------------------|-------------------------------|
|   | per hour                     | per day per week              |
| Concrete mixer operator.....                          | \$0 40                       | 8                             |

| J. E. Lortie Reg'd., Montreal, P.Q. . . . .             | 459 20   |

### Fair Wages Conditions in Harbour Commission Contracts

Under the Fair Wages Order in Council it is provided that certain conditions, referred to therein as "A" Conditions, shall, as far as practicable, be observed by the department or departments of the Government of Canada in connection with all agreements made by the Government involving the grant of Dominion public funds in the form of subsidy, advance, loan or guarantee for any of the purposes mentioned. Under this authority, fair wages conditions are prepared from time to time in the Department of Labour for insertion in contracts awarded by the Harbour Commissioners throughout Canada. The labour conditions in question are similar to those which are applicable to contracts awarded by the several departments of the Dominion Government and include either a fair wages schedule or the General Fair Wages Clause.

The Department of Labour has been notified that the following contract has been awarded under the above-mentioned conditions:—

#### HARBOUR COMMISSIONERS OF THREE RIVERS, P.Q.

Construction of two reinforced concrete sheds, roadways, railroad tracks (4,000 ft.), signal office station, office for Commissioners, a system of dock lighting, etc., at Three

Rivers, P.Q. Name of contractors, The Northern Construction Company and J. W. Stewart, Ltd., Montreal, P.Q. Date of contract, August 4, 1933. Amount of contract, \$275,337. A fair wages schedule was inserted in the contract as follows:—

| Trade or class of labour             | Rates of wages not less than | Hours of labour not more than |
|--------------------------------------|------------------------------|-------------------------------|
|                                      | per hour                     | per day                       |
| Blacksmiths . . . . .                | \$0 45                       | 8                             |
| Bricklayers . . . . .                | 0 70                         | 8                             |
| Carpenters and joiners . . . . .     | 0 50                         | 8                             |
| Cement finishers . . . . .           | 0 50                         | 8                             |
| Compressor operators . . . . .       | 0 40                         | 8                             |
| Drill runners (machine) . . . . .    | 0 40                         | 8                             |
| Electricians . . . . .               | 0 55                         | 8                             |
| Firemen—stationary . . . . .         | 0 35                         | 8                             |

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

The Prime Minister of the Commonwealth of Australia, Mr. Lyons, is reported to have recently announced that the Commonwealth Government was considering plans for the development of North Australia. These plans are said to include the formation of two chartered companies, and it is reported that assurances have been received from British and Australian financial groups that they will take advantage of the Commonwealth offer

to permit the formation of these companies. The Commonwealth Government is said to be willing to encourage and assist private enterprise, and to create a low-tariff or non-tariff area with exemption from land and income tax, but no Commonwealth money will be spent. Plans have also been announced by the South Australian Premier regarding a large settlement scheme in the south-east of the State.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized including civic schedules. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Food, Drink and Tobacco

VANCOUVER AND VICTORIA, B.C.—CERTAIN BREWERIES AND THE INTERNATIONAL UNION OF THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL NO. 300 (VANCOUVER) AND LOCAL NO. 280 (VICTORIA)

The agreement which was summarized in the LABOUR GAZETTE, August, 1932, page 922, December, 1931, page 1354, and August, 1929, page 924, has been renewed without change to December 31, 1934, by Vancouver Local No. 300 and renewed until further notice by Victoria Local No. 280.

### Manufacturing: Printing and Publishing

HALIFAX, N.S.—CERTAIN NEWSPAPER PUBLISHERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 130.

Agreement to be in effect from January 1, 1933, to December 31, 1933.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, July, 1931, page 833, and June, 1930, page 714, with the following exception:

Wages are reduced \$3 per week, making the rate for compositors \$32 per week of 48 hours, for day work and \$35 per week of 48 hours, for night work.

HALIFAX, N.S.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 130

Agreement to be in effect from May 1, 1933, to April 30, 1934.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, September, 1932, page 1018, and June, 1931, page 708.

Wages and hours are unchanged with \$35 per week for day work and \$38 for night work with a 44-hour week in both cases.

HALIFAX, N.S.—CERTAIN NEWSPAPER PUBLISHERS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 300

Agreement to be in effect from May 27, 1933, to May 30, 1934.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1931, page 1355 and June, 1930, page 714, with the following exception:

Wages: a reduction is provided for of 10 per cent from the following wage schedule: \$24 per week for journeymen on day work, \$25 for journeymen on night work, 48 hours in both cases, and \$22.50 for assistants.

Apprentices are not to receive any increase or reduction in wages during the term of this agreement.

HALIFAX, N.S.—TWO JOB PRINTING OFFICES AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 330

The agreement which was summarized in the LABOUR GAZETTE, June, 1930, page 714, has been renewed from year to year since, with the exception that a 10 per cent reduction in wages was verbally accepted in 1933. The basic wage rates from which this reduction was made were: \$30 and \$32 per week on cylinder presses, \$25 and \$27 on pony presses, \$25 and \$30 on platen presses. Hours: 44 per week.

SAINT JOHN, N.B.—NEWSPAPER PUBLISHERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 85

Agreement to be in effect from May 1, 1933, to October 31, 1933.

The agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, February, 1933, page 227, and August, 1930, page 969, with the following exception:

The clause providing that a 10 per cent reduction in wages might be made under certain conditions is eliminated, and wage rates are now set at 10 per cent less than the basic wage given in the previous agreement, and are as follows:—foremen, linotype operators and machinists, \$35.10 per week of 48 hours for day work and \$37.80 per week of 45 hours for night work; floormen, \$33.30 per week of 48 hours for day work and \$36 for night work.

### Correction

In the summary of the previous agreement in the February LABOUR GAZETTE, it was stated that two ten per cent wage reductions had been made from the basic rates of that agreement, but from further information it is learned that only one 10 per cent reduction in wage rates was made, namely that on May 1, 1932, and the change made January 1, 1933, was a 10 per cent reduction in hours on a short time basis, reducing the weekly earnings another 10 per cent, this being still in effect.

### Manufacturing: Miscellaneous Products

TORONTO, ONTARIO.—CERTAIN MANUFACTURERS OF CHESTERFIELDS AND UPHOLSTERED FURNITURE AND THE CHESTERFIELD AND FURNITURE WORKERS' INDUSTRIAL UNION OF TORONTO

Agreement signed following the strike reported on page 903 of this issue.

Agreement to be in effect from August 23, 1933, to August 22, 1934, and thereafter from year to year until notice.

Only members of this local union to be employed, if available. If none available, others may be employed but they are to join the union. Employers also agree to recognize the union and the shop committee.

When a worker has been employed for four consecutive weeks, such worker shall be considered as a steady employee and cannot be dismissed except for flagrant misconduct.

Hours: 44 per week.

Overtime: all work over 48 hours per week to be paid at time and one-quarter.

Wages: The following increases in wages are to be made over the rates paid prior to July 25, 1933: 40 per cent increase for all upholsterers and springers, 30 per cent for all cutters, operators, polishers and other skilled and semi-skilled workers and 20 per cent for all labourers. Minimum wage rates to be as follows: 60 cents per hour for upholsterers, 50 cents for cutters, operators, springers, cushion makers, etc., from 35 to 60 cents for frame workers and 34 cents or \$15 per week for labourers.

During the slack season there will be equal division of work.

In case of any dispute, it will first be taken up with the shop committee, and if no settlement is reached it will be referred to representatives of the union and no stoppage of work during such negotiations.

### Construction: Buildings and Structures

MONTREAL, QUEBEC.—CERTAIN ORNAMENTAL IRON AND BRONZE CONTRACTORS AND THE CANADIAN ORNAMENTAL IRON AND BRONZE WORKERS' UNION OF MONTREAL

Agreement made following strike reported on page 902 of this issue.

Agreement to be in effect from August 21, 1933, to April 30, 1934.

This agreement applies only to shop men and does not apply to work being manufactured and prepared for contracts to be executed outside the Province of Quebec, for which work, contractors and the respective Shop Committees will agree to determine wage rates and other conditions.

The union agrees that none of its members will work for firms who do not sign the agreement, nor will they work for any contractor at less than the minimum wage rate provided in this agreement.

No work to be done on a piece work basis.

Hours: 8 per day with a 44-hour week.

Overtime: time and one-half until midnight; from midnight to 8 a.m., and all work on legal Dominion holidays, double time.

Wages per hour for ornamental iron and bronze workers (shops): first class 55 cents, second class 45 cents; helpers 35 cents.

In case any dispute arises between the union and any employing contractor, the union will not withdraw its men from shops fully observing the conditions of the agreement.

HAMILTON, ONTARIO.—CANADIAN CONSTRUCTION ASSOCIATION, HAMILTON BRANCH, AND THE UNITED BROTHERHOOD OF CARPENTERS, LOCAL No. 18

Agreement to be in effect from July 24, 1933, to April 30, 1934.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, March, 1932, page 348, with the following exceptions:

Hours are reduced from 44 to 40 per week.

Wages are reduced from 90 cents to 75 cents per hour, but it is provided that negotiations for the 1934 agreement will commence at 80 cents.

Apprentices limited to one apprentice to every 8 journeymen employed.

CALGARY, ALBERTA.—CALGARY ASSOCIATION OF MASTER TINNERS AND THE SHEET METAL WORKERS' INTERNATIONAL ASSOCIATION, LOCAL No. 254

Agreement to be in effect from March 31, 1933, to March 31, 1934, and thereafter subject to notice.

Hours: 8 per day, 5 days per week, a 40-hour week.

Overtime to be eliminated except in case of emergency. When overtime is worked, to be paid at time and one-half from 6 p.m. to 10 p.m.; after 10 p.m. and all work on Sundays and holidays, double time.

Wages for sheet metal workers: 90 cents per hour.

Travelling time and all expenses to be paid when a mechanic is sent to work out of the city.

Each party to have a committee of three members to meet when called to take up matters pertaining to the trade.

## First Aid Groups in Ontario

A committee has been formed in Ontario for promoting the creation in the industrial plants of the province of groups of workers trained to render first aid treatment to injured fellow employees. The committee is composed of Dr. W. J. Bell, provincial deputy minister of health; R. B. Morley, general manager of the Industrial Accident Prevention Associations; and W. Rankine Nesbitt, representing the St. John Ambulance Association. The aim of the committee is the creation in industry in Ontario of a trained corps of first aid operatives, especially competent to treat minor industrial injuries and prevention of the serious maimings and illnesses which frequently result from failure to attend to osten-

sibly insignificant hurts. The principal objects of the extended plan include formation of additional St. John Ambulance Association classes for the training of first aid in plants throughout the province. In addition, it is intended to select the more promising of the men already trained for formation into classes for more advanced and complete first aid training. Consolidation work has been partly carried out during the past summer through the establishment of First Aid clubs, bringing together for supplementary work, study and co-ordination the men certificated as the outcome of the past year's endeavours of the committee.

## Reform of Social Insurance in the Soviet Union

Reference was made in the last issue of the *LABOUR GAZETTE*, page 781, to the decision of the Central Executive Committee of the Soviet Union to abolish the Commissariat of Labour and to transfer its functions, including the management of social insurance, to the General Council of Trade Unions. In consequence of this decision, which was approved by a resolution of the third plenary meeting of the General Council of Trade Unions of the Soviet Union held in Moscow in June, 1933, the occupational and territorial insurance funds will come under the direct management of the trade union organizations.

The General Council of Trade Unions is to be entrusted with the management of social insurance, the approval of the consolidated budget of the insurance system and the drafting of legislation, the General Social Insurance Council being abolished. As the establishment of occupational funds for the principal branches of industry has made it possible to meet the requirements of workers in these branches more satisfactorily, insurance funds are to be established under the managing committees of all the trade unions. The existing

territorial funds are to be abolished, as they do not meet the requirements of insured persons and do not provide for active collaboration by the workers in the management of social insurance. Works committees are to be instructed to determine the right to benefit in the event of temporary incapacity and to fix the amount of such benefit, to provide for sending workers to rest homes, sanatoria or health resorts, to maintain or lease places in nurseries and kindergartens, to grant permits authorizing the holder to obtain a special diet and to determine the right supplementary benefit for pregnant women, women in childbirth and women nursing their children.

The Canadian Gas Association, at their annual meeting on September 18, presented their Meritorious Service Gold Medal to Mr. L. B. Temple, chief of the emergency staff, Montreal Light, Heat and Power Company, for his work at Montreal during 1932, in saving the lives of 45 victims of gas asphyxiation by means of the prone pressure method.

## CENSUS OF INDUSTRY IN CANADA

### Manufacturing Statistics for the Year 1931

THE Dominion Bureau of Statistics, under the Statistics Act of 1918, takes annually by mail an industrial census covering statistics of fisheries, mines, forestry, and general manufacturing in Canada. Summary figures for all manufacturing industries for the year 1931 have recently been issued, and the accompanying table gives the figures in some detail.

Information as to the numbers of wage earners working eight hours or less per day, nine hours, ten hours and over ten hours, was secured each year from 1924 to 1930, the resulting figures for the principal manufacturing industries being given in the *LABOUR GAZETTE* for January, 1927, page 105; October, 1929, page 1189 and December, 1932, page 1296. For 1931 information was secured as to the numbers of wage earners whose regular hours of labour were forty hours or less, etc.

The statistics published by the Bureau show also that the number of establishments was 24,501, the capital employed \$4,961,312,408, the cost of materials \$1,223,080,011, and the value of products \$2,698,461,862. The total paid in salaries was \$186,810,794, employees on salary numbering 77,576 male and 2,222 female.

The accompanying table shows the average number of wage earners during the year, male and female, and total wages paid for each group of industries and for the important industries in each group; also the number of establishments and the numbers of wage earners by the length of working week periods. Figures are not included for most of the industries having less than one thousand wage earners, but the group totals and grand total include the figures for such industries.

Information as to hours per week in fish curing and packing and in butter and cheese making is not available, and detailed figures for these industries are, therefore, also omitted. The fish curing and packing industry employed an average for the twelve months of 2,807 wage earners, male, and 921 female, total wages being \$2,069,153, there being 540 persons on salary; the butter and cheese industry employed an average for the twelve months of 7,333 wage earners, male, and 4,923 female, total wages being \$7,525,494, the number on salary being 3,677 males and 683 females, with total salaries of \$4,734,432.

## STATISTICS OF MANUFACTURING INDUSTRIES IN CANADA, 1931

| Industry                                  | *Number of wage earners whose regular hours per week were |              |               |               |               |               |              |              |               |              |               |              | *Total number of wage-earners during year | Average number of wage-earners during year | Total wages \$ | Number of estab-lish-ments |              |  |        |

\*In month of highest employment.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1933

### Cost of Living, Prices of Staple Articles and Index Numbers

**I**N retail prices the cost of the weekly family budget was considerably higher, due mainly to a seasonal advance in the cost of foods, while in wholesale prices the Dominion Bureau of Statistics index number declined slightly, due chiefly to lower prices for grains and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.43 at the beginning of August as compared with \$6.95 for July; \$7.01 for August, 1932; \$11.63 for August, 1929; \$11.44 for August, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.68 for August, 1914. Of the twenty-nine commodities in the food budget twenty-one showed advances, the most important being a seasonal increase in the cost of potatoes which accounted for more than half the increase in the food budget. The cost of eggs, butter, cheese, bread, flour, rolled oats and fresh and salt pork also showed substantial increases. Including the cost of fuel and rent with that of foods the total budget was \$15.96 at the beginning of August as compared with \$15.48 for July; \$16.42 for August, 1932; \$21.90 for August, 1929; \$21.98 for August, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.41 for August, 1914. Fuel and rent showed little change.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly lower, this being the first decline during the last six months. The index in August was 69.4 as compared with 70.5 in July; 63.6 in February; 66.7 in August, 1932; 98.4 in August, 1929; 106.0 for August, 1921; 164.3 for May, 1920 (the post war peak); and 66.1 for August, 1914. Eighty-seven prices quotations were higher, ninety were lower and three hundred and twenty-five were unchanged.

In the grouping according to chief component materials six of the eight main groups advanced and two declined. The groups which advanced were: the Animals and their prod-

ucts group, because of higher prices for hogs, calves, hides, milk, eggs and lard which more than offset lower prices for steers, lambs, fresh and cured meats and butter; the Fibres, Textiles and Textile Products group, because of advanced quotations for raw wool and cotton fabrics which more than offset declines in the prices of raw cotton, raw silk and hessian; the Wood, Wood Products and Paper group, owing to higher prices for certain lines of lumber; the Iron and its Products group, due principally to higher prices for steel sheets, steel tank plates and automobile body plates; the Non-Metallic Minerals and their Products group, because of higher quotations for gasoline, kerosene and sulphur; and the Chemicals and Allied Products group, due to increases in the prices of zinc oxide and certain other chemicals. The Vegetable and Vegetable Products group and the Non-Ferrous Metals and their Products group were substantially lower, the former because of decreased prices for grains and milled products and the latter because of lower quotations for copper, lead, silver, tin and zinc.

In the grouping according to purpose consumers' goods remained unchanged, higher prices for coffee, eggs, milk and its products, fish, woollen cloth and petroleum products offsetting lower prices for foreign fruits, flour and milled products, and meats. In Producers' goods materials for the metal working industries, for the meat packing industries, for the milling industries, as well as miscellaneous producers' materials were substantially lower, while materials for the textile and clothing industries, for the leather goods industries and for the chemical using industries showed slight increases.

In the grouping according to origin both raw and partly manufactured goods and fully and chiefly manufactured goods were lower. Canadian farm products declined substantially. In this group field products were lower because of reduced quotations for grains, while animal products advanced because of higher prices for hides, fresh milk, eggs and wool.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family

## EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of August of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers, and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located,

but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But, as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the

western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for working men's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices, which had gradually advanced since early in the year, showed little change during the month, sirloin steak averaging 22.4 cents per pound as compared with 22.2 cents in July and rib roast being slightly lower at 11.8 cents in August as compared with 12 cents the previous month. Both fresh and salt pork were somewhat higher in most localities in the eastern provinces, the former being up in the average from 16.1 cents per pound in July to 17.1 cents in August and the latter from 15 cents per pound in July to 15.5 cents in August. Boiled ham was up from an average price of 38.5 cents per pound in July to 41.1 cents in August, increases occurring in nearly all localities.

Eggs were generally higher, fresh averaging 23.5 cents per dozen as compared with 21.1 cents in July and cooking averaging 19.5 cents per dozen as compared with 17.1 cents in July. Butter prices also showed a general

seasonal advance, dairy averaging 21.5 cents per pound in August as compared with 19.9 cents in July and creamery averaging 25.1 cents per pound in August as compared with 23.8 cents in July. Prices in 1932 were 18.3 cents per pound for the former and 22.1 cents for the latter. Cheese advanced from an average price of 19.4 cents per pound in July to 19.8 cents in August. Increases were more pronounced in the western provinces.

The price of bread was up from an average of 5.6 cents per pound in July to 5.8 cents in August, increases being reported from Saint John, Bathurst, Sherbrooke, St. John's, Thetford Mines, Kingston, Peterborough, Toronto, Hamilton, Brantford, Kitchener, Sault Ste. Marie, Port Arthur, Fort William, Regina, Drumheller and Trail. Flour was higher in practically all localities, the average being up from 3.1 cents per pound in July to 3.4 cents in August. Rolled oats were also higher, averaging 5 cents per pound as compared with 4.7 cents in July. New crop potatoes replaced the old and the price showed a substantial seasonal advance influenced also by unfavourable crop prospects. The price was up in the average from \$1.16 per ninety pounds in July to \$1.96 in August, increases being more pronounced in Ontario and the western provinces. Granulated sugar was fractionally higher at 8.1 cents per pound. Anthracite coal was practically unchanged from the average of the preceding month. No changes were reported in rent.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices were substantially lower during August than in the previous month. No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaged 73.4 cents per bushel as compared with 83.4 cents in July. Prices were influenced by such contending factors as unfavourable crop reports from time to time from exporting countries and by lack of demand from importing countries. The high price for the month was 87½ cents per bushel reached at the beginning, and the low was 68½ cents, the level at which the price was pegged at Winnipeg on August 15th. In coarse grains western barley was down from an average of 50.3 cents per bushel in July to 44.3 cents in August, flax from \$1.63 per bushel to \$1.41, western oats from 29.7 cents per bushel to 38.9 cents and rye from 67½ cents per bushel to 52 cents. Milled products showed a similar movement to that in grains, flour at Montreal being down from \$6.40 per barrel in July to \$5.40

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

In August while rolled oats declined 10 cents per ninety pound bag to \$3.20. Raw sugar at New York declined from \$1.72 per cwt.

to \$1.54, while granulated at Montreal was unchanged at \$6.47 per cwt. Ceylon rubber at New York was down from 8.4 cents per pound to 7.5 cents. In live stock choice steers at Toronto declined from \$4.80 per hundred pounds to \$4.70 and at Winnipeg from \$4.32 per hundred pounds to \$3.39. Veal calves at Toronto were up from \$4.96 per hundred pounds to \$6.04, while at Winnipeg the price advanced from \$3.95 per hundred pounds to \$4.21. Bacon hogs at Montreal advanced from \$6.49 per hundred pounds to \$6.65. This same grade at Winnipeg was 27 cents per hundred pounds higher at \$5.84. Lambs at Toronto declined from \$7.66 per hundred pounds to \$5.61 and at Winnipeg the price was \$1.40 per hundred pounds lower at \$5.05. The price of creamery butter at Montreal was down from 22.4 cents per pound to 21.3 cents. Stocks in storage at the beginning of August were stated to be approximately 37 per cent higher than on the same date last year. Fresh eggs at Montreal were 1 cent per dozen higher at 23.9 cents, while this same grade at Vancouver was 1.6 cents per dozen higher at 23.9 cents. The United States government crop report indicated that the cotton crop would be considerably higher than was anticipated and prices for raw cotton at New York declined from 11.4 cents per pound to 10.2 cents (Canadian funds). In lumber fir timber was \$1 per thousand board feet lower at \$14 while white pine was slightly higher at \$24 per thousand board feet. In non-ferrous metals electrolytic copper declined from \$10.37 per hundred pounds to \$9.82. Tin at Toronto was 2 cents per pound lower at 50½ cents. As a result of higher prices for crude oil in producing areas quotations for gasoline and kerosene advanced, the increase ranging from ½ cent per gallon to 2½ cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to significant changes and conditions affecting prices in Great Britain and certain other countries. The index numbers of the cost of living are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases. The latest quarterly table giving the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries appeared in the July issue of the LABOUR GAZETTE.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1924=100, was 61.5 for July, which is an advance of 0.6 per cent

for the month and is the highest recorded since April, 1932. Among foods, although cereals were higher the meat and fish group was lower and "other food" showed a substantial decline, these declines being chiefly of a seasonal nature. Non-foods as a whole were 2.1 per cent higher, all groups contributing except for a slight decline in coal and "other textiles." The most noticeable change in any one group was a rise of 12.7 per cent in wool prices.

The *Economist* index number, which is calculated semi-monthly, on the base 1927=100, was 65.0 at August 9, which is 0.5 per cent lower than at July 26. This is the first decline recorded since April.

The *Statist* index number, on the base 1867-1877=100, was 81.7 at the end of July, an increase of 0.5 per cent for the month. Foods were 1.2 per cent higher due to advances in the prices of potatoes, wheat, oats and maize. Industrial materials as a whole were unchanged, the decline in minerals, chiefly tin, was offset by advances in textiles and sundries.

**COST OF LIVING.**—The Ministry of Labour's index number, on the base July, 1914=100, was 139 at August 1, an increase of 0.7 per cent for the month, due to higher food prices, chiefly flour and bread, eggs and butter, partly counteracted by lower prices for potatoes. Groups other than food showed no change from the previous month.

### France

**WHOLESALE PRICES.**—The General Statistical Office index number, on the base 1914=100 (gold basis), was 80 for July, which is the same as for June. Foods were slightly higher due to small advances in vegetable foods and the sugar, coffee and cocoa group, partly offset by a decline in animal foods. Industrial materials were unchanged, declines in the minerals and metals group and in textiles being offset by a rise in miscellaneous products.

**COST OF LIVING.**—The official index number, on the base 1914=100, was 105 for May, a decline of 0.9 per cent from the previous quarter.

### Germany

**WHOLESALE PRICES.**—The Federal Statistical Office index number, on the base 1913=100, was 93.9 for July, an increase of 1.1 per cent over the June level. There were advances in agricultural products and in industrial materials, while colonial products were slightly lower. Among industrial materials groups, the greatest change was a rise of 17.1 per cent in rubber.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 118.7 for July, a decrease of 0.1 per cent for the month. There were no marked changes in any of the groups.

### New Zealand

**WHOLESALE PRICES.**—The index number of the Census and Statistics Office, on the base 1909-1913=1000, was 1320 for June, a decrease of 0.2 per cent for the month. Advances in animal products, metals and their products and chemicals and manures were more than offset by declines in textile manufactures, wood and wood products and non-metallic minerals and their products.

**COST OF LIVING.**—The official index number, on the base 1926-1930=1000, was 798 for May,

an advance of 0.1 per cent over the February level. An advance in clothing, drapery and footwear was almost offset by a decline in fuel and light. Food and rent showed no change from the previous quarter.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 68.9 for July, an increase of 6 per cent over the June level. With the exception of a slight increase in chemicals and drugs, all groups were included in the general advance, the greatest increases occurring in farm products and textile products. It is noted that the increase was somewhat greater in raw materials than in manufactured articles.

The *Annalist* index number, on the base 1913=100, was 102.7 for August, a decline of 0.7 per cent from July. This was entirely due to decreases in the farm products and food products groups, as all other groups were higher than for July.

*Bradstreet's* index number, which is the sum totals of the prices per pound of 96 commodities of common consumption, was \$9.0095 at August 1, an advance of 8.1 per cent over July 1, and of 41.8 per cent over March 1. It is stated that although some of the more speculative commodities receded rather sharply from the peaks reached in mid-July, the index number rose 8.1 per cent for the month.

*Dun's* index number, which is based on the estimated cost *per capita* of a year's supply of commodities in wholesale markets was \$156.134 at August 1, an advance of 4.7 per cent for the month. All groups were higher except for a slight decline in dairy and garden produce.

**COST OF LIVING.**—The National Industrial Conference Board index number, on the base 1923=100, was 75.2 for July, an increase of 3.3 per cent for the month. Except for a slight decrease in housing, all groups were included in the general advance.

The index number of the Department of Labour and Industries, Massachusetts, on the base 1913=100, was 124.3 for July, an increase of 2.8 per cent for the month due to higher prices in the food, clothing and fuel and light groups.

### Other Countries

**WHOLESALE PRICES.**—Figures published of official index numbers for certain other countries for recent months are as follows:

Peru, on the base 1913=100, 181 for July, an advance of one point for the month.

Austria, on the base, first half of 1914=100, 108.4 for July, a decrease of nearly 3 per cent.

Denmark, on the base 1913=100, 125 for July, an increase of two points.

Finland, on the base 1926=100, 89 for June as compared with 88 for the two previous months.

Netherlands, on the base 1913=100, 72 for May and 73 for June.

Norway, on the base 1913=100, 121 for July, showing no change in the last six months.

India, the index number of the Bombay Labour Office of wholesale prices in Bombay, on the base July 1914=100, 98 for June as compared with 97 for May.

**COST OF LIVING.**—The official index numbers of retail prices or cost of living recently published for certain countries are:

Chile, cost of living at Santiago, on the base March, 1928=100, 141 for May and 142 for June.

Austria, on the base July, 1914=100, 105.2 for August.

Milan, Italy, on the base June, 1927=100, 76.03 for June, as compared with 75.63 for May.

Norway, on the base July 1914=100, 148 for July, an advance of one point.

Bombay, India, on the base July, 1914=100, 103 for July, a decline of one point for the month.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Time Limit for Compensation under Group Insurance Policy

An employee of the International Nickel Company of Canada, Limited, in Ontario, was covered by a group insurance policy, issued by the Aetna Life Insurance Company, which contained a total disability clause as follows:—

“If any employee while insured under the policy becomes totally disabled before age sixty and if the disability will presumably prevent the employee for life from engaging in any occupation or employment for wage or profit and if satisfactory evidence of such disability is furnished the Aetna Life Insurance Company at its Home Office, the Insurance Company will pay in accordance with the method designated under the terms of the policy, the amount of insurance in force upon such employee's life at the time the disability commenced.”

The employee, the plaintiff in this case, sustained injuries in the course of his employment, resulting, he claimed, in the loss of the sight of both eyes, which loss under the policy constituted permanent total disability. When the accident occurred the policy was still in force, but the resulting total disability did not occur until after the expiry of the policy. Within a year after the policy expired the plaintiff gave notice as required by the policy of his claim for total disability.

Mr. Justice Jeffrey, who tried the case without a jury, dismissed the action. In giving judgment he said that the policy expired in April, 1932, as from that time on the plaintiff paid no premiums. “It is a fact that within six months after the expiration of the policy he tendered the arrears of premiums to the company, but these were not accepted. He was not then in the employ of the company as he was unable to carry on with his employment. Notwithstanding the fact that his employment with the company had ceased he had the opportunity of converting the insurance to another form of policy. However, the company refused to reinsure him.

“The events insured against by the policy were death or total disability occurring during the life of the policy. It was argued that notwithstanding the fact that the policy had lapsed, in view of the fact that an accident had occurred during the life of the policy as a result of which the plaintiff became totally disabled within one year after the lapse of the policy, he could recover. Here the claim of the plaintiff is based upon a contract which must be interpreted strictly. There is no term in the policy which entitles the plaintiff to recover if he meets with an accident during the life of the policy which does not result in total disability during that time, notwithstanding the fact that he becomes totally disabled within one year after the expiration of the policy. Policies have been drawn to cover this exact situation but there is nothing in the wording of this policy to justify the plaintiff coming into Court and saying: ‘I was injured during the life of the policy and although not totally disabled at that time, within a year after the expiration of the policy I did become totally disabled and, therefore, the company is liable under the policy.’ It is quite true that if he had become totally disabled during the life of the policy and had made no claim during that time, he could have recovered if notice had been given within one year after the expiration of the policy and the cessation of the payment of the premiums. The condition precedent so far as recovery under this policy is concerned is that the insured must be totally disabled within the meaning of the policy. . . .

Moreover, apart from the construction of the policy, the learned Justice said that if he were compelled to do so he would hold on the medical evidence that he could not determine in the plaintiff's favour that he had lost the sight of both eyes.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

THERE was a further improvement in the general employment situation at the beginning of September, according to returns received by the Dominion Bureau of Statistics from 8,264 firms, each with a minimum of 15 employees, representing practically every industry except agriculture, fishing, hunting and highly specialized business operations. These firms employed 817,002 persons, as compared with 804,846 in the preceding month. This increase (the fifth successive gain recently recorded) compared favourably with the decline noted on September 1, 1932, and especially so with the moderate contraction in industrial activity which in the experience of the last twelve years has usually occurred from August to September. The employment index number (with the average for the calendar year 1926 as the base equal to 100) stood at 88.5 on September 1, as compared with 87.1 on August 1, 1933, and with 86.0 on the same date in 1932. On September 1 of the eleven preceding years the index was as follows: 1931, 107.1; 1930, 116.6; 1929, 126.8; 1928, 119.1; 1927, 111.0; 1926, 106.2; 1925, 97.8; 1924, 94.2; 1923, 101.2; 1922, 94.8 and 1921, 89.8.

At the beginning of September, the percentage of idleness reported to the Department of Labour by local trade unions was 19.9, in contrast with 21.2 per cent at the beginning of August, 1933, and with 21.4 per cent at the beginning of September, 1932. For September, reports were received by the Department of Labour from a total of 1,705 labour organizations, comprising a membership of 151,233 persons.

Reports received by the Department of Labour from the Offices of the Employment Service of Canada during August showed that the volume of business, as indicated by the average daily placements effected, was higher than that of the preceding month, as well as that of the corresponding month a year ago. Vacancies in August, 1933, numbered 32,323, applications 56,588 and placements in regular and casual employment 30,667.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was somewhat lower at \$15.78 for September as compared with \$15.96 for August. The decline was due to the lower cost of foods, chiefly potatoes. Some comparative figures for earlier dates are: \$15.41 for June, 1933, the low point; \$16.34 for September, 1932; \$21.90 for September, 1929; \$20.90 for September, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.33 for September, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics was slightly lower at 63.9 for September as compared with 69.4 for August. Figures for certain previous dates are: 63.6 for February (the low point); 65.9 for September, 1932; 97.8 for September, 1929; 94.4 for September, 1922; 164.3 for May, 1920 (the post war peak); and 67.2 for September, 1914.

The accompanying table contains the latest available monthly statistics reflecting industrial conditions. These continued for the most part to indicate substantial improvement. The index of the physical volume of business was again higher, continuing the advance in progress since February, all of the main components of this index being upward except construction which was at a very low level and exports which, while above the same month a year ago, were lower than in July of this year. Wholesale prices were lower the last two months than in July, but the September figure was still over 8 per cent above the low point in February. Employment in September was again upward, this being the fifth consecutive month to show improvement and, as noted above, compares favourably with the usual downward movement at this time in the last twelve years. Car loadings for the four weeks ended September 30th were higher than in the preceding month but were lower than a year ago. Production of iron and steel during August was maintained at levels much higher than a year ago, as was also that of newsprint, and the large increase in the imports of raw cotton and raw wool indicated the prospect of increased activity in the textile industry. Production

of passenger automobiles was lower in August than in July and the manufacture of sugar in recent months has been considerably less than a year ago.

The time loss due to industrial disputes during September was over twice as large as that recorded for the previous month, while the number of workers involved showed an even greater increase, the higher figures being due largely to a strike of men's clothing factory workers in Montreal, P.Q., in which 4,000 workers were involved for a time loss of 20,000 working days. As compared with September, 1932, a substantial increase occurred in the number of strikes recorded, with a corresponding increase in the number of workers involved, while the time loss incurred was over five times as large, due to the strike of clothing workers mentioned above. There were in existence during the month twenty-three disputes, involving 6,991 workers, and resulting in a time loss of 39,194 working days, as compared with seventeen disputes, involving 2,526 workers and resulting in a time loss of 18,762 working days in August. In September, 1932, there were on record fifteen disputes, involving 3,458 workers, and resulting in a time loss of 7,992 working days. At the end of the month there were six disputes in progress recorded as strikes and lockouts, involving approximately 761 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off by the union.

#### **Decline in number of persons on unemployment relief**

The Prime Minister, in the course of an address delivered at Winnipeg on October 10, noted a marked decline during the past six months in the number of persons in receipt of relief in Canada. He stated that at the end of April 1,522,000 people were being assisted, while at the end of September last the number had fallen to less than 1,000,000. Since August, 1930, loans to provinces, direct relief and public works had together cost the Dominion Government \$122,552,000.

Of the relief legislation enacted in 1930 and carried forward ever since, Mr. Bennett said it was constitutionally impossible for the Dominion Government to set up a national relief organization. The jurisdiction rested with the provinces, and it was for that reason the policy was adopted of assisting with money the actual relief works carried on by the provinces and municipalities. The policy laid down by the Dominion, provincial, and municipal governments, that no man, woman or child should be without the necessities of life, had, he

claimed, been realized as it has not been realized in other countries. The Dominion had come through the depression in better condition than any other country in the world. At the present time there was distinct evidence of business recovery not only in Canada but in many of the countries in the world whose prosperity is most associated with that of Canada.

#### **Industrial Disputes Investigation Act**

During the past month the Department of Labour received an application from the British Columbia Electric Railway Company for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Company and their employees. A Board was established early in October to deal with a dispute between the Canadian Pacific Steamships Limited and its steamship freight checkers at Montreal. Full particulars of proceedings under the Act are given on page 978 of this issue, together with an outline of events following the recent reports of the Boards which dealt with the disputes concerning wage reductions on the principal railway systems, and on the Winnipeg Electric system.

#### **Industrial Conditions Act of Manitoba**

In the account of the dispute between the Winnipeg Electric Company and their employees on page 980 of this issue, it is noted that the employees voted to refer the question at issue to a board appointed by the Provincial Government. The board here referred to is the Joint Council of Industry, the establishment of which is provided for by the Industrial Conditions Act (Consolidated Amendments of Manitoba, 1924, chapter 92). This Act, which was passed in March, 1919, provided for a joint council composed of five persons, to hold office during the pleasure of the Lieutenant-Governor in Council. Employers' and employees' organizations were given the right to nominate two members each and the fifth member was to be an "impartial" person. In addition to powers given the council in regard to holding inquiries into the cost of living, wages, employment and unemployment, general working and housing conditions, unreasonable profits and other matters of industrial interest, the council was authorized to act as a board of arbitration at the request of the parties to a dispute and was given power to enforce the attendance of witnesses and the production of documents, etc. There being no compulsory reference of disputes to the council and no enforcement of awards, the law otherwise was purely per-

missive. In 1920 the Act was amended by the addition of clauses declaring the right of employers and employees to organize for any lawful purpose and the right to bargain individually or collectively, provided that a dispute as to the method or terms of such bargaining should be submitted to the Joint Council of Industry. The council was to investigate such a dispute and to report on it with all dispatch. Following this amendment, the council was organized and the first meeting held on May 12, 1920.

The Board was active for about three years but since 1923 it has remained inoperative.

#### **Code adopted by furniture manufacturers in Ontario**

A meeting of furniture manufacturers was held in Toronto on October 4, attended by representatives from practically all districts in which furniture factories in Ontario are located. A full report was received from the special committee which had been instructed to form a Code, and special attention was given to the question of a minimum wage in the industry. Investigation had been made into the cost of living in the various districts, consideration being given to the present purchasing power of the country and present conditions in the industry. As large variations in wage rates had been reported it was considered advisable to go as far as possible in the recommendation for a voluntary first step in establishing a minimum wage, and it was finally decided that in the zone including Waterloo, Kitchener, Preston, Hespeler, Stratford and Hamilton, the minimum wage rate paid to male employees, above twenty-one years of age, in the furniture industry, shall be not less than twenty-six cents per hour of work, and that in all other districts employed in the furniture industry the employees shall be paid at the rate of not less than twenty-two and a half cents per hour of work.

Exceptions to these rates are made as follows:—(a) Boys of the age of sixteen and over shall be paid a minimum wage rate of not less than twelve and a half cents per hour of work; (b) Employees who are partially disabled or of less than normal capacity shall be paid a minimum wage rate of not less than seventy per cent of the minimum paid to men above twenty-one years of age.

These minima are to apply to ordinary unskilled labour who have no knowledge or experience in the furniture industry. All classes of skilled labour will be graded upwards from this basis and paid according to skill, experience and capacity. As there is a great variation in the requirements for labour according to the grades and kinds of furniture

made, it was found impossible at present to set any schedule for the various kinds of skilled labour. This revision of the wage scale will mean varying increases according to districts and factories and the ultimate total increase of wages will be considerable.

It was agreed that these wage scales be put into effect as from October 1.

#### **Labour tribute to work of I.L.O.**

The Right Hon. Arthur Henderson, Secretary of the British Labour Party, in a recent pamphlet on "Labour's Foreign Policy," declares that the technical organization of the League of Nations could do much to prepare the way for the economic and other co-operation between the nations which the labour movement has always desired. "The success of the International Labour Organization," he continues, "has further shown how social and economic conditions can be improved by international action. Its Conventions, which have dealt with the most widely varying problems of industrial and social life, mark a great step forward in levelling up conditions of labour throughout the world and in diminishing unfair competition based on long hours, on the exploitation of women and children and on the absence of social services. More than five hundred ratifications of these Conventions have already been registered. This figure means that the labour legislation of many countries has been profoundly changed by the existence and the activity of the International Labour Organization. It represents therefore, a genuine improvement in the actual working conditions of scores of millions of men, women and children throughout the world. That is in itself a notable result. Yet the chief importance of what has so far been done, whether in modifying labour legislation or in organizing a new international Labour Intelligence Service, lies in the fact that it has shown how wide is the scope for future action of this kind."

#### **Industrial accident prevention in Ontario.**

Antagonism was shown by many employers in Ontario at the outset of the workmen's compensation system in the province, but in recent years there has been a complete co-operation between industry and the Board. Mr. R. B. Morley, general manager of the Industrial Accident Prevention Associations, in a recent address (now reprinted in pamphlet form), attributed this change in the attitude of the employers largely to the work of the Associations. The organization of the Associations, he recalls, goes back to the

days when the Act was being discussed in 1914, when industry felt that there should be some effort to prevent accidents both on humanitarian and economic grounds, and when the Act took effect on January 1, 1915, there was a provision (section 114) for the organization of safety associations in the various classes in Schedule 1.

Of the 24 classes of industry in Schedule 1, twenty-one, in whole or in part, have taken advantage of Section 114. Of the twenty-one classes represented by accident prevention activities, seventeen have federated in the Industrial Accident Prevention Associations and the other four have maintained separate organizations. The Industrial Accident Prevention Associations represent approximately two-thirds of the total payroll in Schedule 1 and include about 9,500 firms. The directors represent not only the various classes of industry but represent the Province geographically. In this way, all classes of industry and all sections of the Province have a voice in the management of the organization.

"It is evident," Mr. Morley said, "from a reading of the Compensation Act that one of the early considerations was directed towards inspection for accident prevention through the Safety Associations. The inspection force of the Industrial Accident Prevention Associations consists at the present time of the chief inspector and eleven inspectors. These men are trained in accident prevention work and the basis of that work on the mechanical side must continue to be the General Rules and Standards of the organization, which have been approved by the Workmen's Compensation Board and the Lieutenant-Governor in Council. Mechanical safeguarding alone, however, is not sufficient for industrial accident prevention and on this basis our staff has been trained to other aspects of the situation, including a certain amount of personnel work, the forming of safety committees where necessary, plant meetings with or without motion pictures, a study of processes and methods of work, and record-keeping. Practically speaking, the whole effort of the organization is extended for the purpose of enabling inspectors to go to plants or to construction jobs and by the quality of the work done there to improve the accident experience of the employer. The General Rules and Standards were designed for this, the accident memos which we receive from the Workmen's Compensation Board tell us where to look for accidents, the safety literature distributed by the organization advertises the accident prevention idea and the various record-keeping done by the office is to enable the Inspector to go where

most needed and to carry on his work satisfactorily there. Recently I summed up for the Inspectors my opinion of their work by saying that they must 'know the hazards, find the hazards and correct the hazards.'"

### **Benefits of workmen's compensation.**

In the course of the same address Mr. Morley outlined the benefits of workmen's compensation: "The Ontario Act," he said, "was the first compensation law to come into effect in Canada. It has served as a model for all others throughout Canada, the last of the provinces to fall in line being Quebec. It occasionally seems necessary to remind employers that we have in Ontario a most generous law and one that gives the injured worker and his dependants a fair deal. Under this Act medical aid and hospital services are unlimited. An injury which lays an employee off for seven days or more entitles him to two-thirds of his average earnings up to a maximum earning of \$2,000 per annum. In fatal cases the widow, if any, receives a pension of \$40 a month for life or until remarriage and there is an allowance also for each dependent child under sixteen. Serious injuries such as the loss of a hand, entitles the worker to a pension for life, not 100 weeks, 200 weeks or 400 weeks as in many of the jurisdictions across the line. Under Section 20 of the Act employers have the right to ask for medical re-examination of employees in receipt of a pension. You are reminded too of the excellent work done by the Rehabilitation Clinic of the Board in re-establishing difficult and long drawn cases. . . . The administration expenses of the Ontario Workmen's Compensation Board represent approximately five per cent of the total receipts by the Board, an admittedly low figure. The operations of the Safety Associations included in the Industrial Accident Prevention Associations represent approximately three per cent, which is a lower cost figure than that for the classes outside the Industrial Accident Prevention Associations."

### **Alleged violations of Hours of Work Act in Quebec.**

The attention of the Hon. C. J. Arcand, Minister of Labour for the Province of Quebec, was recently drawn to the alleged fact that certain employers in the construction industry were not observing the orders in council recently passed by the provincial government limiting the hours of work in the building industry to 40 hours in the week. These orders were reproduced in the *LABOUR GAZETTE*, July, 1933, page 701, for Montreal and District; August,

1933, page 776 (for Quebec and Eastern Townships.) The Minister made the following statement:

"It seems strange that after conferring with the Minister and the officers of the department, and agreeing to apply the eight-hour day and the 40-hour week in all enterprises in which they are interested, the representatives of the building trades and their employees should now overlook it altogether. The number of inspectors at our disposal has not permitted us to supervise all works now in course of execution, but we relied on the good faith of the people interested in the application of such a law, regarded as a means to curb unemployment. When the representatives of the building trades and those of the trades unions conferred with us (LABOUR GAZETTE, June, 1933, page 577), they represented all men, employers and employees, engaged in it. Therefore, when they signed the agreement, which was later included in an order in council, they engaged thereby the trade as a whole. The question raised by the many complaints received is of such importance that I will confer with the Attorney General to see what means can be taken to remedy the situation. I am of the opinion personally that the law must be respected by all, and I promise to do my best towards that end."

The Hours of Work Act, which took effect on June 10 last, provides that employers who contravene the provisions of an Order in Council under the Act shall be liable to a fine of not less than \$25 or more than \$50, and in default of payment, to imprisonment for not more than thirty days.

#### **Interest of consumers in industrial agreements.**

In connection with the administration of the National Recovery Act in the United States, President Roosevelt has appointed three committees (1) the Industrial Advisory Committee, composed of leading industrialists including Gerard Swope, President of the General Electric Corporation; (2) the Labour Advisory Committee, consisting of labour leaders such as Leo Wolman and Sydney Hilman; and (3) the Consumers' Advisory Committee. One of the members of the latter committee is Dr. J. P. Warbasse, president of the Co-operative League of the United States. Writing in the September number of *Co-operation*, on the subject of "Consumers and the National Recovery Act," Dr. Warbasse says: "In every code are things that vitally concern the consumers. Among these are the questions of (1) the amount of profit that may be taken; (2) the overhead costs as found in salaries, payments to subsidiaries, etc.; (3) effi-

ency methods in the interest of economy; (4) elimination of middlemen; (5) statistical research into costs; (6) unhealthful factors in foods, etc.; (7) spurious materials, fraud, and the whole matter of quality; (8) promotion of co-operative education; (9) the use of existing co-operative consumers' societies; (10) the formation of a consumers' code; and (11) violation of consumers' interests in the many codes adopted."

#### **Success of consumers' co-operation in England.**

In a recent issue of the *Economic Journal* (London) Professor C. R. Fay, of Cambridge University, described the present standing of the consumers' co-operation in connection with recent British legislation: "In the opinion of the *New World*," he wrote, "consumers' co-operation is the most remarkable achievement of English democracy. Labour politics they know, trade unionism they know, they have plenty of both themselves. But here in Great Britain is a commonwealth of perhaps one half of the wage-earning industrial population, conducting through their own organs one of the greatest businesses of the country; employing over 200,000 men and women in their own factories and shops; having wages of over £200 millions per annum—and doing it all without a pennyworth of help from the State, but, on the contrary, in these days, under suspicion from the State."

#### **Importance of building activity in Canada.**

The National Construction Council of Canada, in a brief presented to the Royal Commission on Banking at their recent sitting at Ottawa, stated that the volume of construction work in Canada, as measured by the total construction contracts of all kinds awarded showed a volume of \$577,000,000 in the peak year 1929, as compared with a volume for the first six months of 1933 of \$33,000,000, or a present yearly rate of \$66,000,000. "We are therefore doing business this year at the rate of 11½ per cent of our maximum year.... From figures furnished by the Dominion Bureau of Statistics this industry employed in 1929 at the peak 300,000 direct workers. From the same source we are given a figure of 70,000 as the number of indirect workers, or a total of 370,000. It is very difficult to arrive at an accurate figure for the indirect workers in this industry on account of its far reaching ramifications. We believe this figure of 70,000 to be inordinately low. If we follow authorities such as J. M. Keynes, who states

that for every one man employed directly in construction work two more are employed indirectly, we would reach the rather startling total of 900,000 people employed in 1929 directly or indirectly by construction activities. In the United Kingdom, official reports have been issued from time to time using the relationship of one direct worker to one indirect worker, and if we follow this precedent—which we ourselves believe to be very conservative—we arrive at a total of 600,000 persons in Canada engaged by construction before the beginning of the present industrial depression.

"It is obvious from the above that the lack of work in the construction industry is responsible in a very large measure for the numbers of unemployed in the country. It is also correct to state that if the construction industry were operating at the 1929 rate, 500,000 people would be back in employment to-day who are at present unemployed. In other words, about half of Canada's unemployment problem can be laid at the door of this industry."

"The construction industry," the brief stated elsewhere, "beyond all other industries, is unique in its ability to provide great diversity of employment. The ramifications of this industry are so far-reaching that it is difficult to find any major industry in the country not seriously affected by its prosperity or otherwise. It follows that a dollar spent in the construction industry is diffused through the whole fabric of industry. No particular group and no particular locality is affected more than any other group or locality. A bridge on the west coast will provide work for steel makers in Sydney. An office building in Toronto provides work for the lumberman in British Columbia. To this aspect should be coupled a second significant factor, that for every dollar spent in this industry approximately 82 cents goes towards labour. In other words, it goes into the pay envelopes of the workers in this country whether they be on the job or whether they be in the factory working on materials and supplies."

#### Public health and unemployment in Great Britain.

In his annual report for 1932 the Chief Medical Officer of the British Ministry of Health discusses the effects of unemployment on the physical condition of the people. As the result of the work carried on during the past ten years in reducing infant mortality and the deaths from tuberculosis and other diseases, the actual

death rates last year were the lowest ever recorded. "In estimating the effect of widespread unemployment on the physical condition of the people," the Chief Medical Officer says, "there are a number of factors which must be considered. In the first place there is the direct effect on the unemployed individual and his dependants, and in the second there is the indirect effect of its prevalence on the physical well-being, and even on the minds, of employed workers (through fear of unemployment or otherwise) and the population generally, whether employed or not. Again, the harmful effect of unemployment on its victim may be exercised in various ways. For instance: (a) the actual deprivation of an adequate diet; (b) the effect of resultant idleness on a manual worker in rendering him unfit to resume his former occupation owing to lack of practice and loss of muscle tone; (c) the effect of worry and anxiety in impairing normal bodily functions, e.g. on digestion or in aggravating existing states of mental instability and thereby engendering various forms of neuroses; or (d) actual excessive sickness or incapacity. In such a situation there is of course much which can never be either analysed or tabulated, and we have to be guided by the broad facts as represented in sickness and mortality."

---

A digest of the 1933 Safety Convention, organized by the Industrial Accident Prevention Associations of Ontario last April (LABOUR GAZETTE, May, page 515) has just been published in book form. The book contains much practical information in regard to safety methods. Copies may be obtained from the office of the Association, 600 Bay Street, Toronto. Next year's convention is to be held at Toronto on April 26-27.

---

#### CORRECTION

The *Saskatchewan Gazette*, September 15, 1933, contained the text of Regulation 53 of the Workmen's Compensation Board of the Province. The new Regulation corrects an error in the wording of Regulation 51, which was reproduced in the LABOUR GAZETTE, January, 1933, pages 41-42. In the 8th line of the paragraph commencing "Notwithstanding anything elsewhere contained in any Regulation, etc." the word "not" should be omitted, the clause as corrected reading as follows:—"and is not doing such work as part of, or incidental to an industry which is within Schedule One," etc.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THE British Columbia Electric Railway Company, Limited, submitted an application to the Department of Labour at the close of September for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute involving some 1,400 employees being members of the Amalgamated Association of Street and Electric Railway Employees of America, Divisions Nos. 101 (Vancouver), 134 (New Westminster), and 109 (Victoria). A three year agreement under which the employees had been working, and which had been modified on December 1, 1932, by a 5 per cent wage decrease, expired on September 30, 1933, when the company proposed making a further wages reduction of 10 per cent, which would mean a total reduction of 15 per cent from the base rates contained in the agreement. To this further decrease the employees declined to agree. The application was before the Minister for consideration at the time of going to press.

A Board of Conciliation and Investigation was established by the Minister of Labour on October 3 to enquire into a dispute between the Canadian Pacific Steamships Limited and its steamship freight checkers at Montreal. The application had been received in the Department of Labour from the employees on July 25, (LABOUR GAZETTE, August, page 759). The matter of the hourly wage rate was stated to be the cause of the dispute, 50 employees being directly affected. An officer of the Department of Labour mediated in this case but was not successful in negotiating a settlement. The personnel of the board is as follows: Mr. Lynn B. Spencer, K.C., of Welland, Ont., chairman, appointed on joint recommendation of the other board members, Messrs. F. C. Dobell, of Montreal, P.Q., and W. F. O'Connor, K.C., of Toronto, Ont., nominated by the company and employees, respectively.

### The Railway Wages Case

In connection with the dispute between the principal railways in Canada (Canadian National Railways and Canadian Pacific Railway and subsidiary railways) and their locomotive engineers, locomotive firemen, conductors, trainmen and telegraphers, over the further 10 per cent wages deduction which, in accordance with the recommendation of the Board of Conciliation and Investigation (LABOUR GAZETTE, May, 1933, page 478) was put into effect by the railways on May 1, 1933, the Conference Committee of General Chair-

men of the organizations representing the five groups of railway employees notified the employing companies on September 29 that the employees, numbering approximately 24,000, had voted to call a strike unless a settlement satisfactory to their representatives could be secured. Early in October the Prime Minister, the Right Honourable R. B. Bennett, together with the Honourable W. A. Gordon, Minister of Labour, the Honourable H. H. Stevens, Acting Minister of Railways, and the Honourable Hugh Guthrie, Minister of Justice, discussed the situation with the leading railway executives and with the union officials. After these conferences an official statement was issued by the Prime Minister on October 5 as follows:

"The railway union organizations as well as the railway transportation companies have expressed to successive governments the earnest hope that there would be no intervention when employers and employees were negotiating contracts of service. The officials of the several unions affected have represented their membership in negotiating schedules and obtaining redress of grievances with the appropriate officials of the railway companies.

"For that reason, this government has not in any way undertaken to suggest to the companies or their employees what rates of wages should be paid or how questions affecting employment should be determined. When applications have been made for conciliation boards, the Minister of Labour has considered and usually granted such applications. Where a chairman could not be agreed upon he has selected him from the judiciary whenever he could be spared from the discharge of judicial duties.

"Some months ago a dispute between the running trades and the railway companies resulted in the appointment of a conciliation board by the Minister of Labour, which board decided the dispute adversely to the contention of the employees although their representative on the board disagreed with the findings of the majority.

"The officials of the several unions sought authority from their members to continue their negotiations with the transportation companies and, if an agreement could not be arrived at, authority to direct them to withdraw from their employment; in other words, strike. The government was informed that the referendum to the membership of the unions had resulted in authority being given to the officials to proceed with negotiations and, if they failed, to declare a strike.

"Yesterday, the Prime Minister, the Minister of Labour, and the acting Minister of Railways and Canals, with the Minister of Justice, met Mr. Hungerford and Mr. Grant Hall, the executive officers of the railway companies, and pressed upon them the necessity, in the national interest, of every possible effort being made to bring to a successful issue the negotiations with the representatives of the employees.

"This morning, the same members of the cabinet met the representatives of the running trades and in similar terms expressed to them the urgent necessity of an adjustment of differences being arrived at.

"There is no ill-feeling between the representatives of the railway companies and the representatives of the men. They meet on most friendly terms and discuss their differences with complete frankness. Both parties to the dispute expressed their approval of the action of the government and indicated their realization of the seriousness of the situation, which has been accentuated by the course of events during the last few months, which the Canadian people can neither direct nor control. Negotiations between the railway companies and the employees will be resumed without delay."

### The Winnipeg Electric Company Case

The September issue of the *LABOUR GAZETTE* contained, at page 878, the text of the report of the Board of Conciliation and Investigation which dealt with a dispute between the Winnipeg Electric Company and its motormen, conductors and busmen, and employees of the mechanical, track and gas production departments. The report, dated August 12, which was signed by the chairman, the Honourable Mr. Justice A. K. Dysart, and the member of the board nominated by the company, Mr. Ernest T. Leech, recommended that no change should be made in the wage rates of employees in the gas department, but that, as from August 1, 1933, wage rates of the employees in the traffic, mechanical and track departments should be reduced 15 per cent below the peak wages in effect immediately prior to February 1, 1932, with the proviso that no such decrease should operate so as to reduce the wage rate of any regular employee, exclusive of apprentices, below the level of 38.3 cents per hour, the rate paid by the city of Winnipeg to common labourers. The board's findings were rejected by the employees. Direct negotiations between the parties were reopened, but no agreement was reached and the company notified the employees on August 30 that, pending a settlement of the wages question, the rates of pay would be those recommended by the

Conciliation Board. The employees replied that a strike would take place at twelve o'clock, midnight, of August 31, if the wages payable on that date covering the first two weeks of August were subjected to the wage reduction recommended by the Conciliation Board. A question arose as to whether the board was empowered to include a retroactive date in its recommendations and the Department of Labour requested the parties to maintain status quo pending the arrival in Winnipeg of the federal Chief Conciliation Officer. The company stated that if, after investigation, it was found that the retroactive feature was not in accordance with the provisions of the Act, the wages withheld for work performed during the first two weeks of August would be refunded to the employees. This arrangement was acceptable to the employees, who agreed to defer strike action. The federal Chief Conciliation Officer, as well as provincial and municipal officials, were active in furthering negotiations, which continued during the next two weeks. On September 13 the company notified the employees that the deduction made from the pay cheques covering the period August 1 to 15 would be refunded to the employees, and that the pay cheques which they would receive on September 15 for work done during the last half of August would be on the basis of the reduced rates of pay as recommended by the board. An ultimatum was thereupon issued by the employees that if the wages were reduced for the second half of August a strike would take place at midnight, Friday, September 15, and press items indicated that both sides were making preparations for a strike. As a result of a prolonged conference held in the office of the provincial Public Utilities Commissioner on September 15 between officials of the company and of the street railway men's union, at which the Attorney-General of the Province and the Mayor of Winnipeg were present, the threatened strike was averted.

The representatives of the employees agreed to take a secret ballot, the terms of the ballot to be as follows:—

1. Are you willing to accept the 15 per cent reduction in wages advocated in the findings of the board of conciliation?
2. In the event of a majority of this ballot being in the negative, are you agreeable to the matters in dispute being referred to a board appointed by the provincial government under the Industrial Conditions Act?

The company on its part agreed to deposit on each pay day with the Municipal and Public Utilities Board, as trustee, an amount equivalent to the difference between the former wage rate and the reduced rate, to be held

in escrow and disbursed in accordance with the final determination of the matter.

The result of the secret vote, which was taken on September 29, was against acceptance of the wage reduction and in favour of submission of the dispute to a board appointed by the provincial government. In the meantime direct negotiations on the question of wages and working conditions have been resumed in an endeavour to reach an amicable settlement without the necessity of further outside mediation.

### Alberta Labour Disputes Act

A board of Investigation and Conciliation under the Labour Disputes Act of Alberta was appointed during September, at the request of the motion picture projectionists at Edmonton, to deal with the question of recent wage reductions. The board consists of the following members: Dr. J. M. MacEachran, of the University of Alberta, John Blue, secretary of the Edmonton Chamber of Commerce, and Robert McCreath, president of the Allied Printing Trades Council of Edmonton.

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1933

THE following table shows the number of disputes, workers involved and time loss for September, 1933, as compared with the previous month and the same month a year ago:—

| Date           | Number of disputes | Number of employes involved | Time loss in working days |
|----------------|--------------------|-----------------------------|---------------------------|
| *Sept., 1933.. | 23                 | 6,991                       | 39,194                    |
| *Aug., 1933..  | 17                 | 2,526                       | 18,762                    |
| Sept., 1932..  | 15                 | 3,458                       | 7,992                     |

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of strikes and lockouts recorded for September was substantially higher than that shown for August, 1933, while the number of workers involved and the time loss incurred were over twice as large as in the preceding month. The higher figures for September were due largely to a strike involving 4,000 men's clothing factory workers in Montreal, P.Q., resulting in a time loss of 20,000 working days, while disputes involving 1,200 hop pickers in British Columbia and 600 furniture factory

workers in Stratford, Ont., resulted in a combined time loss of above 11,000 working days. As compared with September, 1932, a substantial increase occurred in the number of strikes recorded, with a corresponding increase in the number of workers involved, while the time loss incurred was over five times as great, due largely to the strike of clothing workers mentioned above.

Five disputes, involving 256 workers, were carried over from August. The strike of fur factory workers in Toronto, Ont., commencing on August 16, 1933, shown as unterminated in the September issue of the LABOUR GAZETTE, was later reported to have terminated by the end of August; while a strike of leather goods workers, commencing in Toronto, Ont., on August 18, 1933, was reported too late for inclusion in the September issue, and is now included in the table in the list of strikes in progress prior to September. Eighteen disputes commenced during September. Of these twenty-three disputes, seventeen were terminated during the month, eleven being in favour of the workers involved, two in favour of the employers concerned, two resulting in compromise settlements, one being partially successful, and the result of one being recorded as indefinite. At the end of September, therefore, there were six disputes in progress recorded as strikes or lockouts, namely: leather goods workers, Toronto, Ont., restaurant employees, Vancouver, B.C., shoe factory workers, Toronto, Ont., women's clothing factory workers (dressmakers), Montreal, P.Q., furniture factory workers, Stratford, Ont., and poultry dressers, etc., Stratford, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available

as to seven such disputes, namely: photo engravers, Toronto, Ont., commencing March 23, 1931, one employer; photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Winnipeg, Man., February 28, 1932, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; lithographers, Toronto, Ont., April 15, 1932, one employer; motion picture projectionists, Saint John, N.B., March 6, 1933, one employer; and composers, Winnipeg, Man., March 13, 1933, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, as no relation of employer and employee is involved.

A dispute involving coal miners in the neighbourhood of Drumheller, Alta., at East Coulee, was settled early in September when the mines re-opened for the autumn business, the employers agreeing to pay the same wages as in 1932. A strike of miners against a wage reduction similar to that agreed upon in the Drumheller mines, about twelve per cent, had occurred but by the end of June the mines were closed for the summer (LABOUR GAZETTE, July, 1933, pages 683-684). Approximately 150 miners were employed when the strike began but about 600 are employed during the winter season. At Wayne a similar dispute had occurred and in September the miners were voting on whether to accept the reduced wage scale.

A settlement of the dispute between building contractors and the bricklayers' union in Halifax since May 1, 1933, was reached early in September, the Constructive Mechanical Trades Exchange making a verbal agreement with the Bricklayers, Masons and Plasterers Union providing for a rate of 97½ cents per hour for bricklayers and stonemasons, the same as during the twelve months ending April 30, 1933. The electrical workers' union had reached an agreement with the Builders Exchange on June 6, 1933, while the other trades allowed their members to work under protest without a settlement (LABOUR GAZETTE, July, 1933, page 683, and preceding issues).

A dispute involving employees in one men's clothing manufacturing establishment in Winnipeg, Man., for two days in August was reported to the Department too late for inclusion in the September issue of the LABOUR GAZETTE. The employees, members of the Industrial Union of Needle Trades Workers, on August 25, 1933, ceased work demanding equal division of work, recognition of the union and

no discrimination for union activity. Negotiations between the parties were held and the employer agreed to the strikers' demands, work being resumed on August 28, 1933.

A strike of fourteen workers in a cloak manufacturing establishment, with over one hundred employees, in Toronto, Ont., on August 21, 1933, has been recently reported, apparently in sympathy with a strike of leather goods workers on August 18, 1933, in the same building. At the end of the month four of the strikers resumed work and the remainder were not taken back as they were not required.

A dispute involving employees in a shingle mill near New Westminster, B.C., has been reported as causing a cessation of work on August 30, 1933. It appears that the employer proposed to base the wage scale on that to be adopted in the mills in the State of Washington and the employees objected to working without a wage scale until this should be settled. It was, therefore, arranged to suspend work in the meantime. By the middle of September, the Washington scale not being determined, a scale higher than that previously in effect was agreed upon and operations were resumed.

A minor dispute in August, 1933, involving about twenty-five employees in a furniture factory in Montreal, P.Q., has been recently reported to the Department. Following a cessation of work for an hour, the employees secured an upward adjustment of wages and changes in distribution of work, carpenters receiving 50 cents per hour, upholsterers 45 cents and springers 25 cents to 30 cents.

A minor dispute involving a brief cessation of work on September 13, 1933, involving thirty employees in a rubber factory in Guelph, Ont., has been reported in the press, a dispute as to a proposed adjustment of wages being settled by negotiations within a few hours.

A cessation of work on September 27, 1933, for three hours in one bakery in Winnipeg, Man., employing eight workers, followed allegations that wages were not being paid in accordance with the agreement and that two employees had been discharged. The employer agreed to reinstate the two workers, to raise the wages of one driver and to comply with the terms of the agreement, which is referred to in another paragraph in connection with a strike in another bakery.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

FUR FACTORY WORKERS (OPERATORS, ETC.), WINNIPEG, MAN.—As stated in the September

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1933\*

| Industry,<br>occupation and locality                                 | Number<br>of<br>workers<br>involved | Time<br>loss in<br>working<br>days | Remarks   |
|--|-------------------------------------|------------------------------------|---|
| <b>(a) Strikes and Lockouts in Progress prior to September, 1933</b> |                                     |                                    |   |
| <b>MANUFACTURING—</b>  |                                     |                                    |   |
| <i>Fur, Leather and Other Animal Products—</i>                       |                                     |                                    |   |
| Fur factory workers, Winnipeg, Man.....                              | 16                                  | 80                                 | Commenced Aug. 14, 1933; against discharge of worker and for increased wages, etc.; terminated Sept. 7, 1933; partially successful. |
| Fur factory workers, Toronto, Ont.....                               |                                     |                                    | Commenced Aug. 16, 1933; for increased wages and reduced hours; terminated Aug. 31, 1933; in favour of workers.                     |
| Leather goods workers, Toronto, Ont.....                             | 40                                  | 1,000                              | Commenced Aug. 18, 1933; for increased wages, reduced hours and recognition of union; untermi-<br>nated.                            |
| <i>Textiles, Clothing, etc.—</i>                                     |                                     |                                    |   |
| Cap factory workers, Toronto and Hamilton, Ont.....                  | 175                                 | 1,000                              | Commenced Aug. 30, 1933; for increased wages and reduced hours; terminated Sept. 13, 1933; in favour of workers.                    |
| <i>Metal Products—</i>   |                                     |                                    |   |
| Scrap metal workers, etc., Winnipeg, Man.....                        | 18                                  | 36                                 | Commenced Aug. 25, 1933; for increased wages, recognition of union, etc.; terminated Sept. 2, 1933; in favour of workers.           |
| <b>SERVICE—</b>  |                                     |                                    |   |
| <i>Business and Personal—</i>  |                                     |                                    |   |
| Restaurant employees, Vancouver, B.C.....                            | 7                                   | 175                                | Commenced Aug. 1, 1933; for increased wages; untermi-<br>nated.   |

| TRANSPORTATION AND PUBLIC UTILITIES—<br><i>Local Transportation—</i><br>Garage employees (bus), Calgary, Alta..... | 14                                  | 25                                 | Commenced Sept. 27, 1933; for recognition of union; terminated Sept. 28, 1933; in favour of employer.                                   |
| TRADE—<br><i>Wholesale—</i><br>Poultry dressers, etc., Stratford, Ont.....   | 65                                  | 500                                | Commenced Sept. 21, 1933; for increased wages; unterminated.  |

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

issue of the LABOUR GAZETTE, this dispute was terminated early in the month as the result of mediation of the provincial Bureau of Labour. The employees, variously reported as sixteen and thirty in number, who had ceased work on August 14, 1933, demanding

the reinstatement of one worker, increases in wages, recognition of a shop committee and no discrimination for union activity, returned on September 8, the union representative (Fur Workers' Industrial Union) stating that concessions had been made by the employer as

to the shop committee, discrimination for union activity and as to dismissal of those working during the strike. The discharged worker was not reinstated, having accepted two weeks' pay in lieu of notice on dismissal. On September 12, three workers, arrested during the strike on charges of intimidation, watching and besetting, appeared in the police court, being remanded for trial.

**FUR FACTORY WORKERS (DRESSERS & DYERS), TORONTO, ONT.**—In connection with this dispute, reported as unterminated in the September issue of the *LABOUR GAZETTE*, as noted in a previous paragraph, information has recently been received that the employees involved resumed work on September 1, 1933. The settlement under which the factory re-opened is reported by the union to have been effected by negotiations between the employer and the Fur Dressers and Dyers Industrial Union, and included a ten per cent increase in wages, as well as a forty-eight hour week, time and one-quarter for overtime and recognition of the union shop committee.

**LEATHER GOODS WORKERS, TORONTO, ONT.**—This dispute, commencing August 18, 1933, as noted in a previous paragraph, was not reported to the Department in time for inclusion in the September issue of the *LABOUR GAZETTE*. Forty bench workers, cutters, etc., members of the newly organized Toronto Leather Goods Workers' Union, ceased work on August 18, 1933, demanding adjustment of wages, a forty-four hour week, and recognition of the union. Early in September an interim injunction restraining the union and its members from picketing, intimidating or otherwise interfering with his business was secured by the employer, but a renewal on September 25 was refused by the court. At the end of the month no termination of the dispute had been reported.

**CAP FACTORY WORKERS, TORONTO AND HAMILTON, ONT.**—The employees involved in this dispute resumed work by September 14, 1933, having been on strike from August 30, to secure increases in wages and a reduction in hours. Fourteen firms in Toronto and three firms in Hamilton were affected by the dispute. Operations were resumed from time to time as various factories signed agreements with the International Union of Cloth Hat, Cap and Millinery Workers providing for recognition of the union, a forty-hour week and increases in piece rates of from ten per cent to fifteen per cent. It is stated that the firms not signing agreements made concessions as to hours. The agreements are summarized elsewhere in this issue.

**SCRAP METAL WORKERS, RAG PICKERS, ETC., WINNIPEG, MAN.**—As stated in the September issue of the *LABOUR GAZETTE*, this dispute was terminated early in the month, work being resumed on September 4, 1933. The workers, who had demanded an increase of sixty per cent, returned at rates twenty per cent above those paid prior to the strike, a further increase of sixteen per cent to take effect from October 15. Recognition of a shop committee and the abolition of the piece work system had also been demanded by the Metal Trades Workers' Industrial Union and were granted by the employer in the terms of settlement.

**RESTAURANT EMPLOYEES, VANCOUVER, B.C.**—In connection with the strike, commencing August 1, 1933, involving waiters, etc., employed by one restaurant in Vancouver, following a demand for increases in wages, it is reported that during September several of the employees involved secured work elsewhere, leaving four on strike at the end of the month.

**HOP PICKERS, FRASER VALLEY, B.C.**—Approximately 1,200 hop pickers employed by hop growers in the Fraser Valley district of British Columbia, ceased work early in September, 1933, demanding a wage rate of two cents per pound instead of 1½ cents, a weigher to be kept in the fields, improved conditions as to drinking water and fire protection, and no discrimination for participation in the strike. Pickets were stationed about the hop yards by members of organizations affiliated with the Workers' Unity League, but negotiations between representatives of the parties involved resulted in the resumption of work after two days, the demands of the strikers being substantially granted, the rate for hops, however, being fixed at 1½ cents per pound.

**LOGGERS, SPROAT LAKE, B.C.**—Loggers, reported to be members of the Lumber Workers' Industrial Union, employed by one firm operating in the Sproat Lake district of Vancouver Island, ceased work on September 8, 1933, to enforce a demand for improved camp conditions. Pickets were placed about the camp and when the employer discharged three of the strike leaders an additional demand was made that no discrimination be shown against the strikers. Negotiations between representatives of the parties resulted in work being resumed on September 18, 1933, the employer having agreed to improve living conditions and to reinstate any workers who had been discharged for participation in the dispute.

**PULPWOOD CUTTERS, UNION LAKE, ONT.**—This dispute, commencing on September 15, 1933, affected the camps of one firm operating in

the Onion Lake district near Port Arthur, Ont., where operations had commenced before the camp buildings were completed, when 140 pulpwood cutters ceased work demanding improvements in their living conditions. The employer began to replace the strikers with workers brought from other districts; but through the mediation of the civic authorities at Port Arthur a settlement was reached whereby the employer agreed to engage local men when available and to improve camp conditions as quickly as possible. The employees also agreed, in the event of future disputes, to remain at work pending negotiations between the operator and a committee appointed by the men. It was also arranged that the employers in the district would meet representatives of the workers to agree on working conditions during the winter. Work was resumed on September 27 under the above conditions.

**COAL MINERS, SYDNEY MINES, N.S.**—Claiming that under a newly installed haulage system the coal was not removed fast enough and consequently hampered shooters and loaders in the performance of their work, with a resultant lowering of earnings, miners employed in one colliery at Sydney Mines, N.S., ceased work for one shift on September 23, 1933. Work was resumed on the next shift, however, pending a settlement to the dispute through negotiations.

**BAKERY EMPLOYEES, WINNIPEG, MAN.**—Bakers, drivers, etc., members of the Food Workers' Industrial Union employed by one bakery in Winnipeg, Man., ceased work on September 4, 1933, demanding an eight-hour day with an approximate increase of thirty-five per cent in wage rates and recognition of a shop committee. At the request of the employer, the Secretary of the provincial Bureau of Labour mediated and an agreement was reached, the demands of the strikers being conceded. Similar agreements with a number of other bakeries where no strike occurred were also reached and the agreements are given in summary form elsewhere in this issue.

**BAKERS, BAKERY DRIVERS, ETC., WINNIPEG, MAN.**—On September 19, 1933, seven employees of one bakery ceased work when their employer refused to negotiate with a shop committee, formed by members of the Food Workers' Industrial Union, with regard to increases of \$5, \$7 and \$9 per week for three drivers. Negotiations between the parties, however, resulted in the drivers securing the increases demanded, bringing the rates to \$13 and \$15 per week, and work was resumed on September 21, 1933, the agreement covering drivers being summarized elsewhere in this issue.

**SHOE FACTORY WORKERS, TORONTO, ONT.**—A number of employees in one boot and shoe factory in Toronto ceased work on September 1, 1933, demanding a minimum wage rate of \$10 per week and increases of thirty per cent for those receiving \$10-\$12, twenty-five per cent increase for those receiving \$12-\$15 and twenty per cent for those above \$15. At the end of the month no termination had been reported.

**LEATHER GOODS WORKERS, TORONTO, ONT.**—This dispute, involving 175 workers employed by nine firms engaged in the manufacture of leather handbags, etc., commenced on September 15, 1933. The strikers, members of the Toronto Leather Goods Workers' Union, demanded increases in wages, a forty-four hour week and recognition of the union. Negotiations between the parties resulted in the employees of one firm returning on September 16, the employer granting recognition of the union, the forty-four hour week and time and one-quarter for overtime. By September 26 nearly all of the other firms had reached similar agreements with the union and the dispute was regarded as practically over by the end of the month.

**MEN'S CLOTHING FACTORY WORKERS, MONTREAL AND DISTRICT, P.Q.**—Employees in about one hundred establishments manufacturing men's and boys' suits, overcoats, etc., ceased work on September 6, 1933, to secure agreements providing for higher wages and forty or forty-four hours per week. The Amalgamated Clothing Workers of America for some years had agreements with associations of manufacturers and individual establishments, but in the past two or three years in many cases these were no longer observed, wages being reduced and hours per week increased. In 1932 a new union, the United Clothing Workers of Canada, had secured members in many of the factories, and following a strike secured verbal agreements with some. Later it is reported these agreements were no longer observed. In August, 1933, as a result of negotiations between representatives of the two organizations, it was arranged that the members of the United Clothing Workers, 2,000 in number, would join the Amalgamated Clothing Workers of America and the organization would call a strike to secure agreements in men's clothing factories throughout the city in order to standardize conditions. Many of the manufacturers were anxious to have conditions standardized, as in earlier years under union agreements, and as in Toronto and Hamilton. A committee of the manufacturers negotiated a settlement with the president of the international union providing for a forty-four hour week, to be reduced to forty hours

on December 1, without reduction in wages, a minimum wage scale of \$35 per week for cutters, \$25 for pressers, and a twenty per cent increase for all other workers, individual agreements to be drawn up and signed for each establishment, equalization of labour costs in all manufacturing processes to be secured and enforced by the union. It was estimated that ninety per cent of the men's clothing factories and shops in Montreal would come under these agreements, and also many factories outside of Montreal. Work was resumed in many cases on September 12, 1933, and in most of the others the following day.

**WOMEN'S CLOTHING FACTORY WORKERS (WAISTS, ETC.), MONTREAL, P.Q.**—Demanding an increase of thirty per cent above rates of \$6-\$12 per week, some 110 finishers, drapers, examiners, etc., members of the Industrial Union of Needle Trades Workers, ceased work in one women's clothing manufacturing establishment on September 9, 1933. Demands as to shop committees and discrimination were also made. Negotiations between the parties resulted in the resumption of work by September 16, a general increase of twenty per cent being granted, a shop committee being agreed to, and no discrimination to be shown for union activity.

**EMBROIDERY WORKERS, TORONTO, ONT.**—Employees in the hand embroidery department of one ladies' garment manufacturing company in Toronto, Ont., ceased work on September 5, 1933, demanding increases in piece work rates and a reduction in the number of hours worked. The employer reported that work was resumed within a short time but the Industrial Union of Needle Trades Workers picketed the establishment for several days.

**EMBROIDERY WORKERS, MONTREAL, P.Q.**—This dispute, which commenced on September 18, 1933, involved fifty operators of Bonnaz and other embroidery machines employed by some fifteen firms in Montreal, P.Q. The workers, members of the Bonnaz Embroidery Workers' Union, a local of the International Ladies' Garment Workers' Union, demanded recognition of the union, wage rates of \$25 per week for Bonnaz and \$18 per week for other machine operators, with a forty-four hour week. An agreement was reached through negotiations between representatives of the parties involved, work being resumed after one-half day when the employers agreed to the demands of the strikers and signed an agreement, which is summarized elsewhere in this issue.

**WOMEN'S CLOTHING FACTORY WORKERS (DRESSMAKERS), MONTREAL, P.Q.**—On September 18, 1933, employees of one firm, engaged

in the manufacture of women's clothing, ceased work demanding the reinstatement of a number of workers who had been discharged for alleged union activity. It is stated that the employer had promised to re-employ the workers in question, but had engaged new employees instead, whereupon the Industrial Union of Needle Trades Workers had called its members in the factory out on strike. At the end of the month no termination had been reported.

**FURNITURE FACTORY EMPLOYEES, STRATFORD, ONT.**—Employees in five furniture and cabinet manufacturing establishments ceased work on September 14, 1933, and on September 20, 1933, in another, demanding increases in wages stated to be from thirty-five to fifty per cent, a reduction in hours from fifty per week to forty-four with time and one-half rates for overtime work, and recognition of a recently organized union, a local of the Chesterfield and Furniture Workers' Industrial Union, affiliated with the Workers' Unity League. This organization through a strike in August had secured agreements with a number of chesterfield factories in Toronto and began the organization of employees in furniture factories in other localities (LABOUR GAZETTE, September, 1933, pages 903 and 953). It was stated that wage rates had been reduced considerably since 1929 and conditions as to piece rates were unsatisfactory, while the prevalence of short time resulted in earnings on low levels.

The Minister of Labour for Ontario and the Mayor of Stratford took the matter up with the parties to the dispute, and at their request, on September 21, the Chief Conciliation Officer of the Department of Labour of Canada proceeded to Stratford, with the Deputy Minister of Labour for Ontario and participated in the discussions. Conferences with the representatives of the employers and workers were held on September 22 and 23 and some progress was made in negotiating agreements, most of the employers tentatively agreeing to recognize the union. A parade of 2,000 persons in support of the strike on September 22 included railway and other unions in Stratford. Shop committees met with the respective employers to confer on wage scales. A ten per cent increase in rates offered by the employers was not, however, accepted by the employees and negotiations were broken off. The employers announced that the factories would reopen on September 28 for those who wished to resume work on the basis of the foregoing offer. Pickets in large numbers had interfered with the movement of goods from the factories, although no manufacturing work was being carried on, and following

clashes between the strikers and the city and provincial police the local police commission through the Attorney General for Ontario requisitioned military protection from the Federal Government under Sections 75 to 79 of the Militia Act, Chap. 122, Revised Statutes of Canada, 1927. Detachments from the permanent force at Toronto and London with armoured cars reached Stratford on the 27th and were quartered in the Armouries, while city and provincial police guarded the various factories. As none of the strikers returned to work on September 28 it was announced that the factories would be closed down for the time being. Several of the factories had large orders for radio cabinets and the unfinished goods were removed to factories elsewhere for completion. At the middle of October the Minister of Labour for Ontario announced the appointment of L. J. Salter, of Stratford, as a special investigator to inquire into all phases of the dispute.

**BUILDING TRADES WORKERS, TORONTO, ONT.—** Approximately ten carpenters, plumbers, sheet metal workers, etc., members of the international unions of their respective trades, ceased work on September 12, 1933, demanding the employment of members of international unions by the plastering contractor and the payment of union rates of wages. Work was resumed on September 14, when the demands of the strikers were conceded.

**BRICKLAYERS, MONTREAL, P.Q.—**Some forty bricklayers employed by one contractor on the construction of a building in Montreal, P.Q., ceased work on September 19, 1933, demanding an increase in wage rates, 25 cents to 35 cents per hour being paid. The labourers employed on the job were unable to work, being indirectly affected by the strike, and pickets were stationed about the building. Negotiations between the parties involved, however, resulted in the resumption of work on September 22, 1933, a minimum rate of 35 cents an hour being agreed upon.

**GARAGE EMPLOYEES (BUS LINES), CALGARY, ALTA.—**This dispute commenced on September 27, 1933, when employees of one bus company in Calgary claimed the employer had shown discrimination against organizers of a shop union affiliated with the Workers' Unity League, and had refused to recognize a grievance committee of employees. Following the cessation the strikers also demanded certain improvements in working conditions. The manager of the company involved stated the firm was willing to have its employees affiliate with any organization except the Workers Unity League and that the shop conditions

were not as stated in the complaint. Four of the strikers resumed work within two days, the others being replaced. The remaining strikers, however, continued to picket the establishment.

**POULTRY DRESSERS, ETC., STRATFORD, ONT.—**A number of workers engaged in plucking chickens in a produce plant ceased work on September 21, 1933, demanding an increase in the rate of pay from two cents per bird to three cents. By the twenty-fifth the number had increased from about thirty to sixty-five, including nearly all of the employees except the office staff. The strikers organized a local of the Food Workers' Industrial Union, affiliated with the Workers' Unity League, and demanded recognition of the union, higher wages and reduction in hours from sixty per week to forty-four. The management stated that the chicken pluckers averaged 18 cents per hour and worked from eight to ten hours per day according to the number of birds available, and that two cents per bird was the rate paid in other establishments. Provincial factory inspectors investigated the payrolls and the provincial Minister of Labour and Deputy Minister visited Stratford and stated that the minimum wage regulations were being complied with. On September 25 the pickets attempting to enter the plant in order to ascertain if new employees had entered, clashed with the local police and the aid of provincial police was secured. Later as a result of clashes between the police and the pickets in this dispute and also in that involving furniture factory workers in progress at the same time, the local authorities secured provincial police and military protection. Later the plant was closed down for the time being and at the end of the month the dispute had not been terminated.

The publication of the 1933 edition of the Canada Year Book is announced by the General Statistics Branch of the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, labour, finance, education, etc.—in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the issue of February, 1933, in the review of Strikes and Lockouts in Canada and Other Countries, 1932. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in August was 25 and 11 were in progress from the previous month, making a total of 36 disputes in progress during August, involving 29,200 workers with a time loss of 142,000 working days for the month.

Of the 25 disputes beginning in August, 3 were over proposed wage reductions, 4 over other wage questions, 10 on questions respecting the employment of particular classes or persons, 3 on other questions of working arrangements, 3 over questions of trade union principle and 2 were due to sympathetic action. Settlements were reached in 20 disputes, of which 4 were in favour of workers, 11 in favour of employers and 5 were settled by compromise. In two other disputes work was resumed pending negotiations.

### France

During the first quarter of 1933 there were 37 disputes in January, involving 7,087 workers; 33 in February involving 3,611 workers; and 32 in March involving 23,512 workers. Results of these disputes were: 12 in favour of workers, 31 in favour of employers, 22 ended in compromises and 37 were unterminated or the result not yet known.

### Switzerland

During the first half of 1933, there were 24 disputes involving 85 establishments and 1,475 workers, with a time loss of 32,197 working days.

### New Zealand

The number of disputes during the first half of 1933 was 11, involving 33 firms and 3,147 workers, with a time loss of 67,359 working days and an approximate loss in wages of £58,970.

### United States

The number of disputes beginning in July was 165, and 132 were in effect at the end of the month. The number of workers involved in disputes in effect at the end of the month was 110,032 and the time loss 2,143,085 working days during the month of July.

Delay in reaching an agreement as to the code for conditions governing the bituminous coal mining industry under the National Industrial Recovery Act was the cause of a cessation of work of 30,000 bituminous coal miners in western Pennsylvania September 14. The code was signed September 19 and an agreement between soft coal operators and the United Mine Workers signed September 21, covering 340,000 workers throughout the whole bituminous field. This number, when added to those already under contract, brings the total to 500,000 bituminous coal miners under agreement. The signing of the agreement however did not end the strike as the 30,000 strikers were joined by 45,000 others demanding that coal mines which were subsidiaries of steel companies, and whose output was used directly by such companies, should also come under the code. This was granted in most respects, but they also asked full union recognition, and although about 25,000 returned to work by October 3 there were still 50,000 on strike at that time. About 15,000 steel workers in Pennsylvania and West Virginia were also out in sympathy with the coal miners.

Several thousand gill-net salmon fishermen on the Columbia River, after a week's strike for higher prices for fish, returned to work September 20, and accepted the prices offered by the packers.

No report of a settlement of the strike of 10,000 broadsilk workers at Paterson, New Jersey, reported in the last issue of the *LABOUR GAZETTE*, has been noted. During September between 10,000 and 15,000 workers in the silk dyeing industry at Paterson and other neighbouring centres also went out on strike, demanding increased wages and other concessions.

A three weeks' strike of 25,000 underwear workers in New York City was settled September 25, through the mediation of National

Recovery Administration officials, and a two-year agreement was signed between the manufacturers association and the International Ladies' Garment Workers' Union, providing for closed shop, a 37½ hour week and wages of \$17 and \$21 per week.

About 10,000 workers in the men's neck-wear industry in New York City went on strike September 6, demanding higher wages. By September 15, a settlement had been reached with manufacturers of the higher grades of neckwear.

At the end of September, several thousand tool and die makers employed in the automobile manufacturing industry at Detroit, Flint and Pontiac, Michigan, as well as workers in automobile assembly plants at Chester, Pennsylvania, and Edgewater, New Jersey, were on strike for higher wages and other demands.

A strike of 5,000 toy and doll makers in New York City lasted five weeks and was settled September 30, through the N.R.A. Labour

Board, by the granting of increased wages and a 40-hour week.

Painters in New York City, numbering 15,000, went out on strike September 19, demanding a higher daily wage with a change from an 8 to a 6 hour day and the abolition of overtime. The strike was settled by the local chairman of the N.R.A. Labour Board and it was agreed to work a 35-hour week in five days, with a wage rate of \$9 per day (an increase of \$1 per day) and double time for overtime.

Twelve thousand truck drivers in Philadelphia, Pennsylvania, were on strike for a week, but the dispute was settled through N.R.A. officials when the international union agreed to grant a new charter to the strikers whose leaders had seceded from the union three months previously.

Grain elevator employees at Buffalo, New York, after a three weeks' strike were successful September 14 in securing union recognition.

### Motor Vehicle Transportation in Canada, 1930

Statistics of the operations of motor vehicles engaged in the transportation of persons and goods were secured for the first time in connection with the Census of Merchandising and Service Establishments taken in connection with the Seventh Decennial Census. The data shown in this bulletin cover the operations of common carriers only engaged in long distance transportation during the year 1930. As the census year is the only period for which statistics have yet been collected, it is not possible to determine from the figures presented the developments that are taking place in the field of motor transportation.

Receipts amounting to \$16,033,100 were secured by the 1,463 motor transport enterprises which reported their activities for the year 1930. These concerns employed 3,251 full-time employees and paid out \$3,921,200 in salaries and wages. The greatest revenue from motor transportation was secured by concerns operating in the province of Ontario. Receipts of \$11,078,700 were reported by 957 operators of motor vehicles for hire in Ontario. Eighty-four concerns in British Columbia reported receipts of \$1,682,200 and 110 in Quebec province reported \$1,632,200.

The revenue from motor freight trucking in Canada amounted to \$8,013,700 in 1930 and the receipts of concerns engaged in hauling milk, cream and other farm products amounted to an additional \$1,369,900. Thus the total

revenue from motor freighting amounted to \$9,383,600 in 1930. In the same year the revenue secured by steam railways in Canada from freight, express and milk amounted to \$344,109,505. The receipts of motor freight and trucking concerns were, therefore, 2.72 per cent of the freight, express and milk revenue of steam railways. It must be emphasized, however, that the statistics for motor transportation do not cover the operations of private carriers, such as the fleets of motor trucks operated in inter-city traffic by mercantile companies. If figures were available to show the amount of goods transported in private motor carriers, the competition between motor and steam transportation systems could be more accurately determined.

Motor passenger carriers are classified under two headings—bus lines and stage lines. The former includes motor transportation concerns engaged in serving territory contiguous to a centre of population, while the latter includes those concerns operating between centres of population. The combined receipts of bus and stage lines in 1930 were \$6,649,500, which was 9.95 per cent of the passenger receipts of steam railways in the same period. Again it must be noted that no information is available to show the extent to which the transportation of persons in private automobiles has affected the passenger revenues of steam railways.

## LABOUR LEGISLATION IN PRINCE EDWARD ISLAND IN 1933

THE Legislature of Prince Edward Island, which was in session from March 1 to April 6, 1933, enacted the following laws of interest to labour.

An amendment to The Electrical Inspection Act exempts the City of Charlottetown from the operation of the Act as long as it has in force a by-law which provides for electrical inspection conforming to the standards laid down in the Canadian Electrical Code and which requires no fees to be paid except for licensing of contractors and workmen. Failing such by-law, the Act is to be in force in Charlottetown. In incorporated towns the Act is to be in effect superseding all by-laws relating to electrical inspection enacted therein.

The Public Vehicle Act requires drivers of public vehicles to be at least 21 years of age, of good moral character, fully competent to operate the vehicles under their charge and to hold licences under the Highway Traffic Act. Owners or operators of public vehicles used in the transportation of persons or property as common carriers for compensation are forbidden to cause or allow any driver or operator of such public vehicle to work, as driver or operator, for more than ten hours in any twenty-four hour period.

An amendment to the Old Age Pension Act charges the Minister of Education and Public Health with the administration of the Act, and also empowers the Lieutenant-Governor in Council to appoint three persons to constitute a Board of Pension Commissioners to consider and decide upon applications for pensions and having authority to take conveyances of, hold, and dispose of, real estate for the purposes of the Act.

The Parents' Maintenance Act provides legal machinery to compel children to support aged or infirm parents. Proceedings under the Act may be taken by the parent or other person with the consent of the Attorney-General, by the governing body of an institution of which the parent is an inmate, or by a local authority or commission acting under any law for the payment of old age pensions.

The Insurance Act requires persons carrying on the business of insurance to be licensed. Certain exceptions are made, however, including employees' mutual benefit societies, and trade unions which have insurance funds for the benefit of their own members. The sections dealing with accident and sickness insurance set forth certain statutory conditions to be included in every policy. These provide, among other things, that where a bodily injury or sickness insured against

happens to the insured while he is temporarily engaged in an occupation which is more hazardous than that stated in the policy to be his occupation the liability under the policy is limited to the amount which the premium paid would have purchased for the more hazardous occupation. On the other hand, if the insured changes his occupation to one classified as less hazardous than that stated in the policy, he may on another request to the insurer obtain a new policy for the unexpired term at the lower rate of premium applicable to his new occupation and receive a refund for the difference in premium. That portion of the Act which deals with automobile insurance contains sections similar to those enacted in a number of provinces. These provisions, as adopted this year in Alberta, were summarized in the July issue of the LABOUR GAZETTE at page 699.

An Act to amend The Public School Act adds a clause providing that parents condemned to pay the fine of \$20 imposed by the Act for failure to send their children to school shall, in default of immediate payment, be imprisoned for a term not exceeding 30 days.

Observance of a 44-hour week was among the specifications recently published by the Ontario Government in connection with the letting of the annual contract for the printing of the *Ontario Gazette* and for printing required by the provincial legislature.

The Hon. Premier Henry stated concerning this stipulation that the Government was merely calling for a six-day week with a half day on Saturdays, and had not under contemplation any policy for a short working week. The premier recalled, however, that in connection with the construction of the East Block of government buildings at Toronto, the 40-hour week had been observed in order to give employment to more workers.

The Bureau of Occupational Diseases of the Ohio Department of Health, which was established at the end of 1932 to take over the functions of the former Division of Industrial Hygiene created in 1913, has issued a report on the compensation paid for occupational diseases in the State in 1932. The report states that 1,169 cases of occupational disease were notified of which 1,069 were compensable, 90 were non-compensable and 10 were acute mishaps classified under accidents. In general, dermatitis accounts for 70 to 80 per cent of the total cases reported; lead poisoning and tenosynovitis of the wrist tendons come next, representing about 15 per cent each.

## CODES OF FAIR COMPETITION IN VARIOUS INDUSTRIES IN THE UNITED STATES

A TOTAL of eighteen codes of fair competition had been approved by the President of the United States at the end of August under the provisions of the National Industrial Recovery Act. (The text of the so-called "Blanket Code" was given in the *LABOUR GAZETTE*, August, page 785; and particulars of the Cotton Textile Code appeared on page 908 of the last issue.) These codes were set up in a wide variety of industries; the effective date varied from immediate adoption to nearly 3 weeks after approval.

The following provision is incorporated in all codes:

(1) That employees shall have the right to organize and bargain collectively through representatives of their own choosing, and shall be free from the interference, restraint or coercion of employers of labour, or their agents, in the designation of such representatives or in self-organization or in other concerted activities for the purpose of collective bargaining or other mutual aid or protection; (2) that no employee and no one seeking employment shall be required as a condition of employment to join any company union or to refrain from joining, organizing, or assisting a labour organization of his own choosing; and (3) that employers shall comply with the maximum hours of labour, minimum rates of pay, and other conditions of employment, approved or prescribed by the President.

All codes approved provide for the exclusion of minors under specified ages from employment, the usual provision being for the exclusion of minors under age 16. However, in the lumber industry the minimum age for employment is 18 with certain exceptions, and in the coat and suit industry no minor under the age of 18 may be employed in manufacturing while those over 16 years of age may be employed in non-manufacturing.

The codes adopted at the end of August were in the following industries: Cotton and rayon textiles; shipbuilding and ship repairing; wool textiles; coats and suits; electrical manufacturing; corset and brassiere industry; lace industry; legitimate theatrical industry; fishing-tackle industry; iron and steel industry; lumber and timber-products industries; petroleum industry; photographic manufacturing industry; automobile manufacturing; hosiery industry; men's clothing industry; rayon and synthetic-yarn production.

### Code for Soft Coal Industry

A code of fair competition for the bituminous coal mining industry in the United States under the provisions of the National Industrial Recovery Act was signed by President Roosevelt on September 18. Machinery

for the settlement of labour disputes within the industry is provided in the code, which also includes trade terms and equitable practices designed to benefit operators, miners and the consuming public. Other main provisions of the code are as follows:

Employees are guaranteed the right to organize and to bargain collectively.

The code provides for a forty-hour week of five days of eight hours each.

Coal shall be weighed and the miner paid on a basis of 2,000 or 2,240 pound tons (hitherto coal in any southern mines has been paid for by the mine car and not by tonnage rates).

Minimum wages for inside skilled labour and minimum wages for outside unskilled labour are laid down by districts in the various coal producing states. The rates range from \$3.75 a day in Missouri, Kansas, Arkansas and Oklahoma, to \$5.63 in Montana. The country is divided into sixteen wage districts. The net amount of wages shall be paid semi-monthly in lawful money or par check at the option of the operators. Any deduction in pay (this refers to union dues and deductions for rent, light, power and other items) if not a matter of agreement, shall be in conformity with such general rules and regulations as the administrator may prescribe for the purpose of preventing unfair deductions, or those which may in effect lower the rates of pay provided in the contract.

Employees other than maintenance or supervisory men shall not be required as a condition of employment to live in homes rented from the employer.

No employee shall be required as a condition of employment to trade at the store of the employer.

For purposes of administration the codes divide the soft coal territory into five divisions with autonomy within each group under divisional code authorities.

A National Bituminous Coal Industrial Board is established from among the divisional code authorities "to consider and make recommendations to the divisional code authorities and to the President as to any amendments of the code or other measures which may stabilize and improve the conditions of industry and promote the public interest therein."

The Code was to become operative on October 2 and to remain in effect until April 1, 1934, "and thereafter in the absence of the exercise of the power reserved to the President in Article X, subject to the exercise of the

option, after thirty days' notice to the administrator, by any coal producer to withdraw his consent after April 1, 1934, to the further enforcement of the code, as a code to which he has voluntarily given his consent."

### Proposed Social Measures in U.S.A.

The Hon. Frances Perkins, United States Secretary of Labour, in the course of an address given at New York on October 2, advocated unemployment insurance and other measures for meeting future industrial depressions, as follows: Social and industrial provisions for old age; public works or government expenditure planned in advance for stimulating employment and business in time of early slack in employment; free public employment exchanges on a national scale; development by industry of means for employment stabilization; an agricultural program integrated with industry; adult education.

The Secretary of Labour stated her preference for a compulsory rather than a voluntary system of unemployment insurance, believing it would provide an incentive to employers to stabilize employment, in the same way that workmen's compensation tends to promote industrial safety. Such a system, she said, would to a large extent, relieve the community of the cost of poor relief.

### Non-Profit Corporation to Distribute Necessaries of Life

On October 1 the President announced the creation of a non-profit corporation to buy and distribute the necessities of life to the destitute during the coming winter. The purpose of the organization is not only to provide the unemployed with food, clothing and fuel, but also to relieve the congested markets for these commodities of their surplus stocks. The Federal Relief Administrator, Mr. Harry L. Hopkins, has been appointed chairman. It was stated that the sum of \$330,000,000 remaining from the federal relief appropriation would be applied to the purposes of the new corporation.

### Public Works

In a recent address Mr. Harold L. Ickes, Public Works Administrator and Secretary of the Interior, stated that there are now before the Public Works Administration enough worthy projects to consume the full amount of \$3,300,000,000 which the government was authorized to borrow and to spend and that allotments of funds, as distinguished from sums actually expended, amount to about \$1,500,000,000, or nearly half of the sum involved. "The stupendous amount of \$3,300,-

000,000," Mr. Ickes stated, "cannot be put into actual construction in a week or a month if the taxpayers are going to get their money's worth and the intent of Congress is to be carried out. But men and women are continuously being put back to work in an intelligent and orderly manner.

"In order that the relationship between the Public Works Administration and the States and municipalities may be clearly understood, let me point out that the Federal Government may contribute up to 30 per cent of the total cost of the labour and material entering into any State or municipal project. This is an outright grant for which the government demands no repayment. The State or municipality must furnish the balance of the capital needed. It may do this from its own revenues or it may borrow it from the Federal Government as a secured loan. For instance the government may advance money on a bridge if tolls are charged for the use of the bridge; valid bonds may be given to secure the advance. Or money may be loaned on a water-works, if the rates assessed against the users of the water are placed in a fund for the payment of interest and amortization. Future tax money may also be pledged as security to the Federal Government where it is shown there is authority to do so legally and the taxes are collectable. But the Administrator cannot fitfully abet any local government in incurring indebtedness beyond 'prudently estimated revenue.' The Special Board of Public Works has fixed upon 4 per cent as a fair interest charge for money loaned upon any State or municipal enterprise. The only condition imposed, aside from the fact that borrower must be solvent, is that the sum loaned must be amortized within the reasonable life of the project; but in no case shall the period of amortization be longer than thirty years."

On September 27th, Secretary Ickes stated that thus far federal approval had been given to 1,841 road projects, which are calculated, when in full swing, to employ about 148,000 men. Contracts have been awarded on about half of this number.

The *Coal Age* (New York) contained in its issues for July and August two illustrated articles describing the methods in use in the coal mines of Nova Scotia, by S. C. Miffen, of the Dominion Steel and Coal Corporation. The first article deals with the problems caused by the "weak and heavy top," making longwall and mechanization imperative. The second article gives details of the longwall, steel arches and posts in use in Nova Scotia.

## WORKMEN'S COMPENSATION IN NOVA SCOTIA IN 1932

THE last report of the Workmen's Compensation Board of Nova Scotia reviews the administration of the Act during the calendar year 1932. It contains also a summary of activities since the legislation came into operation on January 1, 1917, and presents the completed statistics for the year 1931.

During 1932, the total number of accidents reported to the Board was 5,312, as compared with 6,849 in 1931, or a reduction of 1,537. The total cost of all accidents for 1932 under Part I of the Act is estimated at nearly \$944,000, exclusive of administration expenses and the cost of safety associations. The 5,312 reported accidents are classified as follows: fatal accidents (claim established) 31; fatal accidents (pending adjustment) 4; fatal accidents (claim non-compensable or disallowed) 6; partial disability, 169; total disability (seven days or over) 3,332; accidents involving medical aid only, 1,397; accidents pending adjustments, 38; non-compensable accidents (other than fatal) 335.

The provisional statement of income and expenditure during 1932 shows that the amount paid for medical aid in all classes was \$53,965.46; while \$8,799.97 was paid to safety associations. The administration expenses for 1932 amounted to \$84,865.89 and the ratio of administration expense to the compensation cost of accidents for the sixteen years operation of the act was 7.72 per cent.

For industries under Part I of the Act the total income for the year 1932, actual and estimated, amounted to \$797,391.44, and the estimated expenditure for the same period was \$1,037,564.58, showing a deficit for the year's operations of \$240,173.14. The surplus carried forward from prior years was \$253,442.05, less \$15,000 for doubtful accounts, or a net surplus of \$238,442.05.

Of the nine industries under the Act—Mining, lumbering, iron and steel, manufacturing (n.e.s.) building and construction, public utilities and transportation—the first-named counted heavily in both income and expenditure statistics. The net revenue accruing from assessments from the mining industry totalled \$377,119.93, while the estimated expenditure for this industry was \$515,656.26, of which amount \$74,854.91 was for compensation paid other than pensions; \$71,150.84 was transferred to reserves for pension awards; \$312,092.36 was for compensation estimated outstanding; the balance being for industry's proportion for medical aid, safety associations, and administration. The deficit for 1932 was offset by balances of prior years.

During 1932, compensation was paid to 3,332 workmen injured and wholly disabled for seven days and upwards. At the end of the year persons receiving compensation for 1932 and prior years in the form of a monthly pension were as follows: widows, 519; children under 16 years, 894; dependent mothers, 78; dependent fathers, 30; other dependants, 17; workmen disabled for life (partially or wholly) 831.

There were 5,081 accidents in 1932 for which compensation was paid. Of this number, 833 were for claims partially disposed of; 31 were fatal cases, 169 involved permanent disability; 2,666 temporary disability; and 1,382 entailed medical aid only.

The completed statistics for 1931 indicate the accidents compensated by classes, month of occurrence of compensated accidents; time loss, average wage and average age by classes, nature of injuries by classes, causes of accidents, etc.

### *Summary of Sixteen Years' Administration.*

—During the sixteen years from the beginning of 1917 to the end of 1932, accidents in the industries within the jurisdiction of the Board to the number of 114,317 were reported. During that time 1,427 workmen were fatally injured. The amount actually paid to workmen or their dependants and for medical aid during the sixteen years from the beginning of 1917 to the end of 1932 was \$11,035,348.91, and the amount required at the end of 1932 for the purpose of paying life and other pensions and compensation to disabled workmen, and for medical aid, was \$6,916,683.15. The total compensation paid or payable to workmen and their dependants and for medical aid for the sixteen years amounts to \$17,952,032.06. That amount does not, however, represent the entire cost of the accidents for the sixteen year period, as the administration expense and cost of safety associations are not included. There were 773 widows to whom pensions for life or until remarriage were awarded; 1,811 children under sixteen years of age were awarded monthly pensions while under that age; dependent mothers and fathers to the number of 406 were awarded compensation, 34 members of the family other than widows, children and parents, but who were wholly or partly dependent upon the earnings of deceased workmen at the time of their respective deaths, received benefits, and life pensions were awarded to 4,053 workmen who were disabled, either wholly or partially, for life.

Prior to January 1, 1920, medical aid was not furnished to injured workmen except in special cases. Since that date injured workmen have

been entitled to free medical aid for thirty days from date of disability, and during the thirteen years that have elapsed the cost of medical aid was \$1,024,686.32. In the mining

and iron and steel classes the greater portion of medical aid in connection with those classes is furnished under medical aid schemes and consequently is not furnished by the Board

## WORKMEN'S COMPENSATION IN BRITISH COLUMBIA IN 1932

THE sixteenth annual report of the British Columbia Workmen's Compensation Board, for the calendar year, 1932, notes a further reduction in industrial activity throughout the province as compared with 1931, there being a reduction of 10.3 per cent in the number of employing firms, and of 20 per cent in the number of employees protected under the Act. At the close of 1931 the number of firms operating was 8,565, and at the end of 1932 there were 7,654 firms in operation. In 1931 there were approximately 150,000 employed workers under the statute. The reduction in the number of employees for 1932 is estimated at 20 per cent. The pay-roll of all industries under the Act during 1932 is provisionally estimated at \$120,000,000 while in 1931 it was \$140,955,102. New firms commencing operations in 1932 numbered 736. Employers to the number of 108 re-entered business during the year. Eight-nine firms whose operations were not compulsorily under the Act had its benefits extended to their workmen. After deducting the firms who discontinued operating during the year there was a net decrease of 911 firms during the year 1932.

*Benefits and Assessments.*—The administrative processes of the Act with respect to the levying of assessments and the consequent paying of benefits for industrial injuries are reviewed in the light of a recent case wherein the validity of increased assessments was challenged by certain employers (LABOUR GAZETTE, March, 1932, page 294 and July, 1933, page 749). The Board outlines its own position in this matter as follows: "The compensation for widows, children, and other dependents of workmen killed in industry is fixed by the Statute, and does not fluctuate up or down with rising or falling wages. Similarly, it takes as much per case to provide medical attention and hospital care and burial in periods of low wages as in more prosperous times. Compensation for time-loss to injured workmen, on the other hand, is based on average earnings at the time of accident, and consequently at all times bears a definite relationship to the assessments levied in respect to their actual earnings. A severe break occurred in the wage scale during the past three years, necessitating an upward revision

in a number of our assessment rates. When wages were \$100 per month an assessment rate of 2 per cent yielded \$2 per month in assessments. When wages fell to \$25 per month, as occurred in certain occupations, a 2 per cent rate would yield only 50 cents per month in assessments. To provide \$2 in assessments it would require a rate of 8 per cent. With a \$100 expenditure in pay-roll four men may now be put to work for a month in some industries where formerly only one could be exposed to the hazards of the work for that pay-roll outlay.

"It is clear from the foregoing that the rates of assessment must rise in periods of low wages in order to provide sufficient revenue to take care of the fixed benefits under the Act. The necessity for increasing the assessments by additional levies made in 1931 was, with the present method of distribution of the cost of medical aid, questioned by a group of seventeen employers engaged in the logging industry. A writ was issued and the validity of the additional assessments and medical aid distribution were upheld by the trial Judge early in 1932. An appeal was taken to the Court of Appeal of this Province with respect to medical aid and that Court has since confirmed the decision of the trial Judge, but the plaintiffs have obtained leave to appeal to the Privy Council. Since the Act came into effect, sixteen years ago, the cost of medical aid, so far as the employers contribute to same, has been distributed to the classes out of which the accidents arose. The effect of plaintiffs' contention is that the non-hazardous industries should bear not only their own medical-aid costs, but a share of the cost arising from accidents in the hazardous industries. The costs of the trial and appeal have been a heavy charge on the Accident Fund."

*Extent of Protection.*—Under this heading a summary is presented of the benefits of the legislation since its enactment. Claims to the number of 397,263 have been filed under the Act during the past sixteen years, or an average of 24,829 for each year. During those years 3,432 workmen met with fatal injuries, and 9,641 were totally or partially disabled for life as a result of accidents at work. At the end of 1932 there were in receipt of pen-

sions 793 widows, 944 children, 128 dependent mothers, 35 dependent fathers, and 31 other dependents. In addition, 1,988 partially or totally disabled workmen were in receipt of regular monthly cheques for amounts varying with the extent of their permanent disabilities. In all, 3,919 persons were at the end of 1932 recipients of monthly payments as a consequence of fatal and disabling accidents which have occurred in the past sixteen years. Approximately 1,500 workmen, in addition, were receiving temporary time-loss compensation at any given time during 1932. Of all the workmen whose claims were disposed of in 1932, only 410 alleged that they were entitled to receive insurance or benefits from any other source to carry them over lay-off periods necessitated by industrial accidents. Over 95 per cent relied on workmen's compensation for the protection they required.

*Accident Statistics.*—A further decrease in the number of accident claims was recorded for 1932. The figures for the past five years were as follows: 32,793 in 1928; 36,750 in 1929; 33,285 in 1930; 25,877 in 1931; and 19,011 in 1932. Claims in respect of fatal accidents also declined. Figures in respect to the fatalities were as follows: 251 in 1928; 253 in 1929; 277 in 1930; 125 in 1931; and 106 in 1932. Approximately 2,000 other accidents occurred in which the injuries were such that physicians' services were not required and less than three days' time-loss per case was sustained by the workmen. First-aid attendance was sufficient to meet the requirements of these cases. Of all the cases disposed of in 1932, 31 per cent concerned workmen in the lumbering industry in its various branches; 14 per cent were in general manufacturing and delivery; 8 per cent were in construction work; 8 per cent were in the railroading groups; 7 per cent in coal mining; 7 per cent in municipal employment; 6 per cent in metal-mining; and all other cases 19 per cent. Of the fatal accidents, 37 per cent were in lumbering; 13 per cent in coal mining; 12 per cent in metal mining;

7 per cent in construction; 5 per cent in general manufacturing and delivery; while 26 per cent were in other classes of work. Of the fatal and permanently disabling accidents, an increasing number each year are of foreign birth. In certain hazardous industries a constantly increasing number of foreign-born are being employed. Fifty-six per cent of the workmen injured were married. One hundred and fifty-five women were among those filing claims during the past year.

The total amount paid out for accident compensation and benefits in 1932 was \$2,173,189.42. Of this amount, \$745,969.97 was expended in the lumbering and allied group. The total wage loss due to accidents in 1932 was \$1,638,447.32, and the total number of days lost was 504,034.

*Accident Prevention.*—On this subject the report observes: "The old doctrine that each industry had its hazards and that those who entered it assumed the risk with the job has been supplanted by a more humane and constructive policy. Workmen's compensation has spread the cost of accidents over industry. The object of accident-prevention is to eliminate the causes of accidents. The technique of safety is being studied by groups of thoughtful operators, with the general result that their assessment rates have remained low. During the past ten years the logging industry is one that has grown steadily more hazardous, whether measured by the number of days worked or the output of logs. This necessarily is reflected in increased assessment rates. It is well to remember that just to the extent to which workmen are killed or crippled will employers be required to contribute to the Accident Fund. Many employers who realize that they are contributors to a mutual insurance fund are now selecting workmen who understand the English language and who can read general instructions and can protect themselves when a danger-signal or verbal warning is given. Undue 'speeding-up' is a prolific cause of accidents."

### Mine Regulations in Saskatchewan

Revised rules for mines in Saskatchewan, issued under the Coal Mines Safety and Welfare Act (Revised Statutes of Saskatchewan, 1930, chapter 222) were approved by an Order in Council dated July 31, 1933, and published in the *Saskatchewan Gazette*, September 15, 1933. The original "General Rules for all Mines" were contained in the Schedule to the Act and were reproduced on page 78 of the 1930 supplement to the federal Department of Labour's publication "Labour Legislation in Canada."

The new regulations deal with the following subjects:—

*Ventilation.*—Quantity of pure air; mine to be divided into districts; air currents not to be contaminated or obstructed; doors; inspection of mines before commencement of work; operation of fans; barometer; thermometer and pressure gauge; withdrawal of workmen in case of danger; lamps and lights; safety lamps.

*Explosives.*—Storage and use.

*Shafts and Winding.*—Fencing of old shafts; fencing of entrances to shafts; securing of shafts; signalling; cover overhead; chains; winding apparatus; brake; safety clutch on cages; maximum number of persons allowed in cage; hand-hold rods; powers of banksman, cager or onsetter; attendance of engine-man; option of workmen using shafts; entering and leaving cages.

*Machinery and Equipment.*—Fencing; internal combustion engines; carriage of persons or explosives on locomotives; ladders.

*Welfare of Workers.*—Sanitary arrangements; drinking water; wash-houses.

*Miscellaneous.*—Mine stations; manager or pit boss to make periodic inspections; inspection by nominee of employees; record book of

inspections; roofs and sides of roads and working places; dangerous accumulations of water; furnishing of props and timber; fencing unused parts of the mine; manholes, places of refuge and stopping places; unlawful entry; dangerous acts; intoxicated persons; restrictions on appointment of persons unable to speak English; loitering; sleeping below ground; care of animals used underground; duty of miner to examine his working place; dangerous condition to be reported; wilful damage; compliance with rules and regulations; non-compliance an offence.

*Electrical Installations.*—All electrical installations and equipment in or about coal mines are subject to the inspection and approval of the Saskatchewan Power Commission.

## MINIMUM WAGES IN SASKATCHEWAN

### Revised Orders governing Female Employees in Various Industries

THE Minimum Wage Board of Saskatchewan has revised and re-issued its Orders Nos. 1-6 governing female employees in cities in the Province. Previous regulations Nos. 1-5 of the Board were published in the LABOUR GAZETTE, August, 1928, page 851, and Order No. 6 in the issue for May, 1932, page 541. Order No. 6 has been extended from time to time.

The new Orders, which come into force on November 1, 1933, have certain provisions in common. The sections dealing with the keeping of registers, posting of orders and penalties are the same as those in the Orders issued in 1928. The provision of the 1928 Orders requiring an employer to give a certificate of experience to an inexperienced worker leaving his employment is now extended to cover all workers. The new regulations also contain a clause embodying a 1929 amendment to the Minimum Wage Act which requires an employer to give two weeks' notice of termination of employment except where the employee is discharged for any of the causes set forth in s. 3 of the Masters and Servants Act.

The main sections of the new Orders are as follows:—

#### ORDER NO. 1.—*Governing Employment of Females in Shops and Stores in Cities of the Province.*

##### 1. Hours:

(a) No person, firm or corporation shall employ a female or suffer or permit a female to be employed in any shop or store in the cities of Moose Jaw, Regina and Saskatoon for a greater number of hours than forty-nine in any one week or in the cities of North Battleford, Prince Albert, Swift Current, Weyburn and

Yorkton for a greater number of hours than fifty-one in any one week, unless a special permit in writing has been obtained from the secretary of the Board:

Provided that during the period commencing on December 15 and ending on December 31, a female may be employed, without a special permit, for any number of hours not exceeding fifty-six in any one week.

(b) When a statutory holiday occurs in any week the working hours for that week shall be reduced from forty-nine or fifty-one, or the number allowed by special permit, as the case may be, by the number of working hours during which the establishment is closed for business on such holiday.

##### 2. Wages:

(a) *Experienced Workers:* No person, firm or corporation shall employ an experienced female or suffer or permit an experienced female to be employed in a shop or store at a rate of wages less than \$15.00 per week.

(b) *Adult Learners:* Adult learners shall be paid not less than \$10.00 per week for the first six months, not less than \$12.00 per week for the second six months and not less than \$13.50 per week for the third six months, and thereafter shall be considered experienced workers and shall be paid not less than the minimum rate prescribed for experienced workers.

(c) *Minor Learners:* Girls under eighteen years of age may be employed as minor learners and shall be paid not less than \$7.00 per week for the first six months and not less than \$8.00 per week for the next six months, and thereafter shall be considered adult learners and shall be paid on the scale set out above for adult learners. Minor learners shall be considered adult learners upon reaching the age of eighteen years.

(d) *Millinery, Dressmaking, Tailoring, Fur Sewing and Florist Establishments:* Excepting the provisions of sub-clauses (b) and (c) of this clause, this Order shall apply to millinery dressmaking, tailoring, fur sewing and florist establishments situated in a shop or store. A proba-

tionary period of six months for which no wages are stipulated is allowed, after which period an inexperienced female employee shall be paid wages at a rate not less than \$3.00 per week for a period of six months, at a rate not less than \$7.00 per week for the next six months and at a rate not less than \$12.00 per week for the next six months, and thereafter shall be considered to be an experienced worker and shall be paid not less than the minimum rate prescribed for experienced workers.

(e) *Overtime*: Wages at not less than the minimum rate applicable shall be paid to employees, whether experienced or inexperienced, for all time worked beyond the maximum number of hours provided for by this Order.

(f) *Part Time*: When a female whether experienced or inexperienced is employed for a less number of hours in any one week than that provided for by this Order, the minimum wages above set forth may be proportionately reduced (provided that in no case shall the rate be less than twenty cents per hour.)

(g) *Holidays*: No reduction for statutory holidays shall be made from the minimum wage.

(h) *Meals*: Where meals are furnished and charged for by the employers the price shall not exceed twenty-five cents per meal.

(i) *Method of Payment*: Wages shall be paid promptly at regular intervals in cash or by certified cheque and no earning period shall be longer than one month.

### 3. *Seats*:

Seats shall be provided in the proportion of at least one seat for every four female employees or fraction thereof.

## ORDER NO. 2.—*Governing Employment of Females in Laundries and Factories in cities of the Province.*

### 1. *Hours*:

(a) No person, firm or corporation shall employ a female or suffer or permit a female to be employed in any laundry or factory for more than forty-eight hours in any one week; and the hours of working in any one day shall not be later than half-past six o'clock in the afternoon unless a special permit in writing has been obtained from an inspector under The Factories Act. (See The Factories Act, section 11 (1)).

(b) When a statutory holiday occurs in any week the working hours for that week shall be reduced from forty-eight by the number of working hours during which the establishment is closed for business on such holiday.

### 2. *Wages*:

(a) *Experienced Workers*: No person, firm or corporation shall employ an experienced female or suffer or permit an experienced female to be employed in a laundry or factory at a rate of wages less than \$14.00 per week.

(b) *Learners*: Learners shall be paid not less than \$9.50 per week for the first six months and not less than \$11.50 per week for the second six months, and thereafter shall be considered experienced workers and shall be paid not less than the minimum rate prescribed for experienced workers.

(c) *Photographic Studios*: Female apprentices in photographic studios and work-rooms in connection therewith, other than those wholly employed in film developing shall be paid wages at a rate not less than \$5.00 per week for a period of three months and for the twelve

months following shall be paid the rate of wages specified in subclause (b) for learners.

(d) *Knitting, Hat and Wearing Apparel Manufactories*: Learners in knitting, hat and wearing apparel manufactories shall be paid wages at a rate not less than \$7.50 per week for a period of three months and for the twelve months following shall be paid the rate of wages specified in subclause (b) for learners.

(e) *Overtime*: Wages at not less than the minimum rate applicable shall be paid to employees, whether experienced or inexperienced, for all time worked beyond the maximum number of hours provided for by this Order.

(f) *Part Time*: When a female whether experienced or inexperienced is employed for a less number of hours in any one week, than that provided for by this Order, the minimum wages above set forth may be proportionately reduced, provided that in no case shall the rate be less than twenty cents per hour.

(g) *Holidays*: No reduction for statutory holidays shall be made from the minimum wages.

(h) *Meals*: Where meals are furnished and charged for by the employer the price shall not exceed twenty-five cents per meal.

(i) *Method of Payment*: Wages shall be paid promptly at regular intervals in cash or by certified cheque and no earning period shall be longer than one month.

## ORDER NO. 3.—*Governing Employment of Females in Mail Order Houses in the Cities of the Province.*

### 1. *Hours*:

(a) No person, firm or corporation shall employ a female or suffer or permit a female to be employed in any mail order house for a greater number of hours than forty-eight in any one week, unless a special permit in writing has been obtained from the secretary of the Board.

(b) When a statutory holiday occurs in any week the working hours for that week shall be reduced from forty-eight by the number of working hours during which the establishment is closed for business on such holiday.

### 2. *Wages*:

(a) *Experienced Workers*: No person, firm or corporation shall employ an experienced female or suffer or permit an experienced female to be employed in any mail order house at a rate of wages less than \$14 per week.

(b) *Adult Learners*: Adult learners shall be paid not less than \$9 per week for the first six months and not less than \$11 per week for the second six months, and thereafter shall be considered experienced workers and shall be paid not less than the minimum rate prescribed for experienced workers.

(c) *Minor Learners*: Girls under eighteen years of age may be employed as minor learners and shall be paid not less than \$6 per week for the first six months and not less than \$7 per week for the next six months, and thereafter shall be considered adult learners and shall be paid on the scale set out above for adult learners. Minor learners shall be considered adult learners upon reaching the age of eighteen years.

(d) *Overtime*: Wages at not less than the minimum rate applicable shall be paid to employees, whether experienced or inexperienced,

for all time worked beyond the maximum number of hours provided for by this order.

(e) *Part Time*: When a female whether experienced or inexperienced is employed for a less number of hours in any one week, than that provided for by this order, the minimum wages above set forth may be proportionately reduced (provided that in no case shall the rate be less than twenty cents per hour).

(f) *Holidays*: No reduction for statutory holidays shall be made from the minimum wage.

(g) *Meals*: Where meals are furnished and charged for by the employer the price shall not exceed twenty-five cents per meal.

(h) *Method of Payment*: Wages shall be paid promptly at regular intervals, in cash or by certified cheque and no earning period shall be longer than one month.

#### ORDER No. 4.—*Governing Employment of Females in Hotels, Restaurants and Refreshment Rooms in Cities of the Province.*

##### 1. *Hours*:

(a) No person, firm or corporation shall employ a female or suffer or permit a female to be employed in any hotel, restaurant or refreshment room or in more than one establishment of that class for a greater number or combined number of hours than forty-nine in any one week, unless a special permit in writing has been obtained from the secretary of the Board.

(b) Twenty minutes uninterrupted time shall be allowed for each meal where meals are provided as part of remuneration.

##### 2. *Wages*:

(a) *Experienced Workers*: No person, firm or corporation shall employ an experienced female or suffer or permit an experienced female to be employed in any hotel, restaurant or refreshment room at a rate of wages less than \$13 per week (\$66.35 per month) except as a kitchen help, in which case the rate of wages shall not be less than \$11 per week (\$47.65 per month).

(b) *Learners*: Except in the case of kitchen employees the rate of wages for learners may be less than the minimum rate prescribed for experienced workers; provided that learners shall be paid not less than \$11 per week (\$47.65 per month) for the first three months of employment and thereafter shall be considered experienced workers and shall be paid not less than the minimum rate prescribed for experienced workers.

(c) *Minors*: No female under sixteen years of age shall be employed.

(d) *Part Time*: When a female whether experienced or inexperienced is employed for a less number of hours than forty-nine in any one week, the minimum wages above set forth may be proportionately reduced, provided that in no case shall the rate be less than twenty cents per hour.

(e) *Method of Payment*: Wages shall be paid promptly at regular intervals in cash or by certified cheque and no earning period shall be longer than one month.

##### 3. *Board and Lodging*:

(a) Where twenty-one meals per week and seven days' lodging per week are furnished by an employer as part payment of wages, the minimum rate of wages shall be \$5.25 per week (\$22.75 per month) for experienced workers

and \$3.25 per week (\$14.08 per month) for inexperienced employees and kitchen employees.

(b) Where meals only are furnished, the minimum rate of wages shall be \$7.75 per week (\$33.58 per month) for experienced workers and \$5.75 per week (\$24.92 per month) for inexperienced employees and kitchen employees.

(c) Where lodging only is furnished, the minimum rate of wages for experienced workers shall be \$10.50 per week (\$45.50 per month) and \$8.50 per week (\$36.83 per month) for inexperienced employees and kitchen employees.

(d) Where less than twenty-one meals or seven days' lodging are furnished in any week, the minimum rate of wages for that week shall be the minimum rate applicable under this clause plus a sum amounting to not less than twenty-five cents for each meal and thirty-five cents for each day's lodging which is not furnished.

#### ORDER No. 5.—*Governing Employment of Females in Beauty Parlours and Barber Shops in Cities of the Province.*

##### 1. *Hours*:

(a) No person, firm or corporation shall employ a female or suffer or permit a female to be employed in any beauty parlour or barber shop for a greater number of hours than forty-eight in any one week unless a special permit in writing has been obtained from the secretary of the Board.

(b) When a statutory holiday occurs in any week the working hours for that week shall be reduced from forty-eight by the number of working hours during which the establishment is closed for business on such holiday.

##### 2. *Wages*:

(a) *Experienced Workers*: No person, firm or corporation shall employ an experienced female or suffer or permit an experienced female to be employed in a beauty parlour or barber shop at a rate of wages less than \$15.00 per week.

(b) *Learners*: There may be a probationary period of three months for which no wages are payable, after which the employee shall be paid not less than \$9.00 per week for the first six months, not less than \$11.00 per week for the second six months and not less than \$13.00 per week for the third six months, and thereafter she shall be considered an experienced worker and shall be paid not less than the minimum rate prescribed for experienced workers.

(c) *Overtime*: Wages at not less than the minimum rate applicable shall be paid to employees whether experienced or inexperienced for all time worked beyond the maximum hours provided for by this Order.

(d) *Part Time*: When a female whether experienced or inexperienced is employed for a less number of hours in any one week than that provided for by this Order, the minimum wages above set forth may be proportionately reduced, provided that in no case shall the rate be less than twenty cents per hour.

(e) *Holidays*: No reduction for statutory holidays shall be made from the minimum wage.

(f) *Meals*: Where meals are furnished and charged for by the employer the price shall not exceed twenty-five cents per meal.

(g) *Method of Payment*: Wages shall be paid promptly at regular intervals in cash or by certified cheque and no earning period shall be longer than one month.

## ORDER No. 6

1. The minimum rates of wages fixed by the Board for workers in shops and stores, laundries and factories, mail order houses, hotels, restaurants and refreshment rooms, beauty parlours and barber shops, are hereby reduced by ten per cent where the rate so fixed is less than thirteen dollars per week and by fifteen per cent where the rate so fixed is thirteen dollars per week or over:

Provided that, where an employee is employed for twenty-four hours or more in any week but for less than full time, the reduction shall not be greater than ten per cent and provided further that there shall be no reduction in the case of an employee who is employed for less than twenty-four hours in any week.

2. The reductions provided for in this Order shall apply to the cash wages of an employee after deductions have been made for board and lodging, where supplied by her employer.

3. This Order shall be deemed to have been in force on and from the first day of September,

1933, and shall continue in force until the thirty-first day of March, 1934.

Mr. Gustave Francq, chairman of the Women's Minimum Wage Commission of Quebec, announced on October 10 that an investigation was under way as to the wages and working conditions of female labour employed in the chemical and drug industry in Montreal, into the jewellery trade, and into the rubber and oilcloth industry. Following the investigation the Commission will convoke a conference, under provision of the act, and the decisions of the conference will result in the fixing of minimum wages for the different categories of female labour. The chemical and drug industry investigation so far has revealed that there were about 100 concerns which operate in the many branches of the industry.

### Women's Minimum Wages in United States

Reference was made in the July issue, page 671, to the recent advance of minimum wage legislation in the United States. Further information on this subject is given in a recent publication of the Industrial Relations Section of Princeton University, (Minimum Wage Legislation in the United States). "At no time in American history," it is stated, "has the movement toward increasing governmental intervention in industrial relations moved forward at such a rapid pace as during the past six months. The National Industrial Recovery Act has raised a philosophy of social responsibility for labour conditions previously accepted by but an enlightened minority of our industrial and political leadership to the level of an established national policy. Overshadowed by the sweeping national legislation has been the movement toward state minimum wage laws. Spurred on by the relapse of many industries into the disorganization of parasitic competition, six states have recently enacted laws intended to set a limit to the encroachment on the living standards of women and children in industry. Though less spectacular than the more inclusive federal legislation, the permanent character of such laws greatly increases their importance as indications of present trends."

The bulletin enumerates some of the problems encountered by the administrators of minimum wage laws in the United States, as follows:

It has always been difficult to get the representatives of the employers, the employees, and the public to agree on the items to be included in a cost-of-living budget. Perhaps the most fundamental disagreement in this respect is concerned with the question whether to base the budget on the needs of women

living alone, supporting others, or living at home. Closely connected with the foregoing is the need for frequent enough adjustment to keep rates in line with the actual cost of living. The difficulty of getting able and interested wage-board members has been an ever-present one. For many reasons, adequate representation of employee interests has been hardest to secure. The whole problem of adjustments, exceptions, and lower rates for minors, learners, and substandard workers has been very vexing and has presented dangerous opportunities for evasion of the law on the part of those anxious to find loopholes. Rates for part-time and piece workers present complicated problems. The application of minimum rates to home work, so important in foreign legislation, has hardly been attempted in the United States.

President Roosevelt, in April this year, sent the following message to the Governors of thirteen industrial States which up to that time had not passed minimum wage legislation: "May I call your attention to the minimum-wage law just passed by Legislature of New York and approved by Governor Lehman, which declares it against public policy for any employer to pay women or minors a wage which is both less than the fair and reasonable value of services rendered and less than sufficient to meet the minimum cost of living necessary for health. This represents a great forward step against lowering of wages, which constitutes a serious form of unfair competition against other employers, reduces the purchasing-power of the workers, and threatens the stability of industry. I hope that similar action can be taken by the other States for protection of the public interest."

## TRADES AND LABOUR CONGRESS OF CANADA

### Summary of Proceedings of the 49th Annual Convention

THE forty-ninth annual convention of the Trades and Labour Congress of Canada was convened in the city of Windsor, Ont., on September 18, and continued in session until September 23. Edward K. Hutchison, president of the Essex County Trades and Labour Council, who presided at the opening session, welcomed the delegates on behalf of organized labour, while the civic welcome was extended by Mayor Croll. In his address the mayor urged higher wages saying: "Canada cannot afford to experiment with the policy of 'longer hours and less pay' or its workers will descend to the wage and living standards of the workers in the mills of Shanghai or the peasantry on the hillside rice fields of Japan." Mayor Croll reminded the delegates that they had the opportunity to determine policies beneficial to the entire Dominion.

Mr. F. W. Wilson, M.L.A., Windsor-Walker-ville, informed the delegates that relief and unemployment were the two main problems the government had to contend with, and he would watch with interest the plans advocated by the Congress for their alleviation.

Mr. Tom Moore, the president, in his preliminary remarks, thanked the various speakers for their kind words of welcome and complimented the local arrangement committee for the manner in which they had looked after the welfare of the delegates. The president declared that "organized labour is determined that our living standards are not to be lowered to the level of the Japanese or the Indians. However black are the clouds overhead," he continued, "Canada still is as rich as in the days of the so-called era of prosperity; our difficulties are man-made and can be man-removed, and, although we haven't as much to live on, we have as much to live for as at any time in the history of this great country."

The first business of the convention was the report of the credential committee, which reported certificates received from 218 delegates, the representation being as follows: 43 delegates representing international organizations; 1 delegate from a provincial federation of labour; 32 delegates from Trades and Labour councils; 10 delegates representing divisions of railroad telegraphers; 130 delegates representing local branch unions, and 2 fraternal delegates representing respectively the British Trades Union Congress and the American Federation of Labor. Following the appointment of convention officers and

committees, the reports of the executive council, provincial executives, federations of labour and fraternal delegates to the British Trades Union Congress and the American Federation of Labour were distributed.

### Report of Executive Council

The report of the executive council opened with a reference to the work carried on during the past year, and stated that one of the primary objectives of the Congress, was "to influence public opinion by peaceful and legal methods in favour of organized labour." Then followed a reference to the legislative program which had been submitted to the Dominion Cabinet on January 27, (LABOUR GAZETTE, February, 1933, page 175). The session of Parliament 1932-1933 was next reviewed, reference being made to certain matters dealt with under the following headings: (a) Unemployment and unemployment relief; (b) economic councils; (c) hours of labour; (d) railways and harbours; (e) Canada Shipping Act; (f) Admiralty Act, Bill No. 66; (g) League of Nations and International Labour Organization; (h) Imperial Economic Conference and trade agreements; (i) immigration; (j) Criminal Code amendments; (k) legalizing of sweepstakes; (l) grant for cadet training; (m) taxation and financial matters; (n) banking credits and currency; (o) salary deductions for government employees; (p) radio broadcasting; (q) the Tariff Board; (r) old age pensions, and (s) the coal combine.

The executive committee reviewed provincial activities, summarizing the reports of the provincial executive committees and federations of labour, and outlining the legislative enactments of the various provincial legislatures of interest to labour.

The report recorded the appreciation of the executive officers for the co-operation given by the general officers of the American Federation of Labor and affiliated national and international unions, and noted the exchange of fraternal delegates with the British Trades Union Congress and the American Federation of Labor. Mention was made of the various organizations with which the Congress has direct affiliation, and a synopsis of the year's activities of some of these bodies was given in the report.

Reference was made to the *Congress Journal*, the official monthly publication, to which the affiliated organizations were urged to give their support.

Under the heading "Congress Headquarters" the report stated that the remodelling and additions to the building had been proceeded with according to authority given by the 1931 convention, and in carrying out the work cognizance was taken of the unemployment situation amongst the building trades in Ottawa and a clause inserted in the contract stipulating observance of the 6-hour day and 5-day week.

Referring to "union labels," the executive expressed the opinion that they created a spirit of co-operation between employer and employee.

Under the caption of "Public Ownership," the report noted that the labour movement had given general support to the Radio Broadcasting Commission, but that it opposed the proposal for the abolition of local harbour commissions and substituting a central national commission.

In regard to the railway situation, especially as it affected the publicly owned national system, the executive committee reported that they had co-operated with affiliated railroad organizations and the four railroad running trades brotherhoods in the preparation and submission of labour's representations in respect to Bill No. 37, which was to give effect to the recommendations of the Duff Commission for closer co-operation between the two railroad systems.

In reporting on unemployment activities, the committee stated that they had used every means at their command to carry out the dual purpose of securing temporary aid for those in need, and of reducing the volume of unemployment through the adoption of more permanent remedies.

Under the heading "relief camps," the report stated that "in a statement given to the press last October, President Moore, while recognizing that the acceptance by the Federal government of the responsibility to provide these men (unemployed single men) with food, shelter, clothing and other necessities was a step in the direction long urged by organized labour, emphatically declared that the conditions under which this was done could not be accepted as in any way satisfactory." The report further alleged that the clearing of land for air ports had been extended to include the construction of permanent public works, and that "protests made in respect to these policies have become common in all sections of the country."

The next section of the report dealt with "International Co-operation," in which reference was made to the President's attendance at the governing body of the International Labour Organization in October last; Vice-

president Tallon's attendance at the special Tripartite Conference at Geneva in January on the reduction of hours, and to the attendance of vice-president Simpson at the regular conference of the International Labour Organization in June. In this section mention was also made of the attendance by Mr. Humphrey Mitchell, M.P., at the biennial Congress of the International Federation of Trade Unions held in Brussels, Belgium, in May (page 1006).

Referring to Unemployment Insurance, the report set out the efforts of the executive council to secure co-operation of other organizations in pressing for the enactment of legislation on this subject. Before arrangements could be completed for a meeting of representatives of such bodies as approved of the executive's undertaking the Prime Minister made the announcement in Parliament of the intention to convene a Federal-Provincial conference for the purpose of considering contributory unemployment insurance, and in view of this further action on the question was deemed unnecessary. While immediate steps were not taken to inaugurate legislation of the desired character, the executive were of the opinion that success was within measurable distance, providing that united support is given by all sections of the labour movement.

In closing their report the executive referred to banking and credit and to a written brief incorporating the opinions of organized labour on this matter which had been presented to the Royal Commission on Banking. (This report is outlined on page 1003 of this issue.)

The remainder of the report contained the reports of the provincial executive committees and federations of labour together with the reports of the fraternal delegates. The various sections of the report were referred to the appropriate committee for consideration and recommendation.

#### Report of Secretary-Treasurer

The secretary-treasurer, Mr. P. M. Draper, presented the financial statement for the fiscal year ended August 31, 1932, which showed total receipts from all sources of \$41,191.99; the total expenditure was \$38,034.10, leaving a balance of \$3,157.89. The paid-up membership of the Congress is 105,546, as compared with 122,129 in the previous year, a loss for the year of 16,583.

In reporting the membership the secretary-treasurer stated that "while there is a decrease in the number of paid members, it does not mean there has been a decrease in the membership of the movement," and he added,

"the continuance of widespread unemployment has resulted in thousands being unable to pay their monthly dues in their respective unions; but for the last 33 years we have reported only on those who have paid, and there is not one delegate seated at this convention whose union is in arrears."

### Resolutions

Among the resolutions adopted were the following:—

Opposing the removal of any restrictions to the immigration laws;

That the Federal Government do immediately adopt a six-hour day and five-day week on all public works in Canada;

That legislation be enacted to enforce a thirty-hour week with no reduction in wages;

That the Federal Government restore at once statutory increases and salaries of all civil servants to their former status;

Enactment of sickness and invalidity insurance legislation;

Immediate inauguration of a system of public health insurance;

That the Federal Government arrange an interprovincial conference of premiers for the purpose of establishing a uniform work-day and work-week in all industries in Canada;

That the classes of work now exempted under the Federal Fair Wage Act be brought within its scope;

Amendment of the Canada Shipping Act to provide that no ship other than a British ship of Canadian registry shall take part or engage in the coasting trade of Canada;

Enactment of legislation to compel payment of dividends only on actual capital invested;

Establishment of a banking system under national control;

Favouring trade relations with all countries of the world, provided that their standards of living do not demoralize the Canadian standard of living;

Some scheme of national industrial recovery and that labour be represented on all committees appointed under such scheme;

Expressing opposition to war and declaring that a referendum vote of the people of Canada should be taken before a declaration of war is made;

That the Government accept the name submitted by the Trades and Labour Congress of Canada as labour's representative for trustee of the Canadian National Railways;

Payment of wages sufficient to enable the worker to maintain a standard of living in accordance with the standards in the LABOUR GAZETTE;

Establishment of a central bank;

Establishment of a system of contributory unemployment insurance;

That the Federal Government take charge of Old Age Pensions throughout the Dominion and have same applied and paid in all provinces;

Shorter hours of labour in industry as a means of absorbing the unemployed;

That the Federal Fair Wages Act be the basis of computing the remuneration paid to workers in relief camps, and that these camps be removed from any semblance of military control;

That the bus and truck industry be placed under the control of the Board of Railway Commissioners;

Repeal of Section 98 of the Criminal Code of Canada;

Abolition of the Senate;

That interest rates on Government bonds, preferred stocks, mortgages, etc., be reduced to make capital available for industry;

That the Federal Government proceed with the Canadian National Railways terminal at Montreal;

Enactment of legislation providing allowances for needy mothers and orphans in all provinces where such legislation does not exist;

A forty-hour week for women in factories and work shops;

That superannuation be established for "prevailing rates" employees of the Federal Government at the earliest possible time;

Enactment of legislation making it possible for municipal councils to initiate proceedings for the removal of any building considered objectionable or detrimental to the advancement or welfare of the community;

Co-operative ownership of the machinery of production and distribution;

That the Federal, provincial and municipal governments initiate building programs;

Legislation compelling printing establishments to conform with the factory regulations;

That the Old Age Pensions Act be so applied that man and wife will get the full amount of pension when their income comes within the prescribed sum mentioned in the act;

Appointment of more inspectors under the Minimum Wage Board of Ontario;

That the Quebec Government repeal the amendment to the Workmen's Compensation Act which reduced the payments made injured workmen;

Enactment of old age pension legislation in Quebec;

That the Quebec Government amend the Weekly Day of Rest Act so as to include that all persons employed in places of amusement operating seven days a week shall be entitled to at least one day's rest of twenty-four consecutive hours each week.

### Fraternal Greetings

Greetings from the American Federation of Labour were extended by Mr. James C. Quinn, secretary-treasurer of the Central Trades and Labour Council of Greater New York City, who outlined the advance made by organized labour in the United States, paying special tribute to the leadership of Samuel Gompers and William Green. He also described briefly the benefits arising out of the enactment of the National Recovery Act.

Mr. John Bromley, ex M.P. for Barrow-in-Furness, and vice-president of the British Trades Union Congress, extended fraternal greetings from that body. In the course of his address he urged the delegates to keep up the fight for a shorter work week.

### Officers Elected

In the election of officers the whole executive were re-elected without opposition, as follows:—

President, Tom Moore, Ottawa, Ont. (re-elected for the fifteenth consecutive term).

Vice-presidents, P. R. Bengough, Vancouver, B.C.; James Simpson, Toronto, Ont., and R. J. Tallon, Montreal, Que.

Secretary-treasurer, P. M. Draper, Ottawa, Ont. (re-elected for the thirty-fourth consecutive term).

Provincial Executive Committees: Nova Scotia: D. W. Morrison (chairman), Glace Bay, and A. M. Sullivan, Halifax (balance of committee to be named later). Quebec: L. A. Beaudry (chairman), P. Lefevre, G. R. Brunet, J. Cuppello, Montreal. Ontario: Chas. Ball (chairman), Toronto; Rod. Plant, Ottawa; G. W. A. O'Dell, Hamilton, and T. Jackson, Toronto. Manitoba: H. Kempster (chairman), J. B. Graham, W. B. Lowe, and M. Teminson, Winnipeg. Saskatchewan: W. E. Stephenson (chairman), Moose Jaw; H. Perry, Regina; Alex. M. Eddy, Saskatoon, and H. D. Davis, Prince Albert. British Columbia: C. E. Herrett (chairman), Vancouver; R. W. Nunn, Victoria; S. D. MacDonald, Prince Rupert, and A. D. MacIsaac, Spences Bridge. The provinces of New Brunswick and Alberta having federations of labour, no committees are named.

Fraternal delegate to the British Trades Union Congress, John McLeod, third vice-president of the Bricklayers, Masons and Plasterers' International Union, Toronto, Ont.

Fraternal delegate to the American Federation of Labour, Fred J. White, M.P.P., president of the Alberta Federation of Labour, Calgary, Alberta.

The fiftieth convention of the Congress will be held next year at Toronto, where the first convention was held.

## BRIEF SUBMITTED BY THE TRADES AND LABOUR CONGRESS TO ROYAL COMMISSION ON BANKING

ON behalf of the Trades and Labour Congress of Canada, Mr. Tom Moore, president, and Mr. P. M. Draper, secretary-treasurer, presented a brief to the Royal Commission on Banking and Currency, at their session in Ottawa on September 12, setting forth the views of the Congress on the banking system of Canada.

The brief stated that the Congress, at its convention in 1926, had adopted a resolution calling for a full investigation into the banking system. It recommended that Parliament revise the Bank Act at shorter intervals than ten years, as at present, and proceeded as follows:—

"Believing that the banking and credit system, controlling as it does the economic destiny of practically the entire community, is in its nature and manner of functioning actually a public utility and that the private banking system, as now constituted, though custodian of

the people's money and savings, is not directly responsible to them for its actions, but works primarily for profit and dividends for shareholders, often with very little consideration for the general public welfare, the Trades and Labour Congress of Canada supports the principle of nationalization of the banking system. As a forward step toward this end we support the establishment of a central bank, believing that this is essential to prevent the wide fluctuations of exchange rates and to bring under state control the power to extend credits commensurate with the required needs for the development of this country.

"While we understand that the present Bank Act aims to limit interest rates charged to seven per cent, in practice this is not always so. The absence of penalties for charging higher rates and the ease with which compliance with this provision of the Act is overcome, shows the necessity of amendments thereto. The lowering of interest rates paid to depositors should be made to reflect itself in easier credit at lower rates than currently charged.

"The stagnation of the building industry can be largely attributed to the difficulties experienced by prospective investors in securing mortgage money. Especially in the case of home owners this should be available at all times at low rates of interest and for much longer than the existing five year periods. As one means towards making money more freely available for this purpose we would suggest that trust and loan companies should be able to discount their mortgages with the proposed central bank or some similar government authority.

"The manner in which trust and loan companies have developed their business along parallel lines to that of chartered banks prompts the suggestion that, under proper safeguards, chartered banks might be given the privilege of making loans to their customers for home building purposes, especially where the amount of the mortgage would not involve exceptionally large sums.

"If the private banking system is to be retained, steps should be taken to maintain a certain amount of free competition by the prevention of interlocking directorates which places the national control of credit in too few hands.

"Loans to brokers for stock market purposes leads to speculation and inflation of values and

therefore should be either prohibited or more stringently regulated. Control also should be exercised over the speculative investment by banks in industrial concerns where the same is likely to result in over-capitalization.

"The financing of public works undertaken or sanctioned by the Federal Government is today being retarded because of the tax burden which the payment of interest involves. To overcome this we suggest that where the public assets would be enhanced by carrying out of any public undertaking that it should be made possible for the Government to use its own credit by the additional issue of non-interest bearing certificates (New Currency) to the amount involved, subject to a percentage of this being withdrawn from circulation each year proportionate to the decreased value of the asset created.

"In conclusion: On the social side, employees of banks should be given the right of association in organizations of their own choosing; the principle of collective bargaining in respect to conditions of employment established and fully protected, and to provide means of amicable settlement of any dispute that may arise on such matters, the banking institutions brought within the jurisdiction of the Federal Industrial Disputes Investigation Act."

## CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES

THE sixteenth regular meeting of Grand Division of the Canadian Brotherhood of Railway Employees opened in Ottawa on September 18, with 162 delegates in attendance, and lasted for nine days. Following the opening ceremonies, the report of the Credential Committee was received, and the president's address was delivered by A. R. Mosher, who has been president of the Brotherhood since its establishment in 1908.

In the course of this address the president claimed that "under a proper system of planned economy, Canada would be able to make full use of all the present railway mileage, and that every idle railwayman would be put back to work. The natural wealth of Canada," he said, "is sufficient to meet every reasonable requirement of the whole population, and leave huge surpluses for exchange with other countries. The economic policy of the Brotherhood," he continued, "is intended to assist in the transformation of the social order from the present one motivated by private profit to one based on co-operation and service." The Committee on Officers' Reports, to which the president's address was referred, fully concurred, and the report was unanimously adopted by the convention.

The reports of the secretary-treasurer, M. M. Maclean, on Finances and Membership, and as editor and manager of the official journal, were also received and adopted.

After the report of the executive board had been read and referred to the Committee on Officers' Reports, it was decided to hear appeals against the decisions of the president and the executive board, including those in connection with the suspension from membership of C. H. Minchin, R. Dykes, and A. M. Allen. The suspension of C. H. Minchin and R. Dykes from membership in the Brotherhood was sustained, and A. M. Allen won his appeal. The decision of the Executive Board in removing R. Dykes from office as general chairman of the Western Region General Grievance Committee, C.N.R., was not sustained, but as he was suspended from membership, he is not entitled to hold office.

The reports of the Executive Board, and Board of Trustees were concurred in by the Committee on Officers' Reports, and accepted as satisfactory by the convention.

A number of amendments to the constitution had been submitted, but the Committee on Constitution and Laws reported non-concurrence in all but a few, and its recommendations were adopted in almost every case. The most important amendments which were approved by the convention provided for meetings of Grand Division every three years instead of every two years, and for an Executive Board composed of the president and four members from among the delegates not being in receipt of a salary from the Brotherhood.

Another amendment which was adopted provided that general chairmen and general organizers would not be eligible for election to the Executive Board.

The election of officers for the next term of three years resulted as follows: president, A. R. Mosher; vice-president, J. E. McGuire; general chairman, Central Region General Grievance Committee, C.N.R.; secretary-treasurer and editor and manager of the official journal, M. M. Maclean; Executive Board: the president, and Ernest Bolduc, Levis, Quebec; F. J. Ainsborough, Ottawa, Ont.; B. H. Crawford, Sydney, N.S., and A. N. Lowes, Vancouver, B.C.; Board of Trustees: J. E. McDonogh, Toronto, Ont. (re-elected); George E. Lowe, Moncton, N.B. (re-elected), and N. L. Preston, General Chairman, Canadian National Express General Grievance Committee.

### Amalgamated Civil Servants of Canada

The seventh biennial convention of the amalgamated Civil Servants of Canada was held at Windsor, Ontario, September 5-8, 1933. The report of the national council reviewed the question of salary deduction and dealt with such other subjects as Civil Service councils; the Superannuation Act; organization; group insurance, and civil servants' war disability pensions.

According to the financial statement presented, covering the period October 1, 1931, to August 31, 1933, total receipts including balance brought forward, amounted to \$42,259.74, disbursements totalled \$31,454.02, leaving a balance on hand of \$10,805.72.

Resolutions were adopted recommending as follows:—

Death claims on civil service insurance to be paid through the local departmental head; against the delay in placing employees on the Soldiers' Settlement Board on a permanent basis under the Civil Service Act; that all government employees be placed under the Civil Service Act; that part-time employees be given seniority on the eligible list for full-time positions in their class; the incoming national executive was instructed to take action towards (a) restoring salaries to normal rates; (b) restoring statutory increases; (c) removing the ban on promotions; the national council was instructed to study the cost of living figures and to report on the question of minimum salaries; opposing any further reductions in salary; immediate filling of promotional vacancies and that the salary of the grade be paid in such cases; semi-month-

ly payment of salaries; that provision be made for payment of salaries during the passing of the estimates each year; that all employees engaged in work of a permanent nature, and who have given satisfaction, be made permanent after a period of six months; full political and civil rights for all Federal civil servants; the 44-hour week the year round, except where a statutory holiday occurs, which shall then be a 36-hour week; a system of rating based on the principle that seniority be given preference, all other things being equal; maintenance of the merit system of appointment to and promotion in the Civil Service.

Chief officers elected were: President, Harold Baker, Vancouver, B.C.; secretary-treasurer, Fred Knowles, Ottawa, Ont.

Future conventions will be held triennially.

### Stage Employees and Picture Machine Operators

The nineteenth annual convention of the Eleventh District of the International Alliance Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada was held recently at Kitchener, Ontario. This district, which comprises the Provinces of Ontario, Quebec, New Brunswick and Nova Scotia, reported a membership of 753, or 65.4 per cent of the total membership in Canada. Preliminaries to the business sessions included addresses by Hon. W. D. Euler, S. C. Tweed, M.L.A., of Waterloo, and Tom Moore, president of the Trades and Labour Congress of Canada.

The report of the secretary-treasurer, P. J. Ryan, referred to the memorandum presented to the Quebec Legislature, recommending more exacting examination of applicants for positions of projectionists, and urging that sufficient help be employed in motion picture theatres. Subsequently, the delegates, by an adopted resolution, reasserted their position in this matter. The secretary dealt with the results of the investigation made into the safety of motion picture theatres by the National Research Council at the request of the Prime Minister of British Columbia. Incorporated in the secretary's report was a summary of local union activities.

Featuring the discussions, was a lengthy debate on a proposal to forestall wage reduction demands by centralized action providing for a universal scale. However the resolution committee's recommendation in this direction was lost.

Another debate occurred over a recommendation that supervisors and other members in

similar positions be granted withdrawal cards. This action was proposed on the basis that a supervisor "must be primarily a company man." After a long discussion no action was taken. The convention closed with an address by Fred J. Dempsey, International secretary-treasurer.

### International Photo-Engravers' Union

The thirty fourth annual convention of the International Photo-Engravers Union of North America was held in Baltimore recently. Featuring the reports of the year's activity was the statement of the president, Edward J. Volz, respecting the benefits paid out by the organization during the fiscal year ending May 31, 1933. The combined local and International benefits paid out in that period amounted to \$2,428,448.86 and exceeded that provided for the same purpose during the previous year by \$393,150.56. Of the total amount disbursed in benefits, \$1,959,617.96 was expended on unemployment benefits—an increase of \$293,791.24 over the fiscal year 1932. It was pointed out that this achievement stands to the credit of an organization composed of less than nine thousand members of whom 36.7 per cent were unemployed; and

42.1 per cent working but part time, leaving 21.2 per cent steadily employed.

The convention's attitude toward the National Industrial Recovery Act was one of co-operation. The committee's report on this subject made reference to one phase of the act as follows: "The practical abolishing of child labour, which although not foreseen, has apparently been accomplished through this law, will of itself—if made permanent—be sufficient reason for approval. Should the unequal competitive advantages heretofore enjoyed by non-union and unscrupulous employers also be outlawed and better regulation of hours, wages and conditions of employment brought about, the beneficial results would be almost beyond comprehension."

In the president's report, reference was made to conditions in Canada, and the hope was expressed "that any regulation and stabilizing of business conditions in the United States as planned under the National Industrial Recovery Act will have a helpful effect on all industry in Canada and that our members in the Dominion will likewise profit by this experiment similar to those directly affected in the States."

Cognizance was also taken "of recent efforts on the part of Canadian employers to stabilize conditions."

### International Federation of Trade Unions

The sixth Congress of the International Federation of Trade Unions was held at Brussels early in August under the presidency of Mr. W. M. Citrine (Great Britain). The delegates—126 in number—from affiliated national trade union centres, represented 8,963,677 members.

Mr. Citrine, in his opening address, referred to the suppression of German trade unions, and appealed to the Congress to take measures towards consolidating the forces of labour. He pointed out the vital need for preserving democracy, as opposed to any form of dictatorship. "Trade unions must in their essence be independent from the control of governments." Mr. Citrine declared that the members of the Federation shared a common faith in the principle of international action. Two years ago they made an appeal for the acceptance by governments of their proposals for a curtailment in the hours of work as a means of alleviating the unemployment crisis. Along with it was a demand for raising the standards of purchasing power of the masses, simultaneously with this reduction in the hours of work. World opinion had ripened considerably on

these aspects of policy; a redistribution of employment by the establishment of the five-day week of forty working hours, and the increase of consumers' purchasing power by the general raising of wages, were proposals that now found wider acceptance. Upon the other aspect of their policy—the increase of consumers' purchasing power by the raising of wages—very little progress had been made. No country, with the exception of the United States, had yet embraced the positive policy of increasing wages as a means of bringing consumption more nearly into equilibrium with the potentialities of production under the modern machine technology.

#### Address by Director of I.L.O.

Mr. H. B. Butler, Director of the International Labour Office, addressing the Congress, summarized the proposals for checking the depression that were contained in the report of the secretary-general of the I.F.T.U., as follows: The maintenance of real wages; the maintenance of the workers' purchasing power; the creation, extension and development of aid for the unemployed; a consider-

able practical reduction of hours of work with a view to securing a more just distribution of work during the crisis; the organization of big public works; and, finally, the elimination of the political and economic factors which are aggravating the crisis. "These are the questions," he said, "which are now uppermost in the minds of everyone. They were all of them brought forward at the London Economic Conference. It is now being increasingly realized that the stability of prices and the proper equilibrium of the economic system depend on the purchasing power of the masses being maintained."

In this connection, Mr. Butler referred to the experiment being tried out in the United States: "Its essential feature," he said, "is that the American Government is making a systematic effort to execute a far-reaching plan of economic reconstruction which is based on the recognition of social needs. It is a very great experiment, which the I.L.O. is following with great attention. Its success or its failure—and I am inclined to believe that in the end it will be successful—are of incalculable importance to the rest of the world. Everybody must hope, whatever his economic views, that this experiment will not fail, for if it does it must produce a serious aggravation of the crisis just at a time when there seems some hope of an improvement setting in."

"For the next few years the I.L.O. is bound to concern itself primarily with these great questions—the reduction of hours, the maintenance of the standard of life and purchasing power, the struggle against unemployment. In some ways its present task is more difficult than at any previous time, and it is significant of the present trend that the question of reducing hours of work has been raised as an international problem. Next year we must attempt to find a solution, although we have little national experience to guide us. We cannot hope to achieve success without the understanding and unstinted support of the trade union movement. I believe that with your support we shall go forward towards

building a better international order, in which the social and economic requirements of our civilisation will ultimately be reconciled."

### Decisions of the Congress

Representatives of the working class were urged to lead the way towards the transformation of society by means of economic planning. The Executive committee were instructed (1) to examine whether it was possible to create under the auspices of the International Federation of Trade Unions a special organization for the promotion of trade union economic policy; (2) to continue to make research into the means adopted and the success obtained by national organizations in their endeavours to make their influence felt in the economic policy of their respective countries; (3) to ascertain which of the decisions of international economic conferences had so far been applied in the various countries; (4) to prepare for a conference which should examine ways and means enabling trade unions to take part in negotiations for commercial treaties; (5) to report to the next Congress on the experience obtained in the application of trade union economic policy, and to supplement the guiding principles and demands laid down for economic planning.

A resolution on social policy was adopted, declaring the agreement of the congress with the guiding principles submitted by the Executive (outlined in Mr. Butler's address above).

The Congress called the attention of the affiliated organizations to the great importance of the work of the International Labour Organization, and urged the workers to combine their efforts to secure the ratification of the conventions by their respective countries.

A resolution was adopted in favour of the adequate representation of women workers in the trade union movement.

Resolutions were also adopted in support of International disarmament, and in favour of a general boycott of German goods.

### Trades Union Congress of Great Britain, 1933

The sixty-fifth Annual Trades Union Congress was held at Brighton on September 4 and the four following days. The President was Mr. A. G. Walkden, J.P., the chairman of the General Council. The number of delegates was 564; the number of organizations affiliated to the Congress (including those organizations, with a membership of about 75,000, which did not appoint delegates) was 166, with a membership of approximately 3,368,000. The figures

of total trade union membership represented at the Congress showed a decrease of nearly 7 per cent on those of the previous Congress, the mining group accounting for over 100,000 of the decrease.

An emergency resolution was adopted in favour of an Anglo-Russian trade agreement. Another resolution called upon the Congress to co-operate with its affiliated unions in taking all possible steps to secure the adoption

of a 40-hour week as a maximum, without reduction of pay, and with a drastic reduction of overtime. The resolution was carried unanimously, though it was pointed out that such a matter could not satisfactorily be dealt with except on an international basis.

A resolution was moved which expressed sympathy with the efforts which were being made in America towards trade recovery, and called for the immediate adoption in Great Britain of a planned program for reducing unemployment, by means of useful schemes of public works, nationally financed, the enactment of a maximum working week of 40 hours, without reduction in wages, the prohibition of child labour under 16 years, and an increase in the school-leaving age to 16. The resolution also urged that the government should restore the "economy cuts" in wages, salaries, and social services, and make more liberal provision for pensions for aged workers. The resolution was adopted after discussion.

Resolutions were passed instructing the General Council to draft a bill limiting overtime to urgent emergency work; and to use its influence to secure a maximum week of 40 hours in workshops for the blind, with wages comparable with those paid to other workers in the same employment. Another resolution was adopted approving the principle of one day's rest in seven for agricultural workers.

A resolution was moved demanding that the "means test" in connection with the Unemployment Insurance Acts should be abolished, and the Anomalies Act repealed, and that the cuts in unemployment benefit should be restored. The resolution also urged the abolition of voluntary social service schemes, as being an evasion of the full rights of the workers.

A resolution was carried appealing to trade unionists to support the co-operative societies by becoming members and purchasing their goods, and urging the societies to appoint principals who were in sympathy with the trade union movement.

A proposed resolution urged an intensive campaign in this country against war preparations, and, in conjunction with the International Federation of Trade Unions, (i) an uncompromising attitude against war preparations; (ii) a determined boycott on war if and when it should be declared; and (iii) an organized refusal to assist in any shape or form in measures calculated to help in the prosecution of the war.

In the course of the discussion which followed it was pointed out, on behalf of the

General Council, that the recently approved policy of the International Federation contained proposals which were more specific than those of the resolution particularly in regard to the use of the general strike as a weapon of defence against war; and the Council desired to consider how the various proposals could best be applied. The matter was accordingly referred to the General Council, the President promising that a report would be made within a year.

A resolution was passed expressing condemnation of the Nazi regime in Germany, and calling for combined resistance by all sections of organized labour in this country to any attempt to supersede democratic institutions. This was carried unanimously.

A discussion took place on the subject of National Health Insurance, and a resolution was passed protesting against the reduction of women's benefits under the Act of 1932, and urging that further funds should be provided to preserve the insurance rights of unemployed persons who were unable to maintain their contributions. A resolution was also passed calling upon the government to extend the Workmen's Compensation Act, to cover all lung diseases, and also other diseases, if proved to be caused by industrial employment, and a menace to the health of workers in such employment.

Fee-charging Employment Agencies were condemned in a further resolution which was passed; and the abolition of such agencies was urged, in favour, if necessary, of specialized Employment Exchanges.

A resolution was moved that wage earners should have legal right to an effective share in the control of the industries in which they worked, with 50 per cent of the representation on managerial committees, the ultimate object to be the replacement of "proprietor control" by "workers' control." In the debate which followed, it was pointed out that the Labour Party was against the adoption of any policy which committed them to demanding a statutory right to a share in control. Eventually a card vote was taken on the question of referring back the recommendations of the General Council, which resulted in the latter being upheld by a small majority.

Among other resolutions which were passed was one calling for the appointment of a National Housing Board "to initiate a really adequate scheme of housing and slum clearance," and that proper housing accommodation should be provided at rentals within the capacity of the lower-paid workers.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF SEPTEMBER, 1933

### Reports of Superintendents of the Employment Service

THE employment situation at the end of September was reported by the Superintendents of the Employment Service to be as follows:—

Harvesting of root crops continued in the Maritime Provinces and fall ploughing had started in some localities. Fair catches of fish were reported. There were no new developments in logging. Coal mines in Cape Breton and vicinity operated from four to six days per week. With the completion of the holiday season and continuous bad weather a very perceptible falling off was noted in the output of gasoline and mineral waters. Food manufacturers stated business was good. No idleness was reported in iron and steel and several departments worked double shifts. Sawmills had finished their season's cut and employees were anxiously awaiting calls to the lumber woods. The opening of a pulpmill was announced at St. George, N.B., where a staff of 70 men will be taken on. Minor repairs and the erection of small dwellings afforded employment to building mechanics, who were fairly busy, particularly in Halifax, and the continuance of street and highway construction, as a relief measure, provided work for many who otherwise would have been without work. Due to exhibitions throughout the province and excursions by boat, passenger traffic, both by land and water, was fair. Fall sales were responsible for increased trade, with collections improved. The usual requests were received for domestic and casual household workers.

Farming, in the province of Quebec, called for fewer workers, but logging showed greater activity. Mining was quiet. In manufacturing, Hull reported every plant operating in full force, but at Montreal, although clothing and textiles were busy, all other industries were slack. In Quebec city, the boot and shoe industry had lessened its operations and was working on reduced time. Sherbrooke, however, stated that the manufacturing situation was satisfactory, and in Three Rivers conditions showed improvement. Only minor contracts were under way in building construction and the demand for building tradesmen was slight. Six thousand workers in Montreal were employed on relief projects. No change was shown in transportation nor in trade. Collections continued difficult. In the women's section the call for domestic help was active and a number of placements were made.

The demand for farm help in the Province of Ontario was somewhat small, although fall ploughing, threshing, harvesting of root crops and cutting of grapes in the St. Catharines' district had added to it slightly. Activity was gradually increasing in logging as camps were opened, companies giving preference to local men. This industry was particularly active at Sudbury, where the placement of bushmen was recorded as the best for the past two years. Mining was quiet, except at Timmins, where highly skilled miners, principally mill men, were in demand. Two mining shafts and mills were being reconditioned and others reorganized so that prospects were good for additional production within six weeks' time. Not much change took place in manufacturing, although there was considerable evidence apparent that the gradual improvement shown for several weeks was being maintained. Placements in general consisted chiefly of mechanics, but did not indicate a great advance in any one particular industry. Iron and steel reported conditions fair, textiles good, rubber somewhat quiet and food and vegetable canneries and sugar refineries busy. Several furniture factories, as well as one meat packing establishment at Stratford, had been tied up completely as a result of a strike, which remained unsettled at the close of the month. Several new building construction jobs had opened up which provided employment for skilled and unskilled workers and relief work on highways, streets and sewers and airports continued. Railways also were engaging extra crews for track maintenance, although this was regarded as being of a temporary nature only. Difficulty was found in the women's section in securing experienced domestics to fill the positions offered, although there was a long list of applicants from whom to choose.

With threshing about completed in the Prairie Provinces, there was a decline in the number of farm hands required. Weather conditions, which had been unsettled, had again retarded operations, and in some localities it was feared the continued rains would lower the grade of grain. Logging was quiet. Mining remained fairly active at Estevan, with small mines doing a good farm trade and large mines expecting to reopen shortly. Elsewhere, quietness prevailed in this industry, with mines operating only on part time and with reduced crews. Manufacturing showed no change, all industries having sufficient help,

with no signs of increased activity. Considerable repair work was going on at Winnipeg and that, with alterations, constituted the principal building construction in that locality. Relief work continued on highways and in the National Park area. There was a slight improvement in railway operations at Medicine Hat, due to the movement of sugar beets to a factory at Raymond. Trade was fair, and except for a nominal increase, both in applications and placements, conditions in the women's domestic section remained unchanged.

There were few calls for farm help in British Columbia. At Kamloops, great disaster had resulted from cyclonic winds, most of the fruit in the district having been blown down and bruised. Frosts had also terminated the tomato crop. Logging remained much the same, a few small camps were open, while others had been closed down. Sawmills were running steadily and shingle mills varied, some

working double shifts, others temporarily idle due to lack of orders. Local mines operated only part-time at Nanaimo. At Nelson, however, mining was brisk, but no call for men, while reports from Stewart indicated increased activity, due to the discovery of rich ore on the Salmon River. At Vancouver, miners and muckers who had been in outside mining districts during the summer months in the hope of securing work there, were returning to the city, some being in a destitute condition. Other than fruit packing houses and canneries, there was little work for factory hands. Building construction was quiet, but many men had been provided with work by the various municipalities, or in the different relief camps. Waterfront workers were busy at Prince Rupert and Victoria, but not as active at Vancouver. Trade was fair. In the women's domestic section, although wages were low, a number of workers accepted employment.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN AUGUST, 1933

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on September 1 was 8,264, the employees on their payrolls numbering 817,002 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for August was 1,705, having an aggregate

membership of 151,233 persons. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 51 cities throughout Canada, showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of September, 1933, as Reported by Employers

According to data tabulated by the Dominion Bureau of Statistics, there was further improvement in the general employment situation at the beginning of September. This increase (the fifth successive gain recently recorded) compared favourably with the decline noted on September 1, 1932, and especially so with the moderate contraction in industrial activity which in the experience of the last twelve years has usually occurred from August to September. Reflecting the upward movement now in evid-

ence, both the crude and the seasonally-corrected index numbers advanced by between one and two points. The working forces of the 8,264 co-operating employers aggregated 817,002 persons on September 1, compared with 804,846 in the preceding month. The unadjusted index (based upon the average for the calendar year 1926 as 100) rose from 87.1 on August 1, 1933, to 88.5 on September 1, as compared with 86.0 on the same date in 1932. On September 1 of the eleven preceding years, the

index was as follows:—1931, 107.1; 1930, 116.6; 1929, 126.8, 1928, 119.1; 1927, 111.0; 1926, 106.2; 1925, 97.8; 1924, 94.2; 1923, 101.2; 1922, 94.8 and 1921, 89.8.

In the five months since the beginning of April, the general trend of employment has been upward, there being an increase of approximately 116,000 workers, in the staffs of the co-operating employers. The sample of industrial employment upon which these data are based is large, and probably includes the businesses most subject to the fluctuations arising from current economic conditions; there

expansion being in favourable contrast with the slight decline that has been the usual seasonal change between August 1, and September 1 in the twelve previous years of the record. The greatest gains on the date under review occurred in textile and vegetable food factories, but with few exceptions, the other divisions also reported improvement. In the non-manufacturing industries, mining, transportation, building, services and trade also showed considerably increased activity, while there was a falling-off in highway and railway construction and logging.

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

is, however, no doubt that the excluded industries, as well as the smaller firms in the industries covered, have also benefitted from the recent improvement in business, so that the number of re-employed persons throughout the Dominion must greatly exceed the figure quoted above, especially in view of the seasonal activity in agriculture. It is significant that the index, rising from 76.0 on April 1, 1933, to 88.5 on September 1, has shown a gain of 12.5 points, or 16.4 per cent; in the same period of 1932, there was a falling-off of 1.5 points, while in 1931 and 1930, there were increases of only 7.4 points and 8.8 points, respectively.

An analysis of the returns by industries shows that manufacturing experienced its eighth consecutive increase in personnel, the

### Employment by Economic Areas

Firms in all but the Maritime Provinces showed gains, those in Quebec and Ontario being greatest.

*Maritime Provinces.*—Following six months of uninterrupted expansion, there was a decline in employment on September 1, which, however, involved a smaller number of workers than that registered on the same date in 1932, when the index was a few points lower. Most of the loss this year took place in construction, mainly of highways and roads, but transportation and fish canneries also released employees. On the other hand, manufacturing as a whole showed considerable improvement, chiefly in textile, pulp and paper, lumber and

iron and steel factories, while mining was also brisker. Statistics were received from 578 firms, whose staffs aggregated 63,928 workers on September 1, 1933, compared with 64,908 in the preceding month.

*Quebec.*—Increased employment was noted in Quebec, mainly in manufacturing, transportation, construction and trade; within the first-named, the textile, pulp and paper, rubber and leather groups showed most improvement, while lumber, food and tobacco and beverage factories released employees. The working force of the 2,013 employers co-operating in Quebec stood at 235,330 persons, as against 229,386 on August 1. A much smaller increase had been registered at the beginning of September, 1932, when the index was between one and two points lower.

*Ontario.*—In this province, 3,652 firms reported further advances in personnel, which compared favourably with the reductions indicated on September 1, 1932; employment then had been at a lower level than on the date under review. Manufacturing recorded a large share of the increase, the vegetable food and textile groups showing especially important gains, although the tendency was

also upward in leather, lumber, rubber, electrical apparatus, non-ferrous metal, mineral product and other factories. Among the non-manufacturing divisions, metallic mining, transportation, building and trade (both retail and wholesale), were also busier. On the other hand, iron and steel works showed their first curtailment since the beginning of the year, and highway and railway construction also released employees; the declines in iron and steel were largely seasonal in character. The payrolls of the reporting employers aggregated 331,840 persons, or 5,616 more than in the preceding month.

*Prairie Provinces.*—There was a small increase in employment in the Prairie Provinces, the upward trend now having continued for five months; the index was about a point lower than on September 1, 1932, when a larger advance had been indicated by the firms making returns. Data were tabulated from 1,198 employers of 112,853 workers, as compared with 112,589 at the beginning of August. Mining and transportation afforded heightened employment; manufacturing was rather slack, notably in the lumber division, and construction work was also curtailed.

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

|  | Canada | Maritime Provinces | Quebec | Ontario | Prairie Provinces | British Columbia |
|--|--------|--------------------|--------|---------|-------------------|------------------|
| Sept. 1, 1921.....   | 89.8   | 104.9              | 83.3   | 89.1    | 97.8              | 84.8             |
| Sept. 1, 1922.....   | 94.8   | 101.4              | 87.3   | 97.9    | 100.5             | 90.5             |
| Sept. 1, 1923.....   | 101.2  | 113.8              | 95.4   | 104.5   | 100.4             | 94.6             |
| Sept. 1, 1924.....   | 94.2   | 97.2               | 93.2   | 94.7    | 93.2              | 94.0             |
| Sept. 1, 1925.....   | 97.8   | 99.2               | 96.6   | 98.7    | 95.3              | 101.3            |

| Sept. 1, 1927.....   | 111.0  | 112.2              | 110.5  | 110.5   | 114.4             | 108.7            |
| Sept. 1, 1928.....   | 119.1  | 115.4              | 115.7  | 119.5   | 127.8             | 115.5            |
| Sept. 1, 1929.....   | 126.8  | 127.3              | 120.5  | 126.9   | 143.3             | 121.5            |
| Sept. 1, 1930.....   | 116.6  | 122.5              | 113.6  | 113.6   | 129.8             | 114.6            |
| Sept. 1, 1931.....   | 107.1  | 102.7              | 109.8  | 100.7   | 130.0             | 96.6             |
| Jan. 1, 1932.....  | 91.6   | 111.1              | 86.3   | 93.8    | 92.8              | 80.6             |
| Feb. 1.....  | 89.7   | 99.9               | 85.9   | 92.7    | 91.3              | 77.5             |
| Mar. 1.....  | 88.7   | 93.1               | 86.5   | 91.8    | 88.2              | 78.7             |
| April 1.....   | 87.5   | 88.3               | 85.0   | 91.1    | 86.1              | 80.9             |
| May 1.....   | 87.5   | 87.8               | 86.0   | 89.5    | 87.6              | 82.7             |
| June 1.....  | 89.1   | 96.4               | 87.8   | 89.9    | 89.3              | 83.7             |
| July 1.....  | 88.7   | 96.4               | 86.6   | 89.2    | 90.5              | 81.4             |
| Aug. 1.....  | 86.3   | 90.1               | 84.4   | 86.9    | 90.1              | 82.8             |
| Sept. 1.....   | 86.0   | 87.8               | 85.3   | 85.1    | 91.6              | 82.1             |
| Oct. 1.....  | 86.7   | 84.9               | 85.8   | 89.1    | 91.6              | 77.8             |
| Nov. 1.....  | 84.7   | 86.8               | 83.6   | 84.2    | 86.7              | 73.8             |
| Dec. 1.....  | 83.2   | 83.8               | 82.9   | 84.1    |                   |                  |
| Jan. 1, 1933.....  | 78.5   | 80.1               | 77.8   | 78.8    | 84.4              | 69.7             |
| Feb. 1.....  | 77.0   | 76.5               | 75.7   | 78.9    | 80.4              | 68.0             |
| Mar. 1.....  | 76.9   | 76.8               | 74.1   | 79.8    | 80.0              | 67.7             |
| April 1.....   | 76.0   | 78.3               | 73.1   | 78.3    | 78.3              | 68.8             |
| May 1.....   | 77.6   | 80.3               | 75.4   | 79.5    | 79.2              | 72.2             |
| June 1.....  | 80.7   | 82.8               | 79.3   | 81.6    | 82.7              | 76.2             |
| July 1.....  | 84.5   | 89.9               | 83.0   | 85.0    | 85.0              | 81.8             |
| Aug. 1.....  | 87.1   | 93.0               | 84.8   | 86.6    | 90.5              | 87.3             |
| Sept. 1.....   | 83.5   | 91.5               | 87.0   | 88.1    | 90.7              | 89.2             |
| Relative Weight of Employment by Economic Areas as at Sept. 1, 1933..... | 100.0  | 7.8                | 28.8   | 40.6    | 13.8              | 9.0              |

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

Harvest operations, actively proceeding at this time of year, are of course not reflected in these statistics.

*British Columbia.*—Employment in British Columbia showed on September 1 its sixth successive gain; in this period of expansion, over 17,500 persons have been added to the staffs of the co-operating firms, while in the same six months of 1932 only slightly over 3,500 employees were re-instated. The increase on the date under review was fairly general, all industries except lumbering, coal mining and railway construction showing improvement. The greatest gains occurred in canning, metallic ore mining, transportation, building and highway construction, services and trade. The working force of the 823 firms furnishing data rose from 71,739 persons on August 1, to 73,051 at the beginning of September. This increase rather exceeded that indicated on September 1, 1932, when employment was in less volume.

Table I gives index numbers by economic areas.

### Employment by Cities

Employment advanced in Montreal, Toronto, Winnipeg and Vancouver; in Quebec

City, Ottawa and Hamilton very little change on the whole was indicated, while curtailment was noted in Windsor and the adjacent Border Cities.

*Montreal.*—Employment in Montreal showed a further increase on September 1, 2,970 workers having been added to the pay-lists of the 1,146 co-operating firms, who employed 124,167. This was the sixth gain indicated in as many months, during which nearly 13,200 persons were added to the reported payrolls; the improvement is especially significant in comparison with the decline of nearly 5,000 workers in the staffs of the employers making returns for the same six months of last year. The index was, however, slightly lower than on the same date in 1932, when a smaller gain had been recorded. Manufacturing (especially of textile products) reported heightened activity on September 1, 1933, as compared with August 1, and services, transportation and construction were also brisker.

*Quebec.*—Very little change on the whole was indicated in Quebec, according to 155 employers of 12,545 persons, as compared with 12,505 in the preceding month. Increases occurred in services, while the fluctuations in

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

other groups were small. Employment as reported by employers was not so active as at the beginning of September of a year ago; a much larger advance had then been noted.

*Toronto.*—Manufacturing showed substantial improvement, chiefly in vegetable food, textile, electrical apparatus and iron and steel; the non-manufacturing groups showed little general change. Statements were received from 1,221 firms with 105,827 workers, or 1,969 more than on August 1. A falling-off had been indicated on the same date of a year ago, but employment then was slightly above its present level.

*Ottawa.*—There was a small increase in Ottawa, chiefly in trade, while other industries showed only minor changes. The 162 firms furnishing returns reported 11,900 employees, compared with 11,884 in the preceding month. On September 1, 1932, an insignificant gain had also been noted, but the index then was higher.

*Hamilton.*—Manufacturing and trade were rather busier, while services and construction recorded contractions in Hamilton; 247 em-

ployers recorded 24,504 persons on their pay-rolls, a number very slightly in excess of their August 1 staffs. Employment was in rather greater volume than at the beginning of September of a year ago, when a large decline had been indicated.

*Windsor and the Adjacent Border Cities.*—A reduction was registered in the Border Cities, where the 137 co-operating firms reported 9,750 workers, as against 10,335 in the preceding month. Iron and steel plants, chiefly automobiles, showed diminished activity, while other industries reported only slight, general changes. A much larger loss had been noted on the same date last year, when the index was a few points lower.

*Winnipeg.*—Employment in Winnipeg showed continued improvement; manufacturing as a group was rather more active, and transportation and construction were also somewhat brisker. An aggregate working force of 34,279 persons was reported by the 385 employers who made returns for September 1, and who had employed 34,090 workers in the preceding month. A reduction had

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

been recorded on the same date in 1932, when the index was about three points higher.

*Vancouver.*—There was an increase in employment in Vancouver, according to statements received from 348 firms employing 27,000 workers, as against 26,368 on August 1. Manufacturing establishments reported rather larger payrolls, while transportation, services and trade also indicated improvement. Employment was in slightly less volume than on the same date of a year ago, when smaller gains had been noted.

Index numbers by cities are given in Table II.

### Employment by Industries

Continuing the favourable movement in evidence since the beginning of the year, employment in manufactures showed a further advance on September 1, the 5,024 co-operating employers enlarging their payrolls from

423,430 on August 1 to 431,481 on the date under review. This increase of over 8,000 workers was the largest recorded at the beginning of September in any of the last twelve years; it is of particular interest because factory operations have very often been curtailed in the early autumn of these years, the average index showing a reduction of about half a point between August 1 and September 1. The crude index (standing at 86.8 on September 1, 1933, as compared with 85.2 in the preceding month and 83.1 on the same date in 1932), showed as compared with August 1 an increase of two points after correction for seasonal variation. The edible animal, lumber and iron and steel groups reported contractions, those in the last two being seasonal in character; the loss in iron and steel plants was the first indicated since January 1. On the other hand, leather, vegetable food, pulp and

<sup>1</sup>The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

paper, rubber, textile, electrical apparatus, non-ferrous metal and mineral product factories indicated considerable improvement. The gains were well distributed, all but the Prairie Provinces sharing in the expansion.

Since January 1, there has been uninterrupted recovery in manufactures, resulting in the re-instatement of over 61,400 persons in the plants of the approximately 5,000 manufacturing firms furnishing monthly employment data to the Dominion Bureau of Statistics; on the average, this is an increase of more than 12 persons in the staff of each of these employers, and signifies an appreciable increase in the purchasing power of the public, particularly since the payroll additions have in many cases been accompanied by an extension in working hours. The recovery has caused the employment index for the manufacturing industries to rise from 74.4 on January 1 to 86.8 at the beginning of September, a gain of 12.4 point or 16.7 per cent.

*Animal Products, Edible.*—Declines occurred in dairies and fish-preserving establishments, while meat-packing plants showed little change. The payrolls of the 252 co-operating factories aggregated 23,375 employees, as compared with 23,953 in the preceding month. Employment on September 1, 1932, had experienced a smaller decrease, but the index number then was nearly 15 points lower than on the date under review.

*Leather and Products.*—A further gain was shown in leather factories, chiefly in footwear plants; this increase (the eighth reported in successive months) was smaller than that noted at the beginning of September of last year, when the employment reported by the firms making returns was at a lower level. Statements were received from 259 manufacturers having 20,331 persons in their employ, as against 20,002 on August 1, 1933; Quebec and Ontario firms reported most of the increase.

*Lumber and Products.*—Seasonal reductions were made in sawmills, but furniture factories were busier; the result was a decrease of 430 persons in the staffs of the 763 lumber-using plants furnishing data, whose payrolls aggregated 34,515. This loss was the first recorded since the beginning of the year; it exceeded that noted on September 1, 1932, but the index then was several points lower.

*Musical Instruments.*—Additions to personnel were recorded in musical instrument works, 36 of which increased their labour forces by 137 persons to 855 on September 1. Increases occurred in Quebec and Ontario. A larger gain had been indicated at the beginning of September, 1932, when employment was at a higher level.

*Plant Products, Edible.*—Confectionery and chocolate and fruit and vegetable preserving factories reported heightened activity, the additions to staffs in canneries being most pronounced. The general improvement was on a much greater scale than on the same date last year, when the index was lower. Data were compiled from 400 firms in the vegetable food group, whose payrolls rose from 29,593 on August 1, to 32,737 at the beginning of September. Ontario and British Columbia reported the largest advances.

*Pulp and Paper Products.*—Employment in this group showed a considerable improvement, mainly in pulp and paper mills, while printing shops were rather slacker; large increases had been noted on September 1 of last year, when the index, at 88.5, was a point lower than on the date under review. The forces of the 557 co-operating establishments included 53,806 persons, as compared with 53,194 in the preceding month. The Maritime Provinces, Quebec and Ontario reported most of the advance.

*Rubber Products.*—Continued recovery was indicated in rubber factories, 43 of which employed 10,715 workers compared with 10,226 on August 1. The situation on September 1, 1932, had remained much the same as in the preceding month; employment was then at a lower level than on the date under review.

*Textile Products.*—Seasonal increases occurred in textile factories, 855 of which had 85,830 employees, as against 82,529 on August 1. Most of the advance took place in Quebec and Ontario, but the tendency was generally favourable. Garment and personal furnishing and knitting factories registered the bulk of the gain, but improvement was also noted in headwear, woollen, cotton and silk mills, while miscellaneous textile plants were slacker. The index of employment on the same date last year was lower; the increase then reported had involved a much smaller number of workers.

*Tobacco, Distilled and Malt Liquors.*—Little general change was noted in this industry on September 1 as compared with the preceding month, since when 48 persons were released from the payrolls of the 151 co-operating factories, which employed 14,121 operatives. The level of employment was lower than at the beginning of September, 1932, when an increase had been indicated in the group as a whole.

*Chemical Products.*—Employment in this division showed a moderate gain, according to statistics from 158 employers of 8,394 persons,

compared with 8,258 on August 1. Activity was greater than on the same date a year ago.

*Clay, Glass and Stone Products.*—Glass and clay products works showed improvement, while the stone division released some employees. Statements were received from 182 plants, having 7,017 workers, as against 6,892 in the preceding month. A reduction had been noted at the beginning of September last year, but the index then was considerably higher.

*Electric Current.*—Little general change was shown in electric current plants, 92 of which employed 13,848 persons. Employment was slacker than on September 1, 1932, when an upward movement had been indicated.

*Electrical Apparatus.*—Employment in this group increased at the beginning of September, when 470 workers were added to the forces of the 97 co-operating establishments, which had 9,920 employees. The gain occurred mainly in Ontario. Curtailment had been noted on the corresponding date in 1932, when the index was above its level at the time of writing.

*Iron and Steel Products.*—The vehicle and agricultural implement divisions of the iron and steel group recorded contractions in employment, while rolling mills, heating appliance, structural and iron and steel and some other factories were busier. On the whole, there was a reduction of 186 in the forces of the 779 co-operating iron and steel manufacturers, who employed 82,192 persons at the beginning of September. Activity was curtailed in all except the Maritime and Prairie Provinces, but chiefly so in Ontario. This decline was the first general contraction indicated since the beginning of the year. The trend on September 1, 1932, had also been downward, much greater losses having been noted; the index number then was fractionally lower than on the date under review.

*Non-Ferrous Metal Products.*—The precious metal and the smelting and refining divisions reported heightened employment, while base metal working plants showed little general change; 137 manufacturers in the group as a whole employed 14,403 operatives, as against 14,075 on August 1. Improvement had also been indicated on the same date last year, when activity was less.

*Mineral Products.*—Employment in this group showed a moderate increase, according to statements from 114 establishments with 12,796 persons on their payrolls, as against 12,604 at the beginning of August. The index was higher than on September 1, 1932, when smaller gains had taken place.

## Logging

Employment in logging camps showed a falling-off at the beginning of September, according to the 220 co-operating firms, whose payrolls aggregated 13,210 workers, compared with 13,416 in the preceding month. The number employed in the bush on September 1 was greater than on the same date in 1931 and 1932, though smaller than in the early autumn of other years of the record.

## Mining

*Coal.*—Data were received from 95 operators having 21,863 men on their payrolls, as compared with 21,102 at the beginning of August. The Prairie coal fields reported the expansion, which involved a smaller number of workers than that registered on the same date a year ago; the index number then was higher than on the date under review.

*Metallic Ores.*—Employment in metallic ore mines showed a further advance, according to returns from 78 firms whose forces rose from 17,902 persons on August 1, to 18,482 at the beginning of September. A contraction had been shown on September 1, 1932, when employment was in smaller volume.

*Non-Metallic Minerals (other than coal).*—Continued gains on a small scale were reported in this group, in which 73 firms enlarged their staffs by 92 workers to 5,359 on September 1. A decrease had been noted on the corresponding date of last year, and the level of employment was then lower.

## Communications

A slight increase was indicated in the communications division, in which the companies reporting employed 22,000 workers, as compared with 21,959 in the preceding month. Activity was less than in the early autumn of 1932.

## Transportation

*Street and Electric Railways and Cartage.*—Improvement was shown in local transportation on the date under review, when the 184 employers furnishing data reported 24,501 workers, or 358 more than in the preceding month. The advances were chiefly in the Prairie Provinces. A greater gain had been recorded at the beginning of September, 1932; the index then was four points higher.

*Steam Railways.*—The was a further increase in the number employed in steam railway operation on September 1, according to the 97 companies and branches from which returns were received, and which had 57,275

employees, compared with 56,641 on August 1. Employment was at a lower level than on the same date last year, although the advance then noted had been on a smaller scale. The improvement reported at the beginning of September, 1933, took place mainly in Quebec and the Prairie Provinces.

*Shipping and Stevedoring.*—Additions to staffs were made in the water transportation group, in which activity was slightly greater than on the same date in 1932. Statements were received from 94 employers of 15,117 workers, as against 14,593 in the preceding month.

### Construction and Maintenance

*Building.*—Further improvement was noted in building construction, in which employment was slacker than in the late summer of 1932. Data were received from 653 contractors, whose payrolls increased from 17,222 on August 1, 1933, to 18,374 persons on the date under review. The trend was favourable in all except the Maritime Provinces.

*Highway.*—There was a decrease in this group, 415 men being released from the forces of the 362 co-operating employers, who had 56,662 workers; there were losses in all provinces except Quebec and British Columbia. Activity was greater than on September 1, 1932.

*Railway.*—A decline in employment was indicated by the 37 firms furnishing data in this division, who employed 27,831 persons, as against 28,652 in the preceding month. Im-

provement was reported in the Maritime Provinces and Quebec, but elsewhere the trend was unfavourable. Heightened activity had been noted on the corresponding date of 1932, and the index number then was a few points higher.

### Services

There was an advance in the service group, in which business this year had not been so brisk as in 1932. The 348 establishments furnishing returns for September 1, 1933, reported 22,710 assistants, as against 22,189 on August 1. Most of the gain occurred in hotels and restaurants.

### Trade

Improvement was noted in both retail and wholesale establishments; employment in this group continued at a slightly lower level than in the late summer of last year, when a decline had been indicated in the group as a whole. Returns were received from 919 trading establishments employing 82,137 persons, compared with 81,253 at the beginning of August, 1933.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables, in which the columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of August, 1933

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged in work other than their own trades or who are idle due to illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The situation for local trade unions at the close of August showed a continuation of the favourable movement which has prevailed since the end of March, unemployment standing at 19.9 in contrast with a percentage of 21.2 in July. The percentage for August was based on the returns furnished to the Depart-

ment of Labour by 1,705 labour organizations with a total of 151,233 members, 30,096 of whom were without work on the last day of the month. Heightened activity also was noted as compared with August last year when 21.4 per cent of the members reported were idle. Quebec unions registered the greatest improvement from July conditions, the metal and textile trades being largely responsible for the change, while in Ontario, Manitoba, Saskatchewan and Alberta the tendency was also toward a higher employment volume, though the variation was slight. British Columbia unions, however, reported moderate curtailment from July, and fractional recessions occurred among Nova Scotia and New Brunswick unions. When a comparison is made with the returns for August last year, Nova Scotia unions indicate a drop in available work during the month surveyed of nearly 4 per cent, and in Saskatchewan activity was

slightly reduced. On the other hand New Brunswick, Quebec, Ontario and Alberta unions all registered gains in employment of around 2 per cent, and Manitoba a fractional increase only. In British Columbia the same situation obtained during both months compared.

Unemployment affecting trade union members in the largest city in each province, with the exception of Prince Edward Island, is compiled separately each month. Noteworthy employment expansion from the previous month was shown in Montreal during August, the improvement recorded in Winnipeg, Toronto,

showing a greater prevalence of available employment and remaining at the close of the month on a level below that of August a year ago when conditions were somewhat quieter than during the period reviewed.

The manufacturing industries which have shown steady improvement since the close of May continued in the better trend throughout August, as manifest by the reports tabulated from 451 unions with a membership aggregate of 43,599 persons. Of these, 8,767 or 20.1 per cent were unemployed at the close of the month, in comparison with a percentage of

#### PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

Halifax and Vancouver being of much lesser degree. On the other hand, Saint John, Regina and Edmonton unions indicated curtailment of activity, which was not, however, of particular importance. Contrasted with the returns for August a year ago, Edmonton unions reflected some lessening of the employment volume recorded during the month reviewed. In all other cities an upward trend was noted, Vancouver, Toronto and Regina, with gains of 3.5 per cent, 2.7 per cent, and 2.5 per cent, respectively, recording the largest advances.

Accompanying this article is a chart which shows the unemployment trend by months from January, 1927, to date. The projection of the curve was again downward during August,

22.3 in July. More active conditions also prevailed than in August last year when 22.5 per cent of the members reported were idle. Increased activity in the garment, and iron and steel trades, particularly in the Province of Quebec, was a noteworthy factor in the change from July, though a better employment tendency was shown also among cigarmakers, bakers and confectioners, glass workers, general labourers, leather, hat, cap and fur workers, and meat cutters and butchers. On the other hand, wood workers suffered substantial losses in available work from July, the declines registered by papermakers, printing tradesmen, textile and brewery workers being but nominal. Among metal polishers and jewel-

lery workers the same percentage of idleness was reported in both months compared. There was general employment advancement in the majority of trades from August of last year in the manufacturing industries, leather and jewellery workers, general labourers, and electric current employees only reporting some curtailment of activity. Among the gains, the most pronounced were recorded in the wood, paper and textile trades.

From unions of coal miners 53 reports were received during August, embracing a member-

ship of 15,410 persons, 2,015 or 13.1 per cent of whom were reported idle on the last day of the month, in contrast with a percentage of 14.3 in July. Activity was slightly retarded from August last year when unemployment stood at 11.8. The improvement shown from July was entirely confined to the coal fields of Alberta, a noteworthy drop in employment being recorded in British Columbia, and slight declines in Nova Scotia. As in the previous comparison Alberta miners showed a better situation then in August last year, but the improvement was slightly more than offset by the recessions evident in the British Columbia and Nova Scotia mines, the declines in the former province being quite pronounced. In both the eastern and western coal fields a considerable amount of short time work was noted.

Contrary to the favourable movement that employment among building and construction workers had maintained continuously since the close of February, there was some slowing up of activity in evidence during August. This was shown by the returns compiled from 208 associations of building tradesmen with a membership numbering 17,035 persons, 10,838 or 63.6 per cent of whom were without work at the end of the month, contrasted with 61.9 per cent in July. Painters, decorators and paperhangers, and bridge and structural iron workers reported large percentage contractions from July, recessions on a smaller scale being apparent among carpenters and joiners, tile layers,, lathers and roofers, and steam shovelmen. On the other hand, the situation was considerably better for hod carriers and building labourers, and granite and stonecutters than in the preceding month. Improvement on a moderate scale was recorded by plumbers and steamfitters, while bricklayers, masons and plasterers, and electrical workers showed slight gains only. In comparison with the returns for August of last year, when 61.2 per cent of unemployment was reported in the building group as a whole, painters, decorators and paperhangers, plumbers and steamfitters, and electrical workers all recorded a higher employment volume during the month reviewed, the increases being noteworthy. Conditions were much slacker, however, for tile layers, lathers and roofers, and hod carriers and building labourers than in August last year, and fair-sized contractions were evident among bridge and structural iron workers. Employment declines of more moderate proportions occurred among carpenters and joiners, bricklayers, masons and plasterers, steam shovelmen, and granite and stonecutters.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

| Month        | N.S. and Prince Edward Island | New Brunswick | Quebec | Ontario | Manitoba | Saskatchewan | Alberta | British Columbia | Canada |
|--------------|-------------------------------|---------------|--------|---------|----------|--------------|---------|------------------|--------|
| Average 1919 | 3.1                           | 2.0           | 3.4    | 2.7     | 2.1      | 3.2          | 2.0     | 7.9              | 3.4    |
| Average 1920 | 1.5                           | 2.0           | 3.2    | 2.4     | 2.1      | 3.2          | 2.8     | 11.2             | 4.9    |
| Average 1921 | 11.3                          | 8.5           | 16.6   | 9.7     | 8.8      | 7.8          | 7.8     | 23.5             | 12.7   |
| Average 1922 | 7.1                           | 4.3           | 8.6    | 6.0     | 5.0      | 5.4          | 6.1     | 12.4             | 7.1    |
| Average 1923 | 3.0                           | 2.0           | 6.6    | 3.7     | 3.8      | 3.0          | 6.0     | 5.8              | 4.9    |
| Average 1924 | 5.1                           | 4.0           | 10.9   | 6.1     | 6.5      | 4.3          | 5.8     | 5.8              | 7.2    |
| Average 1925 | 5.0                           | 3.6           | 10.9   | 5.5     | 5.1      | 3.2          | 4.8     | 5.7              | 7.0    |
| Average 1926 | 7.8                           | 2.1           | 6.8    | 4.2     | 3.6      | 3.0          | 4.9     | 5.5              | 5.1    |
| Average 1927 | 3.7                           | 1.9           | 6.8    | 4.1     | 4.4      | 3.2          | 4.1     | 5.5              | 4.9    |
| Average 1928 | 4.0                           | 1.2           | 6.1    | 3.5     | 4.2      | 3.0          | 4.2     | 5.1              | 4.5    |
| Average 1929 | 4.0                           | 1.6           | 7.7    | 4.3     | 7.1      | 5.3          | 6.4     | 5.9              | 5.7    |
| Average 1930 | 5.4                           | 3.7           | 14.0   | 10.4    | 9.6      | 10.6         | 13.3    | 11.6             | 11.1   |
| Average 1931 | 8.5                           | 9.2           | 19.3   | 17.2    | 15.7     | 15.6         | 19.4    | 17.6             | 16.8   |
| Average 1932 | 9.6                           | 14.4          | 26.4   | 23.7    | 20.0     | 15.8         | 22.6    | 21.6             | 22.0   |
| Aug., 1919   | 5.4                           | 1.5           | 2.7    | 1.3     | .8       | 2.0          | 1.1     | 4.1              | 2.2    |
| Aug., 1920   | .3                            | 1.0           | 7.5    | 1.7     | .3       | .5           | .7      | 4.7              | 3.3    |
| Aug., 1921   | 7.4                           | 8.3           | 11.5   | 8.0     | 3.5      | 3.1          | 4.8     | 12.7             | 8.7    |
| Aug., 1922   | 2.4                           | 2.8           | 5.4    | 2.5     | 1.6      | 2.8          | 3.6     | 6.1              | 3.6    |
| Aug., 1923   | .5                            | .4            | 2.2    | 2.2     | 3.4      | 1.0          | 3.6     | 2.0              | 2.2    |
| Aug., 1924   | 9.2                           | 3.1           | 8.9    | 5.8     | 4.4      | 4.4          | 5.7     | 4.7              | 6.5    |
| Aug., 1925   | 7.2                           | 4.2           | 6.0    | 3.8     | 2.8      | 1.3          | 3.0     | 3.5              | 4.4    |
| Aug., 1926   | 1.9                           | 2.5           | 3.2    | 1.5     | 1.8      | 1.0          | 5.0     | 3.9              | 2.5    |
| Aug., 1927   | 1.5                           | 1.2           | 5.4    | 3.1     | 2.3      | .9           | 3.5     | 4.7              | 3.7    |
| Aug., 1928   | 1.6                           | .7            | 4.0    | 1.9     | 1.4      | .8           | 1.2     | 2.8              | 2.4    |
| Aug., 1929   | 2.2                           | .8            | 4.6    | 2.5     | 2.5      | 1.8          | 5.7     | 3.9              | 3.5    |
| Aug., 1930   | 5.2                           | 1.6           | 12.3   | 8.5     | 7.2      | 6.7          | 11.6    | 8.9              | 9.3    |
| Jan., 1931   | 7.4                           | 10.5          | 16.1   | 18.4    | 15.1     | 18.3         | 15.7    | 16.9             | 16.0   |
| Feb., 1931   | 6.7                           | 8.5           | 15.7   | 17.1    | 15.6     | 19.0         | 18.2    | 16.3             | 15.6   |
| Mar., 1931   | 6.5                           | 10.9          | 14.0   | 16.0    | 14.7     | 19.5         | 21.8    | 18.8             | 15.5   |
| April, 1931  | 7.2                           | 9.8           | 14.9   | 15.2    | 14.4     | 14.6         | 20.8    | 17.8             | 14.9   |
| May, 1931    | 6.4                           | 10.3          | 20.5   | 15.6    | 13.0     | 12.8         | 22.0    | 14.2             | 16.2   |
| June, 1931   | 7.2                           | 6.5           | 20.0   | 16.2    | 14.1     | 13.5         | 21.7    | 15.6             | 16.3   |
| July, 1931   | 7.2                           | 7.0           | 17.0   | 16.6    | 14.7     | 14.5         | 25.3    | 16.3             | 16.2   |
| Aug., 1931   | 9.3                           | 7.7           | 16.9   | 15.2    | 15.7     | 11.8         | 24.4    | 16.4             | 15.8   |
| Sept., 1931  | 8.2                           | 10.4          | 22.7   | 18.7    | 19.0     | 12.3         | 16.0    | 17.9             | 18.1   |

The situation in the transportation industries tended favourably during August, both in contrast with the returns for the previous month and August a year ago. Reports were received for August from 748 associations of transportation workers, with 54,961 members, 6,279 or 11.4 per cent of whom were idle at the end of the month, compared with percentages of 12.5 in July and 12.3 in August last year. In the steam railway division, which included over 78 per cent of the entire group membership reported, some employment expansion was noted from July; and among street and electric railway employees the trend was also toward greater activity, though the gains were less than 1 per cent. On the contrary, employment for navigation workers and teamsters and chauffeurs eased up slightly. Steam railway employees, as in the previous comparison, were slightly better engaged than in August a year ago, and conditions for navigation workers and teamsters and chauffeurs improved moderately. Street and electric railway employees, however, maintained a practically unchanged situation from August, 1932.

Retail clerks were somewhat busier during August than in the previous month, the 5 unions making returns with 1,069 members showing 1.1 per cent of inactivity compared with 2.9 per cent in July. There was a slight falling off in employment from August last year when 0.7 per cent of idleness was recorded.

The 73 associations of civic employees making returns at the close of August with a membership total of 6,505 persons showed that 313 or 4.8 per cent were without work contrasted with percentages of 6.2 in July and 5.3 in August last year.

In the miscellaneous group of trades there was little variation during August from the July level, what slight change was indicated being in a favourable direction. This was manifest by the returns tabulated from 120 unions, with 4,079 members, 805 or 19.7 per cent of whom were idle at the end of the

month, contrasted with an unemployment percentage of 20.6 in July. Activity was also in greater volume than in August last year when 23.1 per cent of the members reported were without work. Hotel and restaurant employees were mainly responsible for the improvement recorded in the group as a whole from July, though among theatre and stage employees fractional gains occurred. On the other hand, unclassified workers, stationary engineers and firemen, and barbers suffered a slight lowering of the employment volume afforded from July. Conditions for stationary engineers and firemen were substantially better than in August of last year, and activity for barbers and hotel and restaurant employees also tended upward though the changes were slight, particularly among the latter tradesmen. Moderate recessions, however, were indicated by theatre and stage employees, and unclassified workers.

A considerable increase in slackness was in evidence among fishermen during August, unemployment standing at 21.3 contrasted with percentages of 1.4 in July and 5.7 in August last year. The percentage for August was based on the reports received from 2 unions of fishermen covering 705 members.

The 4 unions of lumber workers and loggers, with an aggregate of 663 members reporting in August, showed that 136 or 20.5 per cent were idle at the end of the month, contrasted with a percentage of 22.5 in July. Conditions were decidedly better for these workers than in August, 1932, when unemployment stood at 45.4.

Table 1 shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1932 inclusive, and also the percentage of unemployment by provinces for August of each year from 1919 to 1930 inclusive, and for each month from January, 1931, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table 1.

### (3) Employment Office Reports for August, 1933

During the month of August 1933, reports from the offices of the Employment Service of Canada showed gains in the average daily placements of 4 per cent over those of the preceding month, and of 12 per cent over those effected during the corresponding month a year ago, the gain in the former case being entirely due to increased placements in farming, construction and maintenance, and services, and in the latter instance to a substantial gain in construction and maintenance, augmented by increases of lesser volume in

logging, mining and services. Losses in logging, transportation, trade and manufacturing were shown in comparison with July and in farming, manufacturing and trade when compared with August a year ago. Changes in other groups were nominal only.

The accompanying chart shows the trend of employment since January, 1931, as represented by the ratio of vacancies notified and of placements effected for each one hundred applications for work registered at the Offices of the Service throughout Canada, compila-

tions being made semi-monthly. It will be seen from the graph that the curve of vacancies and of placements in relation to applications showed a pronounced upward trend during the first half of the month, but during the latter half of the period under review followed a marked downward course. At the end of August the level of each curve was about seven points below that recorded at the close of the corresponding month a year ago. The ratio of vacancies to each one hundred applications was 61.1 during the first half and 53.7 during the second half of August, 1933, in contrast with the ratios of 56.0 and 60.2 during the corresponding periods of 1932.

The average number of placements made daily by the Offices of the Service during August, 1933, was 1,136, of which 683 were in regular employment and 453 in work of one week's duration or less, as compared with the total daily average of 1,091 during the preceding month. Placements in August a year ago averaged 1,014 daily consisting of 568 placements in regular and 446 in casual employment.

During the month of August, 1933, the Offices of the Service referred 32,227 persons to vacancies and effected a total of 30,667 placements. Of these, the placements in regular employment were 18,434 of which 14,334

# POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o—o—o—o—o—o

The ratios of placements to each one hundred applications during the periods under review were 58.4 and 50.6 as compared with 54.2 and 57.7, respectively, during the corresponding month of 1932.

The average number of vacancies reported daily by employers to the Offices of the Service throughout Canada during August, 1933, was 1,198 as compared with 1,146 during the preceding month, and with 1,052 in August a year ago.

The average number of applications for employment received daily by the Offices of the Service during the month under review was 2,096 in comparison with 2,016 in July, 1933, and with 1,808 during August last year.

were of men and 4,100 of women, while placements in casual work totalled 12,233. The number of vacancies reported by employers was 24,490 for men and 7,833 for women, a total of 32,323, while applications for work numbered 56,588, of which 44,543 were from men and 12,045 from women. Reports for July, 1933, showed 28,630 positions available, 50,397 applications made and 27,266 placements effected, while in August, 1932, there were recorded 28,397 vacancies, 48,815 applications for work and 27,355 placements in regular and casual employment.

The following table gives the placements effected by the Offices of the Employment

## REPORT OF THE EMPLOYMENT SERVICE FOR THE MONTH OF AUGUST, 1933

#### NOVA SCOTIA

During the month of August, 1933, positions offered through the Employment Offices in Nova Scotia were over 4 per cent less than in the preceding month, but nearly 165 per cent above the corresponding month last year. There was a decline of nearly 3 per cent in placements when compared with July, but a gain of 171 per cent in comparison with August, 1932. This large gain in placements over August of last year was entirely due to relief work on highway construction, as there was very little change in all other groups, except services, in which a loss was reported. Placements under construction and maintenance numbered 1,054 and in services 253. Of the latter, 209 were of household workers. During the month 500 men and 64 women were placed in regular employment.

#### NEW BRUNSWICK

There was a decline of nearly 2 per cent in the number of positions offered through Employment Offices in New Brunswick during August, when compared with the preceding month, but a gain of nearly 19 per cent in comparison with the corresponding month last year. Similar percentages of change were recorded in placements under both comparisons. The increase in placements over August, 1932, was due mainly to relief work on road construction, although gains were also shown in logging and services. These latter, however, were offset by losses in transportation and manufacturing. Industrial divisions in which most of the placements were effected during the month were: logging, 56; construction and maintenance, 673; and services 404, of which 327 were of household workers. There were 119 men and 74 women placed in regular employment during the month.

#### QUEBEC

The demand for workers, as indicated by orders received at Employment Offices in the Province of Quebec, was nearly 13 per cent higher than in the preceding month, and over 92 per cent above the corresponding month last year. There was a gain also in placements of nearly 9 per cent when compared with July, and of 82 per cent in comparison with August, 1932. This substantial gain over August of last year was due in large measure to increased placements of female workers through offices which were not open in August, 1932, although construction and maintenance, logging and manufacturing also showed improvement. The changes in other groups were nominal only. Placements by industrial divisions included: manufacturing, 127; logging, 137; farming, 46; construction and maintenance, 432; trade, 80; and services, 1,575, of which 1,344 were of household workers. Regular placements numbered 866 of men and 1,195 of women.

#### ONTARIO

Orders received at Employment Offices in Ontario during August called for nearly 2 per cent fewer workers than in the preceding month, but nearly 18 per cent more than during the corresponding month of last year. There was a decline of over 3 per cent in placements when compared with July, but a gain of over 17 per cent in comparison with August, 1932. This gain was principally due to relief work on road construction, although logging, mining and transportation also showed improvement. These increases were partly offset by declines in farming, trade, communication and services. Placements by industrial divisions included: manufacturing, 384; logging, 326; farming, 594; mining, 54; transportation, 86; construction and maintenance, 6,952; trade, 246; and services, 2,961, of which 1,598 were of household workers. There were 3,987 men and 1,201 women placed in regular employment during the month.

#### MANITOBA

During August, 1933, orders listed at Employment Offices in Manitoba called for nearly 65 per cent more workers than in the preceding month, but over 12 per cent fewer than during the corresponding month last year. There was a gain of over 63 per cent in placements when compared with July, but a loss of nearly 13 per cent in comparison with August, 1932. All groups, except logging and transportation, in which nominal gains only were reported, participated in the decline in placements from August of last year, services,

farming and construction and maintenance showing the largest reductions. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 25; farming, 2,143; construction and maintenance, 1,381; and services, 688, of which 594 were of household workers. There were 3,147 men and 388 women placed in regular employment during the month.

#### SASKATCHEWAN

Opportunities for employment, as indicated by orders received at Employment Offices in Saskatchewan during August, were 72 per cent better than in the preceding month, but over 5 per cent less favourable than during the corresponding month last year. Placements were 76 per cent higher than in July, but nearly 6 per cent less than in August, 1932. This reduction was due to fewer placements on farms and in services. Of the gains in other groups, that in construction and maintenance was the largest. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 65; farming, 2,654; construction and maintenance, 401; trade, 58; and services 761, of which 583 were of household workers. During the month 2,729 men and 505 women were placed in regular employment.

#### ALBERTA

There was an increase of nearly 3 per cent in the number of positions offered through Employment Offices in Alberta during August, when compared with the preceding month, but a decline of over 6 per cent in comparison with the corresponding month last year. Placements also were over 6 per cent above July, but over 6 per cent below August, 1932. As in Saskatchewan, farm and service placements were below August of last year and accounted for the decline under this comparison, although there were fewer placements also in all other groups, except construction and maintenance and mining. The gain in construction and maintenance was quite substantial. Placements by industrial divisions included: manufacturing, 45; farming, 1,171; construction and maintenance, 881; and services, 548, of which 463 were of household workers. There were 1,475 men and 406 women placed in regular employment during the month.

#### BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at Employment Offices in British Columbia during August, were nearly 5 per cent better than in the preceding month and nearly 21 per cent above the corresponding month last year. Placements also were

nearly 4 per cent in excess of July and showed a gain of over 20 per cent, in comparison with August, 1932. This increase was due to a large gain in placements under construction and maintenance, as the changes in all other groups were nominal only. Placements by industrial divisions included: manufacturing, 23; logging, 69; farming, 98; mining, 24; construction and maintenance, 2,366; trade, 24; and services 579, of which 427 were of household workers. During the month 1,511 men and 267 women were placed in regular employment.

#### Movement of Labour

During the month of August, 1933, the offices of the Employment Service of Canada made 18,434 placements in regular employment, 10,133 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 189 were granted the Employment Service reduced transportation rate, 133 travelling to centres within the same province as the despatching office, and 56 to other provinces. The reduced transportation rate which is 2.7 cents per mile, with a minimum fare of \$4.00, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Ontario offices issued 90 certificates for reduced transportation during August, 48 provincial and 42 interprovincial. The latter were granted to mine workers conveyed from Timmins to employment in the Winnipeg zone. Within the province Fort William transferred 1 hotel cook, Sudbury 1 blacksmith, and 1 logging camp cook, and Port Arthur 39 bush workers, 4 mine workers and 1 town housekeeper to centres within their respective zones. In addition 1 construction labourer secured a certificate at Hamilton for transportation to North Bay. Workers taking advantage of the Employment Service reduced transportation rate in Manitoba during August were 12 in number, 2 of whom were bound for provincial situations and 10 outside the province. The Winnipeg office was instrumental in all interprovincial transfers despatching 1 town housekeeper, 1 grain elevator worker, 6 bushmen, 1 grinder, and 1 restaurant worker to points within the Port Arthur zone. Included in the provincial movement were 1 barber journeying from St. Boniface, and 1 town housekeeper from Winnipeg to employment within their respective zones. In Saskatchewan 4 persons received certificates for reduced transportation during August, these travelling to provincial

employment. From Prince Albert 1 farm hand was transported to Yorkton, the Regina office sending 2 teachers, and Saskatoon 1 hotel porter to employment within their own zones. The labour movement from Alberta centres during August comprised the transfer of 59 workers, 55 within the province and 4 outside. The Edmonton office was responsible for the assignment provincially of 4 farm hands to the Calgary zone, and of 26 farm hands, 4 farm domestics, 9 mine workers, 3 mill hands, 3 carpenters, 1 cookee, and 3 hotel workers to various centres within the Edmonton zone. In addition, the Calgary office transferred 1 farm hand and 1 kitchen worker within its own zone. Persons going outside the province travelled from Edmonton and included 1 harvester and 1 farm household worker journeying to the Saskatoon zone, and 1 farm hand and 1 farm domestic to the North

Battleford zone. The transfers from British Columbia centres during August were entirely provincial and included 24 workers. Of these, 23 secured their certificates for reduced transportation at the Vancouver office, 1 steel sharpener travelling to Kamloops, 1 mine machinist to Nelson, 1 farm housekeeper to Penticton, 1 farm hand and 1 farm housekeeper to Prince Rupert, and 13 mine workers, 2 farm hands, 1 cook, and 2 hotel workers to employment in the Vancouver zone. From Prince Rupert also 1 farm hand was sent to a point within the same zone.

Of the 189 workers who took advantage of the Employment Service reduced transportation rate during August, 65 were conveyed by the Canadian National Railways, 65 by the Canadian Pacific Railway, 42 by the Temiskaming and Northern Ontario Railway, 16 by the Pacific Great Eastern Railway, and 1 by the Northern Alberta Railway.

#### (4) Building Permits Issued in Canada During August, 1933

There was a seasonal decline in the value of the building permits issued during August, 1933, as compared with July, 1933, while in comparison with August last year, there was also a considerable reduction; during the month under review, the 61 co-operating centres authorized building estimated to cost \$1,927,882, as compared with \$2,148,497 in July, 1933, and \$3,823,251 in August, 1932. There was, therefore, a decrease of 10.3 per cent in the first comparison, and of 49.6 per cent in the second. The aggregate value of the building authorized in the first eight months of this year, viz, \$14,117,473, was lower than in 1932 and other years of the record; in considering these data, however, it should be noted that there has also been a very significant decline in wholesale costs of building materials, the Bureau's index, based on the 1926 average as 100, having fallen from 143.8 in the first eight months of 1920, when building costs were at their peak, to 77.2 in the period, January-August, 1933, or by 46 per cent.

Some 50 cities furnished detailed statistics showing that they had issued about 200 permits for dwellings estimated to cost over \$600,000, and 1,400 permits for other buildings valued at approximately \$1,150,000. During July, authority was granted for the erection of some 265 dwellings and 1,500 other buildings, estimated at about \$800,000 and \$1,000,000, respectively.

Nova Scotia, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia reported

gains as compared with July, 1933; the percentage gain of 51.6 in Saskatchewan and the actual gain of \$129,944 in Ontario were most pronounced. Of the percentage reductions elsewhere indicated, that of 76.3 per cent in New Brunswick, and of the actual reductions, that of \$365,233 in Quebec, were greatest.

Nova Scotia also reported a slightly higher aggregate of building permits issued than in August of last year, there being an increase of \$10,805, or 14.7 per cent. Declines in this comparison were recorded in the remaining provinces, the percentage decline of 78.6 in Saskatchewan and the actual decline of \$763,248 in Quebec being most notable.

Of the larger cities, Toronto, Winnipeg and Vancouver showed improvement as compared with July, 1933, but depreciation as compared with August, 1932, while Montreal reported a decrease in both comparisons. Of the other centres, Halifax, Sydney, Brantford, Chatham, Fort William, Hamilton, Oshawa, Ottawa, Owen Sound, Port Arthur, St. Thomas, Sarnia, Sandwich, Woodstock, Calgary and Kamloops recorded gains in both comparisons.

*Cumulative Record for First Eight Months, 1920-33.*—The following table gives the value of the building authorized by 61 cities during August and in the first eight months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first eight months of the years since 1920 are also given (average 1926=100).

| Year      | Value of permits issued in August | Value of permits issued in first eight months | Indexes of value of permits issued in first eight months (1926=100) | Average indexes of wholesale prices of building materials in first eight months (1926=100) |
|-----------|-----------------------------------|---|---|--|
|           | \$                                | \$  |   |  |
| 1933..... | 1,927,882                         | 14,117,473                                    | 12.9  | 77.2   |
| 1932..... | 3,823,251                         | 32,576,464                                    | 29.8  | 87.3   |
| 1931..... | 8,201,879                         | 78,194,996                                    | 71.6  | 83.0   |
| 1930..... | 14,029,564                        | 115,268,330                                   | 105.5   | 93.4   |
| 1929..... | 21,582,221                        | 168,894,072                                   | 154.6   | 99.2   |
| 1928..... | 17,448,542                        | 145,247,485                                   | 133.0   | 96.4   |
| 1927..... | 29,478,378                        | 126,690,292                                   | 116.0   | 96.2   |
| 1926..... | 11,672,599                        | 109,211,942                                   | 100.0   | 100.7  |
| 1925..... | 9,511,003                         | 88,223,328                                    | 80.8  | 103.1  |
| 1924..... | 9,406,733                         | 81,762,083                                    | 74.9  | 109.0  |
| 1923..... | 11,425,031                        | 97,551,074                                    | 89.3  | 111.8  |
| 1922..... | 18,158,932                        | 105,181,416                                   | 96.3  | 103.4  |
| 1921..... | 10,928,039                        | 77,665,614                                    | 71.1  | 128.6  |
| 1920..... | 10,805,846                        | 86,303,601                                    | 79.0  | 143.8  |

The aggregate for the first eight months of this year was less than in earlier years of the record, but as already stated, the average index number of wholesale prices of building materials was also much lower than in any other year of this record.

During September a total of 3,086 accidents were reported to the Ontario Workmen's Compensation Board in the industries in Schedule 1 of the Act, 17 of which were fatal cases; in Schedule 2 industries 167 accidents were reported, including 5 fatal cases; and 209 accidents to employees of the Crown, one of which was fatal, were reported during the month, making in all 3,462, of which 23 were fatal.

The Government of Victoria, Australia, proposes to introduce at the next session of the Legislature an amendment to the Children's Welfare Act to provide that any child engaging in street trading without a licence, after having been warned to desist, shall be deemed to be a "neglected child." This amendment will enable children engaged in street trading, or who pretend to be so engaged as a cover for begging, to be suitably dealt with by committal to the care of the Children's Welfare Department.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, September, 1933, summarized the employment situation as follows:—

Employment at August 21 showed a slight improvement as compared with a month before and a marked improvement as compared with August, 1932. There was a further improvement in iron and steel manufacture, engineering, shipbuilding and ship-repairing, in the woollen, linen, hosiery and lace industries and in shipping and hotel and boarding house services. Employment also improved in building, coal mining, the iron and steel tube and electrical apparatus industries, and cocoa, chocolate, etc. manufacture; while in the cotton and jute industries the termination of local holidays at certain centres led to a reduction of the numbers registered as unemployed.

On the other hand, employment further declined in the tailoring, dress-making, and boot and shoes industries, and there was also some decline in tinplate, pottery, and glass bottle manufacture.

In the south of England employment showed a general improvement and was fair to moderate on the whole. In the Midlands and the Northern Counties there was little change, and employment was slack in the former area and bad in the latter. In Scotland, in Wales

and in Northern Ireland employment showed a distinct improvement, but was still bad.

Among the workpeople, numbering approximately 12,808,000, insured against unemployment in Great Britain and Northern Ireland, and working in practically every industry except agriculture and private domestic service, the percentage unemployed at August 21, 1933 (including those temporarily stopped as well as those wholly unemployed), was 19.2, as compared with 19.6 at July 24, 1933, and with 23.0 at August 22, 1932. The percentage wholly unemployed at August 21, 1933, was 15.4, as compared with 15.6 at July 24, 1933, while the percentage temporarily stopped was 3.8 as compared with 4.0. For males alone, the percentage at August 21, 1933, was 22.5, and for females, 10.5; at July 24, 1933, the corresponding percentages were 22.8 and 11.0.

At August 21, 1933, the number of persons on the registers of Employment Exchanges in Great Britain was 1,843,517 wholly unemployed, 483,432 temporarily stopped, and 84,188 normally in casual employment, making a total of 2,411,137. This was 31,038 less than a month before, and 448,691 less than a year before. The total included 1,984,930 men, 62,365 boys, 320,667 women and 43,175 girls.

In Great Britain and Northern Ireland, the total number of persons on the Registers of Employment Exchanges at August 21, 1933, was 2,474,062.

### United States

Index numbers showing the trend of employment and pay rolls in manufacturing industries are computed monthly by the Bureau of Labour Statistics of the U.S. Department of Labour from reports supplied by representative establishments in 89 of the principal manufacturing industries of the United States and covering the pay period ending nearest the 15th of the month. These indexes of employment and pay rolls are figures showing the percentage represented by the number of employees or weekly pay rolls in any month compared with employment and pay rolls in a selected base period. The year 1926 is the Bureau's index base for manufacturing industries, and the average of the 12 monthly indexes of employment and pay rolls in that year is represented by 100 per cent.

The most recent compilation indicates an increase of 6.4 per cent in factory employment in August as compared with July. The August employment index was 71.6 as compared with 67.3 in July. Manufacturing payrolls increased 11.6 per cent over the month interval, the index rising from 46.5 in July to 51.9 in August. A comparison of the August 1933 employment index with the August 1932 employment index (56.0) shows an increase of 27.9 per cent in factory employment over the 12-month period, while the August 1933 pay-roll index compared with the August 1932 pay-roll index (36.3) shows a gain of 43 per cent in factory pay-rolls over the year interval.

August is the fifth consecutive month in which increases in factory employment and pay-rolls have been reported. The increases in employment during the preceding four months were widespread. The number of industries reporting increased employment in August exceeded that of previous months, 81 of the 89 industries surveyed showing increased employment over the month interval. Increased pay-rolls in August, as compared with July, were shown in 83 of the 89 industries. These changes in employment and pay-rolls in August, 1933, are based on reports supplied by 18,008 establishments in 89 of the principal manufacturing industries of the United States. These establishments reported 3,187,674 employees on their pay-rolls during the pay period ending nearest August 15 whose combined weekly earnings were \$60,351,490. The employment reports received from these co-operating establishments cover approximately 50 per cent of the total number of wage earners in all manufacturing industries of the country.

Employment and pay-rolls ordinarily show but little change between July and August, the average percentage of increase in employment

between July and August during the past 10 years having been 0.2 per cent and in pay-rolls 1.5 per cent. These increases therefore of 6.4 per cent in employment and 11.6 per cent in pay-rolls in August of the present year are of unusual proportion and are due largely to the adoption of the NRA codes by numerous co-operating establishments.

The 8 industries in which decreases in employment were reported in August were aircraft, flour, beverages, shirts and collars, knit goods, plumbers' supplies, electric-railroad repair shops, and engines. These decreases ranged from 3.8 per cent in the aircraft industry to 0.5 per cent in engines.

Each of the 14 groups of manufacturing industries reported gains in employment and pay-rolls between July and August, the non-ferrous metals group reporting the most pronounced gains in employment, 12.4 per cent, while the iron and steel, machinery, and rubber products groups reported gains of over 10 per cent in number of workers.

Among the 81 industries in which increased employment was reported between July and August, the largest increase was a seasonal gain of 55.2 per cent in the beet and sugar industry. The locomotive industry reported a gain of 32.9 per cent and increases of more than 20 per cent in employment were reported in the confectionery, millinery, textile machinery, and typewriter industries. Twenty-six industries reported gains in employment between July and August ranging from 10 to 20 per cent, among which were machine tools (17.5 per cent), radios (15 per cent), rayon (12.3 per cent), iron and steel and foundry and machine-shop products (12.2 per cent each), stamped ware (11.6 per cent), slaughtering and meat packing and paper boxes (10.5 per cent each), chemicals (10.3 per cent), and ship-building (10.1 per cent). Other industries of major importance reporting substantial gains in employment over the month interval were silk goods, cotton goods, dyeing and finishing textiles, automobiles, paper and pulp, leather, boots and shoes, agricultural implements, electrical machinery, furniture, pottery, and a number of industries allied with building construction, i.e., sawmills, brick, glass, cement, steam fittings, and structural ironwork.

*Non-Manufacturing Industries.*—Fifteen of the 16 non-manufacturing industries surveyed by the Bureau of Labour Statistics reported increased employment in August 1933, as compared with July, and 13 industries reported increased pay rolls.

Seasonal activity in the canning and preserving industry was reflected in the gain of 47.1 per cent in employment and 47.9 per cent in pay rolls in August. The metalliferous

mining industry reported an increase of 11.5 per cent in employment, combined with an increase of 15.4 per cent in pay rolls. The building construction industry reported increases of 9 per cent in employment and 9.8 per cent in pay rolls over the month interval, the increases appearing in practically every locality covered by the building construction survey. The anthracite mining and bituminous coal mining industries reported gains in employment of 8.8 per cent and 8.6 per cent respectively. These increases in employment were accompanied by increases of 22 per cent in pay rolls in anthracite mining and 28.8 per cent in bituminous coal mining. Both industries reported increases in average hours worked per week in August, as well as increased hourly earnings. Employment in the retail trade group increased 4.7 per cent from July to August, and pay rolls increased 7.9 per cent, numerous establishments reporting better business, special sales and the effect of the N.R.A. code. The quarrying and non-

metallic mining industry reported increases of 4.2 per cent in employment and 5.1 per cent in pay rolls, and the wholesale trade group reported increases of 3.7 per cent in employment and 2.8 per cent in pay rolls. The laundry and the crude petroleum producing industries reported gains in employment of 2.1 per cent each. The hotel industry reported a gain of 2 per cent in number of employees between July and August, and the power and light, electric railroad, dyeing and cleaning, and banks-brokerage-insurance-real estate groups reported increases in employment of less than 1 per cent. The increases in employment in the two last named groups were coupled with slight declines in pay roll totals. The telephone and telegraph industry was the only industry reporting decreases in both employment and pay rolls, a decrease of six-tenths of 1 per cent being reported in employment between July and August, combined with a decrease of nine-tenths of 1 per cent in pay rolls.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding the contracts executed by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government with respect to contracts "for construction, remodelling, repair or demolition of any work" is set forth in an Act of Parliament adopted on May 30, 1930, entitled "The Fair Wages and Eight-Hour Day Act" (chapter 20-21, Geo. V). The full text of this measure appeared in the LABOUR GAZETTE, April, 1930, page 383. The Fair Wages and Eight-Hour Day Act provides as follows:

3. (1) Every contract made hereafter with the Government of Canada for construction, remodelling, repair or demolition of any work shall be subject to the following conditions respecting wages and hours:

(a) All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable;

(b) The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in

Council may otherwise provide, or except in cases of emergency, as may be approved by the Minister.

(2) The provisions of this section shall not apply to persons employed in the fabrication or manufacture of materials, supplies or equipment for use in the work contemplated where such fabrication or manufacture is carried on in any established plant or factory other than a plant or factory established for the purposes of the work contemplated.

The Fair Wages Policy was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Order in Council of April 9, 1924. The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain before hand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions for the protection of the workmen employed, which are sanctioned by the foregoing Orders in Council.

It is further provided in the foregoing Orders in Council that "all contracts for the

manufacture and supply to the Government of Canada of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores; and any other articles and things hereinafter designated by the Governor in Council" must contain provisions for the observance of the current wages rates and working hours in the district, or, in the absence of any such current standards, fair and reasonable rates and working hours. These conditions, which are referred to in the Orders in Council as "B" conditions (the conditions of the Fair Wages Orders in Council with reference to building and construction works being designated as "A" conditions), include the following Fair Wages Clause:

All workmen, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rate in such district, then a fair and reasonable rate, and shall work such hours as those fixed by the custom of the trade as respects hours in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district then fair and reasonable hours, except for the protection of life and property, or on due cause shown to the satisfaction of the Minister of Labour. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade or fair and reasonable hours it shall be determined by the Minister of Labour, whose decision shall be final; payment may also be withheld of any moneys which would otherwise be payable to the Contractor until the Minister of Labour's decision has been complied with.

By the term "current wages" and the term "hours of labour fixed by the custom of the trade" in the foregoing are meant respectively the standard rates of wages and hours of labour either recognized by signed agreements between employers and workmen in the district from which the labour required is necessarily drawn or actually prevailing, although not necessarily recognized by signed agreements.

Both in the case of contracts for building and construction work, and in the "B" conditions sanctioned by Orders in Council applicable to contracts for the manufacture of certain classes of supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied

or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed claim therefore may be filed with the Minister of the Department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of certain classes of supplies listed in the Fair Wages Orders in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

During the past month statements were received in the Department of Labour show-

ing that the following contracts, containing fair wages conditions, have been executed by the Governments of Canada recently:

#### DEPARTMENT OF FISHERIES

##### *Contract in Group "A" (Construction, etc.)*

Construction of a 50 foot patrol vessel for the Department of Fisheries, equipped with a 160 h.p. Gleniffer Diesel engine. Name of contractors, Messrs. John McLean & Sons, Mahone Bay, N.S. Date of contract, September 16, 1933. Amount of contract, \$15,500. The General Fair Wages Clause was inserted in the contract.

#### DEPARTMENT OF PUBLIC WORKS

##### *Contracts in Group "A" (Construction, etc.)*

The Workmen's Compensation Board of British Columbia recently published a series of regulations for the protection of workmen employed in compressed air work other than diving. The regulations appear in the *British Columbia Gazette*, September 28, 1933. Among the other provisions it is laid down that no pressure greater than 50 pounds per square inch shall be permitted except in emergencies; all men undertaking caisson work shall first be examined by a physician and shall be re-examined after the first shift. The regulations deal with air pressure; decompression; compressor plants; locks and working chamber; gauges; lighting; communication; forbid use of tobacco and intoxicating liquor; medical attendance, etc.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Food, Drink and Tobacco

#### WINNIPEG, MANITOBA.—CERTAIN BAKERIES AND COMMITTEES OF THEIR EMPLOYEES.

Agreements made following the strike at one shop called by the Food Workers' Industrial Union, affiliated with the Workers' Unity League of Canada, reported on page 985 of this issue, to be in effect from various dates in September 1933.

Agreements provide for recognition of shop committee, reduction in hours to 8 per day in all shops, with no changes in weekly wage rates in some shops and with increases in wages in other shops. In those shops where increases were granted, wages now average from \$45 to \$18 per week for bakers and from \$8 to \$10 for helpers (increases of \$3 or \$4 per week over former rates).

#### VANCOUVER, B.C.—CERTAIN BAKERIES AND THE BAKERY AND CONFECTIONERY WORKERS INTERNATIONAL UNION OF AMERICA, LOCAL No. 468.

Agreement to be in effect from March 1, 1933, to February 28, 1934 or until 30 days' notice from either party.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, May 1932, page 611, and September, 1931, page 1035, with the following exceptions:

Wages per week: doughman and ovenman \$29, bench hands \$26, helpers \$15 to \$18, apprentices from \$12 during first year to \$21 during fourth year, shippers \$28, assistant shippers and checkers \$16 and \$18, finishers and cake wrappers \$16, (reductions of \$1.50 to \$4 per week from the previous rates in effect). Jobbers \$5 per day.

### Manufacturing: Pulp, Paper and Paper Products

#### IROQUOIS FALLS, SAULT STE MARIE, STURGEON FALLS, ESPANOLA, AND PORT ARTHUR, ONTARIO.—ARITBI POWER AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND OTHER UNIONS.

The agreements which were summarized in the *LABOUR GAZETTE*, December, 1931, and

November, 1932, for Iroquois Falls; in May, 1926, December, 1931 and November, 1932, for Sault Ste. Marie, Sturgeon Falls and Espanola; and in April, 1930, and November, 1932, for Port Arthur (The Thunder Bay Company Limited), were further amended to be in effect from June 1, 1933, to May 1, 1934, with the following exception:

Wages: wage rates of from 39 to 64 cents per hour to be reduced 7 per cent, rates of 65 cents per hour and upwards  $7\frac{1}{2}$  per cent; the rate of 38 cents to be reduced to 36 cents, which is established as the minimum rate. The minimum rate for mechanics is 60 cents per hour.

### Manufacturing: Printing and Publishing

#### WINDSOR, ONTARIO.—PUBLISHERS OF A DAILY NEWSPAPER AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 553.

Agreement to be in effect from April 1, 1933 to March 31, 1934, and thereafter from year to year until notice.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, November, 1932, page 1222, September, 1931, page 1036, and July, 1929, page 803, with the following exceptions:

Wages for journeymen: 80 cents per hour for day work and 85 cents for night work (reductions of 15 cents and  $18\frac{1}{2}$  cents per hour respectively). Shifts working partly during hours of both day and night work to be considered night shifts. The wage scale for apprentices is to be based on the journeymen's scale, from 100/384 of journeyman's scale during first six months with increases each six months to 300/384 of journeymen's scale during second half of fifth year.

#### REGINA, SASK.—DAILY NEWSPAPER PUBLISHERS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL No. 75.

Agreement to be in effect from May 2, 1933, to May 2, 1934.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, July, 1932, page 818 and July, 1930, page 841, with the following exception:

Wages for journeymen pressmen: 76 cents per hour (a reduction of 12 cents per hour from the previous rate). Night scale \$3 per week extra over day scale, as before.

Wages for apprentices from \$13.15 per week during first year to \$26.45 during fifth year. Apprentices on night shift \$2 per week over day scale.

#### REGINA, SASK.—CERTAIN JOB PRINTING OFFICES AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL No. 75.

Agreement to be in effect From May 1, 1933, to April 30, 1934.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, September, 1932, page 1019, and July, 1930, page 842, with the following exception:

Wages per week: journeymen cylinder pressman \$34.65 (a reduction of \$4.95) cylinder assistant \$25.29 (a reduction of \$3.61), cylinder assistant working part time on cylinder and platens \$20.43 (a reduction of \$2.92), platen pressman \$32.29 (a reduction of \$4.61). The

overtime rate of time and one half is not to be in effect until after 44 hours work is completed in the week.

**EDMONTON, ALBERTA.—CERTAIN JOB PRINTING OFFICES AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 604.**

Agreement to be in effect from May 16, 1933 to May 15, 1934.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, September, 1932, page 1019, March, 1931, page 349, and May, 1927, page 556, with the following exception:

Wages per hour for journeymen: 85 cents for day work (a reduction of 11 cents per hour), 90 cents for night work (a reduction of 12½ cents per hour).

Wages for apprentices from 25 per cent of journeyman's rate during first year to 65 per cent during fifth year.

Time and one half to be paid for all of the eight holidays.

Hours are unchanged at 44 per week for day work and 42 for night work.

**CALGARY, ALBERTA.—TWO NEWSPAPER PUBLISHERS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL No. 201.**

Agreement to be in effect from May 16, 1933 to May 15, 1934. (Previous agreements were summarized in the *LABOUR GAZETTE*, September, 1932, page 1019 and October, 1929, page 1159.)

Wages for journeymen pressmen: 85 cents per hour for day work (a reduction of 11 cents per hour). Night scale \$2.40 per week additional and lobster shift scale \$4 per week over day scale.

Wages for apprentices from 25 per cent of journeymen's scale during first two years to 65 per cent during fifth year.

Hours are unchanged at 45 per week for day work and 42 for night work.

**CALGARY, ALBERTA.—CERTAIN JOB PRINTING OFFICES AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL No. 201.**

The agreement which came into effect April 15, 1929, and which was summarized in the *LABOUR GAZETTE*, June, 1929, page 676 and has been renewed from year to year, remains in effect until notice with the following exception:

Wages were reduced October 1, 1932, by 8 per cent, making the wage rate \$40.50 for cylinder journeymen and \$36.80 for journeymen for 2 automatic or 3 or 4 hand-fed presses.

### Manufacturing: Fur, Leather and Products

**TORONTO, ONTARIO.—CERTAIN EMPLOYERS AND THE INTERNATIONAL FUR WORKERS' UNION, LOCALS NOS. 35, 40, 65 AND 100.**

Amendments to agreements which were summarized in the *LABOUR GAZETTE*, January, 1933, pages 93 and 94, to be in effect from July 15, 1933, to April or June, 1934 according to dates of the original agreements.

A strike (reported on page 768 of the August issue of the *LABOUR GAZETTE*) occurred in July owing to alleged violations of the agreements then in force. Following this strike, individual agreements were made with

the various shops, which provide for increases in wages on the rates then being paid which had been reduced from the rates provided in the original agreements. These increases restored the original agreement rates, except in some cases.

The amendments made July 15, 1933, also provide that the employers pay to the union two per cent of the weekly payroll which is to apply for the Fur Workers' Unemployment Insurance Fund of Toronto.

### Manufacturing: Textiles and Clothing

**MONTREAL, QUEBEC.—CERTAIN MANUFACTURERS OF DRESSES AND THE MONTREAL DRESS CUTTERS' UNION.**

Agreement signed following the strike noted in the September issue to be in effect from August, 1933, to February, 1934, or for another 6 months if no notice given.

Only union members to be employed and through the union. Regular employees only to be discharged by making complaints to the union who will exchange any such cutters justly complained of.

No work to be sent to be cut at an outside shop except with the consent of the union. The employer recognizes the shop chairman or shop committee and agrees to meet authorized representatives of the union to adjust any complaints.

Hours: 44 per week with a 5-day week.

Overtime: time and one-half. No overtime in slack season, and in busy season not to exceed 15 hours per week.

Wages to be according to average ability and efficiency. Minimum wage for markers, graders and head cutters \$30 per week, shear choppers and machine cutters \$20, assistant spreaders and separators \$15.

In dull times, when there is not sufficient work for all cutters, the available work in the shop to be divided as equally as possible among the different classes of cutters.

**MONTREAL, QUEBEC.—CERTAIN EMBROIDERY COMPANIES AND THE MONTREAL BONNAZ EMBROIDERY WORKERS UNION (OF THE INTERNATIONAL LADIES' GARMENT WORKERS UNION).**

Agreement, made following strike reported on page 986 of this issue, to be in effect from September 19, 1933 to August, 1934.

Only union members to be employed in operating Bonnaz machines and sample making embroidery. All shops to have shop chairmen elected by the employees and the employers agree to meet authorized representatives of the union to settle any complaints. Regular workers may only be discharged after notice when the reason is given the union.

Hours: 44 per week.

Overtime: time and one-half. No overtime in the slack season.

Wages to be paid according to average ability and efficiency.

Minimum wage of Bonnaz operators \$25 per week, plain stitch operators \$18.

In dull times when there is not sufficient work for all operators, the work will be divided as equally as possible and shall be apportioned by the shop chairman, but all workers required to come in the dull season shall be secure with at least a half day's pay.

**TORONTO AND HAMILTON, ONTARIO.—CERTAIN CAP MANUFACTURERS AND THE CLOTH HAT, CAP AND MILLINERY WORKERS INTERNATIONAL UNION, LOCAL No. 41.**

Agreement made following the strike reported on page 984 of this issue, to be in effect from September, 1933. Notice of change must be given by either party.

Only union members to be employed if available, and they cannot be discharged without submitting the case to a board of arbitration. If union members are not available, other workers employed must join the union or they cannot be regularly employed. The firm will not give out any work to be made in a non-union shop.

Hours: 8 per day, 5 days per week, a 40-hour week.

Overtime to be worked only if necessary and with the consent of the union. Overtime to be paid at time and one-half.

Piece work prices to be agreed on between the manufacturers and the price committee selected by the employees and also a representative of the union.

When full time work for all employees is not available, arrangements for the equal division of work to be made between the firm and the shop committee.

### Construction: Buildings and Structures

**OTTAWA, ONTARIO.—CERTAIN CONTRACTORS AND THE OPERATIVE PLASTERERS AND CEMENT FINISHERS INTERNATIONAL ASSOCIATION, LOCAL No. 124.**

Agreement to be in effect from August 7, 1933, to April 30, 1934.

Foreman must be a union member. A union official may visit the jobs on union business.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half to 10 p.m.; after 10 p.m. and all work on Sundays and holidays, double time.

Wages for journeymen: 75 cents per hour (a reduction of 10 cents per hour from the 1932 rate). Foremen at least 10 cents per hour extra.

No union member to work over open salaried men.

For work out of the city, full 8 hours to be worked and travelling time to be paid for at straight time rates.

Only one apprentice to be employed, not to be over 18 years old when starting. Apprenticeship to be four years.

**HAMILTON, ONTARIO.—CERTAIN CONTRACTORS AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS, LOCAL No. 205.**

The agreement which came into effect May 1, 1932, and which was summarized in the LABOUR GAZETTE, October, 1932, page 1112, was renewed without change for another year ending April 30, 1934.

Wages and hours are unchanged at 70 cents per hour with a 44-hour week.

**HAMILTON, ONTARIO.—CERTAIN MASTER PLUMBERS AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL No. 67.**

The agreement which was to be in effect from May 1, 1933, to April 30, 1934, and which was

summarized in the LABOUR GAZETTE, July, 1933, page 733, was amended August 8, 1933, following the strike reported on page 902 of the September issue, to provide for a wage rate of 80 cents per hour (a reduction of 10 cents per hour).

**ST. CATHARINES, ONTARIO.—CERTAIN CONTRACTORS AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS, LOCAL No. 407.**

The agreement which came into effect April 1, 1929, and which was summarized in the LABOUR GAZETTE, October, 1929, page 1161, was renewed for the year April 1, 1933, to April 1, 1934, with the following exception:

Wages for journeymen: 65 cents per hour. (The 1929 agreement provided for 80 cents.)

### Transportation and Public Utilities: Electricity and Gas

**PORT ARTHUR, ONTARIO.—PUBLIC UTILITIES COMMISSION OF THE CITY OF PORT ARTHUR AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 339, AND ALL OTHER EMPLOYEES OF THE ELECTRIC LIGHT AND TELEPHONE DEPARTMENTS OF THE CITY.**

The agreement came into effect May 1, 1931, was summarized in the LABOUR GAZETTE, August, 1931, page 934, and November, 1930, page 1335. A new agreement came into effect May 1, 1932, to be in effect to May 1, 1933, and was renewed without change to April 30, 1934.

The wage rates which came into effect May 1, 1932, and which are to be in effect to April 30, 1934, were approximately 10 per cent lower than the 1931 rates and are as follows: sub-foreman 81 cents per hour, first class linemen 79½ cents, second class linemen from 58½ to 73 cents, groundmen from 45 to 62 cents, cable splicers 84½ cents, cable splicers' helpers from 58½ to 73 cents.

**FORT WILLIAM, ONTARIO.—HYDRO ELECTRIC COMMISSION OF THE CITY OF FORT WILLIAM, THE CITY OF FORT WILLIAM PUBLIC UTILITIES COMMISSION AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 339, AND ALL OTHER EMPLOYEES OF THE HYDRO ELECTRIC COMMISSION AND THE TELEPHONE DEPARTMENT.**

The agreement which came into effect May 1, 1931, and was summarized in the LABOUR GAZETTE, August, 1931, page 934, was renewed practically without change from May 1, 1932, to May 1, 1933, although certain percentages of wages were contributed by employees to relief funds during that year.

The agreement for the year May 1, 1933, to April 30, 1934, is similar to the 1931 agreement with the exception of the wage scale which is reduced approximately from 5 to 10 per cent, making the rates as follows:

Wages per hour: sub-foreman 81 cents, journeymen linemen 79½ cents, linemen 60 cents during first year, 69½ cents during second year and 73 cents during third year, cablemen 84½ cents, cablemen's helpers 73 cents. Wages per month: line foreman and wire chief \$189, assistant wire chief \$165.50, wire chief helper \$124.50, troubleman \$160, meter foreman \$175,

meter testers and installers \$149.50, meter installers \$140, meter readers \$104.50 during first year, \$114 during second year and \$120.50 during third year, chief operator \$165.50, operators from \$104.50 during first year to \$132.20 during fourth year.

### **Transportation and Public Utilities: Local Transportation**

**WINNIPEG, MANITOBA.**—A CERTAIN BAKERY AND THE DRIVERS EMPLOYED BY THEM.

(This Bakery is one of those included above under the heading Manufacturing: Food, Drink and Tobacco, as having an agreement with its bakers.)

Agreement, made following the strike reported on page 985 of this issue, to be in effect from September 20, 1933.

Wages to be \$13 to \$15 per week.

One week's notice by either party of terminating employment.

The total credit limit which each driver can allow to his customers is increased, but any credit issued by drivers above this limit is to be deducted from their weekly wages.

### **Transportation and Public Utilities: Street and Electric Railways**

**MONTREAL, QUEBEC.**—MONTREAL TRAMWAYS COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, LOCAL NO. 790.

The agreement which came into effect January 1, 1930, to be in effect until June 30, 1933, was printed in full in the *LABOUR GAZETTE*, March, 1930, page 328. This agreement was amended to be in effect from January 1, 1933, to December 31, 1933, and the agreement as so amended to continue in effect from year to year subject to notice from either party for change at the end of any calendar year. This amendment provides for certain changes in allowances for completed runs, for limiting the number of hours work allowed any one spare man and for the following changes in hours and wages:

New working schedules to be put in force whereby conductors and motormen will be limited as nearly as possible to nine hours per day and the understanding whereby such men are restricted to working six days a week is abolished.

Wages of all employees working on an hourly basis to be reduced 4 cents per hour. Wages and salaries of all employees working on a monthly basis to be reduced 10 per cent.

### **Transportation and Public Utilities: Telegraphs and Telephones**

**PORT ARTHUR, ONTARIO.**—THE PUBLIC UTILITIES COMMISSION OF THE CITY OF PORT ARTHUR AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL NO. 339, AND ALL OTHER EMPLOYEES OF THE ELECTRIC LIGHT AND TELEPHONE DEPARTMENTS OF THE CITY OF PORT ARTHUR.

This agreement which includes employees of the Telephone Department is summarized above under the heading: Transportation and Public Utilities: Electricity and Gas.

**FORT WILLIAM, ONTARIO.**—HYDRO ELECTRIC COMMISSION OF THE CITY OF FORT WILLIAM, THE CITY OF FORT WILLIAM PUBLIC UTILITIES COMMISSION AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL NO. 339, AND ALL OTHER EMPLOYEES OF THE HYDRO ELECTRIC COMMISSION AND THE TELEPHONE DEPARTMENT.

This agreement which includes employees of the Telephone Department is summarized above under the heading: Transportation and Public Utilities: Electricity and Gas.

**MANITOBA TELEPHONE SYSTEM AND THEIR EMPLOYEES REPRESENTED BY THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL NO. 1037.**

An agreement between these two parties came into effect May 1, 1930, to be in effect to April 30, 1931, and till notice. The agreement and wage schedule was similar to the memorandum of working conditions and wage schedule for employees of the Plant Department of the System, which was summarized in the *LABOUR GAZETTE*, November, 1929, page 1286, in so far as that memorandum applied to linemen, cable splicers, etc. and their apprentices, but not including inside telephone workers such as switchmen, installers, testers, etc. This agreement was renewed for the calendar year 1932, with a reduction in wages of 7 per cent. The agreement was again renewed from April, 1933, to April 30, 1934, continuing the reduction of 7 per cent from the 1930 rates, and also providing that regular hours be changed from 44 to 40 per week, to be worked in 5 days. Should it be necessary to work on Saturday mornings, however, straight time to be paid.

The latest official returns show that on March 31, 1933, there were 761,288 licensed radio receiving sets in Canada, an increase over March 31, 1932, of 162,930 sets. The province of Ontario has the largest number with 340,347, or about one for every ten of the province's population. Quebec comes next with 195,389, followed by British Columbia with 61,368, Manitoba with 47,980, Alberta with 38,380, Saskatchewan with 32,367, Nova Scotia with 26,824, New Brunswick with 16,908, Prince Edward Island with 1,484, and the Yukon and Northwest Territories with 241.

The President of the United States has established a Central Statistical Board under the authority vested in him by the National Industrial Recovery Act. The object of the Board is to assist the Administration in watching the progress of national industrial recovery and the Board has the power to appraise and advise upon all schedules of all Government agencies engaged in the primary collection of statistics required in carrying out the purposes of the National Industrial Recovery Act, to review plans for tabulation and classification of statistics and to promote the co-ordination and improvement of the statistical services involved.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1933

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was toward slightly lower levels, both the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices declining, the former mainly because of the lower cost of foods, chiefly potatoes, and the latter in large measure because of declines in the prices of grains, milled products and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.24 at the beginning of September as compared with \$7.43 for August. Comparative figures for earlier dates are \$6.98 for September, 1932; \$11.64 for September, 1929; \$10.94 for September, 1926; \$10.28 for September, 1922; \$16.92 for June, 1920 (the peak); and \$7.83 for September, 1914. The most important change during the month was a fall in the cost of potatoes, while beef, mutton, butter and flour were also lower. Pork, fresh eggs, milk and bread cost somewhat more than in the previous month. Including the cost of fuel and rent with that of foods the total budget averaged \$15.78 at the beginning of September as compared with \$15.96 for August. Figures for earlier dates are \$15.41 for June, 1933 (the low point); \$16.34 for September, 1932; \$21.90 for September, 1929; \$21.15 for September, 1926; \$20.90 for September, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.33 for September, 1914. Fuel was slightly higher owing to increases in the price of anthracite coal in some localities. Rent was unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics was again slightly lower at 68.9 for September as compared with 69.4 for August; 63.6 for February (the low point); 65.9 for September, 1932; 97.8 for September, 1929; 98.5 for September, 1926; 94.4 for September, 1922; 164.3 for May, 1920 (the post war peak); and 67.2 for September, 1914. One hundred and two prices quotations were lower, eighty-four were higher and three hundred and sixteen were unchanged.

In the grouping according to chief component materials three of the eight main groups were lower and five were higher. The Vegetable and Vegetable Products group and the Non-Ferrous Metals and their Products group declined, the former mainly because of lower prices for wheat, oats, barley and milled products, and the latter chiefly because of lower quotations for aluminium, copper, lead and zinc. The Chemicals and Allied Products

group was also fractionally lower. The groups which advanced were: the Animals and their Products group, because of higher prices for calves, hogs, eggs, fresh milk and cheese which more than offset lower prices for steers, lambs, hides and furs; the Fibres, Textiles and Textile Products group, because of higher quotations for certain cotton goods, raw wool and worsted cloth yarns which more than offset lower prices for raw cotton, jute and raw silk; the Wood, Wood Products and Paper group, because of higher quotations for certain lines of lumber and groundwood pulp; the Iron and Its Products group, chiefly because of higher quotations for tin plate; and the Non-Metallic Minerals and their Products group, because of increases in the prices of coal, gasoline and kerosene.

In the grouping according to purpose consumers' goods have remained unchanged for the last three months. In September higher prices for woollen yarns, cotton fabrics, coal, petroleum products, cured meats, milk and its products and eggs offset lower prices for milled products, coffee and potatoes. Producers' goods declined because of lower prices for manufacturers' materials, chiefly raw silk, furs, hides, non-ferrous metals, live stock and grains which more than offset higher prices for raw wool, woollen yarns, rolling mill products and dyeing and tanning materials.

In the grouping according to origin raw and partly manufactured goods declined substantially, while fully and chiefly manufactured goods showed a fractional decrease. Canadian farm products were substantially lower, field products being down mainly because of reductions in the prices of grains and potatoes, while animal products were somewhat higher on account of higher quotations for milk, eggs and wool.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of September of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of

(Continued on page 1046)

# COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL, AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost for an average family

\*Prior to 1926 number of commodities was 236.

(Continued from page 1038)

Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various

authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But, as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

## Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage

changes for the principal groups of expenditure for working men's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices, which had reached the high point for the year during August, averaged slightly lower in September, sirloin steak being down from 22.4 cents per pound to 22 cents, round steak from 18 cents per pound to 17.6 cents and shoulder roast from 11.8 cents per pound to 11.5 cents. Mutton was lower in nearly all localities, averaging 18.8 cents per pound in September as compared with 20.4 cents in August. Prices were considerably lower in the prairie provinces than in other parts of Canada. The prices of pork and bacon showed little change.

Fresh eggs showed a slight seasonal advance in most localities, the price being up in the average from 23.5 cents per dozen in August to 24.4 cents in September. The price in September, 1932, was 25.6 cents per dozen. A seasonal increase in the price of milk occurred in several cities, the price for the Dominion averaging 9.3 cents per quart in September as compared with 9.1 cents in August. Butter prices averaged slightly lower, dairy being down from 21.5 cents per pound in August to 21 cents in September and creamery from 25.1 cents per pound in August to 24.3 cents in September. Cheese was fractionally lower at an average price of 19.6 cents per pound.

Higher prices for bread were reported from several localities in Ontario and British Columbia, the price for the Dominion averaging 5.9 cents per pound in September as compared with 5.8 cents in August. The price of flour was slightly lower at 3.3 cents per pound in September as compared with 3.4

cents in August. The low point was 2.6 cents per pound reached in the spring. Canned vegetables were fractionally higher, tomatoes averaging 11.8 cents per tin, peas 11.9 cents per tin and corn 11.6 cents per tin. Onions were lower in most localities, averaging 4.6 cents per pound as compared with 5.9 cents in August. Potatoes were substantially lower in many localities following the seasonal advance in August with the marketing of the new crop. The average price in September was \$1.43 per ninety pounds as compared with \$1.96 in August and 90 cents in September, 1932. Prunes were up from an average price of 11.7 cents per pound in August to 12 cents in September. Anthracite coal advanced from an average price of \$14.58 per ton in August to \$14.80 in September. Increases were reported from Halifax, Sorel, St. Hyacinthe, Montreal, Peterborough, Oshawa, Toronto, Niagara Falls, Hamilton, Brantford, Galt, Kitchener, Stratford, London, Windsor, Owen Sound and North Bay. No changes were reported in rent.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices were in the main lower, No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaging 67.2 cents per bushel as compared with 73.4 cents in August and 83.4 in July. The closing price of the month was 61½ cents per bushel or 7½ cents per bushel lower than at the beginning. This closing price was still about 15 cents per bushel above the averages for January and February. The appearance of Russian wheat in the European market together with favourable weather reports from Australia and Argentina were said to be factors in the decline. In coarse grains western barley was down from 44.2 cents per bushel to 37.2 cents and oats from 38.9 cents per bushel to 34.3 cents. The price of flax and rye advanced, the former being up from \$1.41 per bushel to \$1.47 and the latter from 52 cents per bushel to 52.7 cents. Flour at Montreal was 10 cents per barrel lower at \$5.30. Rolled oats at Toronto declined from \$3.20 per ninety pound bag to \$2.95, while bran and shorts were also lower, the former being down from \$20.96 per ton to \$18.17 and the latter from \$22.69 per ton to \$19.17. Raw sugar at New York was up from an average of \$1.54 per cwt. to \$1.67 in Canadian funds, while granulated at Montreal was unchanged at \$6.47 per cwt. Ceylon rubber at New York averaged 8.3 cents per pound as

against 8.6 cents in August. In live stock choice steers at Toronto were down from \$4.70 per hundred pounds to \$4.50 and at Winnipeg from \$3.39 per hundred pounds to \$3.19. Lambs at Toronto were also lower at \$5.64 per hundred pounds as compared with \$6.34 in August. Bacon hogs at Montreal advanced from \$6.65 per hundred pounds to \$7.17, while at Winnipeg the price was 44 cents per hundred pounds higher at \$6.28. Veal calves at Toronto were up from \$6.04 per hundred pounds to \$6.79. Creamery butter at Montreal was slightly lower at 21.1 cents per pound as compared with 21.3 cents the previous month. Cold storage holdings at the beginning of September were stated to be 39 per cent higher than a year ago and 22 per cent higher than at the beginning of August. Fresh eggs at Montreal were up from 23.9 cents per dozen to 29.5 cents and at Vancouver from 23.9 cents per dozen to

31.8 cents. Rapidly decreasing production together with an increased export demand were said to be factors in this advance. Raw cotton at New York was slightly lower at 10 cents per pound. The decrease was stated to be due largely to an increase in the government crop estimate and to lower consumptive demand. Raw silk at New York was down from \$2.26 per pound to \$2.16. The price of raw wool was  $\frac{1}{2}$  cent per pound higher at 16 $\frac{1}{2}$ -20 cents. Spruce lumber was \$1 per thousand board feet higher at \$15. Tin plate at Montreal was up from \$5.24 per hundred pounds to \$5.99. In non-ferrous metals electrolytic copper was down from \$9.82 per hundred pounds to \$9.48, while imported copper wire bars were down from \$9.55 per hundred pounds to \$9.35. Tin was 2 cents per pound higher at 52.5 cents. Gasoline was 1 $\frac{1}{2}$  cents per gallon higher.

### Labour Conditions under N.R.A.

Secretary of Labour Frances Perkins, in a statement issued in September, outlined the progress made under the National Recovery program in the United States, in regard to employment, wages, and hours of labour. While NRA codes in only seven industries had been officially adopted and approved by President Roosevelt prior to August 15, the acceptance of the blanket code by thousands of employers on August 1 was reflected by wage rate increases and a reduction in the number of hours worked per week from July 15 to August 15. These indicate, she said, how the \$12,000,000 manufacturing payroll increase for this period was distributed. The average hourly earnings as reported to the Bureau of Labour Statistics showed an increase from 42.7 cents per hour in the June 15-July 15 period to 48.5 cents per hour in the July 15-August 15 period, while the average hours worked per week dropped from 42.3 to 38.6 in the 89 manufacturing industries combined which were surveyed.

"While the increases in hourly or daily rates cannot be interpreted in all instances as representing an actual increase in the employees' weekly wages, the number of hours worked per week in many industries has been drastically cut to conform with the industry or blanket codes and the increase in rates offsets the difference in hours worked. Taking the average picture, the average worker during this month received approximately the same weekly wages, had more time for leisure and personal advancement and additional workers obtained employment by the device of shortening of the work week."

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18 $\frac{1}{2}$ %; Clothing, 18 $\frac{1}{2}$ %; Sundries, 20%.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries. The following notes afford information as to significant changes and conditions affecting prices in these and other countries. The index numbers of the cost of living are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1924=100, was 61·7 for August, an increase of 0·2 per cent over the July level. Foods were 2·1 per cent higher, the greatest increase occurring in the "meat and fish" group. Non-foods were 0·8 per cent lower, due to a large extent to a substantial decrease in the price of cotton.

The *Economist* index number, on the base 1927=100, was 65·3 at September 20, a fall of 0·5 per cent from the level of September 6, due principally to lower meat prices, which was partly offset by increases in textiles and metals.

The *Statist* index number, on the base 1867-1877=100, was 81·2 at the end of August, a decrease of 0·6 per cent for the month. Foods were 0·7 per cent higher due chiefly to advances in barley, pork and butter. Industrial materials as a whole were 1·4 per cent lower due to declines in textiles, chiefly cotton and flax, and in sundries, chiefly nitrate.

**COST OF LIVING.**—The Ministry of Labour index number, on the base July, 1914=100, was 141 at September 1, an increase of 1·5 per cent for the month. This was due principally to higher food prices, chiefly eggs, bacon and butter, while potatoes were cheaper.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100 (gold basis), was 80 for August, a decline of 1·2 per cent from the July level due to a fall in prices of imported products, partly offset by a slight increase in national products. Animal products were higher, but all other groups showed declines from the July level.

### Germany

**WHOLESALE PRICES.**—The Federal Statistical Office Index number, on the base 1913=100, was 94·2 for August, an advance of 0·3 per

cent over July. This advance was largely due to an increase in the agricultural products group, partly offset by a decline in colonial products.

**COST OF LIVING.**—The official index number, on the base 1913=100, was 118·4 for August, a decline of 0·3 per cent for the month. Declines in food and sundries were partly counteracted by advances in heat and light and clothing.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 69·5 for August, an increase of 0·9 per cent over July, and is the sixth consecutive monthly increase. This August index number reached a point nearly 16 per cent over the level for February, and nearly 7 per cent over the August 1932 level. Farm products and foods were lower than in July, but all other groups, except for a slight decrease in chemicals and drugs, were included in the advance.

The *Annalist* index number, on the base 1913=100, was 104·8 for September, an increase of 2 per cent over August. Increases were noted in food products, and also in fuels, metals and building materials, while there was a sharp decline in textiles and slight declines in chemicals and miscellaneous products; farm products were unchanged.

*Bradstreet's* index number, which is the sum totals of the prices per pound of 96 commodities of common consumption, was \$8·9918 at September 1, a decline of 0·2 per cent for the month. Advances in livestock, textiles, metals, coal and coke, building materials and miscellaneous products were more than offset by declines in breadstuffs, provisions, hides and leather, oils and naval stores.

*Dun's* index number, which is based on the estimated cost *per capita* of a year's supply of commodities in wholesale markets, was \$160·265 at September 1, an increase of 2·6 per cent for the month. This is the fifth consecutive increase in this monthly index number. "This marks the most sustained gain that has appeared on the records since 1917." All groups were higher than at August 1, except breadstuffs and "other foods."

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, on the base 1913=100, was 125·7 for August, an increase of 1·1 per cent for the month, due chiefly to advances in the food and clothing groups.

### Other Countries

**WHOLESALE PRICES.**—Figures published of official index numbers for certain other countries for recent months are as follows:

Austria: on the base first half of 1914=100, 108·2, for September, as compared with 108·4 for August.

Denmark: on the base 1913=100, 126 for August, an advance of one point.

Finland: on the base 1926=100, 90 for July, an advance of one point.

Netherlands: on the base 1913=100, 73 for August showing no change from July.

Poland: on the base 1927=100, 53·9 for August, a decline of 7·1 per cent for the month.

Switzerland: on the base July, 1914=100, 91 for August, a decline of one point.

New Zealand: on the base 1909-1913=1000, 1327 for July as compared with 1321 for June.

India: index number for Bombay, on the base July, 1914=100, 100 for July, an advance of 2 points for the month.

**COST OF LIVING.**—The official index numbers of retail prices or cost of living recently published for certain countries are:

Austria: on the base July, 1914=100, 105·1 for September.

Poland: cost of living at Warsaw, on the base 1927=100, 69·2 for August, a decline of 4·8 per cent.

Switzerland: on the base June, 1914=100, 131 for each of the three months June, July and August.

India: cost of living Bombay, on the base July, 1914=100, 103 for August, showing no change from July.

South Africa: on the base 1910=1000, 1254 for June and 1249 for July.

## Effect of Safety Movement in the United States during Twenty Years

The National Safety Council of the United States recently published a survey of accident statistics from 1913 to 1932. It is stated that the total number of accidental deaths of all types during the period 1913-1932 totalled 1,720,857, but would have been 175,000 more if the 1913 death rate of 85·5 per 100,000 population had continued, and it is concluded that the safety movement can be credited with saving that number of lives in its twenty years of existence. The 1932 rate was 70·5 per 100,000 population. It is pointed out that the reduction would have been far greater except for the enormous increase in motor-vehicle fatalities, which rose steadily from 4·4 per 100,000 population in 1913 to 27·1 in 1931 and dropped, for the first time, in 1932 to 23·6. Separate rates are not available for accidental deaths in gainful occupations for the period, but combined rates in all except motor-vehicle fatalities show a reduction from 81·1 per 100,000 population in 1913 to 46·9 in 1932.

The Council estimates that the total number of accidental deaths in the United States in 1932 was approximately 88,000 as compared with 97,415 in 1931. Accidental non-fatal injuries are estimated at 8,312,000 for 1932, as against 9,403,000 for 1931, and the wage loss, medical expense, and overhead insurance cost involved in all deaths and non-

fatal injuries at approximately \$2,000,000,000 for 1932, as compared with \$2,308,000,000 for 1931.

The statistics are divided into four groups—occupational accidents, motor vehicle accidents, home accidents and public accidents. Of the total of 88,000 accidental deaths in 1932, 15,000 are estimated to have occurred during the course of gainful employment. These are distributed provisionally as follows: manufacturing, 2,000; mines and quarries, 1,800; building and construction, 1,300; public utilities (gas and electric), 300; steam and electric railways, 800; seamen and stevedores, 300; agriculture, 3,500; all others, 5,000.

Based on 80 non-fatal industrial accidents for each fatal, a total of 1,200,000 non-fatal injuries are estimated to have been incurred in 1932. The statistics show an average reduction for all industries in both frequency and severity rates from 1931 to 1932. Index numbers, calculated from data furnished by identical establishments for each 2-year period and based on 1926=100, give frequency as 45·5 in 1931 and 38·5 in 1932, a decline of 15·4 per cent, and severity as 68·8 in 1931 and 64·7 in 1932, a decline of 6 per cent.

The mining industry leads all others in severity rates per 1,000 hours exposure. In mining this rate is 9·51; the lumber industry is second with 5·43, and construction third with 4·44.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Assessments for Medical Aid May Take Account of Special Hazards in Certain Groups.

**I**N the case of *Merrill Ring Wilson, Limited, et al, versus Workmen's Compensation Board* (British Columbia) (LABOUR GAZETTE, July, 1933, page 749), the employing firms appealed to the Judicial Committee of the Privy Council against the decision of the British Columbia Court of Appeal, which affirmed the original judgment of Mr. Justice Murphy. The plaintiffs representing the logging industry in a certain district in the province, had sought an injunction to restrain the Board from levying a special assessment against the group for the purpose of making up a deficiency which had resulted from the Board's having underestimated the amount of money required to pay the cost of medical aid for the year 1931. The facts in the case are stated in the judgment of the Privy Council, which follows:—

*Lord Russell of Killowen.*—"This case comes before their Lordships on appeal from a judgment of the Court of Appeal for British Columbia affirming a judgment of the Supreme Court of that province which dismissed an action brought by the appellants against the Workmen's Compensation Board.

"This Board (hereinafter referred to as the Board) is a body constituted for the administration of Part 1 of the Workmen's Compensation Act, R.S.B.C., 1924, ch. 278.

"The scheme of Part 1 of the Act is to create and maintain a fund called the 'Accident Fund' mainly by assessments on the employers in the industries within the scope of that part. The power and duty of assessing the employers are placed in the hands of the Board, as appears from the provisions of the Act herein recited.

"The Act provides (sec. 28) for the division of all industries within the scope of Part 1 into 18 specified classes, of which class 1 includes 'logging'; but the Board had power (sec. 35) to establish 'such sub-classifications, differentials, and proportions in the rates as between the different kinds of employment in the same class as may be deemed just.' Acting under this power, the Board has constituted 'logging west of the Cascades' as sub-class 2 of class 1.

"The present proceedings are a consolidation of two actions commenced against the Board by various companies (employers of labour) suing on behalf of themselves and all other members of sub-class 2 of class 1. In other words the plaintiffs represent the in-

dustry classified separately as 'logging west of the Cascades.'

"The relief claimed covered an extensive area; but the sole point which has survived for the consideration of their Lordships' Board may be stated thus: Whether (as the appellants contend) assessments made under the Act for the purpose of raising funds for medical aid must be so made that all employers liable to be so assessed shall be assessed at the same rate upon their pay-rolls irrespective of the hazards of their respective industries, or whether (as the respondents contend) the Board may make those assessments in such a way that regard shall be had to the respective hazards of the various industries of the employers liable to be assessed for the particular purpose.

"There is, it would appear, no dispute that as regards assessments for the purpose of raising funds for the purposes of the Act other than medical aid the respective hazards of the various classes of industries must be a determining factor in the making of the assessments, but the appellants contend that upon the true construction of the Act and in particular in sec. 33 thereof, the Board is bound in making assessments in respect of medical aid to disregard this factor.

"The question in dispute is therefore one which is solely concerned with assessments in respect of medical aid and which depends upon the true construction of the Act.

"In the course of the argument before their Lordships, for the purpose of illustrating the hardships which it was said would ensue if the contention of the respondents prevailed, it was alleged that the Board had adopted a particular method of assessment which embodied not only the feature complained of in the action, but other features alleged to be in contravention of the Act. Their Lordships had no means of ascertaining whether these allegations were well founded or not. They were apparently not raised or suggested in the Courts of British Columbia; they certainly are not referred to in the judgments below. Their Lordships think that they must be disregarded, and that the point for decision must be confined within the limits indicated above.

"The relevant provisions of the Act may now be cited:

(Here follows the text of section 2, defining the terms 'Accident Fund,' 'Compensation,' and 'Medical Aid'.)

"After various sections which provide for payment of compensation for personal injury and where death results from the injury

the Act makes the following provisions for medical aid:

(Here follow the texts of section 23, stating the scope of medical aid; section 28, providing for the division of industry into groups for the purpose of assessment for medical aid; section 32, providing for assessment of employers; section 33, defining methods of payment by employers, etc.; section 35, enabling the Board to establish classes and sub-classes of industry for assessment purposes; section 42, providing for the keeping of separate accounts for each class; and section 43, providing for annual adjustments of amount assessed and actual requirements).

"The point in dispute can now be focussed. It depends upon the true construction and inter-relation of secs. 32 and 33. The appellants contend that the power to assess employers for medical aid depends on and is controlled by sec. 33 (2), and that the only power to assess for medical aid is by assessment upon employers generally in all industries within the scope of Part 1, excepting employers with approved plans. These words, they say, exclude the idea of discriminating against employers by reason of the hazards of their industries, and compel the Board to assess the additional amounts upon the employers liable, in proportion to their respective pay-rolls.

"The respondents contend that the governing section is sec. 32; that sec. 32 (1) (a) is the provision which confers the power to assess employers for medical aid; and that the function of sec. 33 (2) is not to confer a power of assessment, but to ensure that in exercising the power of assessment already conferred by sec. 32 (1) (a) the Board shall not assess any employer with a plan approved under sec. 23 (4).

"Murphy, J., who tried the action, was of opinion that sec. 32, was the empowering section, and that the words in sec. 33, 'by assessment upon the employers generally,' did not cut down the power given to the Board by sec. 32 to rate the assessments upon the pay-rolls or in such other manner as the Board may deem proper.

"In the Court of Appeal the Judges were unanimous. Macdonald, C.J.B.C., while advancing some additional reasons based upon sec. 43, agreed also with the reasons of the trial Judge. McPhillips, J. A., agreed with the judgment of the trial Judge. M. A. Macdonald, J. A., considered sec. 32 to be the controlling section and was of opinion that an assessment was an assessment levied on employers generally even though varied in amount according to the classes affected. All must contribute but not necessarily the same amount.

"Notwithstanding the full and careful argument of Mr. Mayers on behalf of the appellants, their Lordships find themselves in agreement with the trial Judge and the Court of Appeal.

"Medical aid is part of the compensation to be provided under the Act by means of an accident fund, which though split up into various separate accounts is to be deemed one and indivisible (sec. 42). This accident fund is created and maintained by assessing, levying and collecting every year upon and from the employers in each class sufficient funds for five specified purposes, one of which is 'a special fund to meet the cost of medical aid.' This assessment levy and collection may be effected 'by an assessment or by assessments made from time to time rated upon the payroll, or in such other manner as the Board may deem proper' (sec. 32). The special fund for medical aid is composed of contributions by workmen and of contributions by employers. The contributions by workmen are fixed by sec. 33 (1) and are to be deducted from wages by the employer and by him paid to the Board. The contributions of the workmen constitute in the first instance the special fund for medical aid. (See the first sentence of subsec. 2 of sec. 33). So far the meaning of sec. 33 seems clear. The remainder of subsec. (2) deals only the contributions of the employers to medical aid, and its purport and effect is in the opinion of their Lordships as follows: In the first place it limits the contributions of the employers to such amount as may be required in addition to the contributions of the workman; and in the second place, just as the workmen of an employer who has an approved plan are exempted from contributions to medical aid by sec. 23 (4), so this subsection exempts all employers with approved plans from liability to contribute to medical aid either by assessment or by charge against moneys which might otherwise be refunded or credited to them by the operation of sec. 43.

"Their Lordships do not think that the words 'assessment upon employers generally' and 'a general assessment' necessarily involve that all assessable employers must bear an equal burden (i.e., must be rated at an equal rate on their pay-rolls) or that the contrast implied is other than the contrast between 'general' and 'special' which is to be found in sec. 32 (2). In any event the phraseology of sec. 32 (2) is quite unequal to the task of cutting down the power given to the Board by sec. 32 (1) (a). The assessment referred to in sec. 33 (2) is but one of the assessments referred to in sec. 32 (1); and any assessment

under sec. 33 (2) is merely an assessment made in exercise of the power conferred upon the Board by sec. 32 (1) (a). In exercising that power the Board may make an assessment either rated upon the pay-roll or rated in such other manner as the Board may deem proper.

"Their Lordships are therefore of opinion that this appeal should be dismissed, and they will humbly advise His Majesty accordingly. The appellants will pay the costs of this appeal."

*Merrill Ring Wilson et al versus Workmen's Compensation Board* (British Columbia), Judicial Committee of the Privy Council, *Western Weekly Reports*, vol. 3, 1933, page 110).

### Court denies Injunction to restrain Group of Workers from Picketing

Chief Justice Rose, at Osgoode Hall, Toronto, on September 25, refused to continue an interim injunction that had been obtained by Durable Leather Products, Limited, to restrain the Toronto Leather Workers' Union and some thirty-five individuals from picketing, intimidating, or otherwise interfering with the business or employees of the company. The majority of the defendants, former employees of the company, had been on strike since the middle of August.

"There are a great many defendants mentioned," His Lordship said; "I have not been able to sort out the defendants and say that against them there are direct charges. I do not want to grant an injunction against a large body unless there is evidence that they are the persons guilty. On the evidence here I don't think I can continue an injunction restraining as against all the defendants. If there is a real case against some of the defendants I might grant leave to amend the motion so as to file notice for a substantive injunction."

"Some of the defendants," he remarked, "seem to have got into their heads a mistaken idea of the duty of the courts in such matters. They think that the courts are going to be partisan and are going to render aid to the manufacturers for the purpose of enabling the manufacturers to conduct some war against organized labour. Of course that is the most utter nonsense. The courts recognize as well as anybody else the value to the community of organized labour and of the trades unions, but nevertheless the courts will interfere to protect the rights of individuals against those who attempt to apply violent or other unlawful means."

His Lordship gave the plaintiffs leave to file a new notice of motion or a substantive motion returnable in a week. He expressed a hope that in the meantime the necessity for such an injunction would disappear.

### Employer liable for safety of "invited" helper at work

A kiosk belonging to the City of Quebec was being moved by municipal workmen to another site. At one point it was necessary to use a lever to raise the building from the roadway to the sidewalk, and the foreman invited some bystanders, including the plaintiff in this case, to sit on the lever in order to hold the building at the new level. Presently the order to "let go" was given and the other men holding down the lever instantly obeyed, but the plaintiff failed to get clear before the lever flew up and he was thrown into the air, falling to the pavement and receiving very serious injuries. In an action brought by him against the city for damages the Superior Court at Quebec allowed the plaintiff damages to the extent of \$3,000 for bodily injuries, and on appeal by the City this judgment was affirmed by the Court of King's Bench (Mr. Justice Rivard dissenting).

Mr. Justice Howard, in the course of his judgment, said: "Though it was not the respondent's duty to comply with the request of the city's employees to give them a hand in shifting the kiosk, he did so on their invitation and was, therefore, not in any sense a trespasser on the job. He was rather an *invité* of the City and as such the City owed him the care of *bon père de famille*. At any rate it was responsible to him for any loss or damage which he might sustain through the fault or negligence of its employees, and the evidence in this case leaves no doubt in my mind that the injury sustained by the respondent is the direct result of the carelessness and lack of experience and skill of the employee or employees of the City who were in charge of the work."

*Baribeau versus City of Quebec* (Quebec) 1933, *Rapports Judiciaires de Quebec* (Cour de Banc de Roi), page 255.

### B.C. Compensation Act Declared Valid

An employee of the Blue Flame Collieries, Limited, at Princeton, British Columbia, sued the Company for injuries he had sustained in February, 1932. Such action being barred by the Workmen's Compensation Act, the plaintiff's counsel argued that the statute was *ultra vires* of the provincial legislature on the ground that the members of the Board

had powers similar to those exercised by judges, whose appointment was reserved to the Dominion Government under the provisions of the British North America Act.

Mr. Justice Murphy dismissed the action, pointing out that the British Columbia Act had the same characteristics as those of Manitoba and Quebec, which had been upheld by the Courts when similar objections had been taken (LABOUR GAZETTE, March, 1933, page 357, etc.).

*Anderson versus Blue Flame Collieries, Limited* (British Columbia).

#### **Covenant in Restraint of Trade is not Enforceable**

A drug company in Manitoba employed a manager at a monthly salary. After some months of employment the company required him to sign a bond, by which he undertook to refrain from engaging in a similar business within 25 miles for a period of five years after his employment ceased. This condition was violated by the employee, who subsequently became the manager of a drug store next to the company's place of business. The company brought an action against the employee to enforce the conditions contained in the bond.

Mr. Justice Adamson, in giving judgment, held that the defendant did not sign the bond as a consideration for being taken into the service of the company. There had apparently been no complaint as to his work, at least up to the time the bond was signed. The signing of the bond was something new imported into the agreement, and was not a condition of employment. "Here we have a voluntary covenant which Courts of Equity are, to put it as mildly as possible, not quick to enforce. Moreover, it is a covenant in restraint of trade which Courts have always leant against. I dismiss the action with costs."

*Northland Drug Co. Ltd. versus Maguire* (Manitoba), 1933, *Western Weekly Reports*, vol. 3, page 82.

A hotel employee at Montreal suffered severe injuries in the course of his employment when he fell down the light well of the second storey of the hotel. In suing the hotel owners for damages he claimed that workmen who had removed a part of the planking on the second storey had not properly protected the light well. The jury who heard the case found that the plaintiff was without blame for the accident, which was due to the fact that the place had been left in an unsafe condition. Damages of \$5,119.35 were allowed to the plaintiff.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

THERE was a further improvement in industrial activity in Canada on October 1, according to statements received by the Dominion Bureau of Statistics from 8,240 employers, each with a minimum of fifteen employees, whose staffs aggregated 834,348 persons, as compared with 816,458 in the preceding month. Employment has often shown a falling-off between September and October in the twelve years of the record, the change on the average being a fractional reduction; the increase this year is therefore especially interesting, the more so because it is the largest advance reported on October 1 since the record was commenced in 1921. The index (based upon the average for the calendar year 1926 as 100) stood at 94.4 on October 1, 1933, compared with 88.5 on September 1, 1933, and 86.7 on October 1, 1932. On the same date in the eleven preceding years, the index was as follows: 1931, 103.9; 1930, 116.2; 1929, 125.6; 1928, 118.8; 1927, 110.3; 1926, 106.5; 1925, 99.5; 1924, 95.0; 1923, 100.7; 1922, 95.8 and 1921, 91.3. These returns are representative of all industries except agriculture, fishing, hunting and highly specialized business.

At the beginning of October, 1933, reports were furnished to the Department of Labour by 1,762 local trade unions embracing a membership of 149,310 persons. Of these 29,492, or 19.8 per cent, were without employment, contrasted with 19.9 per cent of idleness at the beginning of September, 1933, and with 20.4 per cent at the beginning of October, 1932.

Reports received by the Department of Labour from the offices of the Employment Service of Canada for September, 1933, showed very little change from August in the volume of business transacted, as indicated by the average daily placements effected, a slight gain only being recorded, but a decline was reported from the daily average of September a year ago. Vacancies in September, 1933, numbered 29,935, applications 62,579 and placements in regular and casual employment 28,534.

In retail prices during October the cost per week of a family budget of staple foods, fuel and lighting, and rent was unchanged from the level for September, namely \$15.78, a slight increase in fuel being offset by a decline in rent. Some comparative figures for earlier dates are: \$15.41 for June, 1933 (the low point); \$16.40 for October, 1932; \$21.96 for October, 1929; \$21.14 for October, 1926; \$22.01 for October, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.48 for October, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics was again lower at 67.9 as compared with 68.9 in September and 70.5 in July. The low point was 63.6 reached in February. Figures for certain previous dates are 65.0 for October, 1932; 96.8 for October, 1929; 98.1 for October, 1926; 99.6 for October, 1921; 164.3 for May, 1920 (the post war peak); and 66.8 for October, 1914.

The latest information available indicating industrial conditions is included in the accompanying table. The index of the physical volume of business in September continued upward though at a more moderate rate than in recent months. Of the chief components of this index, mineral production, exports and imports were substantially higher, manufacturing showed little change, while electric power output was considerably lower after seasonal adjustment. Construction continued at a low level but the figures for contracts awarded in October indicated improvement. Employment at the beginning of October showed the sixth consecutive gain, while car loadings for four weeks in October were higher than for the same period last year. Production of footwear in September, though lower than in the preceding month, was still considerably higher than in September last year. Business failures also continued to show improvement, the number being substantially less than a year ago.

The time loss due to industrial disputes during October was substantially lower than that recorded for the previous month, the number of workers involved also showing a considerable decrease. As compared with

October, 1932, a slight decrease appeared in the number of strikes recorded and in the number of workers involved, while the time loss incurred was almost twice as large as that recorded for the same month last year, due largely to a dispute involving six hundred furniture factory workers at Stratford, Ont., which caused a time loss of over 14,000 working days in October, 1933. There were in existence during the month fourteen disputes, involving 1,108 workers, and resulting in a time loss of 19,203 working days, as compared with twenty-three disputes, involving 6,991 workers and resulting in a time loss of 39,194 working days in September. In October, 1932, there were on record sixteen disputes, involving 2,388 workers and resulting in a time loss of 9,554 working days. At the end of the month there were two disputes in progress recorded as strikes and lockouts, involving approximately 585 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off by the union.

**Signs of recovery** Major L. L. Anthes, president of the Canadian Manufacturers' Association, in the course of an address at Toronto on October 26, referred to the recent improvement in employment as probably the most significant indication of the return of better conditions in Canada. He pointed out that industries reporting to the Dominion government showed that 135,000 more workers were employed by them on September 1, than on April 1 this year, and continued: "If small industries not reporting are added, the total would be about 275,000; and if the large number of people returning to whole-time or part-time work in commercial, agriculture and other fields, of which no estimate can be made, the number would be appreciably higher again." Major Anthes considered, therefore, that the upward turn from the recent depression had come, and that it was gaining momentum.

#### **Improvement in employment situation throughout the world.**

mostly for the midsummer period. It is pointed out that an international comparison of the extent and level of unemployment in various countries cannot be made with any precision, and that such a comparison must be limited to the trend of the fluctuations in

The issue of *Industrial and Labour Information* (Geneva) for October 9, contains the usual quarterly tables of unemployment in the principal countries of the world. The figures are

the several countries. Even in the same country a comparison of the figures on two different dates is often influenced by legislative and administrative changes, or the failure of unemployed persons to register at the exchanges. These factors may cause a decrease in the unemployment figures which does not represent a corresponding decrease in the volume of unemployment. This has been the case at certain times, for instance, in Great Britain and Poland, and would appear to account for a part of the decrease shown at present in the Belgian and German figures. Moreover, the figures take no account of short time, and a decrease in recorded unemployment may be occasioned by a shortening of average working hours, a more extensive working on shifts of rotation, etc., without a corresponding decrease in unemployment.

The figures now published show that the improvement noted in the previous quarter—the first since the beginning of the depression—continued to the end of June, unemployment having continued to diminish in most of the countries for which figures are available.

#### **Industrial Disputes Investigation Act**

Reports were received recently from Boards of Conciliation and Investigation established to deal with disputes respectively between Canadian Pacific Steamships Ltd., and its steamship freight checkers at Montreal, and between the Canadian Pacific Railway Company and its clerks, freight handlers, etc. One new application was received by the department during the past month, and a board was completed in connection with an earlier application. The text of the reports above mentioned, with details of other proceedings during the month, will be found on page 1065.

#### **Agenda of 1934 Conference at Geneva**

Session of the International Labour Conference. Henceforth the Conference will normally open on the second Thursday in May.

The agenda of the 1934 session of the Conference comprises the following items: (1) Reduction of hours of work—second discussion; (2) Unemployment insurance and various forms of relief for the unemployed—second discussion; (3) Methods of providing rest and alternation of shifts in automatic sheet-glass works—second discussion; (4) Employment of women on underground work in mines of all kinds—first discussion; (5) Partial revision of

Reports were received recently from Boards of Conciliation and Investigation established to deal with disputes respectively between Canadian Pacific Steam-

ships Ltd., and its steamship freight checkers at Montreal, and between the Canadian Pacific Railway Company and its clerks, freight handlers, etc. One new application was received by the department during the past month, and a board was completed in connection with an earlier application. #### **Code of labour laws of the Province of Quebec**

A new edition of the "Code of Labour and Industrial Laws of the Province of Quebec," consolidating the provincial legislation as it exists in 1933, has just appeared. Like the former editions the compilation is the work of Mr. Gus. Francq, formerly prominent in the labour union movement and now chairman of the Minimum Wage Commission of the Province. It contains the text of the statutes, both federal and provincial, which specially affect the worker, together with the administrative regulations under various acts. In the present edition the attention of contractors and workers in the building trades is called to the law dealing with the limitation of hours of work, and to that respecting the inspection of scaffolds and lifts. The latter section includes illustrations of seven standard types of scaffolds as approved by the Provincial Department of Labour and by the City of Montreal.

#### **Local building programs to stimulate recovery.**

The Hon. H. H. Stevens, Minister of Trade and Commerce, at a meeting on November 6, advised the Ottawa Junior Board of Trade to form a committee to consider a program of building construction required in the city. Such a committee, he said, might stimulate public sentiment to condemn a number of existing buildings as a detriment to the city, being unsanitary and constituting a fire hazard. Mr. Stevens pointed out that such a movement would make a noteworthy contribution to industrial recovery. He cited the figures which were also recorded in the last issue of the LABOUR GAZETTE, page 977, in a note on "the importance of the building industry in Canada," where the National Construction Council of Canada was quoted as stating: "If the construction industry were operating at the 1929 rate, 300,000 people would be back in employment to-day who are at present unemployed. In other words, about half of Canada's unemployment problems can be laid at the door of this industry." The Minister referred further to the fact that expenditure on building is diffused throughout the whole fabric of industry in a remarkable degree, and that activity in construction would have the effect of stimulating general activity. He suggested to the Board that "waiting" had done a great deal of harm and that as

Canada was now ready to make an advance, it was the duty of her citizens to direct their attention to the adjustment of internal problems.

#### **Medical attention for persons on relief.**

The Prime Minister, on October 6, received a delegation from the Canadian Medical Association, who asked that medical care be added to the benefits in the general unemployment relief scheme, which now include the provision of food, clothing, shelter and fuel. Mr. Bennett, on behalf of the Dominion Government expressed entire approval of the movement to secure medical attention for those who were forced to subsist on unemployment relief, many of whom were stated by the delegation to have been neglected in regard to such treatment through lack of adequate provision. He stated, however, that the work of administering of relief in all its forms was the function of the provincial governments, explaining the procedure under the Relief Act, under which the Dominion agrees to bear a certain share of the burden with the provinces, paying one-third of the amount periodically as accounts are rendered by the provincial authorities, but taking no part in the actual disbursement of the money.

#### **Experiment in state medical care in Ontario.**

The Hon. Dr. J. M. Robb, Minister of Health for Ontario, stated on October 19 that experiments in the direction of state medicine were being carried out in the five eastern counties of the Province, Dundas, Grenville, Stormont, Prescott and Russell. The purposes of these experiments, he said, was to put the policy of state medicine to a practical test. The experiment is being carried on with the assistance and co-operation of both medical men and dentists. The work is largely being done among the children in the schools, particular attention being paid to teeth, diseased tonsils, tuberculosis and nervous and mental disorders. "If this experiment is successful in providing proper treatment," he said, "it is possible that it may be adopted in the province and state medical and hospital treatment provided for all our people."

At the annual meeting of the Toronto Academy of Medicine early in October, the president, Dr. E. A. McDonald, claimed that many doctors were on the verge of bankruptcy, and that unless municipalities agree to pay for medical services to the indigent sick, state medicine would have to be established. He suggested that all persons with an income of less than \$2,000 a year be registered, and

that panels of 800 be assigned to each general practitioner. General hospital cases, he continued, might be given to specialists, one specialist for every twenty cases, the money to be raised by a *per capita* tax on the community, similar to the taxes for police protection and public schools.

The "Fédération des Sociétés Médicales de la Province de Québec," at a meeting held at Montreal on October 18, adopted the following special tariff of charges for attending cases on public relief: For visits to the home, \$1.50 a visit during a maximum of one week (except in grave cases). For visits by the patient to a doctor, fifty cents (maximum four visits a week). For lying-in cases, including two preliminary visits, five dollars.

# **Minimum wages for women in boot and shoe industry in Quebec.**

The September issue of the LABOUR GAZETTE contained the text of revised orders of the Minimum Wage Board of the Province of Quebec, governing the boot and shoe and other leather trades in the Province. In

the note introductory to these orders it was stated without qualification that the minimum rate for the District of Montreal had been reduced from \$12.50 to \$11 per week. Attention should however have been called to section (2) of the orders, which lays down the principle that "the work period for which these minimum wages shall be paid shall be 48 hours per week." As the basic work period was formerly 55 hours per week, the net effect of the change resulting from the new orders is that for Montreal and District there is an actual increase in the rate per hour of nearly 2 cents for beginners and 2/10 of a cent for experienced workers; while for Quebec and the rural districts the increase in the hourly minimum wage rate is nearly 6 cents.

# **Labour Service Division in U.S. Department of Labour.**

The announcement by Secretary of Labour Frances Perkins of the establishment of a new service division in her Department is noted on another page of

this issue in the report of the recent convention of the American Federation of Labor. The Secretary intimated that President Roosevelt had consented to the establishment of a "Division of Labour Service and Labour Standards" in the Department of Labour so that wage earners might obtain every facility for complete information of an economic, financial and industrial nature. The new division, she said, would be available for technical aid to the

workers in their efforts to deal with the complex economic issues which confronted them. The Department would also endeavour to strengthen the conciliation division and extend its service in the interests of the wage earners.

Labour's new status under the government's program, the Secretary continued, meant that wage earners would now have a voice in formulating policies for industry and might make constructive contributions toward solving the nation's economic and industrial problems. These problems included the balancing of production with the consumption power of wage earners. During the past four months, she declared advances had been made towards abolishing child labour; instituting a plan of public works; providing adequate federal relief for the destitute; drastically reducing the hours of labour; increasing wage rates; providing machinery to prevent further reductions in wages; providing government specifications for wage and hour standards on public works; and guaranteeing the workers the right to organize and bargain collectively without coercion.

The other divisions in the U.S. Department of Labour are the Bureau of Labour Statistics; the Children's Bureau; the Women's Bureau; the Bureau of Immigration; the Bureau of Naturalization; the Conciliation Service; the Employment Service; and the Library, which is stated to be one of the most complete reference libraries in the country in the field of labour economics and related materials.

# **New Brunswick Accident Prevention Association.**

The proposal to establish an Industrial Accident Prevention Association in New Brunswick was noted in the LABOUR GAZETTE, December, 1932, page 1262. An amend-

ment made last year to the Workmen's Compensation Act made provision for the establishment of employers' safety associations similar to those established under the Ontario Act, the latter being federated in the Industrial Accident Prevention Associations of Ontario, Incorporated.

A meeting of the New Brunswick Accident Prevention Association was held at Saint John recently, Mr. A. F. Blake, manager of the Atlantic Sugar Refineries, presiding. The president reported that since the organization meeting, the Workmen's Compensation Board had approved the constitution of the Association, and this approval was confirmed later by the Provincial Government through an Order-in-Council. The Board also decided to give a small monthly grant to the Association

with the explanation that under the existing unfavourable conditions of the Board's finances, the Association would only be able to carry on in a limited way. If and when conditions improve, consideration would then be given to the question of increasing the allowance.

The most important matter to come up for discussion was the question of the preservation of the class funds under the Act. The present condition is that Class 2, covering lumber, sawmills and pulp and paper industries, is showing a rather serious deficit and the surpluses from the other classes are being used to pay the claims in this class. The governments in late years have been prohibiting the Board from assessing adequate rates in Class 2 and thereby making it impossible for the Board to make a downward adjustment in the classes showing a substantial surplus. It was decided that a circular letter should be prepared outlining this situation and mailed to the members of the Association with the hope that sufficient sentiment might be developed to induce the Government to withdraw its pressure from the Board and thus permit it to adjust all rates in keeping with the experience.

#### **Estimate of number of old age pensioners in Nova Scotia.**

In connection with the coming of the Old Age Pension Act into effect in Nova Scotia (LABOUR GAZETTE, September, 1933, page 875) it may be recalled that the provincial Commission which inquired into the subject in 1928-29 (LABOUR GAZETTE, May, 1929, page 501) estimated that the number of persons 70 years of age or over in the province at that time was about 25,500. Many of these, however, had private resources and would not be eligible for pensions. The number of those entitled to receive pensions either to the full amount of \$240 per annum or to the extent required to bring their annual income from all sources to \$365, was estimated by the Commission at 20,404. Of these, 10,803 were found to have no private income; 3,391 had less than \$100; 3,441 had an average of \$150; 1,897 had an average of \$250; and 872 had an average income of \$330. According to this computation the total amount payable in pensions in the province would reach a total in the neighbourhood of \$4,400,000. At the time of the Commission's report the Dominion Government undertook to pay one-half the total cost of pensions, but the proportion payable by the Dominion has since then been raised to 75 per cent.

#### **Canada Year Book, 1933.**

The Canada Year Book for 1933, recently issued by the Dominion Bureau of Statistics, brings down to the present date this series of official handbooks of Canadian affairs. An annual register of statistical abstract had been published in Canada each year since Confederation, but with the establishment of the Dominion Bureau in 1918, a new and improved series was undertaken, each issue since that date including new features. In its present form the Year Book is an indispensable work of reference for students.

A feature of the Year Book has been the inclusion of special articles on some phase of science or art or of the social or economic development of Canada. Thus, in the present edition there appears a special article prepared in the Department of External Affairs dealing with the Imperial Economic Conference of 1932. Attention may also be drawn to a special study on droughts in Western Canada, contributed by the Climatologist of the Meteorological Service. Additional census analyses becoming available from the census of 1931 have facilitated a more extensive and up-to-date treatment of population. The chapter on internal trade has been extended to present summary statistics of the first comprehensive census of wholesale and retail trade and services to be taken in Canada; this census is also one of the first of its kind in any country. The chapter on transportation and communications includes a description of the new Canadian National-Canadian Pacific Act implementing the report of the Duff Commission, together with a description of the aims and objects of the Radio Broadcasting Commission. A special article on the growth of life insurance in Canada, which appeared in the 1925 edition, has been revised in consequence of recent changes in insurance legislation. The public health chapter has also been improved by the inclusion of the new annual statistics of institutions.

The labour and wages section of the Year Book gives an analysis of the occupations of the people; a summary of the activities of the Federal and Provincial Departments; statistics of organized labour; sections on fatal industrial accidents, workmen's compensation, strikes and lockouts, employment and unemployment, old age pensions, co-operation, labour legislation, legislation respecting combines, wage rates, wages and hours of labour under Minimum Wage laws, and cost of living of wage earners. The chapter on prices treats of wholesale and retail prices of commodities, and includes index numbers of security prices, interest rates and import and export valuations.

# **Forestry Camps in the United States.**

Dr. Clifton D. Howe, dean of the faculty of Forestry in the University of Toronto, describes in the magazine *Pulp and Paper*

of Canada the impressions he received in a visit to one of the forestry camps established in the United States as part of the National Recovery plan. "I was very greatly impressed," he said, "with the way in which these forestry camps are functioning. For one thing, these camps are finding employment for an immense number of young men who would otherwise be involuntarily idle. For another thing, they represent a most creditable effort to provide unemployment relief in one of the very best and most practicable ways of which one can think. For the project involves what is relatively a small overhead, and the cost of maintenance, after the work is done, is also relatively small. Thus only a comparatively small outlay is required to get a certain amount of money into circulation, which is what is so urgently needed. Thus this project differs very markedly from the construction of highways and public buildings which, as experience has shown, necessitate such very large expenditures not only while the work is in progress but also for their subsequent maintenance. Practically all the maintenance required in connection with the project I am discussing, is for fire protection work, and most of this work is to reduce the danger of fire and to render fire-fighting less expensive. Probably in no other form of relief is so large a proportion of the expenditure made directly to the workers."

# **Analysis of unemployment records in Great Britain.**

The *Ministry of Labour Gazette* for October contains an important article summarizing the results of

an analysis, by sample, of the persons insured under the Unemployment Insurance Acts in Great Britain in 1932. Some of the facts revealed in the article are as follows:

Throughout the fifty-two weeks ending November 30, 1932, about 8,836,000 males and 3,193,000 females were insured, and of these numbers about 4,600,000 males, or 52.1 per cent and 2,053,000 females, or 64.3 per cent, did not prove unemployment as claimants during the period in question. On the other hand about 333,000 males, or 3.7 per cent, and 17,000 females, or 0.5 per cent, proved unemployment on every day of the period. The persons who proved unemployment as claimants at some time during the period thus

included about 4,236,000 males and 1,140,000 females, of whom 1,955,000 males and 311,000 females proved unemployment on November 28, 1932.

Of the total of 4,236,000 males included in the total of unemployed, over one-seventh were unemployed for only four weeks or less in the year; over one-third were unemployed for twelve weeks or less; while only about one in thirteen was unemployed for the whole period. Of the 1,140,000 females, over one-quarter were unemployed for only four weeks or less; over half for twelve weeks or less; while only 1.5 per cent were unemployed for the whole period.

For the period of two years, commencing December 4, 1930, and ending November 30, 1932, the number of insured persons who did not prove unemployment as claimants, as indicated by the sample, was approximately 5,600,000, including 3,970,000 males and 1,630,000 females. Expressed as percentages of the numbers insured throughout the period these figures represent 46.9 per cent of the males and 56.1 per cent of the females. . . . Of the total number of men who experienced unemployment during the two-year period, about 1,345,000, or 29.9 per cent were unemployed for more than half the period; but only 98,000, or 2.2 per cent were unemployed for the whole period. Over 30 per cent were unemployed for sixteen weeks or less. Among the women, 171,000 or 13.4 per cent were unemployed for more than half the period, but only 5,000 or less than 1 per cent for the whole period. Over 43 per cent were unemployed for sixteen weeks or less. Of the 98,000 men who were unemployed for two years, 32,000, or just over 32 per cent were over 55 years of age; while approximately 30,000 or about 30 per cent were under 35 years of age. At the other end of the scale, among the men who had been unemployed for four weeks or less in the two-year period, only 10 per cent were over 55 years of age, while 55 per cent were under 35 years of age. Among the 580,000 men aged 55 to 64 who experienced unemployment during the period, 5.4 per cent were unemployed throughout the whole two years, while 42.1 per cent were unemployed for more than half the period. On the other hand, the men aged 25 to 34 who experienced unemployment during the period numbered about 1,300,000, and of this number only 1.6 per cent were unemployed for the whole two-year period, while 27.4 per cent were unemployed for more than half the period.

### Extension of Functions of Trade Unions in Soviet Russia.

In accordance with the decision which was noted in the LABOUR GAZETTE, September, 1933, page 955, the Commissariat of Labour of the Union of Socialist Soviet Republics was abolished by the Order of June 23, 1933 and its functions were transferred to the General Council of Trades Unions. According to a report from the International Labour Organization (Geneva) an order of the government was promulgated on September 10, 1933, and supplemented by an order of the General Council of Trade Unions of September 11, both relating to the new functions of the trade unions. In virtue of these measures, the General Council of Trade Unions and the central committees of the different unions took possession on September 15 of the funds of the social insurance system, amounting to 4,500 million roubles, and all its sanatoria, rest homes, research institutes, etc., and also of the funds of the Commissariat of Labour and its local organs, including those of the social insurance system. The staff of the Commissariat of Labour and of the social insurance system was attached as from the same date to the General Council of Trade Unions and its organs and to the central committees of the different unions and their local organs.

The new functions devolving on the trade unions are the following: management of social insurance; factory inspection; industrial hygiene and safety; registration and supervision of collective agreements; examination of the provisions affecting labour in the economic plan for each year, with reference to number of workers, wages, efficiency, etc. Among these new functions the first place is taken by social insurance. According to the executive officers of the trade unions and to the Soviet press, the management of social insurance will henceforth constitute the principal task of the trade unions.

### Proposed reform of industrial insurance in Great Britain.

The report of the "committee on industrial insurance and assurance on the lives of children under ten years of age", presented recently to the Parliament of the United Kingdom, has now been published. It discusses the methods followed at the present time by insurance companies, and declares that the remedy for existing abuses lies between the three following alternatives: (i) the transference of all industrial assurance business, by whomsoever conducted, to a public utility corporation which will then

have a statutory monopoly; (ii) the grouping of the larger companies and societies into a limited number of compact bodies (the small local societies being, at the same time, restricted as to the areas in which they can operate); and (iii) the statutory imposition on companies and societies of a general limitation of expenditure otherwise than in benefits to the assured.

Of these alternatives, the committee reject the first on account of the formidable obstacles to its adoption, although they consider that the concentration of industrial assurance in a single undertaking might have many advantages. The second alternative is also rejected as "at the best it would not provide a cure for all the defects for which remedies are required." The committee therefore favours the third course, that of a statutory limitation on the proportion of premiums applied to expenses of management of all kinds. "We believe," they state, "that if the proportion of the premiums so applied were fixed by statute, and, of course, at a figure involving a substantial reduction of the present expense ratio of most of the offices, a very considerable step would be taken towards the removal of the evils which the evidence submitted to us has brought to light."

In regard to the insurance of young children, the committee among other suggestions recommend that no persons, other than the parents and persons *in loco parentis*, should be permitted to insure for their own benefit the life of a child under 14 years of age; that such assurances should be effected only with a registered friendly society, a registered branch of such society, a registered trade union or industrial assurance company; and that a child of this age should not be capable of entering into a contract of assurance which includes a death benefit, save with a registered friendly society or an industrial assurance company, and through the parents.

Regulations governing submarine diving, recently approved by the provincial Workmen's Compensation Board, were published in the *British Columbia Gazette*, October 19, 1933. They include general safety rules and specifications for proper appliances and inspection thereof, with codes of signals to be used by divers and their attendants, and rules as to medical supervision. Tables are given showing ordinary time limits under water, stoppages needed during ascent, rest intervals, and approximate air-supply required; and also showing stoppages called for after exceeding the ordinary limits of time on the bottom.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

UNANIMOUS reports were received by the Minister of Labour recently from two Boards of Conciliation and Investigation which had been established under the provisions of the Industrial Disputes Investigation Act to inquire into the following disputes: (1) between the Canadian Pacific Steamships Limited and its steamship freight checkers at Montreal; (2) between the Canadian Pacific Railway Company and its clerks, freight handlers and station employees, and subsidiary groups.

### Application Received

Longshoremen employed by various steamship companies at the Port of Saint John, N.B., applied at the close of October for the formation of a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act. The application states that 900 employees, members of Local 273 of the International Longshoremen's Association, are directly affected by the dispute, which grew out of the employees' request for an increase in wages and certain changes in working conditions. The application is under consideration.

### Other Proceedings

Reference was made in the October issue of the LABOUR GAZETTE (page 978) to an application which had been received from the British Columbia Electric Railway Company, Limited, in connection with a dispute involving approximately 1,400 employees being members of the Amalgamated Association of Street and Electric Railway Employees of America, Divisions Nos. 101 (Vancouver), 134 (New Westminster), and 109 (Victoria). The dispute was occasioned by the employees' refusal to accept a 10 per cent wage reduction when a three-year agreement under which they had been working expired on September 30, 1933, this reduction being in addition to a 5 per cent decrease mutually agreed upon on December 1, 1932, making a total reduction of 15 per cent from the basic rates specified in the 1930 agreement. A Board of Conciliation and Investigation was established by the Minister of Labour on October 25 to inquire into this dispute, its personnel being as follows: His Honour Judge J. N. Ellis, Vancouver, B.C., chairman, appointed by the Minister in the absence of a joint recommendation from the other board members, Mr. A. G. McCandless and Dr. Lyle Telford, both of Vancouver, nominated by the company and employees, respectively.

A Board of Conciliation and Investigation was established by the Minister of Labour on November 6 to deal with a dispute between the Corporation of the City of Edmonton and certain of its employees in the Water Works, Engineer's and Power House Departments, being members of the Edmonton Civic Employees' Union No. 30. The application was received in the Department of Labour during June (LABOUR GAZETTE for July, 1933, page 676). The dispute related to the alleged unjust suspension and dismissal in 1930 of Malcolm Ainslie, a member and business agent of the union above-named. The Western Representative of the Department, Mr. F. E. Harrison, visited Edmonton during the summer months and endeavoured to effect a settlement through conciliation. As a result of his mediation, the civic authorities agreed to re-employ Mr. Ainslie, but only on a temporary basis and not in his former position. This was not acceptable to the employees, who continued to press for a board. Mr. Charles W. Lee, of Edmonton, has been appointed a member of the board on the recommendation of the employees' concerned. The constitution of the board has not been yet completed.

### The Railway Wages Case

Settlement of the wages dispute between the principal Canadian railways and their train service employees and telegraphers was reached on October 28 following prolonged discussions which took place during the past few weeks. Negotiations had reached a deadlock early in October and were resumed after conferences with the Primes Minister (LABOUR GAZETTE, October, 1933, page 978). The agreement provides for a deduction of 15 per cent from the basic wage rates from November 1, 1933, in lieu of the 20 per cent deduction recommended by the Board of Conciliation and Investigation, which has been in effect since May 1 of this year. The agreement is signed by Mr. S. J. Hungerford, Acting President of the Canadian National Railways, and Mr. Grant Hall, Vice-President of the Canadian Pacific Railway Company, and on behalf of the employees by the General Chairmen of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railway Conductors, the Brotherhood of Railroad Trainmen and the Order of Railroad Telegraphers. Also the agreement is approved by the chief officers in Canada of these five organizations.

Following are the terms of the settlement:—

*AGREEMENT between the Canadian National Railway Company and the Canadian Pacific Railway Company respectively, and their Locomotive Engineers, Locomotive Firemen, Conductors, Trainmen, Yardmen and Telegraphers respectively, made at the City of Montreal on the twenty-eighth day of October, 1933.*

The parties hereto agree—

- (a) that the twenty per cent deduction from compensation calculated on the existing basic rates of pay, now in effect, shall continue until October 31, 1933;

(b) that, effective from November 1, 1933, and until October 31, 1934, fifteen per cent shall be deducted from each employee's pay cheques, calculated on existing basic rates of pay;

(c) that effective from November 1, 1934, ten per cent shall be deducted from each employee's pay cheques calculated on existing basic rates of pay, provided that either party may, after September 1, 1934, serve thirty days' notice, as required by wage agreements now in effect, of a desire to change such percentages to become effective November 1, 1934.

### **Report of Board in Dispute between Canadian Pacific Steamships, Limited, and its Steamship Freight Checkers**

A unanimous report was received by the Minister of Labour at the close of October from the Board of Conciliation and Investigation established on October 3 to deal with a wages dispute between the Canadian Pacific Steamships, Limited, and its steamship freight checkers in Montreal. The personnel of the board was as follows: Mr. Lynn B. Spencer, K.C., of Welland, Ont., chairman, appointed on the joint recommendation of the other board members, Messrs. F. C. Dobell, of Montreal, P.Q., nominated by the company, and W. F. O'Connor, K.C., nominated by the employees. Following is the text of the report:—

#### **Report of Board**

*IN THE MATTER OF the Industrial Disputes Investigation Act and of differences between the Canadian Pacific Steamships Limited and its steamship freight checkers.*

To the Honourable W. A. GORDON,  
Minister of Labour.

The report of the Board of Conciliation and Investigation established in this matter sets forth as follows:—

After examining the statement produced by Canadian Pacific Steamships Limited in support of its application for the establish-

ment of this Board and the reply made thereto on behalf of the employees, together with the memoranda and exhibits submitted by both parties, and considering the facts and circumstances surrounding the difference in question between the employer and employees, the Board respectfully recommends that, for the settlement of the dispute according to the merits and substantial justice of the case, the rates of wages payable to the employees, being the steamship freight checkers employed by Canadian Pacific Steamships Limited, should be reduced by two cents per hour to wit: from forty-five cents per hour for day work and fifty-five cents per hour for night work to forty-three and fifty-three cents per hour respectively, effective as and from six o'clock p.m. this 26th day of October, 1933.

The Board also recommends for the consideration of both parties that an agreement on an annual basis be entered into between the employer and the employees.

The whole respectfully submitted.

(Sgd.) LYNN B. SPENCER,  
Chairman.

(Sgd.) WILLIAM F. O'CONNOR,  
(Sgd.) F. C. DOBELL.

October 26, 1933.

### **Report of Board in Dispute Between Canadian Pacific Railway Company and its Clerks, Freight Handlers, etc.**

The Board of Conciliation and Investigation established on August 28 to deal with a dispute between the Canadian Pacific Railway Company and certain of its employees being clerks, freight handlers and station employees, and subsidiary groups, presented a unanimous report to the Minister of Labour on November 10. The dispute was caused by the company proposing to make a 10 per cent wages deduction in addition to the existing 10 per cent deduction, i.e., a total deduction of 20

per cent from the wages calculated on the basic rates of pay. The employees affected, numbering about 3,000, objected to the further deduction, and application for a board was made by the employer. The personnel of the board which inquired into this dispute was as follows:—Mr. Lynn B. Spencer, K.C., of Welland, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other board members, Messrs. George S. Currie, of Montreal,

and W. F. O'Connor, K.C., of Toronto, nominees of the company and employees, respectively.

The text of the board's report follows:—

### Report of Board

To the Honourable W. A. GORDON, the Minister of Labour, Ottawa, Canada.

IN THE MATTER OF *the Industrial Disputes Investigation Act, and of a dispute between the Canadian Pacific Railway Company on the one hand, Employer; and certain of its employees, on the other hand, being clerks, freight handlers and station employees and (subsidiary groups); freight handlers, West Saint John; sub-foremen and freight checkers, West Saint John, gang foremen, checkers, coopers, sealers and porters, Montreal Wharf; shed clerks, Angus; stores department employees, pursers and freight clerks, B.C. Lake and River Steamers; freight shed and baggage room staffs, Victoria, B.C. coast steamship service; freight shed and baggage room staffs, E. & N. Railway; waterfront freight handlers, Vancouver, stores employees, Victoria, B.C. coast steamship service.*

SIR,—The Board of Conciliation and Investigation established in the above matter and composed of Mr. Lynn B. Spencer, K.C., Welland, Ontario, Chairman; Mr. George S. Currie, Montreal, nominated by the Canadian Pacific Railway Company, and Mr. W. F. O'Connor, K.C., Toronto, Ontario, nominated by the employees, was convened and held formal sessions at the Windsor Hotel in the City of Montreal on the 26th day of September, 1933. After the Railway's case had been presented Mr. F. H. Hall for the Employees asked adjournment to October 10 to enable the employees to prepare their answer. The adjournment was acceded to.

Hearings were resumed on the 10th and continued on the 11th when, at the conclusion of the presentation of the case for the employees, Mr. George Hodge on behalf of the Canadian Pacific Railway Company asked for an adjournment to October 17, which was acceded to.

Hearings were not resumed on the 17th but were adjourned by the Chairman until the 24th of October, when sittings were held.

On the completion of the Company's statement, a further adjournment was granted until October 31, at the request of the men, to give them an opportunity of considering the Company's reply. During the interval the Chairman, having been advised that the running trades had reached an agreement, adjourned the hearing until the second of November at Ottawa, in the hopes that settle-

ment could be arrived at between the parties. The hearing was then resumed on the second of November when both the men and the Company introduced further material and the Board continued its sittings on the third of November to consider its decision. A final decision not having been agreed upon, the Board met again upon the fourth of November. Mr. F. H. Hall, the representative of the Employees, and Mr. George Hodge, the representative of the Company, were again called before the Board and were requested to confer together upon certain matters relative to the dispute regarding which, under circumstances explained to them, it was considered they might be able to reach agreement. The sitting was then adjourned to the eighth of November at Montreal, when the Board, after a conference with the representatives of the Company and the Employees, were able to come to a unanimous decision and respectfully report as follows:—

The Railway Company was represented by Mr. Grant Hall, Vice-President; Mr. George Hodge, Manager of the Department of Personnel; Mr. A. Halkett, General Superintendent, Manitoba; and the Employees by Mr. F. H. Hall, Vice-President of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; Mr. W. A. Rowe, General Chairman, Mr. J. L. Pateman, General Chairman, and Mr. L. E. Oliver.

The dispute in this case is well defined and arose out of the request made to the men to accept a further reduction in compensation by placing in effect another ten per cent deduction, in addition to the present ten per cent deduction, making a total deduction on the pay rolls of twenty per cent from wages calculated on the existing basic rates of pay.

On February 18, 1932, the Company and the Employees entered into an agreement to accept a deduction of ten per cent in their compensation from the 1st of March, 1932, to February 28, 1933. It was a condition of this agreement that,

"If on or after January 15, 1933, business conditions have not so improved as to enable the Railways to terminate the agreement at February 28, 1933, notice to that effect will be given to the representatives of the Employees, upon which the parties to this agreement will confer further and agree to make every reasonable effort to bring the matter to a conclusion before February 28, 1933."

On January 9, 1933, the Company notified the Employees in part as follows—

"It is now apparent that business conditions on and after January 15, 1933, will not have so improved as to enable the Company to terminate on February 28, 1933, the agreement of February 18, 1932, so as to restore the scale of pay in force prior to the agreement.

"Indeed conditions may require a further reduction in compensation or a revision of rates of pay, and in that event of course you will receive due notice in accordance with the terms of our agreement."

On June 12, 1933, the Company notified the General Chairman of the Employees' Committees that—

"The Company intends or desires to put into effect... a further reduction in wages or compensation by placing in effect another ten per cent deduction in addition to the present ten per cent deduction, making a total deduction on the pay rolls of twenty per cent from wages calculated on the existing basic rates of pay."

On July 6 the Company wrote to the representatives of the Employees suggesting a conference. In a letter, dated July 8, the General Chairman representing the Employees, after reviewing the agreement of February 18, 1932, while agreeing to a conference, expressed themselves in part as follows—

"We decline to be parties to any further wage reduction—"

and further contained a request for a restoration, as of July 13, 1933, of the deduction already in effect.

The matter for consideration by the Board is therefore the application of the Railways for a further ten per cent deduction, in addition to the present ten per cent deduction, making a total deduction on the pay rolls of twenty per cent from wages calculated on existing basic rates of pay; and the application of the employees that the ten per cent deduction made effective March 1, 1932, should be restored as of July 13, 1933.

The Board wish to express their appreciation of the thorough and painstaking care with which both parties presented their submissions and desires to express its commendation of the friendly and frank manner in which both the Company and the Employees approached and discussed the subject.

The Company submitted, among other reasons, that their claim for a further ten per cent deduction from the compensation of the Employees was justified by the following:—

1. That, if the conditions under which increases in rates of pay are granted are completely reversed, it is unavoidable that some decrease in compensation should be made effective;

2. That, with decreasing railway earnings and decreasing cost of living index figures in recent years, the ratio of decreases in rates of pay has not been anything like the ratio of increases in rates of pay which accompanied improved railway earnings and increasing living costs in earlier years;

3. That Employees' wages, even with the application of the further ten per cent deduction proposed, will show a percentage of

decrease only slightly more than half the percentage of decrease in the cost of living index figures from the peak in 1920;

4. That the purchasing power of the Employees, even after the further ten per cent deduction, will be more than it was at any time since 1920 following the general changes in wage rates made by mutual agreement;

5. That, in the year 1932 as compared with the year 1916, and notwithstanding a decrease in the amount of service required from the employees of the classes involved, the actual money paid to the Employees increased 62.8 per cent, and the ratio of actual wage payments to operating revenues increased 72.8 per cent, although the Company's Railway Operating Income decreased 5.5 per cent and its rate of return from railway operations on investment in railway property was only 1.723 per cent, a decrease of 69 per cent as compared with 1916;

6. That even after allowing for the application of the further ten per cent deduction as proposed, the "real wage" of the Clerks, Freight Handlers and Station Employees will average 83.4 per cent above their "real wage" rate at the close of 1916;

7. That the purchasing power of the Employees' "real wage" at the present time stands at \$1.25 as compared with \$1 in 1930;

8. That the unfavourable comparative and actual financial position of the Company due to depressed traffic conditions, resulting in the discontinuance of any dividend payments to either its ordinary or preference shareholders, showed the necessity for a reduction in its operating costs;

9. That the twenty per cent deduction from compensation had been in effect from May 1, 1933, for Engineers, Firemen, Conductors, Trainmen and Telegraphers, following proceedings before another Board of Conciliation and Investigation involving both the Canadian National and Canadian Pacific Railways, and that this deduction has now been confirmed by Agreement for a period of six months, with an agreed revision to a deduction of 15 per cent for one year from November 1, 1933;

10. That the rates of pay of the Employees, even with the application of the further ten per cent deduction in compensation, compared most favourably with the rates of pay in effect for similar classes of employees in other industries, Railway Employees in recent years not having received as heavy reductions in their compensation and their rates of pay having been maintained on a higher basis.

The Employees contend:

1. That the figures for 1933 completely change the situation,—

"that Railway traffic, railway revenues, gross and net, the credit of the Canadian Pacific Railway, the general level of business activities, the cost of living and every other factor appealed to by the Management, have now been directly reversed."

2. The Employees contend that with living costs started upwards, wages should not be reduced because of additional burdens that are not taken into consideration in preparing the indices, such as increased taxes and assistance to relatives and friends out of employment, and that under the present abnormal conditions the statistics conceal the true position.

3. That the losses due to part time employment and to demotion on account of forced reductions, have forced the wage levels well below those of 1929, while the demands of Government and of charity have multiplied the responsibilities upon the Employees. The Employees show for five classes of employees in the stores department at Weston shops, Winnipeg, the losses due to part time employment—

Material handlers, whose rates in 1931 were \$99.96 per month, received in 1932 average actual earnings, \$56.00, and for the first four months of 1933, an average of \$34.64.

Store men, with 1931 rates of \$128.52, in 1932 averaged \$70.00, and for the first four months of 1933 averaged \$45.56.

Shippers whose rates in 1931 were \$126.00 per month earned \$79.84 in 1932, and for the first four months of 1933 averaged \$49.03.

Order Book Clerks whose rates in 1932 were \$124.67, averaged \$86.75, and for the first four months of 1933 averaged \$52.71.

Senior storemen whose rates in 1932 were \$123.75, averaged in 1932, \$85.00, and for the first four months of 1933, \$52.35 per month.

It was pointed out that these men in normal times seldom worked every day in the year, but the loss due to part time, which was \$8.00 or \$10.00 a month in 1928, in 1933 was from \$55.00 to \$70.00 per month.

Employees in these types of positions at Vancouver, B.C., had wage losses due to loss of working time. In only one of the five classes cited was more than fifty per cent of the full time worked.

The Employees furnished a summary of earnings of the C.P.R. clerical staff at the Toronto terminal. Six employees have actual earnings above those of 1929, resulting from promotion to a higher rated position. Seventy-three of the total number have been demoted to lower paid positions and suffered wage losses greater than the ten per cent general reduction. Forty-seven are of more than \$10.00 per month, and twenty-eight are of more than \$20.00 per month. Nineteen employees' losses due to demotion have been greater than \$50.00 per

month. These losses are all in addition to the ten per cent cut in 1932.

Similar statistics were given with regard to Winnipeg freight shed employees, Brandon, Medicine Hat, and Lethbridge, Alberta, Alyth Station, Winnipeg Yard Office, Cranbrook, B.C., and Moose Jaw, Sask.

The Company points out in their submission that—

"the Company continues to pay the rates of wages agreed upon as applicable to all positions for the class of work performed. No agreement contemplates the employment of men and the payment of rates of wages of position in which service is not required, and therefore it is quite inconsistent and unreasonable to contend that if upon reduction of staffs, employees exercise their seniority rights to lower rated positions, this constitutes a reason that under the changed conditions agreed rates of pay should not be revised."

It is a term of the agreement between the Company and the employees, inserted at the request of the employees, that seniority shall govern, and employees whose positions are abolished may exercise their seniority rights over junior employees, and so long as this seniority rule prevails there will be conditions existing where in times such as these senior employees exercising their rights will displace juniors, and consequently their wages will be reduced.

Without a proper appreciation of this rule one is shocked to find a man with years of service and with a family to support being paid wages close to the poverty level, but if a man chooses to invoke the rule rather than be out of job, his compensation must be measured not by what he could earn in the position from which he is demoted, but by what the position is worth that he is now filling. In the opinion of this Board these basic rates of pay have been the subject of agreement and, therefore, so far as we are concerned, must be accepted as satisfactory, so that if a clerk takes the position of office boy, the basic rate that applies to office boys must be applied to him and so on through the different classes.

With the basic rates, therefore, before us, and with the cost of living yard-stick applied, we find that according to the undisputed figures submitted, the cost of living, as represented by "the cost of living index figure" published in the LABOUR GAZETTE, shows a greater reduction in percentage than does the deduction requested in pay show from the basic rates of pay. We do, however, believe that these figures do not altogether show the complete picture and that under the exceptional conditions existing there are calls as from friends and relatives that increase the cost of living. However, the cost of living index shows a decrease of more than fifteen

per cent since the time when the basic rates were agreed upon.

We recognize the desirability of maintaining the purchasing power of these employees at as high a level as possible, and the advisability of lifting them out of a minimum subsistence level, but it cannot be said that the imposition of an additional 5 per cent deduction from the agreed rates of pay will be such as to force the employees into that level.

The employees contend that—

"there was some fear that 1933 was to see only a continuation of the downward trend of the depression but later developments have completely changed the situation, railway traffic, railway revenues, gross and net, the credit of the Canadian Pacific Railway, the general level of business activity, the cost of living and every other factor appealed to by the management in its argument have now been directly reversed."
